gather the necessary data to file a meaningful report. A 30-day reporting period was suggested. However, a 30-day delay in the reporting of injuries and illnesses would not permit the Bureau of Mines to gather and maintain a sufficiently current data base. The 10 calendar day reporting requirement allows the operators an opportunity to gather and report the required information to the Bureau and at the same time furnishes the Bureau with current and timely accident, injury, and illness data. The longer reporting period will also reduce the number of follow-up forms required to close out lost-time injury cases and thereby reduce the operators' administrative burden.

In addition, the proposed 5-year record retention requirement for the Metal-Nonmetal Injury and Illness Report, has been reduced to 3 years from the date of occurrence or diagnosis whichever is applicable to coincide with the 3-year retention requirements of the operators' investigation, record, and report of accidents under Subpart C, § 58.23, and the Metal-Nonmetal Quarterly Employment Report, Form 6–1556 or 6–1556–S under Subpart D, § 58.32.

Several comments were received with respect to § 58.32 *Metal-Nonmetal Quarterly Employment Report* and questioning the need for the operator's filing of employment information on a quarterly basis. Annual reporting to the Bureau of Mines of injury and employment data has been accepted for many years. However, the continually increasing need for timely information relating to health and safety in the metal and nonmetallic mineral industries requires collection of the basic data more frequently than once a year. Employment data constitutes an important element in the analysis of the causes of accidents and it is essential that this data be collected frequently enough to provide a current data file. Since monthly reporting would generate a large volume of paper and clerical work and since annual reporting is inadequate to meet the Bureau of Mines needs, it has been determined that quarterly reporting is the most acceptable alternative.

Part 58, Subchapter N, Chapter I, Title 30 of the Code of Federal Regulations is adopted as set forth below.

Effective date. Part 58 shall be effective on and after January 1, 1973.

HOLLIS M. DOLE,
Assistant Secretary of the Interior.

NOVEMBER 8, 1972.

AUTHORITY: The provisions of this Part 58 are issued under section 13 of the Federal Metal and Nonmetallic Mine Safety Act (80 Stat. 782, 30 U.S.C. 732).

Subpart A—Purpose and Definitions

§ 58.1 Purpose.

The provisions of the regulations in this Part 58 apply to all metal and nonmetal mines subject to the provisions of the Federal Metal and Nonmetallic Mine Safety Act (80 Stat. 772, 30 U.S.C. sections 721–740). Under the provisions of the Act, the Secretary of the Interior is authorized to cause investigations to be made for the purpose of obtaining information relating to the causes of accidents involving the loss of life or bodily injury and health and safety conditions in such mines. The purpose of the regulations in this Part 58 is to provide for immediate notice to the Bureau of Mines, Department of the Interior, of the occurrence of certain types of accidents in order to afford the Bureau an opportunity to conduct a prompt investigation, to obtain the operator's report of the occurrence, and to gather current and timely information pertaining to injuries and illnesses.

§ 58.2 Definitions.

As used in this part:

(a) "Metal and nonmetal mine" means: (1) An area of land from which minerals other than coal or lignite are extracted in nonliquid form or if in liquid form, are extracted with workers underground; (2) private ways and roads appurtenant to such area; and (3) land, excavations, underground passageways, and workings, structures, facilities, equipment, machines, tools, or other property, on the surface or underground used in the work of extracting such minerals other than coal or lignite from their natural deposits in nonliquid form or if in liquid form, with workers underground, or used in the milling of such minerals, except that with respect to the protection against radiation hazards such term shall not include property used in the milling of source material as defined in the Atomic Energy Act of 1954, as amended.

(b) "Accident" means: (1) Any injury to or illness of any person, as defined in paragraphs (g), (h), and (j) of this section; (2) any outbreak of fire that endangers human life or a fire underground which is not brought under control within 30 minutes; (3) any unplanned ignition of dust or strata gas; (4) any unplanned explosion of dust or gas; (5) any unplanned inundation by water or gas that endangers human life; (6) any unplanned initiation of explosives, including blasting agents; (7) any entrapment that endangers human life; (8) any damage to shafts and ventilation facilities that endangers human life; and (9) any damage to hoisting or haulage facilities used for the transportation of men when such damage endangers human life.

(c) "Ignition" means: The burning of a flammable mixture of gas or dust without evidence of violence from expansion of gases.

(d) "Explosion" means: The burning of a flammable mixture of gas or dust with evidence of violence from expansion of gases.

(e) "State Agency" means: A State agency responsible for administering a State plan agreement on behalf of a State and throughout the State.

(f) "State Plan Agreement" means: An agreement entered into between the United States of America, and a State pursuant to section 16 of the Federal Metal and Nonmetallic Mine Safety Act.

(g) "Nonfatal injury" means: Any occupational injury other than a fatal injury suffered by any worker which results from a work accident arising out of and in the course of work. A nonfatal injury does not include an injury requiring only first aid treatment.

(h) "Fatal injury" means: Any occupational injury of a person resulting in death regardless of the time intervening between injury and death.

(i) "First aid treatment" means: Any one-time treatment, and any followup visit for the purpose of observation for minor headaches, head colds, flu, virus, scratches, cuts, burns, splinters, and other minor injury or illness, which do not ordinarily require medical care. Such one-time treatment, and followup visit for the purpose of observation, is considered first aid even through provided by a physician or registered professional personnel.

(j) "Illness" means: Any occupational illness, that is, any abnormal condition or disorder, other than one resulting from an occupational injury, caused by exposure to environmental factors associated with employment. It includes acute and chronic illnesses or diseases which may be caused by inhalation, absorption, ingestion, or direct contact, and which fall within the listing under the heading "Occupational Illness" on Forms No. 6–1555 and 6–1555–S. An illness does not include an illness requiring only first aid treatment.

(k) "Subdistrict Manager" means: The Metal and Nonmetal Mine Health and Safety Subdistrict Manager of the Subdistrict Office of the Bureau of Mines of the Subdistrict in which the metal and nonmetal mine is located.

(l) "That endangers human life" means: Danger to the life of any person on mine property which is subject to

Mines of an accident specified in § 58.11 shall relieve the operator of the reporting requirements for an injury prescribed in Subpart D of this part.

XUM V37-220 NOV 14 72 XUM V37

(l) "That endangers human life" means: Danger to the life of any person on mine property which is subject to the Act.

Subpart B—Notification of Accidents

§ 58.10 Scope.

The regulations in this Subpart B provide for the immediate notification to the Bureau of Mines, U.S. Department of the Interior, of the occurrence of any accident described in § 58.11 in order to afford the Bureau the opportunity to conduct a prompt investigation, or to require the operator to investigate the accident and submit a written report as provided in Subpart C of this part.

§ 58.11 Notification by operator.

The operator of a metal and nonmetal mine subject to the Act, using the fastest available means of communication, shall immediately notify the Subdistrict Manager of any of the following accidents that occur at a metal and nonmetal mining operation:

(a) Any injury, excluding illness, which results in death or may reasonably be expected to result in death;

(b) Any outbreak of fire that endangers human life or a fire underground which is not brought under control within 30 minutes;

(c) Any unplanned ignition of dust or strata gas;

(d) Any unplanned explosion of dust or gas;

(e) Any unplanned inundation by water or gas that endangers human life;

(f) Any unplanned initiation of explosives, including blasting agents;

(g) Any entrapment that endangers human life;

(h) Any damage to shafts and ventilation facilities that endangers human life; and

(i) Any damage to hoisting or haulage facilities used for the transportation of men when such damage endangers human life.

§ 58.12 Investigation by Bureau of Mines.

Following any notification received in accordance with § 58.11, the Subdistrict Manager shall determine whether an investigation of the accident will be conducted by the Bureau of Mines. If he determines that such an investigation will be conducted (a) in a State with which a State plan agreement is in effect the Subdistrict Manager shall promptly notify the State agency and the operator or, (b) in a State with which a State plan agreement is not in effect, the Subdistrict Manager shall promptly notify the operator directly, of the approximate date and time of such investigation. If an investigation is to be made by the Bureau of Mines, the operator shall, to the extent compatible with rescue and recovery work, take appropriate measures to preserve anything and everything which might assist an investigator in determining the cause or causes of the accident. Neither the operator's immediate report nor an investigation by the Bureau of Mines of an accident specified in § 58.11 shall relieve the operator of the reporting requirements for an injury prescribed in Subpart D of this part.

Subpart C—Operator's Investigation, Record, and Report of Accidents

§ 58.20 Scope.

The Secretary of the Interior or his duly authorized representative may require a detailed investigation and written report of an accident specified in § 58.11. The operator's investigation shall develop sufficient information to determine the cause of the accident and to describe all facts which contributed to or resulted in the accident. The regulations in this Subpart C prescribe the nature and the extent of the information to be included in such records, and the period and manner in which report of accidents shall be recorded and submitted to the Bureau of Mines.

§ 58.21 Investigations required by operators.

Following the occurrence of an accident specified in § 58.11, and if required, an operator shall be notified by the subdistrict manager of the requirement to submit a detailed written report of the accident as soon as practicable to the Bureau of Mines. The operator shall conduct an investigation and, on completion of the investigation, the operator shall submit a written report to the subdistrict manager. If the metal and nonmetal mine is located in a State where a State plan agreement is in effect, the operator shall upon request by the State agency, submit a copy of the written report to the State agency.

§ 58.22 Written record.

(a) The operator's written record of his investigation of an accident shall contain:

(1) The Bureau of Mines mine identification number;

(2) The date and hour on which the accident occurred;

(3) The date and hour the investigation was started;

(4) The name of the person, or persons, who made the investigation;

(5) The name, occupation at the time of the accident, and pertinent occupational experience for each person who received injury, together with the type of each injury incurred;

(6) A narrative description of the accident, including all pertinent events prior to, during, and after the accident; all relevant facts, such as dimension and clearance measurements; manufacturer, model, and type of equipment or machinery involved; in general terms the noise level, visibility, and lighting environment; and identifiable human behavior factors contributing to the accident; and any other factor believed to have related or contributed to the accident;

(7) A diagram of the location of the accident; and

(8) The operator shall attach to his written detailed investigation report, a description of steps taken, or to be taken in the future, along with a reasonable timetable for execution, so that the possibility of recurrence of that type of accident may be eliminated.

(b) A written report submitted by the operator under this Subpart C, which includes an injury, does not relieve the operator from the injury reporting requirements prescribed in Subpart D of this part.

§ 58.23 Maintenance of records.

The operator's written records of investigations of accidents required by this Subpart C, or a true legible facsimile thereof (microfilm or other) shall be maintained at the metal and nonmetal mine or nearest mine office for a period of 3 years from the date of the accident. These records shall be open for inspection by the Secretary of the Interior and his duly authorized representatives, authorized representatives of the official mine inspection agency of the State in which the mine is located, representatives of the mine workers, and the worker who is the subject of the report or his legal representative.

Subpart D—Operator's Reports to the Bureau of Mines

§ 58.30 Scope.

The regulations in this Subpart D prescribe records of injuries and illnesses to be maintained by all operators of metal and nonmetal mines, the time and manner in which required information is to be reported to the Bureau of Mines, and the availability of such records to inspection.

§ 58.31 Metal-nonmetal injury and illness report.

(a) The operator of a metal or nonmetal mine shall maintain at the mine a Metal-Nonmetal Injury and Illness Report (Form 6–1555 or 6–1555–S, whichever is applicable) on which there shall be entered and recorded specified information with respect to each injury by date of occurrence, and each illness by date of diagnosis or occurrence. The Metal-Nonmetal Injury and Illness Report is organized to facilitate the recording and compilation of information for each occurrence. The operator's copy (white) or a true legible facsimile thereof (microfilm or other) shall be maintained at the mine or nearest mine office for a period of 3 years from the date of occurrence or diagnosis, whichever is applicable, and shall be open for inspection by the Secretary of the Interior and his duly authorized representatives, authorized representatives of the official mine inspection agency of the State in which the mine is located, representatives of the mine workers, and the worker who is the subject of the report or his legal representative.

(b) For metal and nonmetal lines located in States in which a State plan agreement is not in effect, the Metal-Nonmetal Injury and Illness Report (Form 6–1555) shall consist of a set of

three forms: An original (white) operator's copy and two carbon copies (one yellow and one blue), which shall be maintained, filled in, and disposed of in accordance with the provisions of this Subpart D.

(c) For metal and nonmetal mines located in States in which a State plan agreement is in effect, the Metal-Nonmetal Injury and Illness Report (Form 6–1555–S) shall consist of a set of five forms, an original (white) operator's copy, and four carbon copies (two yellow and two blue) which shall be maintained, filled in, and disposed of in accordance with the provisions of this Subpart D.

(d) The operator shall maintain at the metal and nonmetal mine, a supply of the Metal-Nonmetal Injury and Illness Report Forms (Form 6–1555 or 6–1555–S). Promptly after an injury occurs, or an illness occurs or is diagnosed, a responsible supervisor or individual of the mine where the injury occurred shall fill out one set of forms for each injury or illness. Where more than one person is injured, or is afflicted simultaneously with the same illness, a separate and additional set of forms shall be used and completed for each person injured or afflicted.

(e) Metal-Nonmetal Injury and Illness Reports shall be retained, completed and information recorded, disposed of and distributed and mailed to the Bureau of Mines as follows:

(1) Promptly after the occurrence of an injury or an illness occurs or is diagnosed. the operator shall record the information required, and upon completion of the recording of the information shall retain the original (white) copy for the operator's records.

(2) The operator shall retain the yellow and blue copies for a period of time not to exceed 10 calendar days after the occurrence of the injury or illness, or diagnosis of an illness. Depending upon whether the person affected does, or does not return to work within the period of 10 calendar days, the operator shall proceed in accordance with subparagraphs (3) and (5) of this paragraph.

(3) If the injured or ill person returns to his regular job at full capacity within 10 calendar days following an injury, or occurrence or diagnosis of an illness, the operator shall enter the "Total number of lost workdays," the "Number lost from regular job," the "Date returned to work," and other relevant data on the white and yellow copies and promptly mail the yellow Federal-copy to the Bureau of Mines and may discard the blue Federal-copy.

(4) Operators in States in which State plan agreements are in effect shall proceed as in subparagraph (3) of this paragraph except that the operator shall mail the yellow State-copy to the State agency and discard the blue State-copy

(5) If the injured or ill person has not returned to his regular job within 10 calendar days following an injury, or occurrence or diagnosis of an illness, the operator shall leave blank the spaces designated "Total number of lost workdays," "Number lost from regular job," "Date returned to work," and also those spaces for other relevant but unknown data or information, and promptly upon the expiration of the period of 10 calendar days the operator shall mail the yellow Federal-copy to the bureau of Mines. Thereafter, when the person returns to his regular job, the operator shall enter the total number of lost workdays, the number of days lost from regular job, the date the person returned to work, and complete and record all other relevant data or information in the spaces provided on the white and blue copies, and mail the blue Federal-copy to the Bureau of Mines.

(6) Operators in States in which State plan agreements are in effect shall proceed as in subparagraph (5) of this paragraph except that at the appropriate times, the operator shall mail the yellow State-copy and the blue State-copy to the State agency, and the yellow Federal-copy and the blue Federal-copy to the Bureau of Mines.

§ 58.32 Metal-Nonmetal Quarterly Employment Report.

(a) On or before the 15th day of the first month following the end of each calendar quarter; that is, April 15, July 15, October 15, and January 15, the operator of a metal and nonmetal mine in which one or more men have worked during any day of a calendar quarter shall file with the Bureau of Mines a Metal-Nonmetal Quarterly Employment Report (Form 6–1556 or 6–1556–S, whichever is applicable). The Metal-Nonmetal Quarterly Employment Report shall be submitted to the Bureau of Mines by all metal and nonmetal mine operators for each quarter, or portion thereof, in which the mine is in operation even though the metal and nonmetal mine may be idle for all or a portion of the quarter. If an operator permanently closes or abandons the mine, the operator shall immediately notify the Bureau of Mines of the last day of operation and no report will be required from a metal and nonmetal mine which has been permanently closed or abandoned, except for the portion of a quarter during which the mine may have been in operation.

(b) For metal and nonmetal mines located in States in which a State plan agreement is not in effect, the operator shall use Form 6–1556 and retain the original and file the copy with the Bureau of Mines.

(c) For metal and nonmetal mines located in States in which State plan agreements are in effect, the operator shall use Form 6–1556–S and retain the original and file the Federal-copy with the Bureau of Mines and the State-copy with the appropriate State Agency.

(d) The operator's original of Form 6–1556 or 6–1556–S or a true legible facsimile thereof (microfilm or other) shall be maintained at the metal and nonmetal mine or nearest mine office for a period of 3 years from the date of filing.

§ 58.33 Place to file reports; initial supply; additional forms.

Unless otherwise provided, all reports required by this Subpart D to be submitted (a) to the State agency in States with State plan agreements in effect, shall be filed with the appropriate State agency, and (b) to the Bureau of Mines shall be filed with the U.S. Bureau of Mines, Health and Safety Analysis Center, Building 20, Denver Federal Center, Denver, Colo. 80225. An initial supply of the Metal-Nonmetal Mine Injury and Illness Report and the Metal-Nonmetal Quarterly Employment Report and preaddressed envelopes for the Bureau of Mines forms will be mailed to each operator. Additional report forms and envelopes may be obtained as needed, upon request, from the Metal and Nonmetal Mine Health and Safety District and Subdistrict Office of the Bureau of Mines of the District or Subdistrict in which the mine is located.

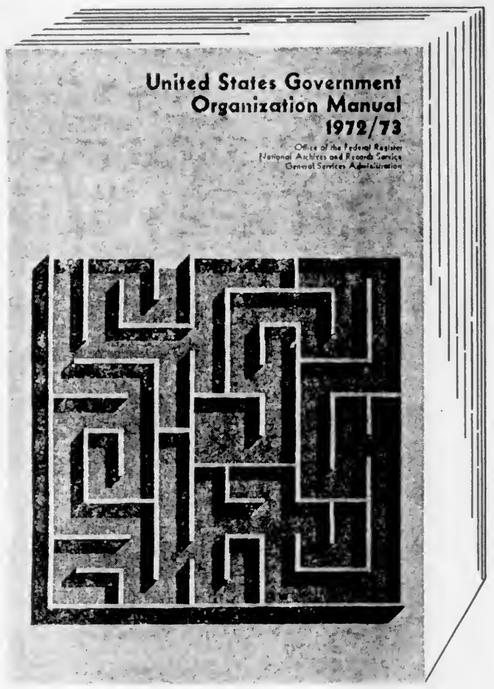
An Invaluable Reference Tool



1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1972, and specifies how they are affected.

Title 12—BANKS AND BANKING

Chapter I—Bureau of the Comptroller of the Currency, Department of the Treasury

PART 9—FIDUCIARY POWERS OF NATIONAL BANKS AND COLLECTIVE INVESTMENT FUNDS

Miscellaneous Amendments

This amendment is issued pursuant to the authority contained in section 1(j) of Public Law 87–722, 76 Stat. 668, 12 U.S.C. 92a. Notice of the proposed amendment of Part 9 was published in the FEDERAL REGISTER on September 9, 1971 (36 F.R. 18082). A number of comments were received following publication and have been carefully considered

This amendment differs from the published proposed amendment in that it reflects comments received and includes only part of the proposals which were published for comment. The remaining proposals are receiving further consideration.

Since this amendment reflects changes that do not impose substantial new requirements for which further notice would be necessary and desirable, delayed effectiveness is unnecessary and contrary to the public interest. Accordingly, this amendment will become effective upon publication (11–15–72).

Part 9, Chapter 1, Title 12 of the Code of Federal Regulations is amended as follows:

1. Section 9.1 by revising paragraphs (c), (g), and (i);
2. Section 9.2 by revising paragraphs (a) and (c);
3. Section 9.7 by revising paragraph (d);
4. Section 9.11 by revising paragraph (d);
5. Section 9.12 by adding a new subparagraph (4) to paragraph (b);
6. Section 9.13 by revising paragraph (a); and
7. Section 9.18 is revised.

Changes in the text are as follows:

§ 9.1 Definitions.

* * * * *

(c) "Fiduciary powers" means the power to act in any fiduciary capacity authorized by the Act of September 28, 1962, 76 Stat. 668, 12 U.S.C. 92a. Under that Act, a national bank may be authorized to act, when not in contravention of local law, as trustee, executor, administrator, registrar of stocks and bonds, guardian of estates, assignee, receiver, committee of estates of lunatics, or in any other fiduciary capacity which State banks, trust companies, or other corporations which come into competition with the national bank may exercise under local law;

* * * * *

(g) "Managing agent" means the fiduciary relationship assumed by a bank upon the creation of an account which names the bank as agent and confers investment discretion upon the bank;

* * * * *

(i) "Trust department" means that group or groups of officers and employees of a bank organized under the supervision of officers or employees to whom are designated by the board of directors the performance of the fiduciary responsibilities of the bank, whether or not the group or groups are so named.

§ 9.2 Applications.

(a) A national bank desiring to exercise fiduciary powers shall apply to the Comptroller of the Currency for a special permit to exercise such powers. Such application shall be made on Form CC–7510–01 (formerly TA–1).

* * * * *

(c) Each application made under the provisions of this section shall be executed and forwarded in duplicate, to gether with duplicate copies of documents containing any information submitted with the application, to the Regional Administrator of National Banks of the Region in which the applying bank is located.

§ 9.7 Administration of fiduciary powers.

* * * * *

(d) The trust department may utilize personnel and facilities of other departments of the bank, and other departments of the bank may utilize the personnel and facilities of the trust department only to the extent not prohibited by law.

§ 9.11 Investment of funds held as fiduciary.

* * * * *

(d) As a part of each examination of the trust department of a national bank and as provided by the Comptroller's Manual for Representatives in Trusts, the Comptroller of the Currency will examine the investments held by such bank as fiduciary, including the investment of funds under the provisions of § 9.18, in order to determine whether such investments are in accordance with law, this regulation and sound fiduciary principles.

§ 9.12 Self-dealing.

* * * * *

(b) * * *

(3) As is provided in § 9.18(b)(8)(ii);

(4) Where required by the Comptroller of the Currency.

* * * * *

§ 9.13 Custody of investments.

(a) The investments of each account shall be kept separate from the assets of the bank, and shall be placed in the joint custody or control of not less than two of the officers or employees of the bank designated for that purpose by the board of directors of the bank or by one or more officers designated by the board of directors of the bank; and all such officers and employees shall be adequately bonded. To the extent permitted by law, a national bank may permit the investments of a fiduciary account to be deposited elsewhere.

* * * * *

§ 9.18 Collective investment.

(a) Where not in contravention of local law, funds held by a national bank as fiduciary may be invested collectively:

(1) In a common trust fund maintained by the bank exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank in its capacity as trustee, executor, administrator, or guardian.

(2) In a fund consisting solely of assets of retirement, pension, profit sharing, stock bonus or other trusts which are exempt from Federal income taxation under the Internal Revenue Code.

(b) Collective investments of funds or other property by national banks under paragraph (a) of this section (referred to in this paragraph as "collective investment funds") shall be administered as follows:

(1) Each collective investment fund shall be established and maintained in accordance with a written plan (referred to herein as the Plan) which shall be approved by a resolution of the bank's board of directors and filed with the Comptroller of the Currency. The Plan shall contain appropriate provisions not inconsistent with the rules and regulations of the Comptroller of the Currency as to the manner in which the fund is to be operated, including provisions relating to the investment powers and a general statement of the investment policy of the bank with respect to the fund; the allocation of income, profits and losses; the terms and conditions governing the admission or withdrawal of participations in the fund; the auditing of accounts of the bank with respect to the fund; the basis and method of valuing assets in the fund, setting forth specific criteria for each type of asset; the minimum frequency for valuation of assets of the fund; the period following each such valuation date during which the valuation may be made (which period in usual circumstances should not exceed 10 business days); the basis upon which the fund may be terminated; and such other matters as may be necessary to define clearly the rights of participants in the fund. A copy of the Plan shall be

available at the principal office of the bank for inspection during all banking hours, and upon request a copy of the Plan shall be furnished to any person.

(2) Property held by a bank in its capacity as trustee of retirement, pension, profit sharing, stock bonus, or other trusts which are exempt from Federal income taxation under any provisions of the Internal Revenue Code may be invested in collective investment funds established under the provisions of subparagraph (1) or (2) of paragraph (a) of this section, subject to the provisions herein contained pertaining to such funds, and may qualify for tax exemption pursuant to section 584 of the Internal Revenue Code. Assets of retirement, pension, profit sharing, stock bonus, or other trusts which are exempt from Federal income taxation by reason of being described in section 401 of the Code may be invested in collective investment funds established under the provisions of subparagraph (2) of paragraph (a) of this section if the fund qualifies for tax exemption under Revenue Ruling 56–267, and following rulings.

(3) All participants in the collective investment fund shall be on the basis of a proportionate interest in all of the assets. In order to determine whether the investment of funds received or held by a bank as fiduciary in a participation in a collective investment fund is proper, the bank may consider the collective investment fund as a whole and shall not, for example, be prohibited from making such investment because any particular asset is nonincome producing.

(4) Not less frequently than once during each period of 3 months a bank administering a collective investment fund shall determine the value of the assets in the fund as of the date set for the valuation of assets. No participation shall be admitted to or withdrawn from the fund except (i) on the basis of such valuation and (ii) as of such valuation date. No participation shall be admitted to or withdrawn from the fund unless a written request for or notice of intention of taking such action shall have been entered on or before the valuation date in the fiduciary records of the bank and approved in such manner as the board of directors shall prescribe. No requests or notice may be canceled or countermanded after the valuation date.

(5) (i) A bank administering a collective investment fund shall at least once during each period of 12 months cause an adequate audit to be made of the collective investment fund by auditors responsible only to the board of directors of the bank. In the event such audit is performed by independent public accountants, the reasonable expenses of such audit may be charged to the collective investment fund.

(ii) A bank administering a collective investment fund shall at least once during each period of 12 months prepare a financial report of the fund which shall be filed with the Comptroller of the Currency within 90 days after the end of the fund's fiscal year. This report, based upon the above audit, shall contain a list of investments in the fund showing the cost and current market value of each investment; a statement for the period since the previous report showing purchases, with cost; sales, with profit or loss and any other investment changes; income and disbursements; and an appropriate notation as to any investments in default.

(iii) The financial report may include a description of the fund's value on previous dates, as well as its income and disbursements during previous accounting periods. No predictions or representations as to future results may be made. In addition, as to funds described in subparagraph (1) of paragraph (a) of this section, neither the report nor any other publication of the bank shall make reference to the performance of funds other than those administered by the bank.

(iv) A copy of the financial report shall be furnished, or notice shall be given that a copy of such report is available and will be furnished without charge upon request, to each person to whom a regular periodic accounting would ordinarily be rendered with respect to each participating account. A copy of such financial report may be furnished to prospective customers. The cost of printing and distribution of these reports shall be borne by the bank. In addition, a copy of the report shall be furnished upon request to any person for a reasonable charge. The fact of the availability of the report for any fund described in subparagraph (1) of paragraph (a) of this section may be given publicity solely in connection with the promotion of the fiduciary services of the bank.

(v) Except as herein provided, the bank shall not advertise or publicize its collective investment fund(s) described in subparagraph (1) of paragraph (a) of this section.

(6) When participations are withdrawn from a collective investment fund, distributions may be made in cash or ratably in kind, or partly in cash and partly in kind, provided that all distributions as of any one valuation date shall be made on the same basis.

(7) If for any reason an investment is withdrawn in kind from a collective investment fund for the benefit of all participants in the fund at the time of such withdrawal and such investment is not distributed ratably in kind, it shall be segregated and administered or realized upon for the benefit ratably of all participants in the collective investment fund at the time of withdrawal.

(8) (i) No bank shall have any interest in a collective investment fund other than in its fiduciary capacity. Except for temporary net cash overdrafts or as otherwise specifically provided herein, it may not lend money to a fund, sell property to, or purchase property from a fund. No assets of a collective investment fund may be invested in stock or obligations, including time or savings deposits, of the bank or any of its affiliates: *Provided*, That such deposits may be made of funds awaiting investment or distribution. Subject to all other provisions of this part, funds held by a bank as fiduciary for its own employees may be invested in a collective investment fund. A bank may not make any loan on the security of a participation in a fund. If because of a creditor relationship or otherwise the bank acquires an interest in a participation in a fund, the participation shall be withdrawn on the first date on which such withdrawal can be effected. However, in no case shall an unsecured advance until the time of the next valuation date to an account holding a participation be deemed to constitute the acquisition of an interest by the bank.

(ii) Any bank administering a collective investment fund may purchase for its own account from such fund any defaulted fixed income investment held by such fund, if in the judgment of the board of directors the cost of segregation of such investment would be greater than the difference between its market value and its principal amount plus interest and penalty charges due. If the bank elects to so purchase such investment, it must do so at its market value or at the sum of cost, accrued unpaid interest, and penalty charges, whichever is greater.

(9) Except in the case of collective investment funds described in paragraph (a)(2) of this section:

(i) No funds or other property shall be invested in a participation in a collective investment fund if as a result of such investment the participant would have an interest aggregating in excess of 10 percent of the then market value of the fund: *Provided*, That in applying this limitation if two or more accounts are created by the same person or persons and as much as one-half of the income or principal of each account is payable or applicable to the use of the same person or persons, such accounts shall be considered as one;

(ii) No investment for a collective investment fund shall be made in stocks, bonds, or other obligations of any one person, firm, or corporation if as a result of such investment the total amount invested in stocks, bonds, or other obligations issued or guaranteed by such person, firm or corporation would aggregate in excess of 10 percent of the then market value of the fund: *Provided*, That this limitation shall not apply to investments in direct obligations of the United States or other obligations fully guaranteed by the United States as to principal and interest;

(iii) Any bank administering a collective investment fund shall have the responsibility of maintaining in cash and readily marketable investments such part of the assets of the fund as shall be deemed to be necessary to provide adequately for the needs of participants and to prevent inequities between such participants, and if prior to any admissions to or withdrawals from a fund the bank shall determine that after effecting the admissions and withdrawals which are

to be made less than 40 percent of the value of the remaining assets of the collective investment fund would be composed of cash and readily marketable investments, no admissions to or withdrawals from the fund shall be permitted as of the valuation date upon which such determination is made: *Provided*, That ratable distribution upon all participations shall not be so prohibited in any case.

(10) The reasonable expenses incurred in servicing mortgages held by a collective investment fund may be charged against the income account of the fund and paid to servicing agents, including the bank administering the fund.

(11) (i) A bank may (but shall not be required to) transfer up to 5 percent of the net income derived by a collective investment fund from mortgages held by such fund during any regular accounting period to a reserve account: *Provided*, That no such transfers shall be made which would cause the amount in such account to exceed 1 percent of the outstanding principal amount of all mortgages held in the fund. The amount of such reserve account, if established, shall be deducted from the assets of the fund in determining the fair market value of the fund for the purposes of admissions and withdrawals.

(ii) At the end of each accounting period, all interest payments which are due but unpaid with respect to mortgages in the fund shall be charged against such reserve account to the extent available and credited to income distributed to participants. In the event of subsequent recovery of such interest payments by the fund, the reserve account shall be credited with the amount so recovered.

(12) A national bank administering a collective investment fund shall have the exclusive management thereof. The bank may charge a fee for the management of the collective investment fund provided that the fractional part of such fee proportionate to the interest of each participant shall not, when added to any other compensations charged by a bank to a participant, exceed the total amount of compensations which would have been charged to said participant if no assets of said participant had been invested in participations in the fund. The bank shall absorb the costs of establishing or reorganizing a collective investment fund.

(13) No bank administering a collective investment fund shall issue any certificate or other document evidencing a direct or indirect interest in such fund in any form.

(14) No mistake made in good faith and in the exercise of due care in connection with the administration of a collective investment fund shall be deemed to be a violation of this part if promptly after the discovery of the mistake the bank takes whatever action may be practicable in the circumstances to remedy the mistake.

(c) In addition to the investments permitted under paragraph (a) of this section, funds or other property received or held by a national bank as fiduciary may be invested collectively, to the extent not prohibited by local law, as follows:

(1) In shares of a mutual trust investment company, organized and operated pursuant to a statute that specifically authorizes the organization of such companies exclusively for the investment of funds held by corporate fiduciaries, commonly referred to as a "bank fiduciary fund."

(2) In a single real estate loan, a direct obligation of the United States, or an obligation fully guaranteed by the United States, or in a single fixed amount security, obligation or other property, either real, personal or mixed, of a single issuer: *Provided*, That the bank owns no participation in the loan or obligation and has no interest in any investment therein except in its capacity as fiduciary.

(3) In a common trust fund maintained by the bank for the collective investment of cash balances received or held by a bank in its capacity as trustee, executor, administrator, or guardian, which the bank considers to be individually too small to be invested separately to advantage. The total investment for such fund must not exceed $100,000; the number of participating accounts is limited to 100, and no participating account may have an interest in the fund in excess of $10,000: *Provided*, That in applying these limitations if two or more accounts are created by the same person or persons and as much as one-half of the income or principal of each account is presently payable or applicable to the use of the same person or persons, such account shall be considered as one; and *Provided*, That no fund shall be established or operated under this subparagraph for the purpose of avoiding the provisions of paragraph (b) of this section.

(4) In any investment specifically authorized by court order, or authorized by the instrument creating the fiduciary relationship, in the case of trusts created by a corporation, its subsidiaries and affiliates or by several individual settlors who are closely related: *Provided*, That such investment is not made under this subparagraph for the purpose of avoiding the provisions of paragraph (b) of this section.

(5) In such other manner as shall be approved in writing by the Comptroller of the Currency.

Dated: November 10, 1972.

[SEAL] WILLIAM B. CAMP,
Comptroller of the Currency.

[FR Doc.72-19634 Filed 11-14-72;8:52 am]

Chapter V—Federal Home Loan Bank Board

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

[No. 72-1308]

PART 564—SETTLEMENT OF INSURANCE

Updating of Examples of Insurance Coverage

NOVEMBER 8, 1972.

The Federal Home Loan Bank Board considers it advisable to amend Part 564 of the Rules and Regulations for Insurance of Accounts (12 CFR Part 564) for the purpose of clarifying certain of the Examples of Insurance Coverage Afforded Accounts in Institutions Insured by the Federal Savings and Loan Insurance Corporation, published as an appendix to said Part 564. Accordingly, on the basis of such consideration and for such purpose, the Federal Home Loan Bank Board hereby amends said Part 564 by revising Examples 8 and 10 of section E *Public unit accounts* and Examples 4 and 7 of section G *Trust accounts* contained in the appendix thereto to read as set forth below.

(Secs. 401, 402, 403, 405, 48 Stat. 1255, 1256, 1257, 1259, as amended; 12 U.S.C. 1724, 1725, 1726, 1728. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1943–1948, Comp., p. 1071)

By the Federal Home Loan Bank Board.

[SEAL] JACK CARTER,
Secretary.

APPENDIX—EXAMPLES OF INSURANCE COVERAGE AFFORDED ACCOUNTS IN INSTITUTIONS INSURED BY THE FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

• • • • • •

E. Public unit accounts. • • •

EXAMPLE 8

Question: A city treasurer deposits in an insured institution $20,000 in each of the following accounts:

"General Operating Fund."
"Police Department."
"Fire Department."
"Parks Department—Maintenance."

What is the insurance coverage?

Answer: The "Police Department" and "Fire Department" accounts would each be separately insured to $20,000 if the funds in each such account have been allocated by law for the exclusive use of a separate city department or subdivision expressly authorized by State statute.

It is assumed that the Parks Department was not created under express authorization of State statute. If funds in the "Parks Department" account are expended only by order of the city treasurer, then they are added to the funds in the "General Operating Fund" account and are insured only to $20,000 (§§ 561.5a, 564.8(a)).

FEDERAL REGISTER, VOL. 37, NO. 221—WEDNESDAY, NOVEMBER 15, 1972

XUM

V37-221 NOV 15 72 XUM

EXAMPLE 10

Question: A city treasurer deposits $20,000 in each of the following accounts:

"Local Improvement District."
"General Operating Fund."
"Equipment Rental Fund."
"Department of Public Welfare."
"Bureau of Weights and Measures' (subordinate agency of "Department of Public Welfare").

What is the insurance coverage?

Answer: The "Department of Public Welfare" and the "Local Improvement District" accounts would each be separately insured to $20,000 if the funds in each such account have been allocated by law for the exclusive use of a separate city department or subdivision expressly authorized by State law. In applying the $20,000 limit to the "Department of Public Welfare" account, those funds allocated to the "Bureau of Weights and Measures" would be added to the DPW account since the Bureau is a subordinate agency of the Department. The "Equipment Rental" and "General Operating" accounts, held for citywide use, would be added together and separately insured to $20,000 (§§ 561.5a, 564.8(a)).

* * * * * *

G. Trust accounts. * * *

EXAMPLE 4

Question: An account in the amount of $40,000 is held pursuant to an irrevocable trust for the benefit of A and her sister B. Under the terms of the trust instrument, A is to receive the income for life and B is to receive the remainder at A's death. At the time of default, A is 70 years of age. What is the insurance coverage?

Answer: The proportionate value of A's life estate can be determined by the use of the present worth tables found at 26 CFR 20.2031-10. To ascertain A's beneficial interest in the account, the appropriate multiplier (0.47540) indicated by Table A(2) is multiplied by the amount in the account. A's interest is found to be $19,016. The difference of $20,984 represents B's beneficial interest in the account. The trustee is entitled to an insurance payment of $39,016, representing A's complete interest ($19,016) and $20,000 of B's interest (§§ 564.2(c)(1) and 564.10).

* * * * * *

EXAMPLE 7

Question: G is settlor of a short-term irrevocable trust for the benefit of H university. Under the terms of the trust instrument, the university is to receive all of the income (payable annually) for 2 years. At the end of the 2-year period, the trust is to terminate, and the corpus is to revert to G. The trustee invests $30,000 in a trust account. At the date of default, 1 year of the 2-year term of the trust has expired. What is the insurance coverage?

Although this arrangement constitutes an express irrevocable trust, G's reversionary interest is treated, for insurance purposes, as an individual account owned by him. (§ 561.-4) To ascertain the value of H university's remaining 1-year income interest in the trust account, the appropriate multiplier (0.05660) indicated by Table B of the present worth tables is multiplied by the account balance. H university's trust estate in the account is $1,698. G's reversionary interest is worth $28,302. Assuming that G has no individual interest in any other account, the trustee is entitled to an insurance payment of $21,698, representing H university's entire trust estate in the account ($1,698) and $20,000 of G's reversionary interest (§§ 564.-2(c)(1) and 564.10).

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Docket No. 72-SO-112; Amdt. No. 39-1557]

PART 39—AIRWORTHINESS DIRECTIVES

Piper Models PA-28 and PA-25 Series Airplanes

There have been reports of the engine failing to develop power after a rapid throttle advance from low-power operation to high-power operation on certain Piper PA-28 series airplanes. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require the installation of a placard to warn against abrupt throttle operation until such time as an appropriate design change can be effected. Since certain PA-25 series airplanes have the same basic powerplant, this airworthiness directive is being made applicable to the PA-25 (150 hp.).

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator, 31 F.R. 13697, § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

PIPER: Applies to Models PA-28-140, PA-28-150, PA-28-160, PA-28-S-160, and PA-25 (150 hp.) airplanes, equipped with Lycoming O-320 engines and Marvel Schebler carburetors Model MA-4SPA, Part No. 10-3678-32 certificated in all categories.

Compliance required within the next 10-hours' time in service after the effective date of this airworthiness directive, unless already accomplished.

To prevent power interruption as a result of abrupt throttle movement, accomplish the following:

(a) Attach the following operating limitation placard to the instrument panel near the throttle control in full view of the pilot using one-eighth inch minimum size type: "Do Not Open the Throttle Rapidly. (Idle to Full Throttle in 2-Seconds Minimum.)" The placard may be fabricated by the owner/operator.

This amendment becomes effective November 17, 1972.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on November 3, 1972.

DUANE W. FREER,
Acting Director, Southern Region.

Chapter II—Civil Aeronautics Board

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER-774; Amdt. 207-7]

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

Facilitation of Enforcement of Charter Regulations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

By notice of proposed rule making EDR-223,[1] the Board proposed amendments to Parts 207, 208, 212, 214, and 249 of its Economic Regulations (14 CFR Parts 207, 208, 212, 214, and 249) which were intended to: (1) alleviate the problem of pro rata charter passengers being "stranded" abroad, and (2) facilitate general enforcement of the Board's pro rata charter regulations, including provisions having particular reference to foreign air carriers.

The proposed amendments directed toward general enforcement would, in brief, require that: (1) all passenger lists include telephone numbers; (2) the carrier verify the identity of all enplaning pro rata charter participants; (3) foreign air carriers performing pro rata charter flights departing from the United States file passenger lists with the Board's Bureau of Enforcement at least 20 days prior to the charter flight departure date; and (4) in the case of a charter flight which is the return leg of a charter trip originating in a foreign country, the foreign carrier file, at least 20 days in advance of the flight from the United States, the names, U.S. addresses, and U.S. telephone numbers of the passengers transported on the inbound flight.

Comments in response to the notice of proposed rulemaking were submitted by Air Canada, Aerlinte Eireann Teoranta, Alitalia, certain trunkline carriers, jointly[2] the American Society of Travel Agents, Britannia Airways, British Caledonian Airways, Consortium International (Consortium), Davis Agency, El Al Israel Airlines, Iberia Lineas Aereas de Espana, Japan Air Lines (JAL), KLM Royal Dutch Airlines, Laker Airways, Linea Aerea Nacional-Chile, Luftverkehrsunternehmen Atlantis (Atlantis), the Ambassador of the Netherlands, North Central Airlines, Pan American World Airways, SABENA Belgian World Airlines, Swissair, Trans International Airlines (TIA), Transavia, Viacao Aerea Rio-Grandense (Varig), Windward Island Airways International, and World Airways (World).

On May 31, 1972 the Board adopted,[3] with certain modifications, the proposed amendments directed toward the stranding problem, but deferred action upon the general enforcement proposals. This procedure was adopted because the comments filed in response to the notice

[1] Dated March 17, 1972, 37 F.R. 5826 (Docket 24329).

[2] American, Braniff, Delta, Eastern, National, Northwest, Pan American, TWA, United, and Western.

[3] ER-740, ER-741, ER-742, and ER-743. 37 F.R. 11235.

raised a number of issues with regard to the general enforcement proposals which warranted further consideration by the Board, and we were of the view that consideration of these issues should not impede adoption of a rule on stranding.

We have now determined to adopt in part, certain of the general enforcement proposals, with the modifications discussed hereinbelow. Each of the specific features of the various proposed amendments, and our conclusions with respect thereto in light of the comments, will be discussed.

1. *Proposed amendments applicable to United States and foreign air carriers*—a. *Inclusion of telephone numbers in passenger lists.* The present charter regulations require that the charterer submit a list of the passengers' names and addresses prior to the departure of a flight.[4] We proposed to amend this requirement so as to provide that the passenger lists must also include the passengers' telephone numbers.

Consortium, TIA, and World argue that this requirement would be unworkable.[5] Consortium and TIA contend that many pro rata charter travelers are students, who may not remain at the telephone numbers which they supply. TIA adds that the Board has not shown how the inclusion of passengers' telephone numbers will aid the enforcement of the Board's pro rata charter regulations; this being so, says TIA, the direct air carriers should not be burdened by the requirement. World says that it has been trying for some time to obtain telephone numbers on the passenger lists, and that its efforts have met with little success because charterers do not have the personnel to cope with this burden.

We have determined to adopt the requirement that passenger lists include telephone numbers.[6] The purpose of the requirement is to facilitate the use of telephones by the Board's enforcement officials in directing inquiries to passengers concerning their participation in a particular charter flight. The argument that this is an ineffective investigative tool because many passengers are students, who change their telephone numbers frequently, is not persuasive. After all, passengers' addresses may also be changed no less frequently than their telephone numbers, yet the existing requirement that passenger lists include addresses has been useful to the Board. Nor do we believe it to be unduly burdensome upon either the carrier or the charterer to require that passenger lists include telephone numbers as well as addresses.

b. *Identification of enplaning persons.* It was proposed to require that the carrier verify the identity of enplaning charter participants, noting the source of the verification on the passenger lists, with passports to be used for this purpose on international flights.

Atlantis and World argue that such a requirement would unduly delay the passenger check-in procedure, and World suggests as an alternative that the carrier merely be required to note on the list, next to a passenger's name, that some form of identification was checked. JAL says that foreign carriers already verify the identity of enplaning passengers since they must ascertain that each passenger has a valid visa.[7]

The Board is not persuaded that the requirement of identifying passengers and recording the source of the identification on the passenger list will be unduly burdensome, and we believe on the other hand that it will significantly aid the Board's enforcement efforts. Accordingly, we have determined to adopt this requirement. However, since passports are not required for all international travel, we are modifying this aspect of the proposal by providing that, where there is no passport, any other travel identity document may be used.[8]

2. *Proposed amendments applicable only to foreign air carriers*—a. *Filing of statements of supporting information and passenger lists with the Board.* In EDR-223, we noted that the Director of the Board's Bureau of Enforcement can easily obtain access to passenger lists and statements of supporting information which have been submitted to U.S. carriers;[9] however, in the case of a foreign carrier, although these documents are required to be made available, upon request, to an authorized representative of the Board at a point in the United States,[10] experience has shown that it is often difficult for the Board's enforcement officials to actually obtain and inspect the documents sufficiently in advance of a flight's departure. Therefore, we propose that, in the case of charter flights from the United States, foreign air carriers be required to file all statements of supporting information and passenger lists with the Board's Bureau of Enforcement at least 20 days prior to the flight date.

This proposal has been vigorously opposed by the foreign air carriers, who argue that it would unfairly discriminate against them vis-a-vis U.S. carriers. Moreover, most of the commenting foreign carriers say that they have never refused the Board access to documents relating to charter flights.

Upon further consideration, the Board has determined not to adopt the proposed requirement that foreign air carriers file all statements of supporting information and passenger lists with the Board. Instead, we are amending §§ 212.7(b) and 214.6(d) so as to require that the statements of supporting information and the passenger lists be submitted to the Director, Bureau of Enforcement, within 48 hours after receipt of a written request therefor. This will remedy the enforcement difficulty alluded to earlier, while making the requirement which is applicable to foreign carriers approximately the same as that which is applicable to U.S. carriers.[11]

In view of our action herein, the proposed requirement that the passenger lists be submitted by the charterer to the foreign air carrier at least 30 days in advance, and the proposed deletion of the existing requirement that the foreign air carrier retain the documents, both of which followed from the proposed filing requirements, are not being adopted.

b. *U.S. telephone numbers and addresses of foreign-originating passengers.* Finally, in the case of a charter flight which is the return leg of a charter trip originating in a foreign country, we proposed to require the filing, at least 20 days in advance of the outbound flight, of the names, U.S. addresses, and U.S. telephone numbers of the passengers carried on the inbound flight.

This proposal, too, has been objected to by the foreign carriers. It is urged that the proposal would be unworkable, since it is unlikely that foreign persons traveling to the United States would be able to supply such information. Moreover, the proposed requirement is said to discriminate against foreign air carriers, since it would apply only to them. It is also argued that foreign persons might view with suspicion a governmental request for their U.S. addresses and telephone numbers.

We agree with the comments to the effect that many foreign persons may not be able to supply U.S. addresses and telephone numbers, and accordingly, we have determined not to adopt this portion of the proposal.

Accordingly, the Board hereby amends Part 207 of the Economic regulations (14 CFR Part 207), effective December 15, 1972, as follows:

1. Amend the Table of Contents of Part 207 by adding a new § 207.26 under Subpart B—Provisions Relating to Pro Rata Charters, the table as amended to read as follows:

Sec.
207.26 Air carrier to identify enplanements.

2. Amend § 207.9 by revising paragraph (a), the section as amended to read as follows:

§ 207.9 Records and record retention.

* * * * * *

(a) A record of the names, addresses, and telephone numbers of all passengers

[4] §§ 207.45, 208.215, 212.45, and 214.35.

[5] Varig, while not objecting to the requirement, question its usefulness.

[6] This requirement has already been adopted for travel group charters, under Part 372a, SPR-61, September 27, 1972.

[7] JAL also states that our present regulations do not require foreign air carriers to retain passenger lists; apparently JAL has overlooked § 212.7(a)(3), which does so require.

[8] This requirement, as modified, has already been adopted for travel group charters, under Part 372a, SPR-61, Sept. 27, 1972.

[9] § 385.22(c).

[10] §§ 212.7(b) and 214.6(d).

[11] Documents requested of air carriers by the Director, Bureau of Enforcement, pursuant to § 385.22(c) must be submitted "within a specified reasonable period."

transported on each pro rata charter trip.

743, 754, as amended by 76 Stat. 143, 82 Stat. 867, and 766, as amended by 83 Stat. 103; 49 U.S.C. 1324, 1371, and 1377)

number shall be entered on the passenger list.

4. Amend § 208.215(a) to read as

By notice of proposed rule making EDR-223,[1] the Board proposed, inter alia, certain amendments to Part 212. For the

way passengers. The list shall be amended if passengers are added or dropped before flight.

Rata Charters, the table as amended to read as follows:

Sec.

transported on each pro rata charter trip.

• • • • •

3. Add a new § 207.26, to read as follows:

§ 207.26 Air carrier to identify enplanements.

The air carrier shall make reasonable efforts to verify the identity of all enplaning charter participants, and the documentary source of such verification shall be noted on the passenger list: *Provided however*, That in the case of international flights the identity of each enplaning charter participant shall be verified by means of his passport or, if there be none, by means of any other travel identity document, and the passport number or travel identity document number shall be entered on the passenger list.

4. Amend § 207.45(a) to read as follows:

§ 207.45 Passenger lists.

(a) Prior to each one-way or round-trip flight, a list shall be filed by the charterer with the air carrier showing the names, addresses, and telephone numbers of the persons to be transported, including standbys who may be transported, specifying the relationship of each such person to the charterer (by designating opposite his name one of the three relationship categories hereinafter described), the date the person joined or last renewed a lapsed membership in the charter organization, and the designation "one-way" in the case of one-way passengers. The list shall be amended if passengers are added or dropped before flight.

• • • • •

5. Amend the Statement of Supporting Information set forth at the end of Part 207 by modifying Item 7 of section B of Part II thereof, the statement as amended to read as follows:

STATEMENT OF SUPPORTING INFORMATION [1]

• • • • •

Part II • • •
Section B • • •

7. Attach list of prospective passengers (including "standbys" and one-way passengers designated as such), showing for each: (a) name, address, and telephone number; (b) relationship of such person to chartering organization, i.e., member, spouse, dependent child, parent or "special" (a person whose proposed participation in the charter flight was permitted by the Board pursuant to request for waiver); (c) if such person is related to a member who is not a prospective passenger, the member's name, address, and telephone number; and (d) date member joined or last renewed a lapsed membership.

(NOTE: This is a list of prospective passengers and does not necessarily have to represent the passengers actually to be carried. The list is to be amended, if passengers are dropped or added before flights and the certification required by § 207.45 must be attached to the list.)

• • • • •

(Secs. 204(a), 401, and 407 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754, as amended by 76 Stat. 143, 82 Stat. 867, and 766, as amended by 83 Stat. 103; 49 U.S.C. 1324, 1371, and 1377)

NOTE: The record-retention requirements herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

By the Civil Aeronautics Board.

[FR Doc.72-19635 Filed 11-14-72;8:52 am]

[Reg. ER-775; Amdt. 208-8]

PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN SUPPLEMENTAL AIR TRANSPORTATION

Facilitation of Enforcement of Charter Regulations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

By notice of proposed rule making EDR-223,[1] the Board proposed, inter alia, certain amendments to Part 208. For the reasons set forth in ER-774 (Part 207), published contemporaneously herewith, the Board hereby amends Part 208 of the Economic Regulations (14 CFR Part 208), effective December 15, 1972, as follows:

1. Amend the Table of Contents of Part 208 by adding a new § 208.202c under Subpart C—Provisions Relating to Pro Rata Charters, the table as amended to read as follows:

Sec.
208.202c Air carrier to identify enplanements.

2. Amend § 208.4 by revising paragraph (a), the section as amended to read as follows:

§ 208.4 Particular records.

• • • • •

(a) A record of the names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip.

• • • • •

3. Add a new § 208.202c, to read as follows:

§ 208.202c Air carrier to identify enplanements.

The air carrier shall make reasonable efforts to verify the identity of all enplaning charter participants, and the documentary source of such verification shall be noted on the passenger list: *Provided, however*, That in the case of international flights the identity of each enplaning charter participant shall be verified by means of his passport or, if there be none, by means of any other travel identity document, and the passport number or travel identity document number shall be entered on the passenger list.

4. Amend § 208.215(a) to read as follows:

§ 208.215 Passenger lists.

(a) Prior to each one-way or round-trip flight, a list shall be filed by the charterer with the air carrier showing the names, addresses, and telephone numbers of the persons to be transported, including standbys who may be transported, specifying the relationship of each such person to the charterer (by designating opposite his name one of the three relationship categories hereinafter described), the date the person joined or last renewed a lapsed membership in the charter organization, and the designation "one-way" in the case of one-way passengers. The list shall be amended if passengers are added or dropped before flight.

• • • • •

5. Amend the statement of supporting information set forth at the end of Part 208 by modifying Item 7 of section B of Part II thereof, the statement is amended to read as follows:

STATEMENT OF SUPPORTING INFORMATION [1]

• • • • •

Part II • • •
Section B • • •

7. Attach list of prospective passengers (including "standbys" and one-way passengers designated as such), showing for each: (a) Name, address, and telephone number; (b) relationship of such person to chartering organization, i.e., member, spouse, dependent child, parent or "special" (a person whose proposed participation in the charter flight was permitted by the Board pursuant to request for waiver); (c) if such person is related to a member who is not a prospective passenger, the member's name, address, and telephone number; and (d) date member joined or last renewed a lapsed membership. (NOTE: This is a list of prospective passengers and does not necessarily have to represent the passengers actually to be carried. The list is to the amended, if passengers are dropped or added before flights and the certification required by § 208.215 must be attached to the list.)

• • • • •

(Secs. 204(a), 401, and 407 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754, as amended by 76 Stat. 143, 82 Stat. 867, and 766, as amended by 83 Stat. 103; 49 U.S.C. 1324, 1371, and 1377)

By the Civil Aeronautics Board.

[Reg. ER-776; Amdt. 212-9]

PART 212—CHARTER TRIPS BY FOREIGN AIR CARRIERS

Facilitation of Enforcement of Charter Regulations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

[1] Dated Mar. 17, 1972, 37 F.R. 5826 (Docket 24329).

By notice of proposed rule making EDR-223,[1] the Board proposed, inter alia, certain amendments to Part 212. For the reasons set forth in ER-774 (Part 207), published contemporaneously herewith, the Board hereby amends Part 212 of the Economic Regulations (14 CFR Part 212), effective December 15, 1972, as follows:

1. Amend the Table of Contents by adding a new § 212.26 under Subpart B—Provisions Relating to Pro Rata Charters, the table as amended to read as follows:

Sec.
212.26 Foreign air carrier to identify enplanements.

2. Amend § 212.7 by revising subparagraph (a)(3) and paragraph (b), the section as amended to read as follows:

§ 212.7 Records and record retention.

(a) • • •

(3) A record of the names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip originating or terminating in the United States.

• • • • •

(b) Such documents shall be made available, at a place in the United States, for inspection upon request by an authorized representative of the Board or the Federal Aviation Administration. Each foreign air carrier shall permit such authorized representative to make such notes and copies thereof as he deems appropriate: *Provided*, That the passenger lists and statements of supporting information described in paragraph (a)(3) and (4) of this section shall be submitted so as to be received by the Board within 48 hours after receipt by the carrier of a written request therefor from the Director, Bureau of Enforcement.

3. Add a new § 212.26, to read as follows:

§ 212.26 Foreign air carrier to identify enplanements.

The identity of each enplaning charter participant shall be verified by means of his passport or, if there be none, by means of any other travel identity document, and the passport number or travel identity document number shall be entered on the passenger list.

4. Amend § 212.45(a) to read as follows:

§ 212.45 Passenger lists.

(a) Prior to each one-way or round-trip flight, a list shall be filed by the charterer with the foreign air carrier showing the names, addresses, and telephone numbers of the persons to be transported, including standbys who may be transported, specifying the relationship of each person to the charterer (by designating opposite his name one of the three relationships categories hereinafter described), the date the person joined or last renewed a lapsed membership in the charter organization, and the designation "one-way" in the case of one-way passengers. The list shall be amended if passengers are added or dropped before flight.

• • • • •

5. Amend the Statement of Supporting Information set forth at the end of part 212 by modifying item 7 of section B of part II thereof, the Statement as amended to read as follows:

STATEMENT OF SUPPORTING INFORMATION [1]

• • • • •

Part II • • •
Section B • • •

7. Attach list of prospective passengers (including "standbys" and one-way passengers designated as such), showing for each: (a) name, address, and telephone number; (b) relationship of such person to chartering organization, i.e., member, spouse, dependent child, parent or "special" (a person whose proposed participation in the charter flight was permitted by the Board pursuant to request for waiver); (c) if such person is related to a member who is not a prospective passenger, the member's name, address, and telephone number; and (d) date member joined or last renewed a lapsed membership.

NOTE: This is a list of prospective passengers and does not necessarily have to represent the passengers actually to be carried. The list is to be amended, if passengers are dropped or added before flights and the certification required by § 212.45 must be attached to the list.

• • • • •

(Secs. 204(a), 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 757; 49 U.S.C. 1324, 1372)

NOTE: The record-retention requirements herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK, *Secretary.*

[FR Doc.72-19637 Filed 11-14-72;8:52 am]

[Reg. ER-777; Amdt. 214-12]

PART 214—TERMS, CONDITIONS, AND LIMITATIONS OF FOREIGN AIR CARRIER PERMITS AUTHORIZING CHARTER TRANSPORTATION ONLY

Facilitation of Enforcement of Charter Regulations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

By notice of proposed rule making EDR-223,[2] the Board proposed, inter alia, certain amendments to Part 214. For the reasons set forth in ER-774 (Part 207), published contemporaneously herewith, the Board hereby amends Part 214 of the Economic Regulations (14 CFR Part 214), effective December 15, 1972, as follows:

1. Amend the Table of Contents of Part 214 by adding a new § 214.19 under Subpart A—Provisions Relating to Pro Rata Charters, the table as amended to read as follows:

Sec.
214.19 Foreign air carrier to identify enplanements.

2. Amend § 214.6 by revising paragraph (d), the section as amended to read as follows:

§ 214.6 Record retention.

• • • • •

(d) Every foreign air carrier shall make the documents listed in this section available in the United States upon request by an authorized respresentative of the Board or the Federal Aviation Administration and shall permit such representative to make such notes and copies thereof as he deems appropriate: *Provided*, That the documents described in paragraph (a)(2)(4) of this section shall be submitted so as to be received by the Board within 48 hours after receipt by the carrier of a written request therefor from the Director, Bureau of Enforcement.

3. Add a new § 214.19, to read as follows:

§ 214.19 Foreign air carrier to identify enplanements.

The identity of each enplaning charter participant shall be verified by means of his passport or, if there be none, by means of any other travel identity document, and the passport number or travel identity document number shall be entered on the passenger list.

4. Amend § 214.35(a) to read as follows:

§ 214.35 Passenger lists.

(a) Prior to each one-way or round-trip flight, a list shall be filed by the charterer with the foreign air carrier showing the names, addresses, and telephone numbers of the persons to be transported, including standbys who may be transported, specifying the relationship of each such person, to the charterer (by designating opposite his name one of the three relationship categories hereinafter described), the date the person joined or last renewed a lapsed membership in the charter organization, and the designation "one-way" in the case of one-way passengers. The list shall be amended if passengers are added or dropped before flight.

• • • • •

5. Amend the Statement of Supporting Information set forth at the end of Part 214 by modifying item 7 of section B of Part II thereof, the Statement as amended to read as follows:

STATEMENT OF SUPPORTING INFORMATION [1]

• • • • •

Part II • • •
Section B • • •

7. Attach list of prospective passengers (including "standbys" and one-way passengers designated as such), showing for each:

[1] • • •

[2] Dated March 17, 1972, 37 F.R. 5826 (Docket 24329).

[1] This must be retained by the foreign air carrier for 2 years pursuant to the requirements of § 214.6, but open to Board inspection, and to be filed with the Board on demand.

(a) name, address, and telephone number; (b) relationship of such person to chartering organization, i.e., member, spouse, dependent child, parent or "special" (a person whose proposed participation in the charter flight was permitted by the Board pursuant to request for waiver); (c) if such person is related to a member who is not a prospective passenger, the member's name, address, and telephone number; and (d) date member joined or last renewed a lapsed membership.

(NOTE: This is a list of prospective passengers and does not necessarily have to represent the passengers actually to be carried. The list is to be amended, if passengers are dropped or added before flights and the certification required by § 208.215 must be attached to the list.)

• • • • •

(Secs. 204(a), 401, and 407 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754, as amended by 76 Stat. 143, 82 Stat. 867, and 766, as amended by 83 Stat. 103; 49 U.S.C. 1324, 1371, and 1377)

NOTE: The record-retention requirements herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

[Reg. ER-774; Amdt. 207-3]

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

Facilitation of Enforcement of Charter Regulations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

By notice of proposed rule making EDR-223,[1] the Board proposed, inter alia, certain amendments to Part 207. For the reasons set forth in ER-774 (Part 207), published contemporaneously herewith, the Board hereby amends Part 207 of the Economic Regulations (14 CFR Part 207), effective December 15, 1972, as follows:

1. Amend the Table of Contents of Part 207 by adding a new § 207.26 under Subpart C—Provisions Relating to Pro Rata Charters, the table as amended to read as follows:

Sec.
207.26 Air carrier to identify enplanements.

2. Amend § 207.45(a) to read as follows:

§ 207.45 Passenger lists.

(a) Prior to each one-way or round-trip flight, a list shall be filed by the charterer with the air carrier showing the names, addresses, and telephone numbers of the persons to be transported, including standbys who may be transported, specifying the relationship of each such person to the charterer (by designating opposite his name one of the three relationship categories hereinafter described), the date the person joined or last renewed a lapsed membership in the charter organization, and the designation "one-way" in the case of one-way passengers. The list shall be amended if passengers are added or dropped before flight.

• • • • •

(b) Such documents shall be made available, at a place in the United States, for inspection upon request by an authorized representative of the Board or the Federal Aviation Administration. Each foreign air carrier shall permit such authorized representative to make such notes and copies thereof as he deems appropriate: *Provided*, That the passenger lists and statements of supporting information described in paragraph (a)(3) and (4) of this section shall be submitted so as to be received by the Board within 48 hours after receipt by the carrier of a written request therefor from the Director, Bureau of Enforcement.

3. Add a new § 207.26, to read as follows:

§ 207.26 Air carrier to identify enplanements.

The air carrier shall make reasonable efforts to verify the identity of all enplaning charter participants, and the documentary source of such verification shall be noted on the passenger list: *Provided however*, That in the case of international flights the identity of each enplaning charter participant shall be verified by means of his passport or, if there be none, by means of any other travel identity document, and the passport number or travel identity document number shall be entered on the passenger list.

4. Amend § 207.45(a) to read as follows:

§ 207.45 Passenger lists.

(a) Prior to each one-way or round-trip flight, a list shall be filed by the charterer with the air carrier showing the names, addresses, and telephone numbers of the persons to be transported, including standbys who may be transported, specifying the relationship of each such person to the charterer (by designating opposite his name one of the three relationship categories hereinafter described), the date the person joined or last renewed a lapsed membership in the charter organization, and the designation "one-way" in the case of one-way passengers. The list shall be amended if passengers are added or dropped before flight.

• • • • •

5. Amend the Statement of Supporting Information set forth at the end of Part 207 by modifying Item 7 of section B of Part II thereof, the statement as amended to read as follows:

STATEMENT OF SUPPORTING INFORMATION [1]

• • • • •

Part II • • •
Section B • • •

7. Attach list of prospective passengers (including "standbys" and one-way passengers designated as such), showing for each: (a) name, address, and telephone number; (b) relationship of such person to chartering organization, i.e., member, spouse, dependent child, parent or "special" (a person whose proposed participation in the charter flight was permitted by the Board pursuant to request for waiver); (c) if such person is related to a member who is not a prospective passenger, the member's name, address, and telephone number; and (d) date member joined or last renewed a lapsed membership.

(NOTE: This is a list of prospective passengers and does not necessarily have to represent the passengers actually to be carried. The list is to be amended, if passengers are dropped or added before flights and the certification required by § 207.45 must be attached to the list.)

• • • • •

(Secs. 204(a), 401, and 407 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754, as amended by 76 Stat. 143, 82 Stat. 867, and 766, as amended by 83 Stat. 103; 49 U.S.C. 1324, 1371, and 1377)

[Docket 24329; Order 72-11-73]

PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN SUPPLEMENTAL AIR TRANSPORTATION

Facilitation of Enforcement of Charter Regulations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

By notice of proposed rule making EDR-223,[1] the Board proposed, inter alia, certain amendments to Part 208. For the reasons set forth in ER-774 (Part 207), published contemporaneously herewith, the Board hereby amends Part 208 of the Economic Regulations (14 CFR Part 208), effective December 15, 1972, as follows:

1. Amend the Table of Contents of Part 208 by adding a new § 208.202c under Subpart C—Provisions Relating to Pro Rata Charters, the table as amended to read as follows:

Sec.
208.202c Air carrier to identify enplanements.

2. Amend § 208.4 by revising paragraph (a), the section as amended to read as follows:

§ 208.4 Particular records.

• • • • •

(a) A record of the names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip.

• • • • •

3. Add a new § 208.202c, to read as follows:

§ 208.202c Air carrier to identify enplanements.

The air carrier shall make reasonable efforts to verify the identity of all enplaning charter participants, and the documentary source of such verification shall be noted on the passenger list: *Provided, however*, That in the case of international flights the identity of each enplaning charter participant shall be verified by means of his passport or, if there be none, by means of any other travel identity document, and the passport number or travel identity document

[1] Dated Mar. 17, 1972, 37 F.R. 5826 (Docket 24329).

acetate, rayon, cotton, or any other material or combinations thereof in a manner which fails to conform to the standard of flammability applicable to such fabric under the provisions of the Flammable Fabrics Act.

It is further ordered, That the individual respondents named herein promptly cease and desist from manufacturing for sale, selling, offering for sale, in com-

(a) name, address, and telephone number; (b) relationship of such person to chartering organization, i.e., member, spouse, dependent child, parent or "special" (a person whose proposed participation in the charter flight was permitted by the Board pursuant to request for waiver); (c) If such person is related to a member who is not a prospective passenger, the member's name, address, and telephone number; and (d) date member joined or last renewed a lapsed membership.

NOTE: This is a list of prospective passengers and does not necessarily have to represent the passengers actually to be carried. The list is to be amended, if passengers are dropped or added before flights and the certification required by § 214.35 must be attached to the list.

* * * * * * *

(Secs. 204(a), 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 757; 49 U.S.C. 1324, 1372)

NOTE: The record-retention requirements herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

[Reg. ER-778; Amdt. 249-22]

PART 249—PRESERVATION OF AIR CARRIER ACCOUNTS RECORDS AND MEMORANDA

Charter Passengers' Telephone Numbers

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 25th day of October 1972.

By notice of proposed rule making EDR-223,[1] the Board proposed, inter alia, certain amendments to Part 249. For the reasons set forth in ER-774 (Part 207), published contemporaneously herewith, the Board hereby amends Part 249 of the Economic Regulations (14 CFR Part 249), effective December 15, 1972, as follows:

1. Amend § 249.8 by modifying Item 12 of the "Category of records," the section as amended to read as follows:

§ 249.8 Period of preservation of records by supplemental air carriers.

* * * * * * *

Category of Records	*Period to be retained*
* * *	* * *
12. Names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip	2 years.
* * *	* * *

2. Amend § 249.12(c) by revising subparagraph (3), the section as amended to read as follows:

§ 249.12 Period of preservation of records by foreign air carriers.

* * * * * * *

(c) Each carrier shall * * *

(3) A record of the names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip originating or terminating in the United States: 2 years.

* * * * * * *

3. Amend § 249.13 by revising paragraph (c) of Item 302 of the "Category of records," the section as amended to read as follows:

§ 249.13 Period of preservation of records by certificated route air carriers.

* * * * * * *

Category of Records	*Period to be retained*
* * *	* * *
302. Reservations, reports and records: * * *	
(c) Names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip	2 years.
* * *	* * *

(Secs. 204(a), 402, 407, Federal Aviation Act of 1958, as amended, 72 Stat. 743, 757, and 766, as amended by 83 Stat. 103; 49 U.S.C. 1324, 1372, and 1377)

NOTE: The record-retention requirements herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

By the Civil Aeronautics Board.

Title 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket No. C-2293]

PART 13—PROHIBITED TRADE PRACTICES

B. & H. Importing Corp. and Paul Silverberg

Subpart—Importing, manufacturing, selling, or transporting flammable wear: § 13.1060 *Importing, manufacturing, selling, or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, B. & H. Importing Corp. et al., Middle Village, Docket No. C-2293, Oct. 2, 1972]

In the Matter of B. & H. Importing Corp., a Corporation, and Paul Silverberg, Individually and as an Officer of Said Corporation

Consent order requiring a Middle Village, N.Y., importer, manufacturer, and wholesaler of scarves, footwear, and accessories, among other things to cease manufacturing for sale, selling, importing, or transporting any products, fabric, or related material which fails to conform to an applicable standard of flammability or regulation issued or amended under the provisions of the Flammable Fabrics Act.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents B. & H. Importing Corp., a corporation, its successors and assigns, and its officers, and Paul Silverberg, individually and as an officer of said corporation, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, do forthwith cease and desist from manufacturing for sale, selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting or causing to be transported in commerce, or selling or delivering after sale or shipment in commerce any product, fabric, or related material; or manufacturing for sale, selling or offering for sale, any product made of fabric or related material which has been shipped or received in commerce, as "commerce," "product," "fabric" and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric, or related material fails to conform to an applicable standard or regulation continued in effect, issued or amended under the provisions of the aforesaid Act.

It is further ordered, That the respondents notify all of their customers who have purchased or to whom have been delivered the products which gave rise to the complaint, of the flammable nature of said products and effect the recall of said products from such customers.

It is further ordered, That the respondents herein either process the products that gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products.

It is further ordered, That the respondents herein shall within ten (10) days after service upon them of this order, file with the Commission a special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning: (1) The identity of the products which gave rise to the complaint, (2) the number of said products in inventory, (3) any action taken and any further actions proposed to be taken to notify customers of the inflammability of said products and effect the recall of said products from customers, and of the results thereof, (4) any disposition of said products since October 26, 1970, and (5) any action taken or proposed to be taken to bring said products into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products, and the results of such action. Such report shall further inform the Commission as to whether or not respondents have in inventory any product, fabric, or related material having a plain surface and made of paper, silk, rayon and acetate, nylon and acetate, rayon, cotton, or any other material or combinations thereof in a weight of 2 ounces or less per square yard, or any product, fabric, or related material having a raised fiber surface. Respondents shall submit samples of not less than 1 square yard in size of any such product, fabric or related material with this report.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 2, 1972.

By the Commission.

[SEAL] CHARLES A. TOBIN, *Secretary.*

[FR Doc.72-19581 Filed 11-14-72;8:47 am]

[Docket No. C-2296]

PART 13—PROHIBITED TRADE PRACTICES

Conseenee Carpets, Inc. et al.

Subpart—Importing, manufacturing, selling, or transporting flammable wear: § 13.1060 *Importing, manufacturing, selling or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, Conseenee Carpets, Inc., et al., Ellijay, Ga., Docket No. C-2296, Oct. 5, 1972]

In the Matter of Conseenee Carpets, Inc., a Corporation, and Robert S. Mosley and E. Davis Lacey, Individually and as Officers of Said Corporation.

Consent order requiring an Ellijay, Ga., manufacturer of carpets and rugs, among other things to cease selling and distributing carpeting which does not meet the acceptable criteria for carpeting under the Flammable Fabrics Act, as amended.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent Conseenee Carpets, Inc., a corporation, its successors and assigns, and its officers, and Robert S. Mosley and E. Davis Lacey, individually and as officers of said corporation, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, do forthwith cease and desist from manufacturing for sale, selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting or causing to be transported in commerce or selling or delivering after sale or shipment in commerce, any product, fabric, or related material; or manufacturing for sale, selling or offering for sale, any product made of fabric, or related material which has been shipped or received in commerce, as "commerce," "product," "fabric" and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric or related material fails to conform to an applicable standard or regulation continued in effect, issued or amended under the provisions of the aforesaid Act.

It is further ordered, That respondents notify all of their customers who have purchased or to whom have been delivered the products which gave rise to this complaint, of the flammable nature of said products and effect the recall of said products from such customers.

It is further ordered, That the respondents herein either process the products which gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products.

It is further ordered, That respondents herein shall, within ten (10) days after service upon them of this order, file with the Commission a special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning: (1) The identity of the products which gave rise to the complaint, (2) the identity of the purchasers of said products, (3) the amount of said products on hand and in the channels of commerce, (4) any action taken and any further actions proposed to be taken to notify customers of the flammability of said products and effect the recall of said products from customers, and the results thereof, (5) any disposition of said products since April 27, 1972, and (6) any action taken or proposed to be taken to bring said products into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or to destroy said products, and the results of such action. Respondents will submit with their report, a complete description of each style of carpet or rug currently in inventory or production. Upon request, respondents will forward to the Commission for testing a sample of any such carpet or rug.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the individual respondents named herein promptly notify the Commission of their discontinuance of their present business or employment and of their affiliation with a new business or employment. Such notice shall include respondents' current business or employment in which they are engaged as well as a description of their duties and responsibilities.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 5, 1972.

By the Commission.

earnings of participants; running a program in the nature of a lottery; failing to inform participants of their right to cancel their contract within 3 business days; and furnishing means and instrumentalities of deception.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Devour Chemical Co., Inc., a corporation, and Otis D. Powell, Jr., individually and as an officer of said corporation, its successors and assigns, and respondents' officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any product or of distributorships, franchises, licenses, or marketing agreements with respect thereto, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from directly or indirectly:

1. Operating or participating in the operation of any marketing program wherein the financial gains to the participants are dependent in any manner upon the continued successive recruitment of other participants.

2. Offering to pay, paying, or authorizing the payment of any finder's fee, bonus, override, commission, cross-commission, discount, rebate, dividend, or other consideration to any participant in respondents' marketing program for the solicitation or recruitment of other participants therein.

3. Offering to pay, paying, or authorizing payment of any bonus, override, commission, cross-commission, discount, rebate, dividend, or other consideration to any person, firm, or corporation in connection with the sale of said products or distributorships under respondents' marketing program unless such person, firm, or corporation performs a bona fide and essential supervisory, distributive, selling, or soliciting function in the sale and delivery of such products to the ultimate consumer.

4. Requiring prospective participants or participants in said program to purchase said products or pay any consideration, other than payment for necessary sales materials, in order to participate in any manner therein.

5. Using any marketing program, either directly or indirectly:

(a) Wherein any finder's fee, bonus, override, commission, cross-commission, discount, rebate, dividend, or other compensation or profit inuring to participants therein is dependent on the element of chance dominating over the skill or judgment of the participants; or

(b) Wherein no amount of judgment or skill exercised by the participant has any appreciable effect upon any finder's fee, bonus, override, commission, cross-commission, discount, rebate, dividend, or other compensation or profits which the participant may receive; or

(c) Wherein the participant is without that degree of control over the operation of such plan as to enable him substantially to affect the amount of any finder's fee, bonus, override, commission, cross-commission, discount, rebate, dividends, or other compensation or profits which he may receive or be entitled to receive.

6. Using any marketing program which fails to:

(a) Inform orally all participants in respondents' marketing program and to provide in writing in all contracts of participation that the contract may be canceled for any reason by notification to respondents in writing within three (3) business days from the date of execution of such contract.

(b) Refund immediately all moneys to (1) customers who have requested contract cancellation in writing within three (3) business days from the execution thereof, and (2) customers showing that respondents' contract solicitations or performance were attended by or involved violation of any of the provisions of this order: *Provided, however*, that subpart (2) hereof shall not apply to such contracts entered into before the date of this order, nor shall the payments of refunds hereunder be construed as an admission that this order or any part thereof has been violated.

7. Representing directly or by implication, orally or in writing, that participants in any marketing program will earn or receive any stated or gross or net amount of earnings or profits; or representing, in any manner, the past earnings of participants unless in fact the past earnings represented are those of a substantial number of participants in the community or geographical area in which such representations are made and accurately reflect the average earnings of these participants under circumstances similar to those of the participant to whom the representation is made.

8. Representing, directly or by implication, orally or in writing, that it is not difficult for participants to recruit or retain persons to invest in any marketing program as distributors or as sales personnel to sell said products.

9. Failing to deliver a copy of this order to cease and desist to all present and future distributors, salesmen or other persons engaged in the advertising, sale or distribution of any products through the use of a marketing program, and securing from each such distributor, salesman, or other person similarly involved a signed statement acknowledging receipt of said order.

10. Furnishing others any means or instrumentalities, services, and facilities, whereby they may mislead participants or prospective participants as to any of the matters or things prohibited by this order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That:

(A) Respondents immediately obtain from each person described in paragraph 9 above a signed statement setting forth his intention to conform his business practices to the requirements of this order.

(B) Respondents advise each such present and future salesman, agent, solicitor, independent contractor, distributor, or any person engaged in the promotion, sale, or distribution of any of respondents' products and/or franchises that respondents will not engage or will terminate the engagement or services of any said person, unless such person agrees to and does file a notice with the respondents that he will be bound by the provisions contained in this order.

(C) If such party will not agree to so file notice with the respondents and be bound by the provisions of the order, the respondents shall not use such third party, or the services of such third party to promote, sell, or distribute any of respondents' products and/or franchises or distributorships.

(D) Respondents so inform the persons so engaged that the respondents are obligated by this order to discontinue dealing with those persons who continue on their own the deceptive acts or practices prohibited by this order.

(E) Respondents institute a program of continuing surveillance adequate to reveal whether the business operations of each of said persons so engaged conform to the requirements of this order; and

(F) That respondents discontinue dealing with the persons so engaged, revealed by the aforesaid program of surveillance, who continue on their own, deceptive acts or practices prohibited by this order.

It is further ordered, That respondents herein shall notify the Commission at least thirty (30) days prior to any proposed change in any of the corporate respondents such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution which may affect compliance obligations arising out of the order.

It is further ordered, That respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 2, 1972.

By the Commission.

[Docket No. C-2292]

PART 13—PROHIBITED TRADE PRACTICES

Kowa American Corp. and Masaaki Kawabe

Subpart—Importing, manufacturing, selling, or transporting flammable wear: § 13.1060 *Importing, manufacturing, selling, or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, Kowa American Corp. et al., New York, N.Y., Docket No. C-2292, Oct. 2, 1972]

In the Matter of Kowa American Corp., a Corporation, and Masaaki Kawabe, Individually and as an Officer of Said Corporation.

Consent order requiring a New York City importer and wholesaler of cameras, tiles, footwear, and textile products, among other things to cease manufacturing for sale, selling, importing, or transporting any product, fabric, or related material which fails to conform to an applicable standard of flammability or regulation issued or amended under the provisions of the Flammable Fabrics Act.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Kowa American Corp., a corporation, its successors and assigns and its officers, and Masaaki Kawabe, individually and as an officer of said corporation and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device do forthwith cease and desist from manufacturing for sale, selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting, or causing to be transported in commerce, or selling or delivering after sale or shipment in commerce any product, fabric or related material, or manufacturing for sale, selling or offering for sale, any product made of fabric or related material which has been shipped or received in commerce, as "commerce," "product," "fabric," and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric, or related material fails to conform to an applicable standard or regulation continued in effect, issued, or amended under the provisions of the aforesaid Act.

It is further ordered, That the respondents notify all of their customers who have purchased or to whom have been delivered the products which gave rise to the complaint, of the flammable nature of said products and effect the recall of said products from such customers.

It is further ordered, That the respondents herein either process the products that gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products.

It is further ordered, That the respondents herein shall within ten (10) days after service upon them of this order, file with the Commission a special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning (1) the identity of the products which gave rise to the complaint, (2) the number of said products in inventory, (3) any action taken and any further actions proposed to be taken to notify customers of the flammability of said products and effect the recall of said products from customers, and of the results thereof (4) any disposition of said products since October 23, 1970, and (5) any action taken or proposed to be taken to bring said products into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products, and the results of such action. Such report shall further inform the Commission as to whether or not respondents have in inventory any product, fabric, or related material having a plain surface and made of paper, silk, rayon and acetate, nylon and acetate, rayon, cotton, or any other material or combinations thereof in a weight of 2 ounces or less per square yard, or any product, fabric, or related material having a raised fiber surface. Respondents shall submit samples of not less than 1 square yard in size of any such product, fabric, or related material with this report.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: October 2, 1972.

By the Commission.

PART 13—PROHIBITED TRADE PRACTICES

Playfield Industries, Inc., and John B. Whisnant, Jr.

Subpart—Importing, manufacturing, selling, or transporting flammable wear: § 13.1060 *Importing, manufacturing, selling, or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, Playfield Industries, Inc., et al., Chatsworth, Ga., Docket No. 2300, Oct. 6, 1972]

In the Matter of Playfield Industries, Inc., a Corporation, and John B. Whisnant, Jr., Individually and as an Officer of Said Corporation

Consent order requiring a Chatsworth, Ga., manufacturer and seller of carpets and rugs, among other things to cease selling and distributing carpeting which does not meet the acceptable criteria for carpeting under the Flammable Fabrics Act, as amended.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent Playfield Industries, Inc., a corporation, its successors and assigns, and its officers, and respondent John B. Whisnant, Jr., individually and as an officer of said corporation and respondents' agents, representatives, and employees directly or through any corporation, subsidiary, division, or other device, do forthwith cease and desist from manufacturing for sale, selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting, or causing to be transported in commerce, or selling or delivering after sale or shipment in commerce, any product, fabric, or related material; or manufacturing for sale, selling, or offering for sale, any product made of fabric or related material which has been shipped or received in commerce, as "commerce," "product," "fabric," and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric or related material fails to conform to an applicable standard or regulation continued in effect, issued or amended under the provisions of the aforesaid Act.

It is further ordered, That respondents notify all of their customers who have purchased or to whom have been delivered the products which gave rise to this complaint, of the flammable nature of said products and effect the recall of said products from such customers.

It is further ordered, That the respondents herein either process the products which gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products.

It is further ordered, That respondents herein shall, within ten (10) days after service upon them of this order, file with the Commission a special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning (1) the identity of the products which gave rise to the complaint, (2) the identity of the purchasers of said products, (3) the amount of said products on hand and in the channels of commerce, (4) any action taken and any further actions proposed to be taken to notify customers of the flammability of said products and effect the recall of said products from customers, and of the results thereof, (5) any disposition of said products since April 29, 1972, and

(6) any action taken or proposed to be

volume reports as to completed transactions in securities registered on such ex-

so that they may be examined and commented upon by the public. It was also

ing to any entity which may be established to implement the plan and shall

(6) any action taken or proposed to be taken to bring said products into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or to destroy said products, and the results of such action. Respondents will submit with their report, a complete description of each style of carpet or rug currently in inventory or production. Upon request, respondents will forward to the Commission for testing a sample of any such carpet or rug.

It is further ordered That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligation which may affect compliance obligations arising out of the order.

It is further ordered, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

In the Matter of Rosen & Bachner, Inc., a Corporation, and Marvin Rosen and Arthur Bachner, Individually and as Officers of Said Corporation

Consent order requiring a New York City manufacturer of fur products, among other things to cease misbranding and deceptively invoicing its merchandise.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That Rosen & Bachner, Inc., a corporation, its successors and assigns, and its officers, and Marvin Rosen and Arthur Bachner, individually and as officers of said corporation, and respondents' representatives, agents, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the introduction, or manufacture for introduction, into commerce, or the sale, advertising or offering for sale in commerce, or the transportation or distribution in commerce, of any fur product; or in connection with the manufacture for sale, sale, advertising, offering for sale, transportation or distribution, of any fur product which is made in whole or in part of fur which has been shipped and received in commerce, as the terms "commerce", "fur", and "fur product" are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

A. Misbranding any fur product by:

1. Representing directly or by implication on a label that the fur contained in such fur product is natural when such fur is pointed, bleached, dyed, tip-dyed, or otherwise artificially colored.

2. Failing to affix a label to such fur product showing in words and in figures plainly legible all of the information required to be disclosed by each of the subsections of section 4(2) of the Fur Products Labeling Act.

B. Falsely or deceptively invoicing any fur product by:

1. Failing to furnish an invoice, as the term "invoice" is defined in the Fur Products Labeling Act, showing in words and figures plainly legible all the information required to be disclosed by each of the subsections of section 5(b)(1) of the Fur Products Labeling Act.

2. Representing directly or by implication on an invoice that the fur contained in such fur product is natural, when such fur is pointed, bleached, dyed, tip-dyed, or otherwise artificially colored.

It is further ordered, That Rosen & Bachner, Inc., a corporation, its successors and assigns, and its officers, and Marvin Rosen and Arthur Bachner, individually and as officers of said corporation, and respondents' representatives, agents, and employees, directly or through any corporation, subsidiary, division, or other device, do forthwith cease and desist from furnishing a false guaranty that any fur product is not misbranded, falsely invoiced or falsely advertised when the respondents have reason to believe that such fur product may be introduced, sold, transported, or distributed in commerce.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the individual respondents named herein promptly notify the Commission of the discontinuance of their present business or employment and of their affiliation with a new business or employment. Such notice shall include respondents' current business or employment in which they are engaged as well as a description of their duties and responsibilities.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Title 17—COMMODITY AND SECURITIES EXCHANGES

Chapter II—Securities and Exchange Commission

[Release No. 34-9850]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Reporting of Market Information on Transactions in Listed Securities

The Securities and Exchange Commission today announced the adoption of Rule 17a-15 (17 CFR 240.17a-15) under the Securities Exchange Act of 1934 (the Act) requiring registered national securities exchanges, national securities associations and broker-dealers who are not members of such organizations to make available through vendors of market transaction information price and volume reports as to completed transactions in securities registered on such exchanges. This rule is designed to implement the purposes and policies underlying the act and was originally proposed following the release of the Commission's Policy Statement on the Future Structure of the Securities Markets. It has been modified in view of the report and recommendations of the Commission's Advisory Committee on Market Disclosure and public comments received on previous proposals (Securities Exchange Act Release Nos. 9530, published in the FEDERAL REGISTER for March 21, 1972, at 37 F.R. 5761, and 9731, published in the FEDERAL REGISTER for September 19, 1972, at 37 F.R. 19148).

The rule as adopted contains several technical changes from the form in which it was proposed in Securities Exchange Act Release No. 9731. First, it has been revised in response to several suggestions that the rule define more clearly the type of market transaction information which must be reported. Second, with respect to the imposition by self-regulatory organizations and vendors of reasonable, uniform charges (irrespective of geographic location) for distribution of last sale reports, the rule has been modified to clarify that the Commission did not intend that any vendor be required to charge the same rates for its services as any other vendor. In this connection it should be noted that the term "vendor" can include, as well as independent vendors, any self-regulatory organization (or any joint or several instrumentalities thereof) which falls within the definition contained in the rule.

In addition, some commentators felt that the 75-day period after which trades must be reported pursuant to an effective plan is too short. The Commission wishes to note in this regard that plans may provide for a phase-in period, which should not in any event exceed 40 weeks, and distribution of last sale reports pursuant to such an effective plan would not be deemed to violate the prohibition.

There also appeared to be some confusion as to the contemplated role of independent vendors in distributing last sale reports by means of a composite tape, as distinguished from an interrogation system. It is not the intention of the rule to prescribe whether such distribution is to be effected solely by independent vendors, solely by self-regulatory bodies acting as vendors or by both, nor even to create an obligation on the part of self-regulatory bodies to make their last sale reports available for distribution by such vendors. This determination, which must initially be made by each self-regulatory body, cannot be final until the Commission has had an opportunity to examine the plans submitted pursuant to the rule.

Some commentators also recommended that the rule provide for public comment on any plans submitted pursuant to the rule. It is the Commission's intention to place such plans in its public files so that they may be examined and commented upon by the public. It was also suggested that the Commission permit the sponsor of any plan the opportunity to comment on any changes or conditions that the Commission may wish to impose thereon. Before the Commission would impose changes or conditions on the effectiveness of any plan, its sponsors would of course be afforded an opportunity to respond.

Finally, in order to insure that no unjustified restrictions are imposed on access to the information reported pursuant to the rule, the rule has been revised to require that any plan submitted pursuant thereto must contain reasonable standards for denial of access to users and procedures for Commission review of such denials.

Commission action. The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934, and particularly sections 10(b), 15(c), 17(a), and 23(a) thereof, hereby adopts § 240.17a-15 of Chapter II of Title 17 of the Code of Federal Regulations, effective December 15, 1972, as set forth below:

§ 240.17a-15 Reporting of market information on transactions in listed securities.

(a) Every registered national securities exchange (exchange) shall, with respect to transactions executed through the facilities of such exchange, and every national securities association (association) shall, with respect to over-the-counter transactions executed by its members in securities registered or admitted to unlisted trading privileges on an exchange (listed securities), file with the Commission on or before December 26, 1972, a plan, with respect to such exchange or association, for the dissemination of the information required to be reported pursuant to this Section through vendors of market transaction information (vendors). Such plan shall not become effective unless the Commission, having due regard for the maintenance of fair and orderly markets, the public interest and the protection of investors, declares the plan, with whatever changes are deemed necessary or appropriate by the Commission, to be effective. In declaring any such plan effective, the Commission may impose such terms and conditions relating to the provisions of the plan and amendments thereto as it may deem necessary or appropriate. After January 22, 1973, last sale reports relating to transactions in listed securities executed through the facilities of any exchange or in the over-the-counter market shall not be released on a current and continuing basis by such exchange or association or member thereof except pursuant to such an effective plan.

(b) Each plan filed pursuant to paragraph (a) of this section may include joint procedures designed to comply with all or any portion of such paragraph, shall contain copies of all rules, by-laws, or other constituent instruments relating to any entity which may be established to implement the plan and shall specify, among other things:

(1) The manner of collecting, processing, sequencing, distributing, and displaying last sale reports;

(2) The applicable standards and methods which will be utilized to insure promptness of reporting, accuracy, completeness, and similar matters;

(3) All other rules or procedures which may be adopted to insure that the last sale reports will not be reported in a fraudulent or manipulative manner; and

(4) Standards for denial of access to users of last sale reports and procedures for Commission review of such denials.

Each such plan shall also provide that every vendor who receives any information reported pursuant to this section must agree to make available to its subscribers, on a current and continuing basis, through a moving, real-time last sale reporting system (composite tape) or an interrogation system, reports of prices and volume of all completed transactions (last sale reports) from all reporting markets in any listed security reported on by such vendor. The plans also shall require that any person displaying last sale reports shall agree not to exclude such reports based upon the market in which a transaction was executed and that any public display of selected last sale reports be clearly identified as only reporting selected transactions classified as to size, category of security, or other criteria. Each such composite tape or interrogation system, in displaying last sale reports, shall identify the marketplace where each such transaction was executed.

(c) A "vendor" of market transaction information shall include any person engaged in the business of disseminating to brokers and dealers, on a real-time or other current and continuing basis, reports of transactions in listed securities, whether distributed through an electronic communications network or shown on a terminal or other display device.

(d) Every member of an exchange or association shall make and keep current, and promptly transmit to the exchange or association of which it is a member, information and records required by such exchange or association pursuant to the plan declared effective under paragraph (a) of this section.

(e) Every broker or dealer who is not a member of an exchange or association and who effects transactions in listed securities, which transactions are not reported by any exchange or association pursuant to this section, shall file a plan meeting the requirements of paragraph (a) of this section, and such plan shall become effective in the manner specified in such paragraph.

(f) Nothing in this section shall preclude any exchange or association, separately or jointly: (1) From imposing reasonable, uniform charges (irrespective of geographic location) for distribution of last sale reports; nor (2) from requiring any vendor which distributes or

displays last sale reports to make the last sale reports it distributes or displays

ponds, and other potential sources of potable water. The 10 comments (from

displays last sale reports to make the last sale reports it distributes or displays available to all qualified subscribers throughout the continental United States and to impose uniform charges on its subscribers (irrespective of geographic location).

(g) No broker or dealer shall operate or maintain any display of information reported pursuant to this section which excludes last sale reports based upon the market in which a transaction was executed.

(h) The Commission may exempt from the provisions of this section, either unconditionally or on specified terms and conditions, any exchange, association, broker, dealer, vendor or specified type of security if the Commission determines that it is not necessary in the public interest or for the protection of investors that such exchange, association, broker, dealer, vendor or type of security be subject to the provisions of this section.

Title 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 72-310]

PART 22—DRAWBACK

Proof of Export

Correction

In F.R. Doc. 72-19181 appearing at page 23712 of the issue for Wednesday, November 8, 1972, the Treasury Decision number should read as set forth above.

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Subpart D—Food Additives Permitted in Food for Human Consumption

DIQUAT

Ten comments were received in response to the notice published in the FEDERAL REGISTER of September 13, 1972 (37 F.R. 18562), proposing establishment of an interim food additive tolerance of 0.01 part per million for residues of the herbicide diquat in potable water resulting from use of its dibromide salt in the control of aquatic weeds in canals, lakes, ponds, and other potential sources of potable water. The 10 comments (from Federal, State, and local agencies in Florida plus the University of Florida and a private citizen) supported the proposal.

Having considered the comments received and other relevant information, it is concluded that the proposal should be adopted as published.

The Reorganization Plan No. 3 of 1970, published in the FEDERAL REGISTER of October 6, 1970 (35 F.R. 15623), transferred (effective December 2, 1970) to the Administrator of the Environmental Protection Agency the functions vested in the Secretary of Health, Education, and Welfare for establishing tolerances for pesticide chemicals under sections 406, 408, and 409 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346, 346a, and 348).

Therefore, pursuant to provisions of the act (sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d)), the authority transferred to the Administrator of the Environmental Protection Agency (35 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides programs (36 F.R. 9038), Part 121 is amended by adding the following new section to Subpart D:

§ 121.1242 Diquat.

An interim tolerance of 0.01 part per million is established for residues of the herbicide diquat in potable water (calculated as the cation) resulting from the use of its dimromide salt to control aquatic weeds in canals, lakes, ponds, and other potential sources of potable water.

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, 4th & M Streets SW., Waterside Mall, Washington, DC 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on its date of publication in the FEDERAL REGISTER (11-15-72).

(Sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d))

Dated: November 9, 1972.

EDWIN L. JOHNSON, *Acting Deputy Assistant Administrator for Pesticides Programs.*

[FR Doc.72-19598 Filed 11-14-72;8:48 am]

SUBCHAPTER C—DRUGS

POTASSIUM HETACILLIN VETERINARY ORAL LIQUID

The Commissioner of Food and Drugs has evaluated a new animal drug application (55-048V) filed by Bristol Laboratories, Division of Bristol-Myers Co., Post Office Box 657, Syracuse, NY 13201, proposing the safe and effective use of potassium hetacillin veterinary oral liquid for the treatment of dogs and cats. The application is approved.

As said drug is subject to batch certification under provisions of section 512 (n) of the Federal Food, Drug, and Cosmetic Act, this order provides for the appropriate amendments to the antibiotic drug certification regulations.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512 (i) and (n), 82 Stat. 347; 350-351; 21 U.S.C. 360b (i) and (n)) and under the authority delegated to the Commissioner (21 CFR 2.120), Parts 135c, 141, and 149c are amended as follows:

PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

1. Part 135c is amended by adding the following new section:

§ 135c.72 Potassium hetacillin veterinary oral liquid.

(a) *Specifications.* The drug is in liquid form and conforms to the certification requirements of § 149c.8 of this chapter.

(b) *Sponsor.* See code No. 044 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) It is used in dogs and cats as a treatment against strains of organisms susceptible to potassium hetacillin and associated with respiratory tract infections, urinary tract infections, gastrointestinal infections, skin infections, soft-tissue infections, and post-surgical infections.

(2) Dosage is administered as follows:

(i) In dogs, administer twice daily at a minimum rate of 5 milligrams per pound of body weight. In severe infections the frequency of the dosage may be increased to three times daily, or alternatively, the dosage may be increased to 10 milligrams per pound of body weight twice daily. For stubborn urinary tract infections, the dosage may be increased to 20 milligrams per pound of body weight twice daily. Treatment should be continued for 48 to 72 hours after the animal has become afebrile or asymptomatic. The drug should be administered 1 to 2 hours prior to feeding to insure maximum absorption. In stubborn infections, therapy may be required for several weeks.

(ii) In cats the recommended dosage is 50 milligrams twice daily. Treatment should be continued for 48 to 72 hours after the animal has become afebrile or asymptomatic. The drug should be administered 1 to 2 hours prior to feeding to insure maximum absorption. In stubborn infections, therapy may be required for several weeks.

(3) For use in dogs and cats only. Not to be used in animals raised for food production.

(4) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

PART 141—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

2. Part 141 is amended by adding the following new section:

§ 141.554 Thin layer chromatographic identity test for hetacillin.

(a) *Equipment*—(1) *Chromatography tank.* A rectangular tank, approximately 9 x 9 x 3.5 inches with a glass solvent trough on the bottom.

(2) *Plates.* Use 20 x 20 centimeter thin layer chromatography plates coated with Silica Gel G or equivalent to a thickness of 250 microns.

(b) *Developing solvent.* Mix 650 milliliters acetone with 100 milliliters distilled water, 100 milliliters benzene, and 25 milliliters acetic acid.

(c) *Spray solution.* Dissolve 300 milligrams of ninhydrin in 100 milliliters ethanol.

(d) *Preparation of spotting solutions*—(1) *Sample solution.* Use the sample solution prepared as described in the section for the particular product to be tested.

(2) *Reference solutions.* Prepare a solution containing 10 milligrams of an authentic hetacillin sample per milliliter in a 4:1 solution of acetone and 0.1*N* hydrochloric acid, and a solution of ampicillin standard at 1 mg/ml in the same solvent.

(e) *Procedure.* Spot a plate as follows: Apply approximately 10 microliters of the sample solution, 1 μl. of the reference hetacillin solution, and 1 μl. of the ampicillin reference solution on a line 1.5 centimeters from the base of the silica gel plate and at intervals of not less than 2.0 centimeters. Pour developing solvent into the glass through the bottom of the chromatography tank. After all spots are thoroughly dry, place the silica gel plate directly into the glass trough of the chromatography tank. Cover and seal the tank. Allow the solvent front to travel about 11.5 centimeters from the bottom of the plate, remove the plate from the tank, and allow to air dry. Apply the spray solution (do not saturate) and place immediately into an oven maintained at 90° C. Heat 15 minutes.

(f) *Evaluation.* Measure the distance the solvent front traveled from the starting line and the distance the spots are from the starting line. Calculate the R_f value by dividing the latter by the former. The sample and standard should have spots of corresponding R_f values.

PART 149c—HETACILLIN

3. Part 149c is amended by adding the following new section:

§ 149c.8 Potassium hetacillin oral suspension, veterinary.

(a) *Requirements for certification*—(1) *Standards of identity, strength, quality and purity.* Potassium hetacillin oral suspension veterinary is potassium hetacillin with one or more suitable and harmless colorings, flavorings and gelling agents suspended in a suitable and harmless non-aqueous vehicle. It contains in each milliliter an amount of potassium hetacillin equivalent to 50 milligrams of ampicillin. Its potency is satisfactory if it contains not less than 90 percent and not more than 120 percent of the number of milligrams of ampicillin it is represented to contain. Its moisture content is not more than 1.0 percent. Its pH is not less than 7.0 and not more than 9.0. It gives a positive identity test for hetacillin. The potassium hetacillin used conforms to the requirements of § 149c.1b.

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 148.3 of this chapter, except that in lieu of the requirements of § 148.3(a)(1), it shall be labeled in accordance with the requirements of § 1.106(c) of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 146.2 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The potassium hetacillin used in making the batch for potency, safety, moisture, pH, potassium hetacillin content, identity and crystallinity.

(*b*) The batch for potency, moisture, pH and identity.

(ii) Samples required:

(*a*) The potassium hetacillin used in making the batch, 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of eight immediate containers.

(b) *Tests and methods of assay*—(1) *Potency.* Proceed as directed for ampicillin in § 141.110 of this chapter, using the ampicillin working standard as the standard for comparison and preparing the sample for assay as follows: Place an accurately measured aliquot (usually 1 milliliter) into a high-speed glass blender jar, with sufficient 0.1 *M* potassium phosphate buffer, pH 8.0 (solution 3) to give a stock solution of convenient concentration. Blend 3 to 5 minutes. Further dilute an aliquot of the stock solution with solution 3 to the reference concentration of 0.1 microgram of ampicillin per milliliter (estimated).

(2) *Moisture.* Proceed as directed in § 141.502 of this chapter.

(3) *pH.* Proceed as directed in § 141.503 of this chapter, preparing the sample as follows: Transfer about 5.0 milliliters of the well shaken sample to a centrifuge tube. Add 10 milliliters of benzene, shake vigorously for 3 minutes and centrifuge at medium speed for 5 minutes. Carefully decant the benzene without disturbing the precipitate. Add 5 milliliters of carbon dioxide-free distilled water.

(4) *Hetacillin identity.* Proceed as directed in § 141.554 of this chapter preparing the sample solution as follows: Place 1.0 milliliter of the well shaken sample into a 50-millliliter volumetric flask. Bring to volume with a 4:1 solution of acetone and 0.1 *N* hydrochloric acid.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (11-15-72).

(Sec. 512(i) and (n), 82 Stat. 347; 350-351; 21 U.S.C. 360b(i) and (n))

Dated: November 7, 1972.

C. D. VAN HOUWELING, *Director, Bureau of Veterinary Medicine.*

Title 30—MINERAL RESOURCES

Chapter V—Interim Compliance Panel (Coal Mine Health and Safety)

SUBCHAPTER C—GENERAL ADMINISTRATION

PART 505—PRACTICE AND PROCEDURE FOR HEARINGS UNDER SUBCHAPTERS A AND B OF THIS CHAPTER

Filing of Requests

This amendment clarifies the procedures by which any person interested in an application for a permit for noncompliance may request a public hearing. The amendment also extends these procedures to hearings on applications for permits for noncompliance with the 2.0 mg./g.^{3} respirable dust standard (30 CFR Part 502).

No notice of proposed rule making was published because under 5 U.S.C. 553(b)(A) these rules are exempted as rules of agency procedure or practice.

Accordingly, §§ 505.10 and 505.12 of Part 505 of Title 30 of the Code of Federal Regulations are amended to read as follows:

§ 505.10 Persons who may file requests.

Requests for public hearings will be considered by the Panel only if such requests are filed with the Panel by the following persons:

(a) Any interested person, including the applicant or a representative of the miners at the applicant's mine, after the Panel's decision on an application for an initial permit (other than one under section 305(a)(2) of the Act (30 U.S.C. 865(a)(2)).

(b) Any person interested in the application after publication in the FEDERAL REGISTER of a Notice of Opportunity for Hearing on an application for the renewal of any permit or an application for an initial permit under section 305(a)(2) of the Act.

(c) The applicant, concerning the decision of the Panel as to the application, when no public hearing has been held on an application for which Notice of Opportunity for Hearing was published.

§ 505.12 Time for filing of requests.

The Panel will consider a request for a public hearing:

(a) On its decision on an application for initial permit (other than one under

loss or damage. This part does not apply

(1)) and "Request for Approval of

OPNAVINST 3730.3 series, and AFR 55-4

flight operations at the contractors' op-

(iii) Aircraft currency requirements

section 305(a)(2) of the Act, if such request is filed within 15 days after the date of mailing by the Panel of notice of such decision.

(b) On an application for a renewal permit or for an initial permit under section 305(a)(2) of the Act, if such request is filed within 15 days after publication in the FEDERAL REGISTER of a Notice of Opportunity for Hearing.

(c) Filed by an applicant if such a request is filed within 15 days after publidate of mailing by the Panel of its decision on an application, when no public hearing has been held pursuant to the Notice of Opportunity for Hearing as described in paragraph (b) of this section.

(Sec. 503, 83 Stat. 803; 30 U.S.C. 957)

Effective date. This amendment shall become effective upon its publication in the FEDERAL REGISTER (11-15-72).

GEORGE A. HORNBECK,
Chairman.

[FR Doc.72-19629 Filed 11-14-72;8:51 am]

Title 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

SUBCHAPTER F—AIRCRAFT

PART 860—CONTRACTOR'S FLIGHT OPERATIONS

Part 860, Subchapter F of Chapter VII of Title 32 of the Code of Federal Regulations is revised to read as follows:

Sec.
860.1 Purpose
860.2 Definitions.
860.3 Approving authority.
860.4 Contractor's flight operations procedures.
860.5 Forms and records.
860.6 Qualification requirements.
860.7 Minimum requirements.
860.8 Flight crewmember approval.
860.9 Contractor flight crewmembers proficiency requirements.
860.10 Other related publications.
860.11 Requests for waivers.
860.12 Disposition of Government flight representative records.
860.13 Supply of forms.

AUTHORITY: The provisions of this Part 860 issued under 10 U.S.C. 8012.

§ 860.1 Purpose.

This part establishes procedures to obtain the required Army, Navy, Air Force, and Defense Supply Agency approval of contractor's flight operations procedures and contractor's personnel who operate aircraft for the Government. Also, it provides for the delegation of authority for such approvals, regardless of service affiliation. This part applies to all Army, Navy, Air Force, and Defense Supply Agency (DSA) Government flight representatives who approve contractor's flight operations procedures, and to contractor's personnel who operate any aircraft for which the Government may be contractually liable for loss or damage. This part does not apply to contract flight training, or to the operation of leased aircraft.

§ 860.2 Definitions.

(a) *Terms relating to Government*—(1) *Approving authority.* The commander or comparable individual of one of the following organizations having the administrative responsibility for a particular contractor facility.

(i) Army Heads of Procurement Activities (HPA) or their designee.

(ii) Naval Plant Representative Office (NAVPLANTREPO).

(iii) Air Force Heads of Procurement Activities (HPA) or their designee.

(iv) Commander, Defense Contract Administration Services Region (DCASR).

(2) *Cognizant Government agency.* Refers to the Army, the Navy, the Air Force, or DSA, whichever has cognizance over the contractor's facility, and the agency having cognizance over a Government installation where a contract for such services as aircraft maintenance is to be performed.

(3) *Government flight representative.* That pilot on current flight status (including Army aviators in an excused flying status, Navy pilots in Category II and III and Naval Flight Officers (NFO's), and Air Force pilots in flying status Code 3) to whom the approving authority has delegated responsibility to approve contractor flight operations procedures and flight crews for which the Government by contract assumes the risk for loss of, damage to, or destruction of aircraft.

(4) *Procuring and administrative contracting officers.* The individual designated in accordance with the Armed Services Procurement Regulation (ASPR) and defined in Part 1, Subchapter A, Chapter 1 of this title.

(b) *Terms relating to contractor*—(1) *Contractor.* Any individual, corporation, or other entity whose personnel may operate aircraft for which the Government assumes contractual liability for loss or damage to the aircraft.

(2) *Flight crewmembers.* Pilot, copilot, flight engineer/mechanic, navigator, bombardier-navigator, sensory systems operator, boom operator, and defensive systems operator when assigned to their respective crew positions to conduct any flight for the contractor.

(3) *Flight personnel (noncrewmember).* Those personnel designated by the contractor to perform a function while the aircraft is in flight; for example, technicians, observers, inspectors, systems engineers, and photographers.

(4) *Ground personnel.* Personnel designated by the contractor to perform taxiing, towing, and engine runup functions.

(5) *Requesting official.* The member of the contractor's first level of management (president, vice president) or his appointed designee authorized to sign the form letters "Request for Approval for Qualification Training" (§ 860.5(a)(1)) and "Request for Approval of Contractor Flight Crewmember" (§ 860.5(b)(1)).

(c) *Terms relating to aircraft*—(1) *Test aircraft.* Any aircraft used for research, development, test, and evaluation purposes; the "first flight" of production aircraft; and the "first flight" of those aircraft falling under the meaning of "major alteration" explained in Federal Aviation Regulation, Part I (14 CFR Part I), available from the Federal Aviation Administration (FAA).

(2) *Production aircraft.* Any aircraft being manufactured for use in the operational inventory or undergoing depot-level maintenance, or contract modification, or inspect and repair as necessary (IRAN) before returning to the operational inventory.

(i) *Preaccepted aircraft.* Any aircraft which has not been accepted (DD Form 250, "Material Inspection and Receiving Report," has not been appropriately signed) by the Government, but for which the Government has assumed flight risk responsibilities.

(ii) *Accepted aircraft.* Any aircraft for which DD Form 250 has been signed.

(3) *Bailed and Government-furnished aircraft.* Government-owned aircraft provided to a contractor for use in conjunction with a specific contractual requirement.

(d) *Terms relating to flights*—(1) *Experimental test flights.* There are five types of these flights.

(i) Initial flight of a new type of model aircraft.

(ii) Flights to test or check compliance with specifications for structural integrity, spin test, etc.

(iii) Flights of experimental and research aircraft (X-22, X-24, etc.).

(iv) Flights to determine flight envelope and expansions thereto.

(v) Flights of an aircraft whose flight characteristics have been altered by configuration changes.

(2) *Functional flights*—(i) *Engineering flights.* (a) Subsystem development flights (for example, autopilot, fire control, bombardier/navigator systems).

(b) Specification compliance for subsystem flights.

(c) Engine, propeller, rotor, and transmission development flights.

(d) Flights where the aircraft serves as the vehicle carrying the item to be checked, for example, radar, missiles, etc.

(ii) *Acceptance flights.* (a) Acceptance flights of production aircraft.

(b) Flights following inspection, repair, and modification (TM 55-1500-204-25/1 and TO 1-1-300).

(3) *Support flights*—(i) Photographic flights.

(ii) Chase flights.

(iii) Target or target towing.

(iv) Ferry flights.

(v) Demonstration flights conducted according to AR 95-1, Navy OPNAVINST 3710.7 series, AFR 60-6, and contractor demonstration flights.

(vi) Hurricane evacuation flights conducted according to AR 95-87/

OPNAVINST 3730.3 series, and AFR 55-4 or appropriate oversea command directives.

(vii) Administrative flights, such as cargo flights, personnel carrier, etc. This includes flights of an emergency nature approved by the contract administration office.

(viii) Reliability, extended flight checks, training, instrument, or navigational proficiency flights.

(ix) First destination delivery flights.

§ 860.3 Approving authority.

(a) The approving authority designates the Government flight representative for the contractor's facility. The approving authority also may designate a Government flight representative to act for the primary Government flight representative during his absence due to leave, TDY, or illness. This delegation must be in writing and may not be redelegated. (Subparagraph (1) of this paragraph gives the format to be used for this delegation.) Notify the contractor when the Government flight representative is changed. The newly appointed Government flight representative furnishes the contractor a copy of his delegation of authority.

(1) Format for designating Government flight representatives:

(Service Letterhead)

Reply to attention of:
Subject: Delegation of Authority.
To:

1. Pursuant to AR 95-20, NAVAIRINST 3710.1 series, AFR 55-22, and DSAR 8210.1, you are hereby designated Government flight representative (primary/act in the absence due to leave, TDY, or illness) (delete inappropriate statement) and delegated authority to approve contractor personnel and procedures for operating aircraft under your jurisdiction for which the Government, by contract, assumes the risk for loss, damage, or destruction.

2. This authority is granted to you as an individual, and is not to be redelegated. It is effective only so long as you remain physically qualified for flying status and in your present assignment, unless sooner terminated.

3. As the Government flight representative, you shall assure that the procedures contained in AR 95-20, NAVAIRINST 3710.1 series, AFR 55-22, or DSAR 8210.1 and appropriate ASPR provisions including departmental implementing instructions, are followed in the approval of contractor aircrew personnel and flight operations procedures.

(Signature of Approving Authority)

(b) Approval of the "Request for Approval of Contractor Flight Crewmember," "Request for Approval for Qualification Training," and the contractor's flight operations procedures shall be accomplished by the Government flight representative having cognizance of the contractor facility.

(c) Government flight representatives, when practical and possible, will be qualified in the mission, design, and series aircraft being operated at their facility.

§ 860.4 Contractor's flight operations procedures.

(a) The contractor prepares written flight operations procedures to cover flight operations at the contractors' operating facilities. The Government flight representative for each facility, or another qualified member of his staff, may assist in preparing but not actually prepare these procedures. Approved contractor operations procedures for principal operating facilities must cover the areas listed below, and are supplemented as necessary to cover other operational facilities.

(1) Flight management:

(i) Flight scheduling.

(a) Procedures for obtaining Government flight representative approval for flights, including flights of preaccepted aircraft. Where a type of flight is conducted repeatedly for the same purpose, the approval may be for all flights of a specified type which would follow the same mission profiles.

(b) Identification of contractor individual responsible for giving written flight authorization.

(c) Procedures governing the use of mixed aircrew (contractor and military crewmembers) in multiplace aircraft or formation flights.

(d) Procedure for designating pilot in commaind for aircraft with more than one pilot and for formation flights.

(e) Establish minimum crew requirements for the various type flight activities.

(f) Maximum crew duty time is 10 consecutive hours for single piloted aircraft, 12 consecutive hours for dual piloted aircraft without an operative autopilot installed, 16 consecutive hours for dual piloted aircraft with an operative autopilot installed. The crew duty period begins when the crewmember reports for work, and includes all time spent in flight planning and preflight. Twelve hours downtime with a minimum of 8 hours allowed for sleep is required before beginning a new crew duty period.

(g) Procedures to insure that flight crewmembers who will be exposed to night or instrument flying are currently qualified for these flight conditions.

(ii) Contractor personnel must use technical manuals and checklists in all cases where applicable technical data has been published. This includes ground operations—for example, towing, taxiing, refueling, scheduled maintenance, unscheduled maintenance, progressive aircraft rework (PAR), and IRAN—as well as flight operations. The contractor obtains normal publications distribution for all military technical manuals, changes, and supplements. Where only commercial manuals are available, the contractor is responsible for obtaining such publications. He insures that changes and supplements are promptly posted in the basic technical publications, so that his personnel can use the most current technical data available. Mixed crews (Government and contractor personnel) performing aircrew or maintenance tasks use identical checklists. Locally devised checklists may be used only if published checklists are not available, or where deviation has been authorized by appropriate Government authority.

(iii) Aircraft currency requirements (§ 860.6(c)).

(iv) Multiple currency policies.

(v) Maintenance of flight crew qualifications and training folders.

(vi) Procedure for inspection of aircrew training folder and aircrew records folder.

(vii) Procedures to insure flight crewmember qualification for varying flight conditions and flight activities.

(viii) Procedures to comply with "Request for Government Approval for Qualification Training" (§ 860.5(a)(1)).

(ix) Procedure to comply with "Request for Approval of Contractor Flight Crewmember" (§ 860.5(b)(1)).

(x) Certificates, licenses, and permits (instrument ratings).

(xi) Procedure and criteria for selecting and designating contractor aircrew instructors, flight examiners, etc.

(xii) Procedure for termination of approval.

(xiii) Provisions for determining weight and balance for each aircraft and flight.

(xiv) Procedures for use of life support equipment.

(xv) Flight safety:

(a) The accident prevention program will include:

(1) Contractor's consolidated safety council.

(2) Regular recurring flight safety surveys. Use the following references as guidelines: For Army the USABAAR Guide to Aircraft Aviation Resources Management for Aircraft Mishap Prevention; for Navy the OPNAVINST 3710.7 series; for the Air Force AFM 127-1; and for Defense Supply Agency DSAM 8220.3.

(3) Safety publications.

(4) Published safety responsibilities.

(5) Hazard reporting/correction procedures.

(6) Regularly scheduled aircrew flying safety meetings (as a minimum these will be conducted monthly).

(7) Designation of aviation officer, with specific duties and responsibilities.

(8) Fire protection and prevention programs.

(9) Aircraft ground handling and services procedures and practices.

(b) Preaccident and crash alarm systems procedures must include a current roster of Government personnel to be notified of lost or damaged aircraft. Guidance on military accident reporting is provided in Department of Defense Index TD-3 (Data item description DI-H-1329-1331) for the Army, OPNAVINST 3750.6 series for the Navy, Joint Chiefs of Staff Publication No. 6, Vol. 5, for the Air Force, and DSAR 8200.4 for the Defense Supply Agency. This plan must include the procedure for contractor and subcontractor cooperation and participation in accident investigations conducted by the Government.

(c) Provisions for search and rescue procedures.

(2) Flight crewmember requirements:

(i) Detailed qualification, requalifica-

(iv) The contractor establishes operaadequate, or outdated, the contractor is

directives pertinent to the accomplishment of my assigned duty.

(d) Maintain a training folder on each flightcrew member while in training

(NOTE: For contractors located in foreign countries, the appropriate civil aviation authority or foreign military department rat-

XUM
V37-221 NOV 15 72 XUM

(i) Detailed qualification, requalification, upgrading, crosstraining, and instructor qualification programs must be outlined in the contractor's operations procedures. These procedures must include the expiration dates for recurring training requirements, and the procedure to assure that flight crews do not fly if training requirements have not been met.

(ii) Training requirements.

(*a*) Survival training requirements, if essential.

(*b*) Personal and life support equipment training.

(*c*) Egress training.

(*d*) Physiological training (§860.6(d)).

(*e*) Ground school requirements.

(iii) Flying requirements.

(*a*) Annual flying time (§ 860.9).

(*b*) Annual written proficiency and emergency procedure examinations.

(*c*) Annual proficiency flight checks.

(*d*) Annual instrument flight checks.

(*e*) Who may administer flight checks.

(*f*) Current FAA flight physical.

(3) Flight personnel (noncrew) requirements:

(i) Procedures to comply with written approval.

(ii) Determination of contents and maintenance of records folder.

(iii) Flying requirements.

(*a*) Physiological training (§ 860.6(d)).

(*b*) Qualification procedures.

(*c*) Ejection or escape procedures.

(*d*) Ground egress procedures.

(*e*) Contractor physical requirements.

(4) Ground personnel requirements: Contractor personnel taxiing/towing aircraft and performing engine runups.

(i) Qualification procedures.

(ii) Ground egress training.

(iii) Contractor physical requirements.

(5) Procedures for passenger approval.

(6) Planning and flight mission procedures.

(i) Prepare mission profiles for each type of flight regularly conducted by the contractor's flight crewmembers and covered in the flight operations procedures. Establish specific geographical areas or point-to-point routes and flight following procedures for conduct of flights.

(ii) Mission profiles and specified geographical areas must make maximum use of ground radar, ground radio, and chase aircraft to monitor position and status of aircraft.

(iii) Crew briefings, conducted or received by supervisory personnel, must include, but are not limited to:

(*a*) Station and takeoff times.

(*b*) Primary mission, including mission aircraft, support aircraft, weather, crewmember duties, routes and ranges, communications, specific mission procedures, and recovery and landing.

(*c*) Alternate mission.

(*d*) Life support systems and equipment.

(*e*) Emergency procedures.

(*f*) Security assigned to the mission.

(*g*) Ground coordination procedures.

(iv) The contractor establishes operational procedures to cover items (*a*) through (*f*) of this subdivision. If the contractor flight activity is physically located at a fully operational civil or military airfield that has these procedures in operation, the contractor complies with local directives and executes an agreement with the airfield authority. All procedures must meet FAA requirements and, as a minimum, include the following:

(*a*) Basic regulations, to include flight areas.

(*b*) Weather minimum—test and functional.

(*c*) Traffic control tower requirements.

(*d*) Filing of flight plans.

(*e*) Standard operating procedures, to include:

(*1*) Radio failure.

(*2*) Gear malfunction.

(*3*) Cross wind landing criteria.

(*4*) Airdrome traffic procedures.

(*5*) Emergency procedures for takeoff and landing, to include procedures for use of fire equipment and barriers/arresting gear.

(*6*) Ejection and jettisoning areas.

(*7*) Arming and dearming (if applicable).

(*8*) Minimum fuel procedures.

(*f*) Severe weather plans.

(*b*) The contractor forwards the completed written flight operations procedures to the Government flight representative for approval. Government approval is accomplished by the Government flight representative using the Army USAAVSCOM Pamphlet 715–1, Navy OPNAVINST 3710.7 series, or Air Force Manuals 60–1, 60–16, and the AFM 51 series, DSAM 8220.3 as a guide. Both the contractor and Government flight representatives must maintain in their offices or operations sections a current copy of the approved procedures. The flight operations procedures for support operating locations must be approved by the Government flight representative assigned in accordance with DODM 4105.-59H for each location, and forwarded to the Government flight representative at the contractor's principal operating facility. A duplicate copy of these procedures is maintained by the contractor at each such facility. A list of approved crews and copies of operations procedures at the principal facility are furnished to all alternate support facilities.

(*c*) The contractor shall not begin flight operations until his operations procedures have been approved in writing by the Government flight representative.

(*d*) Reviews of contractor's flight operation procedures must be conducted at least every 6 months, or whenever the primary Government flight representative is changed, to assure currency and compliance. A record of the review dates and action taken is kept by the Government flight representative and the contractor. The contractor is responsible for assuring that the contractor's flight operations procedures are current. If the Government flight representative determines the procedures are deficient, inadequate, or outdated, the contractor is notified. Failure of the contractor to correct the procedures in a reasonable time shall be grounds for suspension of the Government flight representative's approval of the flight crewmembers and contractors flight operations procedures. Flights conducted during such suspension are deemed flights without the required approvals of the applicable clauses of 41 CFR, Part 1–10.

(*e*) Noncompliance with approved procedures and/or development of dangerous practice must be brought to the immediate attention of the contractor and the administrative contracting officer by the Government flight representative. If the initial notification is oral, immediately prepare a formal written communication fully outlining the deficiencies as a matter of contract record. Noncompliance with approved flight operations procedures and/or development of a dangerous practice is unreasonable condition or conduct within the meaning of the clause of 41 CFR, Part 1–10, and is grounds for suspension of the approval of the contractor's flightcrew. The Government reserves the right to take such other action as may be necessary for preserving the aircraft.

(*f*) If the procedures need revising, the contractor submits recommended revisions with applicable supporting documents to the Government flight representative for approval.

§ 860.5 Forms and records.

Contractors must:

(a) Use subparagraph (1) of this paragraph, format for "Request for Approval for Qualification Training," Office of Management and Budget (OMB) Approval No. 22–RO195 to request the approval to qualify the contractor's flight crewmembers.

(1) Format for request for approval for qualification training:

Subject: Request for Government Approval for Aircrew Qualification and Training.
To: Government Flight Representative.
I. Name: _____, Crew position: _____, Aircraft: _____, Date of birth: _____, Security clearance: _____, FAA rating: _____.
II. Provide a résumé of education background. (High school, name and location; college or university name, location and degree obtained; flight school and date completed; test pilot school and date completed; and special professional schools.)
III. Have you ever served in any branch of the U.S. Military Service? _____ If so, state: Branch _____, Service dates: From _____ to _____, Last location _____, Highest rank _____, SSAN _____, Aero rating _____. Are you now a member of the Reserves or National Guard? _____. If yes, state: Branch _____, Present rank _____.
IV. Provide a résumé of experience in the flight test field. Include both engineering and aircrew experience by project, type of aircraft, and hours flown.

FLIGHT PHASE

V. I certify that I have read and understand all of the contractor's procedures and directives pertinent to the accomplishment of my assigned duty.

_____ (Crewmember signature)

VI. I have verified the records of _____, and it is requested that he be approved for experimental/functional flights (delete one not applicable) in _____ type aircraft.

_____ (Type name of contractor's requesting official)

_____ (Signature of contractor's requesting official)

1 Attachment DD Form 1821

VII. ☐ Approved
☐ Disapproved

_____ (Date of approval or disapproval)

_____ (Type name of Government flight representative)

_____ (Signature of Government flight representative)

(b) Use subparagraph (1) of this paragraph, format for "Request for Approval of Contractor Flight Crewmember" Office of Management and Budget (OMB) Approval No. 22–RO196 to request approval of contractor flight personnel.

(1) Format for request for approval of contractor flight crewmember:

Subject: Request for approval of contractor flight crewmember.
To: Government flight representative.
I. I have verified the records of _____ (crewmember's name) and it is requested that he be approved as a _____ (crew position) for experimental/functional (delete one not appropriate) flights in _____ type aircraft.
1 Attachment DD Form 1821.

_____ (Signature of Contractor's requesting official and date)

_____ (Typed name of contractor's requesting official)

II. I certify that _____ has satisfactorily flown a proficiency flight check on _____ (date)

_____ (Signature of instructor pilot/flight examiner)

III. ☐ Approved

_____ (Signature of Government flight representative)

☐ Disapproved

_____ (Type Name of Government flight representative)

_____ (Date)

(c) Use DD Form 1821, "Contractor Crewmember Record," Office of Management and Budget (OMB) Approval No. 22–RO197 to record individual flight crew personnel records and approval to operate Government aircraft. It will be an enclosure to the forms listed in paragraphs (a)(1) and (b)(1) of this section.

(d) Maintain a training folder on each flightcrew member while in training status. This folder serves as a management tool to record training progress and assists in the orderly progression of training. The folder shall contain:

(1) Complete copy of form as shown in paragraph (a)(1) of this section.

(2) Copy of the most recent aircraft questionnaires, to be dated and corrected to 100.

(3) Hours, type, and dates of ground school completed.

(4) Each training/checkout flight numbered, with a résumé as to the areas covered, to include how trainee performed during that training period.

(5) Record of training prerequisites (§ 860.4(a)(2)(ii)).

(e) Maintain a record folder for each flightcrew member after the completion of training and qualification to include the following:

(1) Complete training folder required in paragraph (d) of this section.

(2) Completed copy of forms shown in paragraph (b)(1) of this section. Documented records of special training completed that is required to perform all maneuvers required in conducting the test/functional check flights and mission profile, for example, formation, refueling, instrument, night, low level, etc.

(3) Certification of current FAA flight physical.

(4) Completed copies of aircrew proficiency checks administered by Government and/or company personnel during the preceding 2 years.

(5) Certification of physiological training.

(6) Certification of ejection seat or escape training, survival training and egress training, as required by the contractor's operations procedures.

(f) Maintain a records folder for flight personnel (noncrewmembers) to include the following:

(1) Completed copy of contractor's authorization to fly.

(2) Certification of current physical.

(3) Certification of training and qualifications as required in the contractor's operations procedures.

(4) Certification of physiological training.

(5) Certification of ejection seat or escape training, survival training, and egress training as required by the contractor's operations procedures.

(g) Make the records in paragraphs (a) through (f) of this section available to the Government flight representative at his request.

§ 860.6 Qualification requirements.

(a) Minimum qualifications for approval of the "Request for approval of contractor flightcrew member" for test and functional flight categories are listed below. However, they are only minimums, and such factors as total experience, currency of experience, experience in similar aircraft, type of flying experience, and other related factors are evaluated by the Government flight representative before approving a contractor flightcrew member.

(NOTE: For contractors located in foreign countries, the appropriate civil aviation authority or foreign military department ratings, for example, Department of Transport (Canada), Royal Air Force (Great Britain), may be substituted for FAA in the following subparagraphs.)

The requirements are:

(1) *Experimental test flights*—(i) *Pilot.* FAA commercial and instrument rating and current FAA Class II physical qualification. Not less than 1,500 hours first pilot time, to include 100 hours as first pilot during engineering and/or acceptance flights listed under the functional flight category. Graduate of a military test pilot school.

(ii) *Copilot.* FAA commercial and instrument rating, and current FAA Class II physical qualification. Not less than 1,000 hours first pilot time, to include 100 hours of pilot time during engineering and/or acceptance flights listed under the functional flight category. Graduate of a military test pilot school.

(2) *Functional flights*—(i) *Pilot.* FAA commercial and instrument rating and current FAA Class II physical qualification. Not less than 1,000 hours first pilot time. Highly qualified in mission, design, and series of aircraft.

(ii) *Copilot.* FAA commercial and instrument rating and current FAA class II physical qualification. Not less than 500 hours first pilot time. Qualified in mission, design, and series aircraft.

(b) Minimum prerequisites to qualify in any specific type aircraft.

(1) *Pilots.* See § 860.7. These minimums have been established after considering that some contracts require that pilots operate Government aircraft only during VFR and daylight and within a few miles of the home station. If a contract requires flying under more adverse conditions, the Government flight representative shall require more experience than listed in § 860.7. In all cases, however, Government approval depends on experience and proficiency on a par with the type flying being contemplated or conducted. A comprehensive written questionnaire on the applicable mission, design, and, if appropriate, series of aircraft must be completed. A knowledge of all the aircraft systems, including normal and emergency procedures, must be demonstrated to a qualified instructor pilot approved by the Government flight representative. This demonstration may be made while the aircraft is on the ground or during flights.

(2) *Copilots.* A minimum of 5 hours or three sorties and five dual or supervised landings are required in the mission, design, and, if necessary, series aircraft for which approval is requested. The Government flight representative may require more experience at his discretion (for example: 25 or more hours may be appropriated for larger or more complex aircraft). Completion of ground school course is required for mission, design, and, if necessary, series of aircraft. Reference Army Training Circular 1–34, NATOPS for the Navy, and AFM 50–5 and 51 series manuals for the Air Force. A comprehensive written questionnaire

§ 860.8 Flightcrew member approval.

(a) Only contractor-designated re- flight date. If disapproved, the contractor must be notified immediately by the service concerned

tion of employment, physical disqualification, or revocation of FAA rating. The contractor notifies the Government flight

XUM

V37-221-NOV15-72 XUM

(b) *Jets and turboprop.*

Aircraft by group	First pilot time for this group	Dual or supervised time before checkout	Dual or supervised sorties, each including at least one landing	Other requirements	Instructor pilots
	Hours	*Hours*			
(1) Single	50	5	5	(1)	At the discretion of the Government flight representative.
(2) Twin engine	100	5	5	(1)	Do.
(3) Three or four engines	100	15	10	(1)	Do.
(4) Multiengine (more than four)	200	20	10	(1)	Do.

[1] Completion of ground school course required for mission, design, and, if necessary, series of aircraft. Reference Army Training Circular 1-34, NATOPS for the Navy, and AFM 50-5 and the 51 series manual for the Air Force.

(c) *VTOL helicopter/aircraft.*

Type of aircraft for group and similar aircraft based on engine horsepower	Total first pilot hours as help time	Dual time in type of helicopter before checkout	Dual autorotations (other than those on power recovers as applicable	Other requirements	Instructor pilot
	Hours	*Hours*			
(1) 0-500 pounds, 5 sorties	50	5	10	Completion of formal ground school course required.	At the discretion of the Government flight representative.
(2) 5,000-16,000 pounds, 5 sorties	250	5	10	Previous completion of a formal ground school course. Completion of specialized or formal ground school course for helicopter concerned.[1]	Do.
(3) 16,000-40,000 pounds, 10 sorties	500	10	10	Previous completion of a formal ground school course. Completion of specialized or formal ground school course for helicopter concerned.[2]	Do.
(4) 40,000 pounds and over, 10 sorties	500	10	10	do[2]	Do.

[1] To include checkout time.
[2] For qualification in amphibious aircraft, 10 water landings also are required.

(d) All flightcrew members shall have received physiological training required by Army Training Circulars 1-26 and 1-34, OPNAVINST 3710.7 series, and AFR 50-27 as supplemented. This requirement may be waived at the discretion of the Government flight representative for crewmembers flying aircraft whose normal flight altitudes do not exceed 10,000 feet.

§ 860.7 **Minimum requirements.**

Minimum requirements for initial qualification of contractor pilots are the satisfactory completion of written questionnaire and demonstration of knowledge of systems, including normal and emergency systems pertaining to the specific mission, design, and series of aircraft to be flown. In addition, the Government flight representative may require night flying (up to 5 hours) and instrument practice (up to 5 hours) or until a satisfactory degree of proficiency is demonstrated. If contractor pilots are to fly under these conditions, on the applicable mission, design, and, if appropriate, series of aircraft must be completed. A knowledge of all the aircraft systems, including normal and emergency procedures, must be demonstrated to a qualified instructor pilot approved by the Government flight representative. This demonstration may be made while the aircraft is on the ground or during flight.

(3) *Other flight personnel.* A written questionnaire applicable to the particular function the individual is to perform (to include emergency procedures) must be completed before flight in that aircraft.

(c) A minimum of one flight and one landing in each mission, design, and series aircraft of significant difference in which qualified is required every 45 days to insure currency as either pilot or copilot. The Government flight representative determines the grouping of aircraft for currency requirements with regard to powerplants, control system, and airframe differences.

(a) *Reciprocating aircraft.*

Aircraft by group	First pilot time for this group	Dual or supervised time before checkout	Dual or supervised sorties, each including at least one landing	Other requirements	Instructor pilots
	Hours	*Hours*			
(1) Single engine up to 6,000 pounds gross weight.	75	5	5	(3)	At the discretion of the Government flight representative.
(2) Single engine 5,000 to 6,000 pounds gross weight.		5	5	(3)	Do.
(3) Twin engine up to 12,000 pounds gross weight.		5	5	(4)	Do.
(4) Four or more engines.	75	15	10	(3)	Do.

[1] To include checkout time.
[2] Completion of ground school course required for mission, design, and, if necessary, series of aircraft. Reference Army Training Circular 1-34, NATOPS for the Navy, and AFM 50-5 and the 51 series manual for the Air Force.

§ 860.8 **Flightcrew member approval.**

(a) Only contractor-designated requesting officials submit requests for crewmember approval and for qualification training. A list of these officials is provided in writing to the Government flight representative. The list is revised as necessary to insure currency by the contractor or subcontractor.

(b) The contractor official requesting approval for qualification training prepares, signs, and forwards to the Government flight representative for approval two copies in the format of § 860.5(a)(1). The Government flight representative indicates his action, and signs both copies. The original is retained by the Government flight representative. The contractor insures that flightcrew members do not fly or initiate qualification training before receipt of Government approval.

(1) The Government flight representative is allowed a minimum of 10 workdays for processing, analyzing, and approving or disapproving contractor requests for qualification training.

(2) Following approval, training must be initiated within 90 days, and completed without interruption. If interrupted for any reason, the resumption of training is a matter to be worked out between the Government flight representative and the contractor.

(3) Formal training offered by military agencies may be requested by the contractor on a space available basis. Unless otherwise provided in the contract, the contractor must reimburse the military agencies for such training.

(c) Request for approval of contractor flightcrew member.

(1) On completion of training, the contractor forwards to the Government flight representative two completed copies in the format of § 860.5(b)(1). The Government flight representative indicates his action and signs both copies. The original is kept in the Government flight representative's files; the duplicate copy must be returned to the contractor within 10 workdays.

(2) The contractor will not use the flightcrew member in his aircrew specialty until receipt of Government approval.

(d) Request for aircraft initial flights.

(1) The contractor submits a written request, including both the names of the flightcrew with current "Request for Approval for Qualification Training" (§ 860.5(a)(1)) and "Request for Approval of Contractor Flightcrew Member" (§ 860.5(b)(1)) for each crewmember and the date of anticipated flight, to the Government flight representative, not less than 90 days before the scheduled initial flight date. The Government flight representative forwards all requests to the appropriate project manager of the Procuring Contracting Officer, as appropriate.

(2) The Government flight representative returns the request to the contractor at least 30 days before initial flight date. If disapproved, the contractor must be notified immediately by the service concerned.

(e) The contractor's requesting official grants written approval for each contractor and subcontractor noncrewmember required to fly in Government aircraft, before the individual's first flight, with a copy of the Government flight representative. The contractor's requesting official insures that each individual is required, and is qualified to serve in a specific capacity while aboard military aircraft. The contractor keeps the written approval on file until the individual is no longer authorized to fly.

(1) Limit personnel approved to those necessary for the contractor to perform on contract.

(2) If the Government flight representative determines that the written approval has been signed without adequate justification, the contractor is requested to remove the affected individual from flight status. If the contractor still feels that the individual should be allowed to fly, the matter is referred to the Administrative Contracting Officer. The contracting officer assures that the above mentioned individual(s) is not allowed to fly pending the result of any appeal.

(3) The Government flight representative reviews flight personnel assignment each 6 months to insure only those necessary to the mission have current written approval.

(f) Contractor instructor flightcrew members.

(1) Only the most highly qualified, proficient, and experienced personnel are designated as instructor flightcrew members. Certification of instructor pilot status must be documented on DD Form 1821.

(2) Contractor instructor flightcrew members shall administer flight checks to other flightcrew members employed by the contractor. Military personnel may receive qualification and recurrency checks from contractor instructor flightcrew members when deemed appropriate by the approval authority.

(3) Contractor personnel administering such checks must be qualified as instructors in accordance with the instructor's criteria as outlined in the contractor's operations procedures.

(g) Any person not approved either as flightcrew member or flight personnel requires written approval by the appropriate Government flight representative before flying in any aircraft which the Government, by contract, assumes the risk of loss, damage, or destruction.

(h) Ground personnel (personnel taxiing or towing aircraft, or performing engine runups) as well as fire crash rescue personnel must be qualified as outlined in the contractor's approved operations procedures. Written Government approval, except when otherwise specified in the applicable contract, is not required.

(i) Termination of approvals:

(1) Approvals of flightcrew members are automatically canceled on termination of employment, physical disqualification, or revocation of FAA rating. The contractor notifies the Government flight representative of such action by the most expeditious means, and confirms in writing within 10 calendar days.

(2) The contractor may request the Government flight representative to terminate any approval. This request must be in writing, and must be signed by a contractor's requesting official.

(3) The Government flight representative suspends approvals of flightcrew members and flight personnel who:

(i) Have failed to meet the general requirements of normal flight techniques and to exercise sound judgment in test or functional flights.

(ii) Have exhibited evidence of personal instability or similar undesirable tendencies or have conducted themselves contrary to the interests of the Government in promoting safety.

(iii) Have failed to accomplish annual (within 12 months) requirements.

(4) The Government flight representative promptly notifies the contractor when an approval is suspended. A written statement by the Government flight representative to the contractor must set forth in detail the reasons for the action. If the contractor feels that the approval should not have been suspended, he may request a review of the matter by the Administrative Contracting Officer.

(j) Verification by the Government flight representative as to the qualifications of contractor personnel flying military aircraft at locations other than the principal location is furnished by letter or message to the Government flight representative at the other location. The contents of the transmittal includes the level of the pilot's qualification (for example, experimental, functional flights, etc.), last flight, time in the model being flown, time in the last 90 days, and any other specific information pertinent to the maneuver/mission to be flown at that location.

(k) The Government flight representative will not approve any flightcrew member until he has approved the contractor's operations procedures. Flightcrew member qualifications procedures will place particular emphasis on ground training, flight training, and checkout requirements for any aircraft in which an individual is not currently qualified. These areas will be in sufficient detail to cover the requirements for initial checkouts, upgrading to test and experimental status, requalification, and any other specific training associated with the contractor's mission.

§ 860.9 **Contractor flightcrew members proficiency requirements.**

(a) The contractor must require a minimum of 80 hours per year total flying time for pilots and copilots, and 60 hours per year for all other flightcrew members. The requirement applies to the period covered by the flight operation phase of the Government contract. For contracts of less than a year's duration, a proportionate share are flown by each

flightcrew member. For pilots and copilots, the contractor may substitute a minimum of 80 sorties per year for each pilot and copilot. However, the contractor must not substitute sorties for flight hours for more than 50 percent of the total requirement. Sorties must be of sufficient duration to accomplish the training objectives. Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(b) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(c) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(d) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(e) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(f) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(g) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(h) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(i) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(j) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(k) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(l) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(m) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(n) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(o) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(p) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(q) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(r) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(s) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(t) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(u) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(v) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(w) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(x) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(y) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

(z) Flightcrew members must be scheduled for sufficient flight time to maintain proficiency in all aircraft and crew positions for which they are qualified.

involved are considered completely built up

Title 40—PROTECTION OF ENVIRONMENT

the issues for the hearing. A hearing will be granted if the objections are sup-

flightcrew member. For pilots and copilots, a minimum of 35 hours must be flown in each 6-month period (Jan.–June, July–Dec.). All others, a minimum of 24 hours.

NOTE: This does not mean that the Government furnishes additional flying time for contractor flightcrew member; the flying time must be available under the contractor's flying program.

(b) In lieu of the total hourly requirements in paragraph (a) of this section, the contractor, with the approval of the Government flight representative, may substitute a minimum of 80 sorties per year for each pilot and copilot. However, a minimum of 15 sorties must be flown in each quarter. No combination of this sortie minimum and the hourly minimum may be used in satisfying proficiency requirements for a period of less than 6 months. But, a 6-month period using the sortie basis may be combined with a 6-month period using the hourly basis to determine annual minimums. If so combined, the respective minimums must be 40 sorties and 40 hours. (Note in paragraph (a) of this section applies.)

(c) Proficiency requirements:

Aircrew	Event	First 6 months July–Dec. minimum	Last 6 months Jan.–June minimum	Annual minimum
Pilot and copilot	Night instruments	(5 hours	5 hours	10 hours.
		(8 hours	8 hours	20 hours.
	Precision approaches	5 each	5 each	10 each.
	Nonprecision approaches	do	do	Do.
Navigator/bombardier/electronic warfare officer/weapons system officer.	Night	4 hours	4 hours	8 hours.

(1) Night instrument time may be applied to either instrument time requirements or night requirements, but not to both.

(2) There is no requirement for contractor pilots to fulfill the night, instrument, or approach requirements, except in those cases where night and/or instrument flying by contractor personnel will be required. Those pilots maintaining night flying proficiency also must maintain instrument proficiency minimum.

(d) Proficiency flight evaluations and/or instrument flight evaluations (if applicable) may be administered to contractor flightcrew members by qualified military flight examiners, at the discretion of the cognizant Government flight representative.

NOTE: The Government may furnish flying time necessary to support this requirement.

(e) If a pilot fails to maintain acceptable proficiency, he is not permitted to fly as a pilot in command of aircraft covered by the Government flight risk clause until appropriate training as prescribed by the Government flight representative is accomplished and a satisfactory flight evaluation is completed. Additional flying time is not furnished by the Government if a training period is required. Flight checks conducted by military flight examiners must be conducted in accordance with criteria of the applicable major command flight evaluation/standardization program.

(f) Approved contractor flightcrew members must demonstrate their ability to operate aircraft, aircraft systems (to include egress systems), or perform other assigned aircrew functions safely and effectively, in accordance with contractor's existing procedures and directives, annually (within 12 months of the previous check) in each aircraft in which currency is maintained. These checks may be conducted as an integral part of the check pilots in the same aircraft or a regularly scheduled flight, with the chase plane. Flight checks are documented on the DD Form 1821. For those aircraft with similar mission and design, but dissimilar series designations (for example, C–130A, C–130E), the Government flight representative determines which are considered like aircraft.

(g) Supervisory personnel (chief pilot administers these checks.

(h) In conjunction with the flight check, the flightcrew member also must demonstrate orally to the check pilot his knowledge of the contractor's operations procedures. In addition, the contractor develops proficiency and emergency procedure examinations for the aircraft and its associated systems. These examinations are administered before the proficiency flight check. Crewmembers certify to having reviewed the contractor operations procedures annually and when revised. Accomplishment of these requirements are documented on the DD Form 1821.

§ 860.10 Other related publications.

In all cases not specifically covered by this part, the contractor should, insofar as practicable, adhere to the procedures set forth in the operational flight instructions and requirements issued by the military services having plant cognizance. For the Army, AR 385–40 and AR 95 series; Navy OPNAVINST 3710.7 series, AFM's 60–1, 60–16, and the 51 series, and the DSA Flight Operations Manual.

§ 860.11 Request for waivers.

Waivers regarding application of this part to the contractor's performance of a contractor contracts, unless specifically provided for in the contract or contracts, are forwarded through the Government flight representative for his recommendations, to the Administrative Contracting Officer, and submitted through channels to the procuring activity, or the requiring activity in those cases where the requiring activity is not the procuring activity (for example, military interdepartmental purchase requests (MIPR)). Monetary or other consideration shall be given to the contractual requirements before processing any requests for waivers. Waivers to this part require approval of the heads of procurement activities (HPA) or his designee, or the HPA for the requiring activity where the contract is awarded as a result of a MIPR.

§ 860.12 Disposition of Government flight representative records.

Records accumulated by the Government flight representatives are disposed of according to disposition standards published by the military services (AFM 12–50, AR 340–18–11, SECNAVINST 5212.5B, DSAM 5015.1).

§ 860.13 Supply of forms.

Locally reproduce DD Form 1821, pages 1, 2, and 3 on 8"x10½" or 8½"x11" paper.

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, U.S. Air Force, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.72–19556 Filed 11–14–72;8:45 am]

Title 39—POSTAL SERVICE

Chapter I—U.S. Postal Service

PART 155—CITY DELIVERY

PART 171—MONEY ORDERS

Miscellaneous Amendments

Sections 155.1 and 155.2 of Title 39, Code of Federal Regulations, relating to establishing and extending city delivery service, are amended to revise the criteria for inaugurating delivery service. The current requirement (among others) of $10,000 in annual postal receipts at the post office where delivery service is contemplated is rescinded. The prime requirement henceforth will be a population of 2,500 or more in the area to be served, or 750 possible deliveries. The amendments also state the applicability of delivery service extension requirements to mobile home subdivisions.

Accordingly, §§ 155.1 and 155.2 are amended to read as follows:

§ 155.1 Requirements for establishing city delivery service.

(a) Consideration for establishing city delivery service will be given when the following requirements are met:

(1) A population of 2,500 or more within the area to be served, or 750 possible deliveries. (Postal population may vary greatly from the general census population because of different boundary interpretations and designations);

(2) Fifty percent of the building lots in the area to be served are improved with houses or business places. Where a house or building and its yard or grounds cover more than one lot, all lots

involved are considered completely built up;

(3) Streets are paved or otherwise improved to permit travel of post office vehicles at all times without damage or delay;

(4) Street signs are in place and house numbers displayed, where applicable;

(5) Rights-of-way, turnouts and areas adjacent to roads and streets are improved so that installation and servicing of boxes will not be hazardous to the public or postal employees;

(6) Satisfactory walks for carriers where required; and

(7) Approved mail receptacles or door slots are installed at designated locations.

(b) The requirements set out above are essential to an efficient mail delivery service, and must be met before delivery is inaugurated in a community. In establishing delivery service, a combination of delivery methods is considered in order to provide adequate service to all residential and business sections of a community. All establishments of delivery service must have final approval of the Regional Postmaster General or his designee.

§ 155.2 Delivery extension requirements.

Delivery service extension requirements are the same as those listed in § 155.1, with the exception of paragraph (a)(1), and apply to all extensions, including extensions to mobile home subdivisions.

Section 171.1(b)(2) is amended to extend the flat 15 cents money order fee available to the military overseas to civilians and their dependents who have APO/NPO privileges overseas.

Accordingly, in § 171.1 *Issuance of domestic money orders*, subdivision (ii) of paragraph (b)(2) is amended to read as follows:

§ 171.1 Issuance of domestic money orders.

* * *

(b) * * *

(2) * * *

(ii) The fee for a postal money order issued to authorized civilian or military personnel or their dependents by an Armed Forces Postal Clerk on board any ship or at any other Military Post Office (APO or NPO) located outside the 50 States, Puerto Rico, and Guam is 15 cents, regardless of the amount of the money order. Postal money orders issued to others shall be charged at the fees indicated below.

* * * * * *

(39 U.S.C. 401, 404)

ROGER P. CRAIG,
Deputy General Counsel.

[FR Doc.72–19587 Filed 11–14–72;8:48 am]

Title 40—PROTECTION OF ENVIRONMENT

Chapter I—Environmental Protection Agency

SUBCHAPTER E—PESTICIDES PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Inorganic Bromides

A notice (PP 2E1280) was published by the Environmental Protection Agency in the FEDERAL REGISTER of September 21, 1972 (37 F.R. 19650), proposing establishment of a tolerance for residues of inorganic bromides resulting from postharvest fumigation with the insecticide methyl bromide in or on the raw agricultural commodity pomegranates at 70 parts per million.

Subsequently, the petitioner amended the petition by increasing the proposed tolerance level from 70 parts per million to 100 parts per million. No comments or requests for referral to an advisory committee were reecived.

It is concluded that the proposal should be adopted.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), the authority transferred to the Administrator of the Environmental Protection Agency (35 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides Programs (36 F.R. 9038), § 180.123 is amended by revising the paragraph "100 parts per million in or on copra", as follows:

§ 180.123 Inorganic bromides resulting from fumigation with methyl bromide; tolerances for residues.

* * * * * *

100 parts per million in or on copra and pomegranates.

* * * * * *

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, DC 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on its date of publication in the FEDERAL REGISTER (11–15–72).

(Sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e))

Dated: November 9, 1972.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticides Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Methomyl

A petition (PP 2F1254) was filed by E. I. du Pont de Nemours & Co., Inc., Wilmington, Del. 19898, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of tolerances for residues of the insecticide methomyl (*S*-methyl *N*-[(methylcarbamoyl)oxy] thioacetimidate) in or on the raw agricultural commodities grapefruit, lemons, oranges, and tangelos at 2 parts per million.

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The insecticide is useful for the purpose for which the tolerances are being established.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

3. The tolerances established by this order will protect the public health.

4. An amendment published in the FEDERAL REGISTER of April 6, 1971 (36 F.R. 6495), eliminated the use of the term "tangelo" and replaced it with the term "tangerines."

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (36 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides Programs (36 F.R. 9038), § 180.253 is amended by revising the paragraph "2 parts per million * * *", as follows:

§ 180.253 Methomyl; tolerances for res-

the Administrator to the Deputy Assist-

3. The tolerances established by this

1. The purpose of this notice is to (a) revise Agency policy on the use of negocite any other circumstances which operate to make competitive negotiation

the foreign assistance program. A copy of the determination and findings shall

2 parts per million in or on beans (succulent), grapefruit, lemons, oranges, and tangerines.

* * * * *

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, DC 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on its date of publication in the FEDERAL REGISTER (11–15–72).

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: November 9, 1972.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticides Programs.

[FR Doc.72-19599 Filed 11-14-72;8:49 am]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Isopropalin

A petition (PP 2F1278) was filed by Elanco Products Co., Post Office Box 1750, Indianapolis, IN 46206, in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of a tolerance for negligible residues of the herbicide isopropalin (2,6-dinitro-*N,N*-dipropylcumidine) in or on the raw agricultural commodity peppers at 0.05 part per million.

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The pesticide is useful for the purpose for which the tolerance is being established.

2. The tolerance established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides Programs (36 F.R. 9038), § 180.313 is revised to read as follows:

§ 180.313 Isopropalin; tolerances for residues.

Tolerances are established for negligible residues of the herbicide isopropalin (2,6-dinitro-*N,N*-dipropylcumidine) in or on peppers and tomatoes at 0.05 part per million.

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, DC 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on its date of publication in the FEDERAL REGISTER (11–15–72).

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: November 9, 1972.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticides Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

N^3,N^3-diethyl-2,4-dinitro-6-trifluoromethyl-1,3-phenylenediamine

A petition (PP 2F1267) was filed by U.S. Borax Research Corp., 412 Crescent Way, Anaheim, CA 92801, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of tolerances for negligible residues of the herbicide N^3,N^3-diethyl-2,4 - dinitro-6-trifluoromethyl-1,3-phenylenediamine in or on the raw agricultural commodities soybean forage, cottonseed, cotton forage, and soybeans at 0.05 part per million.

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The herbicide is useful for the purposes for which the tolerances are being established.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

3. The tolerances established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (36 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides Programs (36 F.R. 9038), Part 180 is amended by adding the following new paragraph to Subpart C:

§ 180.327 N^3,N^3-Diethyl-2,4-dinitro-6-trifluoromethyl-1,3-phenylenediamine; tolerances for residues.

Tolerances are established for negligible residues of the herbicide N^3,N^3-diethyl - 2,4 - dinitro - 6 - trifluoromethyl-1,3-phenylenediamine in or on the raw agricultural commodities cotton forage, cottonseed, soybean forage, and soybeans at 0.05 part per million.

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, DC 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on its date of publication in the FEDERAL REGISTER (11–15–72).

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: November 9, 1972.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticides Programs.

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 7—Agency for International Development, Department of State

[AIDPR Notice 73–1]

PART 7–3—PROCUREMENT BY NEGOTIATION

PART 7–30—CONTRACT FINANCING

Miscellaneous Amendments

Subject: AIDPR Notice No. 73–1, Amendment of Subparts 7–3.1, 7–3.3, 7–30.4 and 7–30.45 of the AID Procurement Regulations (41 CFR Chapter 7).

1. The purpose of this notice is to (a) revise Agency policy on the use of negotiation; (b) add new procedures on the use of method determinations and findings; and (c) simplify the procedures applicable to Federal Reserve letters of credit. AID procuring activities shall comply with the new policies and procedures contained in paragraphs 2, 3, 4, and 5 of this notice in lieu of those currently appearing in the AIDPR (41 CFR Chapter 7).

2. Section 7–3.101–50 is revised to read as follows:

§ 7–3.101–50 Exceptions to normal negotiation procedures.

Competition should be obtained in negotiated procurements whenever possible. However, there are four types of exceptions to normal negotiation procedures which authorize departures from ordinary competitive practices as follows:

(a) The requirements of FPR 1–3.101 for the solicitation of proposals from the maximum number of qualified sources consistent with the nature of and requirements for the supplies or services to be procured shall be deemed satisfied when the selection of the contractor for Architect-Engineer services has been made pursuant to the procedures prescribed in AIDPR section 7–4.2.

(b) Negotiation without the solicitation of proposals from more than one offeror may be undertaken for the types of contracts listed below. In each of these cases, however, consideration of as many sources as is practicable, including informal solicitation to the maximum extent practicable, is required. In each case the contract file will include appropriate explanation and support.

(1) Procurements to be performed by the contractor in person.

(2) Procurements by an overseas procuring officer which do not exceed $25,000.

(3) Procurements from State or local governmental agencies.

(c) Negotiation without solicitation of proposals from more than one offeror or informal solicitation may be undertaken for contracts for which one institution or firm has exclusive or predominate capability by reason of experience, specialized facilities or technical competence to perform the work within the time required and at reasonable prices. In such a circumstance, the initiating technical office may recommend, for approval by the contracting officer, that a proposal be solicited only from this one institution or firm. This recommendation shall be in writing and will be contained in a separate document entitled "Justification for Noncompetitive Procurement" which shall set forth full and complete justification for the selection. Specifically the "Justification" shall explain with particularity the exclusive or predominant capability the proposed contractor possesses which meets the requirements of the procurement, shall cite any other circumstances which operate to make competitive negotiation impracticable and shall reflect the degree of consideration which has been given to other sources in the particular field and the reasons they lack the capability of the proposed contractor. The following illustrations represent factors which should be considered, as appropriate, in preparing the "Justification":

(1) What capability does the proposed contractor have which is important to the specific effort and makes him clearly more desirable than another firm in the same general field?

(2) What prior experience of a highly specialized nature does he possess which is vital to the proposed effort?

(3) What facilities or equipment does he have which are specialized and vital to the effort?

(4) Does he have a substantial investment of some kind which would have to be duplicated at Government expense by another source entering the field?

(5) If time schedules are involved, why are they critical and why can the proposed contractor best meet them?

(6) Does the proposed contractor have personnel considered predominant experts in the particular field?

Each "Justification" shall contain, in the first sentence of the document an appropriate recommendation (e.g., "I recommend that we negotiate only with the _____ for the _____ (Name of entity) (Item or services being procured)").

(d) Negotiation without solicitation of proposals or informal solicitation and without consideration of other competitive sources may be undertaken for the types of contracts listed below. In each case the contract file will include appropriate explanation and support.

(1) Contracts based on unsolicited research and development proposals to be awarded to a qualified offeror upon the appropriate determination by the cognizant Assistant Administrator pursuant to AIDPR section 7–4.5301.

(2) Contract amendments which provide for the continuation of activities or assistance which in the judgment of the contracting officer are designed to meet a goal which is the same as or substantially similar to the goal stated in the original PROP.

(3) Procurements for which the contracting officer determines that the property or services can be obtained from only one person or firm (sole source of supply). See FPR 1–3.210(a)(1).

(4) Procurements for which the head of the procuring activity (this authority is not delegable except to his chief deputy) makes a written determination, with supporting findings (including the degree of consideration, if any, given to other sources in the particular field), that procurement from another source would impair foreign assistance objectives and would be inconsistent with fulfillment of the foreign assistance program. A copy of the determination and findings shall be included in the contract file.

3. Subpart 7–3.3 of Chapter 7 is amended to add new § 7–3.302 as follows:

§ 7–3.302 Determinations and findings required.

The requirement of FPR 1 3.302(b) shall not apply to negotiated amendments to cost reimbursement contracts. The original determination and findings justifying the initial use of a cost reimbursement-type contract shall be deemed applicable to all subsequent amendments to said contracts.

4. Section 7–30.400 is revised to read as follows:

§ 7–30.400 Scope of subpart.

References to nonprofit contracts with nonprofit educational or research institutions for experimental, research, and development work include nonprofit contracts with nonprofit institutions for:

(a) Technical assistance services provided to or for another country or countries, and (b) projects which concern studies, demonstrations, and similar activities related to economic growth or the solution of social problems of developing countries.

5. Section 7–30.4501–2(a) is amended by deleting subparagraphs (1)(iii), (2)(ii) and (iii), and adding the following as subparagraph (2)(ii):

§ 7–30.4501–2 Procedure to establish Federal Reserve Letter of Credit.

* * * * *

(a) * * *

(2) * * *

(ii) Such other data as may be required to conform to the Controller's current requirements: e.g., copy of the contractor's latest available balance sheet, and income and expense statement.

* * * * *

(Sec. 621, 75 Stat. 445, as amended; 22 U.S.C. 2381. E.O. 10973, November 3, 1961, 26 F.R. 10469; 3 CFR 1959–63 Comp.)

6. This AIDPR notice should be filed in front of the cover page of Amendment No. 14.

7. AIDPR Notice No. 73–1 is an interim procurement instruction issued pursuant to AIDPR 7–1.104 (41 CFR 7–1).

8. Effective date: The notice shall be effective 15 days after publication in the FEDERAL REGISTER. It will be canceled and superseded upon publication of its contents in an amendment to the AIDPR (41 CFR Chapter 7).

Dated: November 3, 1972.

WILLARD H. MEINECKE,
Deputy Assistant Administrator for Program and Management Services.

PART 1033—CAR SERVICE

Lehigh Valley Railroad Co.; Authorization To Operate Over Tracks of Lehigh Coal and Navigation Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 29th day of August 1972.

Upon further consideration of Service Order No. 1094 (37 F.R. 9028, 11066, 13334, and 15514), and good cause appearing therefor:

It is ordered, That: § 1033.1094 *Service Order No. 1094* (Lehigh Valley Railroad Co., John F. Nash and Robert C. Haldeman, trustees, authorized to operate over tracks of Lehigh Coal and Navigation Co. (formerly operated by the Central Railroad Company of New Jersey, Robert D. Timpany, trustee) be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., September 11, 1972, unless otherwise modified, changed, or suspended by order of this Commission, provided that any extension of this order shall be subject to the continued concurrence of the Lehigh Coal and Navigation Co.

Effective date. This amendment shall become effective at 11:59 p.m., August 31, 1972.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2))

It is further ordered, That copies of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] JOSEPH M. HARRINGTON,
Acting Secretary.

[S.O. 1109]

PART 1033—CAR SERVICE

Burlington Northern, Inc. Authorized To Operate Over Trackage in Campbell County, Wyo.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 29th day of August 1972.

It appearing, that the Burlington Northern, Inc., has filed an application with the Interstate Commerce Commission in Finance Docket No. 27110 for a certificate of public convenience and necessity authorizing operation over approximately 17 miles of track between a point of connection with the main line of the Burlington Northern, Inc., at Chaining Station H.B. 4704+01 located in Campbell County, Wyo., approximately 10 miles east of Gillette, Wyo., and extending southward to a coal mine now being constructed by the Amax Coal Co., located in sections 34 and 35, Township 48 north, range 71 west, eighth Guide Meridian, Campbell County, Wyo.; that this track is the only source of rail service to the aforementioned mine; that the Commission is of the opinion that there is immediate need for service over this line pending decision by the Commission in Finance Docket No. 27110, and that operation of this line by the Burlington Northern, Inc., is necessary in the interest of the public and the commerce of the people; and that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than 30 day's notice.

It is ordered, That:

§ 1033.1109 Service Order No. 1109.

(a) *Burlington Northern, Inc., authorized to operate over trackage in Campbell County, Wyo.* The Burlington Northern, Inc., be, and it is hereby, authorized to operate over trackage in Campbell County, Wyo., between a point of connection with the main line of the Burlington Northern, Inc., at Chaining Station H.B. 4704+01 located in Campbell County, Wyo., approximately 10 miles east of Gillette, Wyo., and extending southward to a coal mine now being constructed by Amax Coal Co. located in sections 34 and 35, Township 48 north, Range 71 west, eighth Guide Meridian, Campbell County, Wyo., a distance of approximately 17 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Effective date.* This order shall become effective at 11:59 p.m., August 31, 1972.

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., December 31, 1972, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2))

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

PART 33—SPORT FISHING

Long Lake National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (11–15–72).

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

NORTH DAKOTA

LONG LAKE NATIONAL WILDLIFE REFUGE

Sport fishing on the Long Lake National Wildlife Refuge, Moffit, N. Dak., is permitted on refuge waters. These open areas, comprising 3,625 acres, are delineated on maps available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for winter sport fishing on the refuge extends from December 15, 1972, to March 15, 1973.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuges generally which are set forth in title 50, Part 33, and are effective through March 15, 1973.

LOUIS S. SWENSON,
Refuge Manager, Long Lake National Wildlife Refuge, Moffit, N. Dak.

Title 6—ECONOMIC STABILIZATION

Chapter III—Price Commission

PART 300—PRICE STABILIZATION

Price Increases by Rate Bureaus or Conferences

The purpose of this amendment to § 300.310 of the regulations of the Price Commission is to clarify the intention of the Commission regarding prenotification of certain rate increases for public utilities, proposed by rate bureaus, conferences, or similar organizations.

Section 300.310 is being revised to make it clear that any price increase which is proposed by a rate bureau, conference, or similar organization that has been approved by an uncertificated regulatory agency, and which would cause an increase of more than 1 percent in the combined aggregate annual revenues of the members of the rate bureau, conference, or similar organization, may not be put into effect during the 60-working day period after the regulatory agency's approval unless, at an earlier date, the Price Commission determines that the increase complies with § 300.303. This amendment is consistent with the Price Commission's intention, as expressed in § 300.308(b) regarding prenotification public utilities, to prohibit any price increase from going into effect before the Price Commission has had the opportunity to review the price increase for conformity with § 300.303. Other editorial changes have been made which do not affect substance.

Because the purpose of this amendment is to provide clarification of existing provisions and not to effect any substantial change, notice and public procedure thereon is unnecessary and good cause exists for making it effective less than 30 days after publication.

(Economic Stabilization Act of 1970, as amended, Public Law 91–379, 84 Stat. 799; Public Law 91–558, 85 Stat. 1468; Public Law 92–8, 85 Stat. 13; Public Law 92–15, 85 Stat. 38; Economic Stabilization Act Amendments of 1971, Public Law 92–210; Executive Order No. 11640, 37 F.R. 1213, Jan. 27, 1972; Cost of Living Council Order No. 4, 36 F.R. 20202, Oct. 16, 1971)

In consideration of the foregoing, § 300.310 of title 6, Code of Federal Regulations is revised as set forth below, effective November 13, 1972.

By direction of the Commission.

XUM V37-221 NOV 15 72 XUM

XUM

Issued in Washington, D.C. on November 13, 1972.

C. JACKSON GRAYSON, JR.,
Chairman, Price Commission.

§ 300.310 Rate bureaus, conferences, and similar organizations.

(a) Whenever any price increase (interim or final) proposed by a rate bureau, conference, or similar organization authorized by law to act on behalf of its members, which would cause an increase of more than 1 percent in the combined aggregate annual revenues of the members of the rating bureau, conference, or similar organization, is approved by a regulatory agency which has not been certificated pursuant to § 300.304 or whose certificate of compliance has been revoked pursuant to § 300.306, the rate bureau, conference, or similar organization must report the price increase to the Price Commission on a prescribed form within 3 working days after the date of the decision authorizing the price increase, and that increase may not be put into effect by any member thereof during the 60-working-day period after the date of that decision, unless, at an earlier date, the Commission determines that the increase complies with § 300.303. During the period it is subject to Commission review, the Commission may take any action authorized by § 300.311 (a).

(b) Any price increase proposed by a rating bureau, conference, or similar organization, other than an increase covered by paragraph (a) of this section, that is approved by a regulatory agency which has not been issued a certificate of compliance under § 300.304 or whose certificate of compliance has been revoked pursuant to § 300.306, must be certified by the rating bureau, conference, or similar organization in the manner prescribed for public utilities under § 300.308(c), and the Price Commission shall have the same power of review over such price increase as is provided in § 300.308(c).

[FR Doc.72-19768 Filed 11-14-72;9:33 am]

PART 300—PRICE STABILIZATION

Certification in Forms PC–50 and PC–51

The purpose of this amendment to Appendix II to Part 300 of the Price Commission regulations is to update the wording of the certification of no price increase specified in the instructions for the preparation of Forms PC–50 and PC–51, to cover Special Regulation No. 1, the custom products rule of § 300.410, and the volatile pricing rule of § 300.51(f).

Because the purpose of this amendment is to provide guidance and information that is needed immediately for compliance with the Price Stabilization Program, notice and public procedure is impracticable and good cause exists for making it effective in less than 30 days after publication in the FEDERAL REGISTER.

(Economic Stabilization Act of 1970, as amended, Public Law 91–379, 84 Stat. 799; Public Law 91–558, 84 Stat. 1468; Public Law 92–8, 85 Stat. 13; Public Law 92–15, 85 Stat. 38; Economic Stabilization Act Amendments of 1971, Public Law 92–210; Executive Order No. 11640, 37 F.R. 1213, January 27, 1972; Cost of Living Council Order No. 4, 38 F.R. 20202, October 16, 1971)

In consideration of the foregoing, Appendix II to Part 300 of Title 6 of the Code of Federal Regulations is amended as set forth below, effective November 13, 1972.

Issued in Washington, D.C., on November 13, 1972. By direction of the Commission.

JAMES B. MINOR,
General Counsel, Price Commission.

1. The certification appearing in the second paragraph of the "Who Must File" part of the "Instructions for the preparation of Form PC–50" and of the "Instructions for the preparation of Form PC–51," is amended to read as follows:

I certify that as of _____,
(last day in firm's fiscal quarter)
_____ has not at any time
(name of firm)
since November 13, 1971, charged a price in excess of base price established for any property or service under the regulations of the Price Commission, or if such a price was charged, that the firm has complied with all of the requirements of Special Regulation No. 1 and since that time has not increased a price above base price. I further certify that this firm has not (1) determined a base price for any custom product or service under § 300.410 of the regulations of the Price Commission, or, if it has determined such a price, that the annual revenues attributable to that product or service represent less than $1 million and less than 1 percent of the firm's total annual revenues, and (2) increased a price pursuant to the special rule for volatile pricing under § 300.51(f) of the regulations of the Price Commission.

Proposed Rule Making

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 905]

ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Proposed Handling Limitations

Consideration is being given to the following proposal submitted by the committees, established under the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The recommendation by the committees for more restrictive size requirements on shipments of tangerines is based on the increasing available supply of smaller size tangerines. The higher minimum size requirement is designed to prevent a general weakening of the price structure for all sizes of tangerines during the period of peak volume and to prevent an excessive build-up of small size tangerines in the markets. It is anticipated by the committees that the supply situation will be such that fresh market outlets will accept a percentage of tangerines of the smaller size in shipments during the period November 27, through December 3, 1972, at prices which will provide favorable returns to producers.

The proposal is as follows:

Order. In § 905.547 (Tangerine Regulation 44; 37 F.R. 21799) the provisions of paragraph (a)(2) are revised to read as follows:

§ 905.547 Tangerine Regulation 44.

(a) • • •

(2) Any tangerines, grown in the production area, which are of a size smaller than $2^{6}/_{16}$ inches in diameter, except that a tolerance of 10 percent, by count, of tangerines smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in the U.S. Standards for Florida Tangerines: *Provided*, That during the period November 27, through December 3, 1972, any handler may ship a quantity of tangerines which are smaller than $2^{6}/_{16}$ inches in diameter, including the aforesaid tolerance, if (i) the number of standard packed boxes of such smaller tangerines does not exceed 40 percent of the total shipments of tangerines by such handler during the last previous week, within the current fiscal period, in which he shipped tangerines; and (ii) such smaller tangerines are of a size not smaller than $2^{1}/_{16}$ inches in diameter, except that a tolerance of 10 percent, by count, of tangerines smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in said U.S. Standards for Florida Tangerines.

• • • • •

All written data, views, or arguments submitted in connection with the aforesaid proposal must be received in quadruplicate, by the Hearing Clerk, U.S. Department of Agriculture, Room 112A, Washington, D.C. 20250, not later than November 20, 1972. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27 (b)).

Dated: November 10, 1972.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division Agricultural Marketing Service.

[FR Doc.72-19651 Filed 11-14-72;8:52 am]

[7 CFR Part 906]

ORANGES AND GRAPEFRUIT GROWN IN THE LOWER RIO GRANDE VALLEY IN TEXAS

Proposed Container, Pack, and Container Marking Regulations

Consideration is being given to the following proposal, applicable to § 906.340 *Container, pack, and container marking regulations* (7 CFR 906.340; 37 F.R. 2765; 4707; 21800; 23626), recommended by the Texas Valley Citrus Committee, established pursuant to the marketing agreement, as amended, and Order No. 906, as amended (7 CFR Part 906) regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

All persons who desire to submit written data, views, or arguments in connection with the proposal should file the same with the Hearing Clerk, Room 112A, U.S. Department of Agriculture, Washington, D.C. 20250, not later than the 7th day after the publication of this notice in the FEDERAL REGISTER. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

This action reflects the committee's appraisal of the need for restricting the use of containers and pack sizes to those most suitable for the packing and handling of fruit to promote orderly marketing so as to provide consumers with good quality fruit, while improving returns to producers pursuant to the declared policy of the act. The proposed amendment would require that fruit packed in bags having a capacity of 5 or 8 pounds of fruit be handled only in certain master containers.

The proposal is that the provisions of paragraph (a)(1)(iv) of § 906.340 (7 CFR 906.340; 37 F.R. 2765, 4707, 21800, 23626) be amended to read as follows:

§ 906.340 Container, pack, and container marking regulations.

(a) • • •

(1) • • •

(iv) *Bags.* (*a*) Bags having a capacity of 5 pounds of fruit: *Provided*, That fruit when packed in such bags shall be handled only when packed in the number and container specified in subdivision (vi) of this subparagraph.

(*b*) Bags having a capacity of 8 pounds of fruit: *Provided*, That fruit when packed in such bags shall be handled only when packed in the number and container specified in subdivision (v) of this subparagraph, and

(*c*) Bags having a capacity of 18 pounds of fruit: *Provided*, That on and after August 1, 1973, bags having a capacity of 18 pounds of fruit shall be mesh or woven type;

• • • • • •

Dated: November 10, 1972.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

ination at the office of the Regional Air Traffic Division Chief.

The airspace action proposed in this

in order to be sure of consideration, must be received not later than 20 days from the date of publication of this notice in the FEDERAL REGISTER.

Under the Tobacco Loan Program published June 18, 1970 (35 F.R. 1000), amended June 17, 1971 (36 F.R. 11634, 12509), and August 5, 1972 (37 F.R. 15856), CCC proposes to establish advance rates by grades for the 1972 crop Ohio filler tobacco, types 42–44, Connecticut Valley broadleaf tobacco, type 51, Connecticut Valley Havana seed tobacco, type 52, New York and Pennsylvania Havana seed tobacco, type 53, and Southern Wisconsin tobacco, type 54, Northern Wisconsin tobacco, type 55, and Puerto Rican tobacco, type 46, as set forth herein. These proposed rates, calculated to provide the level of support of 51.9 cents per pound for types 51–52, 38.9 cents per pound for type 46, and 37.5 cents per pound for types 42–44, 53–55, as determined under section 106 of the Agricultural Act of 1949 (7 U.S.C. 1445), are as follows:

Sec.

1464.22 1972 crop—Ohio filler tobacco, types 42–44, advance schedule.

1464.23 1972 crop—Connecticut Valley broadleaf tobacco, type 51, advance schedule.

1464.24 1972 crop—Connecticut Valley Havana seed tobacco, type 52, advance schedule.

1464.25 1972 crop—New York and Pennsylvania Havana seed tobacco, type 53, and Southern Wisconsin tobacco, type 54 advance schedule.

1464.26 1972 crop—Northern Wisconsin tobacco, type 55, advance schedule.

1464.27 1972 crop—Puerto Rican tobacco, type 46, advance schedule.

AUTHORITY: The provisions of this Part 1464 issued under sec. 4, 62 Stat. 1070, as amended, sec. 5, 62 Stat. 1072, secs. 101, 106, 401, 403, 63 Stat. 1051, as amended, 1054, 74 Stat. 6; 7 U.S.C. 1441, 1445, 1421, 1423, 15 U.S.C. 714b, 714c.

Correction

In F.R. Doc. 72–16644 appearing at page 21112 of the issue for Thursday, October 5, 1972, the following changes should be made:

1. On page 21119 in the "Items of Comparison" column of the tabulated material, "Cream style corn", which appears under "9. Methods for determining quality:", should read "(b) Cream style corn"; and

2. In § 51.21 the reference in the fourth line of paragraph (b) now reading "(§ 15.20(b)(5))" should read "(§ 51.20(b)(5))".

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 72–WA–55]

VOR FEDERAL AIRWAYS

Proposed Alteration

The Federal Aviation Administration (FAA) is considering amendments to Part 71 of the Federal Aviation Regulations that would realine Victor Airways 3, 39, and 93 northeast of oBston, Mass.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, New England Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 154 Middlesex Street, Burlington, MA 01803.

All communications received within 30 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendments. The proposals contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. An informal docket will also be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendments would:

1. Realign V–93 from Concord, N.H., via Kennebunk, N.H.; INT of the Kennebunk 045° T (062° M) and Bangor, Maine, 220° T (239° M) radials; to Bangor.

2. Realign V–39 from Concord, N.H., via INT of the Concord 052° T (068° M) and Augusta, Maine, 227° T (245° M) radials; Augusta; to Millinocket, Maine.

3. Realign V–3 from Ipswich Intersection via Pease, N.H., VOR; INT of the Pease 005° T (021° M) and Augusta 227° T (245° M) radials; to Augusta.

These actions would update and modernize the utilization of low altitude airspace northeast of Boston, Mass., and would create a dual airway system along the east coast of Maine to the Canadian border. These proposed airway changes along with revised center-terminal procedures currently under development would significantly increase utilization of the airspace and provide better service to the users.

These amendments are proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on November 8, 1972.

CHARLES H. NEWPOL,
Acting Chief, Airspace and
Air Traffic Rules Division.

[14 CFR Part 75]

[Airspace Docket No. 72–WA–60]

AREA HIGH ROUTE

Proposed Alteration

The Federal Aviation Administration (FAA) is considering an amendment to Part 75 of the Federal Aviation Regulations that would realign a segment of J974R from Casanova, Va., to Westport, Ky.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. All communications received within 20 days after publication of this notice in the FEDERAL REGISTER will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The airspace action proposed in this docket would realign J974R in part from Casanova via Henderson, W. Va., to Westport. If this action is taken, J974R would coincide with J951R between Casanova and Henderson. This alignment would facilitate transition between en route and terminal procedures at Dulles Airport.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on November 13, 1972.

H. B. HELSTROM,
Chief, Airspace and
Air Traffic Rules Division.

ATOMIC ENERGY COMMISSION

[10 CFR Part 50]

ENVIRONMENTAL EFFECTS OF THE URANIUM FUEL CYCLE

Notice of Proposed Rule Making

Notice is hereby given that the Atomic Energy Commission is considering possible amendments to its regulations in 10 CFR Part 50, Appendix D, "Interim Statement of General Policy and Procedure: Implementation of the National Environmental Policy Act of 1969 (Public Law 91–190)," that would specifically deal with the question of consideration of environmental effects associated with the uranium fuel cycle in the individual cost-benefit analyses for light water cooled nuclear power reactors.

The Commission's regulation implementing the National Environmental Policy Act of 1969 (NEPA) in 10 CFR Part 50, Appendix D, requires that each draft and final detailed statement prepared pursuant to section 102(2)(C) of NEPA for a nuclear power reactor contain a cost-benefit analysis which, among other things, considers and balances the adverse environmental effects and environmental, economic, technical, and other benefits of the facility. This regulation further provides that the cost-benefit analysis will, to the fullest extent practicable, quantify the various factors considered.

In several nuclear power reactor licensing proceedings it has been argued that the cost-benefit analysis for the facility that is the subject of the licensing action should include costs and benefits associated with the uranium fuel cycle, such as environmental effects of reprocessing spent fuel and disposal of wastes resulting from reprocessing. Other factors related to the fuel cycle include those associated with uranium mining and milling, uranium hexafluoride production, isotopic enrichment, fuel fabrication, and transportation associated

with the above. It has been urged that in each power reactor case the contribution of the fuel cycle to the environmental effects of the facility should be assessed on the record and weighed in the balance with other environmental effects. Some of the fuel cycle activities, such as reprocessing and waste disposal will be those associated not only with nuclear power reactors but with other facilities as well. Therefore, with respect to light water cooled nuclear power reactors, interested persons are invited to submit comments

TABLE S–3

(Sec. 161, 68 Stat. 948; sec. 102, 83 Stat. 853, 42 U.S.C. 2201, 4332)

XUM

V37-221 NOV 15 72 XUM

with the above. It has been urged that in each power reactor case the contribution of the nuclear power reactor to the environmental costs associated with the fuel cycle activity should be ascertained and considered in the cost-benefit balance.

The Commission's Atomic Safety and Licensing Appeal Board has held that environmental impact statements for nuclear power reactors should consider, among other things, environmental effects of the transportation of irradiated nuclear fuel from the facility that is the subject of the licensing action, and the transportation of low level wastes and of high level solid wastes other than irradiated fuel from the facility to depositories, but should not consider environmental effects of reprocessing of irradiated nuclear fuel, the disposal of wastes resulting from reprocessing, or disposal of low and high level solid wastes. In the matter of Vermont Yankee Nuclear Power Corp. (Vermont Yankee Nuclear Power Station), Docket No. 50–271, Memorandum and Order, June 6, 1972. Subsequently, the Appeal Board in that case held that mining and manufacturing of reactor fuel are not within the scope of the environmental review prescribed for nuclear power reactors by NEPA and the Commission's regulations (Decision, October 11, 1972).

In connection with the foregoing, it should be noted that in conjunction with the revision of Appendix D of 10 CFR Part 50 on September 9, 1971, there was transmitted by the Director of Regulation to applicants for licenses to construct or operate nuclear power plants, and made available to the public, a document dated September 1, 1971, which, among other things, indicated that applicants' environmental reports should describe the environmental effects of the transportation of fuel elements from the fuel fabrication plant to the reactor as well as the transportation of spent fuel elements from the reactor to the fuel reprocessing plant and the transportation of packaged radioactive material from the reactor to low level waste burial grounds.

There are in the United States well over 100 nuclear power reactors in operation, under construction, or on order, and, in addition, three commercial nuclear fuel reprocessing facilities have received operating licenses or are under construction. The existence of a uranium mine or mill, uranium hexafluoride plant, enrichment facility, fuel fabrication plant, fuel reprocessing plant, or ultimate waste depository does not depend upon the licensing of any one nuclear power reactor, nor does the cold or irradiated fuel or waste from any one reactor make more than a fractional contribution, if any, to the effects of such activities or facilities. Uranium mining and milling, uranium hexafluoride production, isotopic enrichment, and fuel fabrication will contribute fuel to many nuclear reactors and the effects associated with fuel reprocessing and waste disposal will be those associated not only with nuclear power reactors now operating or under construction, but also with those that are no longer in operation and those that are planned for the future. There does not appear to be any way to ascertain with any degree of certainty which of the uranium mines or mills, uranium hexafluoride plants, isotopic enrichment facilities, and fuel fabrication plants in existence or to be operated in the future will contribute fuel to a given nuclear power reactor, or which of the various fuel reprocessing plants or commercial burial grounds now in existence or to be constructed from time to time will receive irradiated fuel or wastes from any given nuclear power reactor.

Many of the various elements in the nuclear fuel cycle involve varying methods or processes with different environmental and other effects and there is no reason to believe that during the useful life of any given nuclear power reactor other methods or processes with different effects will not be developed. In addition, effects of uranium milling and mining, uranium hexafluoride production, fuel element fabrication, spent fuel reprocessing, operation of licensed burial grounds, and transportation incident to each of the above, are, except as those activities are subject to agreement State jurisdiction, the subject of Commission NEPA review proceedings associated with issuance of materials or facility licenses that are separate from the review proceedings for issuance of licenses for nuclear power reactors.

Cost-benefit analyses of nuclear power reactor license applications should contain a full and frank disclosure and consideration of costs and benefits of the proposed action. The results of the application of this principle to the question of inclusion of environmental effects associated with the fuel cycle are not entirely clear. As the above discussion indicates, the fractional contribution, if any, of the environmental effects of the fuel cycle to the cost-benefit balance for a particular nuclear reactor is difficult, and may be impossible, to ascertain with any degree of certainty. This suggests that such matters, if they are to be considered at all, be considered in a generic fashion through the rule making process. The Commission's regulatory staff has prepared a report entitled "Environmental Survey of the Nuclear Fuel Cycle," dated November 6, 1972, which provides a basis for an informed consideration of the generic question of the environmental impact associated with the uranium fuel cycle in light water cooled nuclear power reactor licensing proceedings.

To aid the Commission in its consideration of possible amendments to Appendix D to 10 CFR Part 50 of its regulations that would deal with the question of the account to be taken of the environmental effects associated with the uranium fuel cycle in individual cost-benefit analyses for light water-cooled nuclear power reactors, interested persons are invited to submit comments and suggestions, together with relevant data and information, with respect to possible additions to 10 CFR Part 50 along the following alternative lines:

(1) In the case of light water-cooled nuclear power reactors, the applicant's environmental report and the Commission's detailed statement shall contain a full discussion of, inter alia, the environmental effects of the transportation of cold fuel to the reactor and irradiated fuel from the reactor to a fuel reprocessing plant and the transportation of low level waste and high level solid wastes (other than irradiated fuel) from the reactor to depositories. Those documents need not cover the environmental effects of uranium mining and milling, the production of uranium hexafluoride, isotopic enrichment, fuel fabrication, reprocessing of irradiated fuel, disposal of low level and high level solid wastes or transportation related to such activities (other than transportation of cold fuel to, and irradiated fuel from, the reactor), since the environmental effects of those activities as related to a particular light water-cooled nuclear power reactor have been analyzed in the Commission's "Environmental Survey of the Nuclear Fuel Cycle" and, when factored into the cost-benefit analysis, are sufficiently small as not to affect significantly the resultant conclusion. The environmental effects of the latter activities will generally be considered in detail in proceedings in which approval for such activities, or closely related activities, is sought.

(2) Or in the case of light water-cooled nuclear power reactors, the applicant's environmental report and the Commission's detailed statement shall contain a full discussion of, inter alia, the environmental effects of the transportation of cold fuel to the reactor and irradiated fuel from the reactor to a fuel reprocessing plant and the transportation of low level wastes and high level solid wastes (other than irradiated fuel) from the reactor to depositories. In such documents, the contribution of the environmental effects of uranium mining and milling, the production of uranium hexafluoride, isotopic enrichment, fuel fabrication, reprocessing of irradiated fuel, transportation and disposal of wastes resulting from such reprocessing, disposal of low level and high level solid wastes and transportation related to such activities (other than transportation of cold fuel to, and irradiated fuel from, the reactor), to the environmental costs of licensing the nuclear power reactor, shall be as set forth in the following Table S–3 of the Commission's "Environmental Survey of the Nuclear Fuel Cycle": [1]

[1] The "Environmental Survey of the Nuclear Fuel Cycle" provides the supporting data for this summary table.

TABLE S–3

SUMMARY OF ENVIRONMENTAL CONSIDERATIONS FOR NUCLEAR FUEL CYCLE (NORMALIZED TO MODEL LWR ANNUAL FUEL REQUIREMENTS)

Natural resource use	Total
Land (acres):	
Temporarily committed	63
Undisturbed area	45
Disturbed area	18
Permanently committed	4.6
Overburden moved (MT×10⁻⁴)	2.7
Water (gallons×10⁻⁴):	
Discharged to air	163
Discharged to water bodies	11,052
Discharged to ground	123
Total	11,338
Fossil fuel:	
Electrical energy (mw.-hr.×10⁻³)	317
Equivalent coal (MT×10⁻²)	116
Natural gas (s.c.f.×10⁻⁶)	103

Effluents—Radiological (curies)	Total
Gases (including entrainment):	
Rn-222	83
Ra-226	.02
Th-230	.02
Uranium	.046
Tritium (×10⁻³)	12
Kr-85 (×10⁻³)	350
I-129	.002
I-131	.02
Fission products	1.0
Transuranics	.004
Liquids:	
Uranium and daughters	2.1
Ra-226	.027
Th-230	.27
Th-234	.001
Other uranium daughters	.001
Ru-106	4
Tritium (×10⁻³)	6.2
Solids (buried):	
Other than high level	1,200
Thermal (B.t.u. ×10⁻⁴)	3,370

Effluents—Chemical (MT)	Total
Gases (including entrainment):[1]	
SO_x	4400
NO_x	1170
Hydrocarbons	11.3
CO	28.7
Particulates	1156
Other gases:	
F-	1.0
Liquids:	
$SO_4^=$	5.8
NO_3^-	8.2
Fluoride	0.4
Ca^+	5.4
Cl^-	8.2
Na	13.5
NH_3	8.4
Fe	0.4
Tailings solutions (×10⁻³)	240
Solids	91,000

Maximum effect per annual fuel requirement of model 1000 MWe LWR
Principally from mills—Maximum annual dose rate <4 percent of average natural background within 5 miles of mill. Results in 0.06 man-rem per annual fuel requirement. Due to dilute concentration and short half-life of principal component, exposure beyond a 5-mile radius is miniscule relative to natural background.
Principally from fuel reprocessing plants—Whole body dose is 4.4 man-rem for population within 50-mile radius. This is <0.005 percent of average natural background dose to this population.
Principally from milling—Included in tailings liquor and returned to ground—no effluents; therefore, no effect on environment.
From UF_6 production—concentration <5 percent of 10 CFR 20 for total processing of 27.5 model LWR annual fuel requirements.
From fuel fabrication plants—concentration <1 percent of 10 CFR 20 for total processing 26 annual fuel requirements for model LWR.
From reprocessing plants—maximum concentration <4 percent of 10 CFR 20 for total reprocessing of 26 annual fuel requirements for model LWR.
From mills—Included in tailings returned to ground—no significant effluent to the environment.

[1] Estimated effluents based upon combustion of equivalent coal for power generation.
[2] 1.2 percent from natural gas use and process.

The Commission will hold an informal rule-making hearing on possible amendments described in (1) and (2) above on February 1, 1973, at 10 a.m. The location and the presiding officer will be designated in a notice that will be published in the FEDERAL REGISTER in the near future.

Interested persons are invited to attend the hearing and present oral or written statements. Any person who intends to present views at this hearing should furnish in writing his name and the name of the organization he represents to the Secretary of the Commission by January 1, 1973. The hearing will be conducted as a legislative-type hearing. Since the hearing will be part of a rule making, rather than an adjudicatory, proceeding, the provisions of Subpart G, "Rules of General Applicability," of 10 CFR Part 2, the Commission rules of practice, will not be applicable.

Nothing herein shall be construed as affecting the continuing validity of the above-described holdings by the Appeal Board in the Vermont Yankee proceeding during the course of this rule making proceeding, and they shall continue in effect unless and until modified by promulgation of a regulation or other Commission action.

All interested persons who desire to submit written comments or suggestions in connection with the possible amendments to Appendix D of 10 CFR Part 50 or the "Environmental Survey of the Nuclear Fuel Cycle," should send them to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, within sixty (60) days after publication of this notice in the FEDERAL REGISTER.

Copies of comments on this notice as well as the "Environmental Survey of the Nuclear Fuel Cycle," dated November 6, 1972, may be examined at the Commission's Public Document Room at 1717 H Street NW., Washington, DC 20545. In addition, copies of the environmental survey may be obtained upon request addressed to the Deputy Director for Fuels and Materials, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

(Sec. 161, 68 Stat. 948; sec. 102, 83 Stat. 853, 42 U.S.C. 2201, 4332)

Dated at Germantown, Md., this 10th day of November 1972.

For the Atomic Energy Commission.

PAUL C. BENDER,
Secretary of the Commission.

CIVIL AERONAUTICS BOARD

[14 CFR Parts 207, 208, 212, 214]

[Economic Regs. Docket No. 24908; EDR–237]

CHARTER GROUPS

Suspension of "Prior Affinity" Charter Authority Pending the Travel Group Charter Experiment

NOVEMBER 9, 1972.

Notice is hereby given that the Civil Aeronautics Board is considering whether it should propose amendments of Parts 207, 208, 212, and 214 of the Board's Economic Regulations which would suspend the "prior affinity" charter rules pending the travel group charter experiment. The principal features of the proposal are set forth in the attached explanatory statement. The amendments are being considered under the authority of sections 204(a), 401, 402, and 1001 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754 (as amended), 757, 788; 49 U.S.C. 1324, 1371, 1372, and 1481.

Interested persons may participate in this proceeding through submission of twelve (12) copies of written data, views, or arguments pertaining thereto, addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Individual members of the general public who, as prospective passengers, could be affected by the outcome of this proceeding, may participate in the advance notice of rule making through submission of comments in letter form to the Docket Section at the above-indicated address, without the necessity of filing additional copies thereof. All relevant material in communications received on or before December 15, 1972, will be considered by the Board before it takes further action in this proceeding. Copies of such communications will be available for examination by interested persons in the Docket Section of the Board, Room 712, Universal Building, 1825 Connecticut Avenue NW., Washington, DC, upon receipt thereof.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

EXPLANATORY STATEMENT

By SPR–61, adopted and effective September 27, 1972, the Board provided for a new class of charter called Travel Group Charters (TGC), which will be applicable to all direct air carriers and

foreign air carriers. The new type of charter will enable any 40 or more per-

do not permit the operation of travel group charters?

pursuant to § 0.251(b) of the Commission's rule.

"nationwide" loan without "retsinage" by a local servicer if the institution which

XUM

foreign air carriers. The new type of charter will enable any 40 or more persons to be formed into a charter group, regardless of any prior affinity among such persons, provided that certain prescribed conditions and limitations are met.

Among the general conditions of the TGC are the following: (1) The cost of the charter must be shared equally by all participants; (2) each participant must pay a nonrefundable deposit [1] of no less than 25 percent of the pro rata charter price at least 3 months before, and the full balance at least 60 days before the scheduled flight departure; (3) the charter must be for a round trip and be for a prescribed minimum stay (7 days for North American charters, as defined in the rule, or 10 days for all other charters); (4) no earlier than 4 months, and no later than 3 months, prior to scheduled departure the charter organizer and the carrier must jointly file with the Board various documents, including a "main list" of charter participants, and there may also be filed at the same time a "standby list" of persons who are interested in becoming substituted, as assignees, for "main list" participants; and (5) only charter participants whose names were included in the lists filed at least 3 months previously may be passengers on the TGC flight, and of those participants at least 80 percent must be from the "main list."

In the preamble to the travel-group charter rule,[2] we stated that we were not then determining the issue of whether TGC's should be a substitute for, rather than alternative to, the existing affinity charters,[3] but that we would institute in due course a rule making proceeding to consider this particular issue. Accordingly, we are now instituting this rule making proceeding to determine whether existing affinity charter rules should be suspended during the pendency of the TGC experiment.

There are, of course, sound reasons in favor of eliminating affinity charter authority. Indeed, our very adoption of the TGC rule was largely based on our view that the existing affinity charter rules are unsatisfactory,[4] because they tend to discriminate against members of the public who do not belong to charter worthy organizations having a membership large enough to successfully mount a charter program, and also because they have proven to be extremely difficult to enforce. Moreover, since the TGC's are expected to attract principally those very passengers who are prospective participants in affinity charters (i.e., price conscious vacationers), suspension of affinity charters during the pendency of the TGC experiment would appear to be especially desirable, in order to more validly test the full potential of TGC's as a replacement for affinity charters. Indeed, unless the Board suspends the affinity charter rules during the TGC experiment, there will be a substantial incentive to operate illegal so-called affinity charters rather than undertake the operation of TGC's, since the restrictions surrounding TGC operations are more difficult to evade than those surrounding affinity charters. The basic restriction on affinity charters is the affinity concept itself, i.e., availability of such charters is limited to bona fide organizations interested in providing low cost air transportation to their bona fide members on a nonprofit basis. However, if that basic restriction is satisfied (or evaded, in the case of an illegal charter), operation of an affinity charter is not subject to some of the technical restrictions imposed on a TGC. For example, charters operated under our affinity charter rules, unlike those operated under our TGC rules, do not entail: (1) payment of a nonrefundable 25-percent deposit 3 months in advance of flight; (2) payment of the full price 60 days in advance; (3) restricting participation in the flight to persons whose names were filed with the Board at least 3 months in advance; (4) round trip and minimum-stay requirements; or (5) cancellation of the charter if, as a result of defaults, the pro rata charter price exceeds a specified maximum.

Another incidental benefit arising from the suspension of the affinity charter rules is that we would thereby eliminate operators who specialize in consolidating passengers for illegal so-called affinity charters. Elimination of these operators would, in turn, tend to eliminate the problem of passenger strandings abroad, since such strandings are mainly caused by illegal operators. TGC operators, in contrast, are required to be bonded and to place customer deposits in escrow.

On the other hand, the elimination—even temporarily—of affinity charters may well create a serious hiatus in our rules, and cause inconvenience to the traveling public, by precluding all charters which cannot satisfy the technical requirements of the TGC rule although they otherwise comport fully with the basic concept of bona fide group travel which should be charter worthy. For example, a bona fide group wishing to attend a special event could not charter air transportation under the TGC rule unless such special event is to occur at least 3 months hence and the group is willing to meet the applicable minimum-stay requirements.

We have determined to follow the more tentative procedure afforded by advance notice of rule making, rather than the customary notice of a specific proposed rule, because we believe that the step of suspending traditional affinity charter rules during the pendency of a novel charter experiment should be taken, if at all, only after we have had an opportunity to consider as much factual material and discussion of alternatives as we are able to obtain. Accordingly, we are requesting the parties to file with their comments such documentation as is available to support their respective positions. Upon review of the comments and the accompanying data, the Board will then be in a position to decide what rule, if any, should be proposed in this proceeding.

The Board has tentatively concluded that any suspension of the affinity charter rules would not take effect before October 1, 1973, lest such suspension unduly disrupt plans already made, or about to be made, for air transportation under our affinity charter rules during the 1973 summer season. Such plans are frequently confirmed by the participating parties many months in advance of scheduled flight departure, and it seems obvious that the Board could not complete the pending rule making proceeding in time to avoid disruption of plans for the coming peak season. Therefore, we expect to postpone the effectiveness of any rule which may evolve from this proceeding until after completion of the 1973 summer season.

While we shall of course welcome all relevant comments, views, and information, we specifically request interested parties to focus upon the following questions:

(1) What would be the economic impact on total charter operations of the suspension of the affinity charter rules, i.e., how much of the total charter market could not be accommodated by the TGC rule? What is the basis for such conclusion? As much documentation should be provided as possible, as to the type and volume of affinity charters which could not be so accommodated.

(2) Should affinity charters be permitted to operate, but only on a prior approval basis? If so, should prior approval be required on an ad hoc basis for each flight, or could some more generalized type of prior approval be devised? To the maximum extent possible, the Board would obviously wish to avoid the administrative burden which a prior approval procedure entails.

(3) If the Board is to make special provision for the operation of certain types of affinity charters, such as the "special event" type discussed above, how could such an exception be expressed so as to be unambiguous, self-executing, and easily enforceable?

(4) Should special provision be made for charters to or from countries which do not permit the operation of travel group charters?

The Board also invites comments as to what regulatory action, if any, should be taken with respect to affinity group fares offered on scheduled services, in the event that affinity charters are suspended.

[FR Doc.72-19641 Filed 11-14-72;8:53 am]

[1] After contracts are filed with the Board, refund of this 25 percent deposit is permitted only in case of death or illness of a charter participant, and only if such event occurs before the "tentative adjusted price" is computed (no later than 45 days before the date of scheduled flight departure). After that time no payments are refundable to defaulting participants.

[2] SPR-61, page 6 (mimeo.).

[3] By "affinity charters" we mean pro rata charters of all or part of an aircraft by groups of persons who share a "prior affinity" (e.g., membership in a social or professional organization). These have been the traditional group charters and are authorized to be performed by certificated air carriers and foreign air carriers under the following subparts of the rules: Subpart B of Part 207; Subpart C of Part 208; Subpart B of Part 212; and Subpart A of Part 214.

[4] See, for example, SPR-61, supra, pages 1-2 (mimeo.).

of another insured institution servicing

written approval of the Corporation has

to submit written comments thereon by September 29, 1972.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN W. PETTIT,
General Counsel.

[FR Doc.72-19653 Filed 11-14-72;8:52 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 2]

[Docket No. 19547]

SPACE WARC, GENEVA, 1971

Extension of Time for Filing Comments

Order. In the Matter of amendment of Part 2 of the Commission's rules to conform, to the extent practicable, with the Geneva Radio Regulations, as revised by the Space WARC, Geneva, 1971, Docket No. 19547.

1. On September 29, 1972, the Commission, by its General Counsel, granted a 30-day extension of time for the filing of comments and replies in this proceeding in response to motions by the Central Committee on Communication Facilities of the American Petroleum Institute and the Utilities Telecommunications Council.[1] Comments were accordingly filed on October 30, 1972, by some 17 parties raising a number of issues concerning the proposed rule amendments. Subsequently, there have been informal requests by several parties and a motion filed by the Communications Satellite Corp. (Comsat) for a brief extension of the reply comment date. Comsat states that it has been unable to analyze adequately and respond to the comments of other parties in the short time allowed for reply comments.

2. In our earlier Order extending the time for filing comments in this proceeding, we pointed out the urgency of completing this rule making to align the U.S. Table of Frequency Allocations with the new international regulations adopted at the 1971 World Administrative Radio Conference on Space Telecommunications, which become effective on January 1, 1973. However, considering the number of comments filed and the importance of this proceeding, a 1-week extension of time for the filing or replies would appear to be warranted and should not prejudice the interests of any concerned party.

3. Accordingly, the date for filing reply comments in this proceeding is extended from November 10 to November 17, 1972. Authority for this action is taken

[1] 37 F.R. 23162, October 7, 1972.

FEDERAL HOME LOAN BANK BOARD

[12 CFR Part 563]

[No. 72-1266]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Nationwide Lending and Participation Loans

OCTOBER 31, 1972.

Section 563.9(a)(4) of the rules and regulations for insurance of accounts (12 CFR 563.9(a)(4)) imposes certain requirements with respect to the servicing of "nationwide" loans made or purchased by insured institutions. Under the present regulation, each such loan must be serviced by an FSLIC-insured institution, an FDIC-insured bank, or an approved FHA mortgagee having an office within 100 miles of the real estate securing the loan. The Federal Home Loan Bank Board considers it desirable to liberalize these servicing requirements in several respects. First, it proposes to expand the list of eligible servicers to include any wholly owned subsidiary of an FDIC-insured bank and any savings and loan "service corporation." Second, the 100-mile requirement would be enlarged in the case of servicing by an FSLIC-insured institution having a "normal lending territory" which extends beyond the 100-mile limit (usually due to "grandfather" lending rights). Third, the local servicing requirement would no longer apply in the case of a loan in excess of $500,000.

Section 563.9-1(b) of such regulations (12 CFR 563.9-1(b)), which governs participations in loans on real estate located outside of the "normal lending territory" of an insured institution, imposes certain requirements with respect to the servicing of such loans and "retainage" interests in such loans. Under the present regulation, the real estate securing a participation loan must be located within 100 miles of an office of an "approved lender" servicing such loan and having a certain "retainage" interest in such loan. The Board considers it desirable to liberalize these requirements in several respects.

With regard to servicing, the Board proposes to enlarge the 100-mile requirement in the case of an FSLIC-insured institution having a "normal lending territory" extending beyond such limit. As to the "retainage" requirement, the proposal would permit participation in a "nationwide" loan without "retainage" by a local servicer if the institution which held the whole loan keeps the required "retainage" interest in such loan. The proposal would also permit the local servicing requirement to be met by a wholly owned subsidiary of an "approved lender" holding the required "retainage" in other participation loans.

Accordingly, it is hereby proposed to amend 12 CFR Part 563 by revising §§ 563.9(a)(4) and 563.9-1(b) (1), (2), and (3) to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue NW., Washington, DC 20552, by December 15, 1972, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

1. It is proposed to amend § 563.9 by revising subparagraph (4) of paragraph (a) thereof to read as follows:

§ 563.9 Loans and investments.

(a) *General provisions.* • • •

(4) Any insured institution which, at the close of its most recent semiannual period, had a ratio of scheduled items (other than assets acquired in a merger instituted for supervisory reasons) to specified assets of less than 2.5 percent may, to the extent that it has legal power to do so, make, or invest its funds in, any loan on the security of real estate located outside its normal lending territory but within any State of the United States, subject to the following requirements:

(i) The aggregate amount of investment in all such loans may not exceed 10 percent of the insured institution's assets;

(ii) The loan must be serviced by or through one of the following:

(*a*) An insured institution;

(*b*) A lending institution whose deposits are insured by the Federal Deposit Insurance Corporation, or a wholly owned subsidiary of any such lending institution;

(*c*) A service corporation in which the entire capital stock is held by one or more insured institutions or institutions which are eligible to apply for insurance of accounts under title IV of the National Housing Act, as amended; or

(*d*) An approved Federal Housing Administration mortgagee which has furnished to the insured institution documentation of its current approved status.

(iii) Except in the case of a loan in an amount in excess of $500,000, the real estate security for the loan must be located within the normal lending territory

(d) *Adjustment for negative net worth account balances.* In determining

greater of (i) the applicable Federal in-

(*a*) Before a minimum net worth percentage is applied to an asset item, the

XUM V37-221-NOV15-72 XUM

XUM

V37-221-NOV15-72 XUM

of another insured institution servicing such loan or within 100 miles of the principal or a branch office of any other servicer of such loan; and

(iv) The insured institution must have obtained a signed report of appraisal of the real estate security for the loan by an appraiser, designated by such institution, who has no interest, direct or indirect, in the real estate or in any loan on the security thereof.

* * * * *

2. It is proposed to amend § 563.9–1 by revising subparagraphs (1), (2), and (3) of paragraph (b) thereof to read as follows:

§ 563.9–1 Participation loans.

* * * * *

(b) *Loans on real estate located outside normal lending territory*—(1) *General.* Subject to the provisions of this section, any insured institution, to the extent it has legal power to do so, may purchase from any other approved lender a participation interest in any loan secured by a first lien upon real estate located outside its normal lending territory, and may participate with any other approved lender or lenders in the making of any such loan, if such loan is in one of the following three categories:

(i) The loan is an insured loan or a guaranteed loan;

(ii) (*a*) The loan is secured by property located (*1*) within the normal lending territory of another insured institution servicing such loan or (*2*) within 100 miles of the principal or a branch office of any other approved lender (or wholly owned subsidiary thereof) servicing such loan; and (*b*) at the close of the participation transaction, such servicer or any approved lender holding all of the stock of such servicer has an interest in such loan of at least—

(*1*) 10 percent, if the loan is secured by residential real estate; or

(*2*) 50 percent, if the loan is secured by real estate other than residential real estate; or

(iii) (*a*) The loan was originally made or purchased by an insured institution under the provisions of paragraph (a)(4) of § 563.9 and is being serviced in accordance therewith; and (*b*) at the close of the participation transaction, such insured institution has an interest in such loan of at least—

(*1*) 10 percent, if the loan is secured by residential real estate; or

(*2*) 50 percent, if the loan is secured by real estate other than residential real estate.

(*2*) *Scheduled items limitation.* (i) No insured institution may, pursuant to either subdivision (ii) or (iii) of subparagraph (1) of this paragraph, purchase a participation interest from, or enter into a participation with, any insured institution which had, at the close of its immediately preceding semiannual period, scheduled items (other than assets acquired in a merger instituted for supervisory reasons) in excess of 4 percent of its specified assets, unless the prior written approval of the Corporation has been obtained as provided in subdivision (ii) of this subparagraph.

(ii) An insured institution having scheduled items in excess of 4 percent of its specified assets may request Corporation approval for other insured institutions to purchase from it participation interests in loans and to participate with it in the making of loans pursuant to subparagraph (1) of this paragraph. Any such request by the institution for Corporation approval shall be transmitted to the Director, Office of Examinations and Supervision, Federal Home Loan Bank Board, Washington, D.C. 20552, with a copy thereof to the Supervisory Agent.

(3) *Requirements as to servicing and retainage.* An insured institution may maintain a participation interest in a loan, other than an insured loan or a guaranteed loan, only if the relevant servicing and retainage requirements contained in subdivisions (ii) and (iii) of subparagraph (1) of this paragraph continue to be met. In the event that such requirements cease to be met with respect to a loan in which an insured institution has a participation interest, such institution shall dispose of such participation interest within 90 days from the date that such requirements ceased to be met, unless it has, prior to the expiration of such 90-day period, obtained the written approval of the Corporation to maintain such investment for such longer period as the Corporation may provide.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Federal Insurance Reserve and Net Worth Requirements of Insured Institutions

NOVEMBER 9, 1972.

By Resolution No. 72–951, dated August 10, 1972, the Federal Home Loan Bank Board proposed to amend Parts 563 and 571 of the rules and regulations for Insurance of Accounts (12 CFR Parts 563, 571) for the purpose of revising the regulatory provisions regarding the Federal insurance reserve and net worth requirements of insured institutions.

Notice of such proposed rule making was published in the FEDERAL REGISTER on August 25, 1972 (37 F.R. 17216–17), with an invitation for interested persons to submit written comments thereon by September 29, 1972.

After consideration of all relevant material presented by interested persons or otherwise available, the Board decided to make certain changes in the provisions of the proposal as so published. Since several of such changes could have a substantial effect on some insured institutions, the Board has determined that it is advisable to withdraw such proposal and to publish notice of proposed rule making with respect to the revised proposal and receive additional comment by interested persons. Accordingly, it is hereby proposed to amend said Parts 563 and 571 as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue NW., Washington, DC 20552, by December 1, 1972, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the general regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

1. It is proposed to amend Part 563 by revising §§ 563.11, 563.13, and 563.14 thereof to read as follows:

§ 563.11 Federal insurance reserve; establishment of and earmarking to.

(a) *Establishment of account.* Each insured institution shall set up a Federal insurance reserve account which shall be used solely for the purpose of absorbing losses. No insured institution may pay dividends or interest on savings accounts from its Federal insurance reserve account. Any insured State-chartered institution, by specific and appropriate corporate action, may permanently designate as part of its Federal insurance reserve account all of any reserve account which under the provisions of State law is established for the sole purpose of absorbing losses. Evidence of such action shall be filed promptly with the corporation.

(b) *Earmarking of net worth accounts.* Any insured institution, by specific and appropriate corporate action, and with the prior written approval of the corporation, may earmark as part of its Federal insurance reserve account (1) any portion of any other reserve account which, by such corporate action, is made subject to charges for losses only, or (2) any amount of pledged savings accounts, capital stock (where permitted by State law to be used for absorbing losses), capital surplus, contributed surplus, or retained earnings. Such corporation approval may set forth the conditions under which such earmarked amounts may be released.

(c) *Reserves of Federal associations.* The general reserves of Federal savings and loan associations are deemed to meet the requirements of paragraph (a) of this section.

(d) *Adjustment for negative net worth account balances.* In determining the amount of the Federal insurance reserve account, any net negative balance in the aggregate of all other net worth accounts shall be deducted from the Federal insurance reserve account.

§ 563.13 Required amounts and maintenance of Federal insurance reserve and net worth.

(a) *Federal insurance reserve requirements*—(1) *Minimum required amounts.* After the fiscal year in which a certificate of insurance is issued, each insured institution shall build up its Federal insurance reserve account so that, as of the close of business on the annual closing date following each anniversary of the date of insurance of accounts, such account shall be at least equal to the amount obtained by multiplying the percentage corresponding to such anniversary date, as set forth in the table below, by either (i) the amount of the institution's savings account balance on such closing date, or (ii) the average of the savings account balance on such closing date and on one or more of the 4 immediately preceding annual closing dates, provided all such dates are consecutive. In any event, unless otherwise permitted in writing by the corporation, each insured institution shall build up its Federal insurance reserve account so that, at any one annual closing date prior to the twenty-sixth anniversary of its insurance of accounts, such account shall be at least equal to 5 percent of the institution's savings account balance on such closing date.

Anniversary	*Percentage*
2	0.50
3	0.75
4	1.00
5	1.25
6	1.50
7	1.75
8	2.00
9	2.25
10	2.50
11	2.75
12	3.00
13	3.25
14	3.50
15	3.75
16	4.00
17	4.25
18	4.50
19	4.75
20 and thereafter	5.00

(2) *Maintenance of minimum level.* Each insured institution must maintain in its Federal insurance reserve account (until the next annual closing date) at least the dollar amount required at any annual closing date under the provisions of the first sentence of subparagraph (1) of this paragraph.

(b) *Net worth requirements*—(1) *Minimum required amounts.* After the fiscal year in which a certificate of insurance is issued, each insured institution shall build up its net worth so that, as of the close of business on the annual closing date following each anniversary of the date of insurance of accounts, such net worth shall be at least equal to the greater of (i) the applicable Federal insurance reserve account requirement plus an amount equal to 20 percent of the institution's scheduled items, or (ii) the amount determined under the Asset Composition and Net Worth Index set forth in subparagraph (2) of this paragraph, as adjusted by multiplying such amount by a fraction of which the numerator is the applicable Federal insurance reserve percentage (from the table set forth in paragraph (a)(1) of this section) and the denominator is 5.00.

(2) *Asset Composition and Net Worth Index.* (i) The Asset Composition and Net Worth Index referred to in subparagraph (1) of this paragraph shall be as follows:

ASSET COMPOSITION AND NET WORTH INDEX

Asset Category	*Minimum Net Worth Percentage*
First mortgage loans and contracts:	
Insured or guaranteed mortgage loans	2
Mortgage loans, participations, and mortgage-backed certificates insured or guaranteed by an agency or instrumentality of the United States	2
Conventional mortgage loans	
Single-family dwellings	3
Homes—2–4 dwelling units	5
Multifamily—more than four dwelling units	6
Other improved real estate—commercial and industrial	7
Developed building lots and sites	6
Acquisition and development of land	8
Undeveloped land	8
Nonconforming mortgage loans and contracts to facilitate sale of real estate owned	8
Other loans:	
Property improvement, alteration, or repair	
Insured or guaranteed loans	3
Other than insured or guaranteed loans	5
Educational loans	
Insured or guaranteed loans	2
Other than insured or guaranteed loans	6
Mobile home chattel paper	6
Insured or guaranteed	3
Other than insured or guaranteed	6
Equipping and consumer loans	6
Real estate:	
Foreclosed and in judgment	10
Held for development or investment	7
Office premises—	
Land and buildings	3
Leasehold and leasehold improvements	3
Fixtures	3
Investment securities—Non-liquid:	
Securities other than those that qualify as liquid assets under § 523.10(g) or would so qualify except for maturity	3
Other assets:	
Furniture and equipment	10
Investment in service corporations and other subsidiaries	5
All other (except excluded assets)	3

(ii) The following rules shall apply in making determinations under such Index.

(*a*) Before a minimum net worth percentage is applied to an asset item, the amount of such asset item may be reduced by the amount of (*1*) any applicable allowance or reserve for depreciation, valuation allowance or reserve, specific reserve, or loss reserve, and (*2*) any applicable loans-in-process.

(*b*) The following are "excluded assets" and shall not be included in any asset category under such Index:

(*1*) Cash on hand and demand deposits in banks;

(*2*) Loans on the security of savings accounts;

(*3*) Prepaid FSLIC insurance premiums and secondary reserve prepayments;

(*4*) Securities that qualify as liquid assets under § 523.10(g) of this chapter or would so qualify except for maturity;

(*5*) Time deposits that qualify as liquid assets under § 523.10(g) of this chapter;

(*6*) Stock of a Federal Home Loan Bank or the Federal National Mortgage Association; and

(*7*) Prepaid expenses.

(*c*) Deferred income (in any form) may not be deducted from any asset item.

(3) *Maintenance of minimum level.* Each insured institution must maintain (until the next annual closing date) at least the dollar amount of net worth required at any annual closing date under the provisions of subparagraph (1) of this paragraph.

(c) *Failure to meet Federal insurance reserve or net worth requirements.* If any insured institution fails to meet the Federal insurance reserve requirements set forth in paragraph (a) of this section or the net worth requirements set forth in paragraph (b) of this section, the corporation may, whether through enforcement proceedings (as provided in parts 565 and 566 of this subchapter) or otherwise, require such institution to take any one or more of the following corrective actions:

(1) Increase the amount of its Federal insurance reserve account and/or net worth to a specified level or levels;

(2) Convene a meeting or meetings of its board of directors with the Director, Office of Examinations and Supervision, or his designee, for the purpose of accomplishing the objectives of this section;

(3) Reduce the rate of earnings that may be paid on savings accounts;

(4) Limit the receipt of savings to deposits to existing savings accounts;

(5) Cease or limit the issuance of new savings accounts of any or all classes or categories, except in exchange for existing savings accounts;

(6) Cease or limit lending or the making of a particular type or category of loan;

(7) Cease or limit the purchase of loans or the making of specified other investments;

(8) Limit operational expenditures to specified levels;

(9) Increase liquid assets and maintain such increased liquidity as specified levels; or

(10) Take such other action or actions as the corporation may deem necessary

companies; deferred income taxes, Docket No. R–446.

this notice in the FEDERAL REGISTER will be considered. All written comments re-

more than nonwillful or a mere inadvertence. The Committee may act on a

indebtedness provided the requirements of paragraph (a) of this section are met.

(1) Fraud or misrepresentation of a material fact (see § 13.207(b)).

(2) Material fault: The inexcusable

(10) Take such other action or actions as the corporation may deem necessary or appropriate for the protection of the corporation, the insured institution, or depositors or investors in the insured institution.

§ 563.14 Payment of dividends and interest where losses are chargeable to the FIR.

No insured institution which has recognized losses chargeable to its Federal insurance reserve account may declare any dividends or pay any interest on savings accounts unless the amount standing to the credit of such account, after deduction of all such losses, is equal to at least the amount required under § 563.13. However, for any period when recognized losses are chargeable to such reserve and the amount remaining to the credit of such account after deduction of all such losses is less than the amount required under § 563.13, the declaration of such dividends or the payment of such interest on savings may be made if prior written approval is obtained from the corporation. The corporation hereby approves, for any such insured institution which has been insured for a period of 20 years or more and whose Federal insurance reserve account, prior to the charging of such losses, equalled at least 5 percent of all savings accounts, the declaration of dividends or the payment of interest on savings accounts, if such insured institution provides for the transfer to its Federal insurance reserve account of not less than 25 percent of its net income (as defined in § 572.3 of this subchapter) for such distribution period.

§ 571.3 [Rescinded]

2. It is proposed to amend Part 571 by rescinding § 571.3 thereof.

(Secs. 402, 403, Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R 4981, 3 CFR, 1943–48 Comp., p. 1071)

VETERANS ADMINISTRATION

[38 CFR Part 13]

RECOVERY OF PAYMENT OF INDEBTEDNESS[1]

Single Standard for Waiver

Public Law 92–328 (86 Stat. 393), enacted June 30, 1972, amends sections 1820 and 3102, title 38, United States Code, to provide a single and a more equitable standard in lieu of dual sets of standards, under which the Administrator of Veterans Affairs may waive collection of certain debts.

The law extends the term "overpayment" to the indebtedness of a veteran-transferee and a veteran-purchaser of a vendee account; it permits waiver of certain debts or overpyaments heretofore excluded; and increases the time limitation to 2 years for application for waiver in other than loan program. Sections 13.207 and 13.208 are amended accordingly.

Sections 13.208 and 13.209 reflect the single standard for waiver and § 13.210 prescribes the application of the standard and elements to be considered. Also, § 13.209 authorizes the right to request waiver in the loan program not only to a veteran-borrower, but also to a veteran-transferee, a veteran-purchaser of a vendee account, and to a former spouse of a veteran. Other nonveteran obligors are excluded from waiver consideration.

The law makes no provision for (a) initiating a new claim for waiver or, (b) a waiver request by a veteran other than one so defined in sections 101 and 1801 of 38 U.S.C. This excludes a request for waiver made by a serviceman.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (232H), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All relevant material received not later than 30 days after publication of this notice in the FEDERAL REGISTER will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in Room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Notice is also given that it is proposed to make any regulations that are adopted effective June 30, 1972, date of enactment of Public Law 92–328.

1. Section 13.205 is revised to read as follows:

§ 13.205 Legal and technical assistance.

Legal questions involving a determination under § 2.6(f)(4) of this chapter will be referred to the Chief Attorney for action in accordance with delegations of the General Counsel, unless there is in existence a General Counsel's opinion or an approved Chief Attorney's opinion dispositive of the controlling legal principle. As to matters not controlled by § 2.6(f)(4) of this chapter, the chairman of the field station Committee or at his instance, a member, may seek and obtain advice from the Chief Attorney on legal matters within his jurisdiction and from other division chiefs in their areas of responsibility, on any matter properly before the Committee. Guidance may also be requested from Central Office Board.

2. Section 13.207 is revised to read as follows:

§ 13.207 Waiver of overpayments.

The term "overpayment" means payments made and determined to be erroneous, indebtedness resulting from services erroneously furnished, and indebtedness of a veteran-borrower or veteran-transferee under the loan guaranty program or the indebtedness of his spouse, under laws administered by the Veterans Administration.

(a) Benefits subject to waiver include indebtedness due the Veterans Administration because of or in connection with hospitalization, domiciliary care, or treatment of a veteran, a person who claimed he was a veteran, or a person to whom such benefits were granted on the assumption that he was an eligible veteran.

(b) In any case where there is an indication of fraud or misrepresentation of a material fact on the part of the debtor or any other party having an interest in the claim, action on a request for waiver will be deferred pending appropriate disposition of the matter. However, the existence of a prima facie case of fraud shall, nevertheless, entitle a claimant to an opportunity to make a rebuttal with countervailing evidence; similarly, the misrepresentation must be

[1] Notice of proposed rule making in Docket No. R–424 was published at 36 F.R. 16069, Aug. 19, 1971, and in Docket No. R–446 at 37 F.R 13805, July 14, 1972.

more than nonwillful or a mere inadvertence. The Committee may act on a request for waiver concerning such debts, after the Chief Attorney has determined that prosecution is not indicated, or the Department of Justice has notified the Veterans Administration that the alleged fraud or misrepresentation does not warrant action by that department, or the Department of Justice or the appropriate U.S. Attorney specifically authorized action on the request for waiver.

3. In § 13.208, paragraphs (a) and (b) are amended to read as follows:

§ 13.208 Waiver; other than loan guaranty.

(a) *General.* Recovery of overpayments of any benefits made under laws administered by the Veterans Administration shall be waived if recovery of the indebtedness from the payee who received such benefits would be against equity and good conscience.

(b) *Application.* Request for waiver of an overpayment will be considered only if received within 2 years following the date of notice to the payee.

* * * * *

4. In § 13.209, paragraphs (a), (c), and (e) are amended and paragraph (f) is added so that the amended and added material reads as follows:

§ 13.209 Waiver; loan guaranty.

(a) *General.* An indebtedness of a veteran or the indebtedness of his spouse may be waived only when both of the following factors are determined to exist:

(1) Following default there was a loss of the property which constituted security for the loan guaranteed, insured or made under chapter 37 of title 38, United States Code; and

(2) Collection of such indebtedness would be against equity and good conscience.

* * * * *

(c) *Widow or former spouse.* A widow of a veteran or the former spouse of a veteran may be granted a waiver of her indebtedness provided the requirements of paragraph (a) of this section are met.

* * * * *

(e) *Application.* There is no time limit for filing an application for waiver of indebtedness under this section.

(f) *Exclusion.* Except as otherwise provided in this section, the indebtedness of a nonveteran obligor under the loan program is excluded from waiver.

5. Section 13.210 is revised to read as follows:

§ 13.210 Application of standard.

(a) The standard "Equity and Good Conscience," will be applied when the facts and circumstances in a particular case indicate a need for reasonableness and moderation in the exercise of the Government's rights. The decision reached should not be unduly favorable or adverse to either side. The phrase "equity and good conscience" means arriving at a fair decision between the obligor and the Government. In making this determination, consideration will be given to the following elements, which are not intended to be all inclusive:

(1) Fault of debtor: Where actions of the debtor contribute to creation of the debt.

(2) Balancing of faults: Weighing fault of debtor against Veterans Administration fault.

(3) Undue hardship: Whether collection would deprive debtor or family of basic necessities.

(4) Defeat the purpose: Whether withholding of benefits or recovery would nullify the objective for which benefits were intended.

(5) Unjust enrichment: Failure to make restitution would result in unfair gain to the debtor.

(6) Changing position to one's detriment: Reliance on Veterans Administration benefits results in relinquishment of a valuable right or incurrence of a legal obligation.

(b) In applying this single standard for all areas of indebtedness, the following elements will be considered, anyone of which, if found, will preclude the granting of waiver:

(1) Fraud or misrepresentation of a material fact (see § 13.207(b)).

(2) Material fault: The inexcusable commission or omission of an act that directly results in the creation of a debt to the Government.

(3) Lack of good faith: Absence of an honest intention to abstain from taking unfair advantage of the holder and/or the Government.

§ 13.211 [Revoked]

6. Section 13.211 *Standards for waiver; loan guaranty* is revoked.

7. In § 13.212, paragraph (b)(2)(i) is amended to read as follows:

§ 13.212 Scope of waiver decisions.

* * * * *

(b) A field station committee or Central Office Board may:

* * * * *

(2) Waive or decline to waive recovery from specific benefits or sources, except that:

(i) There shall be no waiver of recovery out of insurance of an indebtedness secured thereby; i.e., an insurance overpayment to an insured. However, recovery may be waived of any or all of such indebtedness out of benefits other than insurance then or thereafter payable to the insured.

* * * * *

8. In § 13.213, paragraph (c) is amended to read as follows:

§ 13.213 Refunds.

* * * * *

(c) Amounts which have been recovered by the U.S. Government prior to the date of receipt by the Veterans Administration of a request for waiver, will not be refunded and will be excluded from waiver.

Approved: November 9, 1972.

By direction of the Administrator.

IMPRESSION FABRIC OF MAN-MADE FIBER FROM JAPAN

Withholding of Appraisement Notice

OCTOBER 17, 1972.

Information was received on January 5, 1972, that impression fabric of man-made fiber from Japan was being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of February 24, 1972, on page 3922. The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), notice is hereby given that there are reasonable grounds to believe or suspect that the purchase price (section 203 of the Act; 19 U.S.C. 162) of impression fabric of man-made fiber from Japan is less, or is likely to be less, than the foreign market value (section 205 of the Act; 19 U.S.C. 164).

Statement of reasons. The information before the Bureau of Customs tends to indicate that the probable basis of comparison for fair value purposes will be between purchase price and the adjusted home market price of such or similar merchandise.

Purchase price will probably be calculated on the basis of a c.i.f., f.o.b., or ex-warehouse price, as applicable, with deductions made, where applicable, for ocean freight, marine insurance, inspection charges, and inland freight in Japan.

Home market price will probably be based on a weighted-average delivered price to purchasers in the home market. Where applicable, deductions will be made for inland freight. Adjustments will probably be made, where applicable, for differences in packing, credit costs, and for differences in the merchandise.

Using the above criteria, there are reasonable grounds to believe or suspect that purchase price will be lower than adjusted home market price.

Customs officers are being directed to withhold appraisement of impression fabric of man-made fiber from Japan in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

In accordance with § 153.32(b) and 153.37, Customs Regulations (19 CFR 153.32(b), 153.37), interested parties may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street NW., Washington, DC 20226, in time to be received by his office not later than 10 calendar days from the date of publication of this notice in the FEDERAL REGISTER.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than 30 days from the date of publication of this notice in the FEDERAL REGISTER.

This notice, which is published pursuant to § 153.34(b), Customs Regulations shall become effective upon publication in the FEDERAL REGISTER. It shall cease to be effective at the expiration of 6 months from the date of this publication, unless previously revoked.

[SEAL] LEONARD LEHMAN,
Acting Commissioner of Customs.

Approved: November 10, 1972.

EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

PROPOSED ALLAMUCHY MOUNTAIN STATE PARK ACQUISITION PROJECT

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the proposed Allamuchy Mountain State Park Acquisition Project and invites written comment within forty-five (45) days of this notice.

The environmental statement considers the acquisition of approximately 3,604.6 acres in a rural, mountainous area of northwestern New Jersey, containing portions lying in Warren, Sussex, and Morris Counties. The land acquired will be added to other State-owned lands in Allamuchy Mountain State Park serving the New Jersey-New York metropolitan area.

PROPOSED ROADS AND UTILITIES, WILLOW CREEK RECREATION SITE, HERON RESERVOIR, N. MEX.

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the proposed construction of Roads and Utilities, Willow Creek Recreation Site, Heron Reservoir, N. Mex., and invites written comment within forty-five (45) days of this notice. Written comment should be addressed to the Director, Southwest Region at the address given below.

The environmental statement discusses the effects of developments consisting of an entrance road and car/boat trailer parking area, residential road, complete water system, underground powerlines, comfort station, and sewage system.

Copies are available for inspection at the Office of the Director, Southwest Region, 1100 Old Sante Fe Trail, Santa Fe, NM 87501. Single copies may be obtained by writing to the same official, Post Office Box 728, Santa Fa, NM 87501.

Dated: November 6, 1972.

W. W. LYONS,
Deputy Assistant Secretary of the Interior.

U.S.-FLAG BULK CARGO VESSELS

Adoption of Standard Operating-Differential Subsidy Contract for Carrying Bulk Raw and Processed Agricultural Commodities From U.S. to U.S.S.R.

Notice is hereby given that the Maritime Subsidy Board/Maritime Administration has adopted a standard contract under which operating-differential subsidy will be paid for U.S.-flag bulk cargo vessels engaged in carrying bulk raw and processed agricultural commodities from the United States to the Union of Soviet Socialist Republics.

Copies of the contract may be obtained, without charge, from the Secretary, Maritime Subsidy Board, Maritime Administration, Washington, DC. 20235.

Dated: November 13, 1972.

By Order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

[FR Doc.72-19764 Filed 11-14-72;8:53 am]

[Docket No. S-308]

MATHIASEN'S TANKER INDUSTRIES, INC. ET AL.

Notice of Multiple Applications

Notice is hereby given that the following corporations have filed application for an operating-differential subsidy contract to carry bulk cargoes to expire on June 30, 1973 (unless extended only for subsidized voyages in progress on that date). The bulk cargo carrying vessels proposed to be subsidized and the trades in which each proposes to engage are presented also.

Applicant's name and address	Type of ship	Name of ship
Mathiasen's Tanker Industries, Inc., Public Ledger Building, Philadelphia, Pa. 19106.	Tanker	SS Prarie Grove.
	do	SS Joseph D. Potts.
	do	SS Sohio Intrepid.
	do	SS Sohio Resolute.
Freighters, Inc., 111 Sutter Street, Suite 1412, San Francisco, CA 94104.	Bulk carrier	SS American Wheat.
American Rice Steamship Co., 111 Sutter Street, Suite 1412, San Francisco, CA 94104.	do	SS American Rice.
Texas City Tankers Corp., Post Office Box 1271, Texas City, TX 77590.	Tanker	SS William J. Fields.
Intercontinental Bulktank Corp., 511 Fifth Avenue, New York, NY 10017.	do	ST Overseas Alaska.
Ocean Tankships Corp., 511 Fifth Avenu, New York, NY 10017	do	ST Overseas Vivian.
Overseas Bulktank Corp., 511 Fifth Avenue, New York, NY 10017.	do	ST Oversea Arctic.

The foregoing applications may be inspected in the Office of the Secretary, Maritime Subsidy Board, Maritime Administration, U.S. Department of Commerce, Washington, D.C., during regular working hours.

These vessels are to engage in the carriage of export bulk raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the U.S. to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Liquid and dry bulk cargoes may be carried from U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk raw and processed agricultural commodities to the U.S.S.R.

Full details concerning the U.S.-U.S.S.R. export bulk raw and processed agricultural commodities subsidy program, including terms, conditions, and restrictions, upon both the subsidized operators and vessels, appear in the regulations published in the FEDERAL REGISTER on October 21, 1972 (37 F.R. 22747).

For purposes of section 605(c), Merchant Marine Act, 1936, as amended (Act), it should be assumed that each vessel named will engage in the trades described on a full-time basis through June 30, 1973 (with extension to termination of approved subsidized voyages in progress on that date). Each voyage must be approved for subsidy before commencement of the voyage. The Maritime Subsidy Board (Board) will act on each request for a subsidized voyage as an administrative matter under the terms of the individual operating-differential subsidy contract for which there is no requirement for further notices under section 605(c) of the Act.

Any person having an interest in the granting of one or any of such applications and who would contest a finding of the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes as previously specified is inadequate, must, on or before November 22, 1972, notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's rules of practice and procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing. Further, each such statement shall identify the applicant or applicants against which the intervention is lodged.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to any application(s), the purpose of such hearing will be to receive evidence relevant to: (1) Whether the application(s) hereinabove described is one with respect to vessels to be operated in an essential service, served by citizens of the U.S. which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

Dated: November 13, 1972.

By Order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

[FR Doc.72-19766 Filed 11-14-72;8:53 am]

[Docket No. S-309]

OVERSEAS BULKTANK CORP. ET AL.

Notice of Multiple Applications

Notice is hereby given that applications have been filed under the Merchant Marine Act of 1936, as amended, for operating-differential subsidy with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire on June 30, 1973 (unless extended only for subsidized voyages in progress on that date). Inasmuch as the below listed applicants and/or related persons or firms, employ ships in the domestic, intercoastal, or coastwise service, written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, will be required for each such applicant if its application for operating-differential subsidy is granted.

The following applicants have requested permission involving the domestic, intercoastal, or coastwise services described below:

Name of Applicants:

Overseas Bulktank Corp. (Bulktank), Intercontinental Bulktank Corp. (Intercontinental), Ocean Tankships Corp. (Tankships).

Description of domestic service and vessels: The applicants, Bulktank, Intercontinental, and Tankships, are subsidiaries of Overseas Shipholding Group, Inc. (Shipholding), whose subsidiaries have engaged in domestic coastwise, intercoastal, and noncontiguous petroleum trades with tanker vessels, and each applicant has requested written permission to continue such operations. The following tanker vessels are owned by the applicants and other subsidiaries of Shipholding:

Ship *Owner*

Office of the Secretary

equipment, techniques, and computer

DEPARTMENT OF HEALTH,

party in any hearing. Any person who

30 days, a written notice of the time and

Ship	Owner
Overseas Alaska	Intercontinental.
Overseas Alice	Do.
Overseas Aleutian	Ocean Transportation Co., Inc.
Overseas Ulla	Do.
Overseas Arctic	Bulktank.
Overseas Valdez	Do.
Overseas Joyce	Overseas Oil Carriers, Inc.
Overseas Anchorage	Globe Seaways, Inc.
Overseas Vivian	Tankships.
Alpha Reserve	Sea Tankers, Inc.
Beta Reserve	Do.
Gamma Reserve	Do.

Written permission is now required by the applicants (Bulktank, Intercontinental, and Tankships) notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

Interested parties may inspect these applications in the Office of The Secretary, Maritime Subsidy Board, Maritime Administration, Department of Commerce Building, 14th and E Streets NW., Washington, DC 20235.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in any application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on November 22, 1972, file same with the Maritime Subsidy Board/Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board/Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for 10 a.m., November 24, 1972, in room 4896, Department of Commerce Building, 14th and E Streets NW., Washington, DC 20235. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the act.

By order of the Maritime Subsidy Board/Maritime Administration.

Dated: November 13, 1972.

JAMES S. DAWSON, Jr.,
Secretary.

Office of the Secretary

[Dept. Organization Order 30-2B, Amdt. 1]

NATIONAL BUREAU OF STANDARDS

Organizations and Functions

This order effective November 2, 1972, amends the material appearing at 37 F.R. 14423 of July 20, 1972.

Department Organization Order 30-2B, dated June 12, 1972, is hereby amended as follows:

1. In section 4. *Staff Units Reporting to the Director*, new paragraphs .03 and .04 are added to read:

.03 The "Office of Public Affairs" shall serve as the public information office of the Bureau, acting as the official point of contact and coordinating office for all activities relating to the general and trade press and other media, and providing direction for the activities of the Bureau that relate to public affairs such as press releases, brochures and other written materials, radio and television materials, photography, exhibits, tours, and related activities.

.04 The "Office of Engineering and Information Processing Standards" shall implement Bureau and departmental policy concerning voluntary standardization activities; serve as the focal point for the Bureau's participation in voluntary standards programs; serve as the liaison office with private, national, and international standards organizations; and provide staff guidance and direction to Bureau management on matters relating to voluntary standardization.

2. A new section 6 is added to read as follows:

SEC. 6. *Office of Experimental Technology Incentives Program.* The Office of Experimental Technology Incentives Program shall investigate the effectiveness of various incentives and mechanisms to stimulate increased development and use of technology by industry. These investigations shall be designed to provide an experimental basis for the formulation of Government policy in this area.

3. Old sections 6 through 12 are renumbered 7 through 13, respectively.

4. The title of section 9, and paragraphs .01, .02, and .03 of the section, are revised to read:

SEC. 9. *Institute for Computer Sciences and Technology.*

.01 The "Institute for Computer Sciences and Technology" shall conduct research and provide technical services designed to aid Government agencies in improving cost effectiveness in the conduct of their programs through the selection, acquisition, and effective utilization of automatic data processing equipment (Public Law 89-306); and serve as the principal focus within the executive branch for the development of Federal standards for automatic data processing equipment, techniques, and computer languages.

.02 The "Director" shall direct the development, execution, and evaluation of the programs of the Institute.

.03 The functions of the organizational units of the Institute are as follows:

5. In section 12. *Institute for Applied Technology*, paragraph .03 is revised to read:

.03 The "Engineering and Product Standards Division" shall provide guidance to the engineering and product standards programs conducted in the Institute for Applied Technology, serve as the NBS point of contact on matters pertaining to the metric system of measurement, provide a library and reference service on engineering and product standards, and conduct the Department of Commerce Voluntary Product Standards Program.

6. The organization chart of June 12, 1972, is superseded by the organization chart attached to this amendment. A copy of the organization chart is on file with the original of this document in the Office of the Federal Register.

Effective date: November 2, 1972.

GUY W. CHAMBERLIN, Jr.,
Acting Assistant Secretary for Administration.

[Dept. Organization Order 25-5B, Amdt. 4]

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Organizations and Functions

This order effective November 1, 1972, further amends the material appearing at 37 F.R. 6411 of March 19, 1972, 37 F.R. 14421 of July 20, 1972, 37 F.R. 19390 of September 20, 1972, and 37 F.R. 21863 of October 14, 1972.

Department Organization Order 25-5B, effective March 10, 1972, is hereby further amended as follows:

Section 8 is amended to read:

SEC. 8. *Office of Sea Grant.* The Office of Sea Grant shall provide grant support, primarily to institutions, for research, education, and advisory services aimed at assisting those who are interested in and responsible for the development, utilization, and management of the seas and the Great Lakes of the United States, including their resources; and shall manage NOAA's Marine Advisory Services to the user community.

Effective date: November 1, 1972.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[DESI 5743; Docket No. FDC-D-529; NDA 5-743]

AYERST LABORATORIES

Sodium Fluoride, Ascorbic Acid, and Ergocalciferol Lozenge; Notice of Opportunity for Hearing on Proposal to Withdraw Approval of New Drug Application

In an announcement (DESI 5743) published in the FEDERAL REGISTER of July 26, 1972 (37 F.R. 14899), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group on Enziflur Lozenges containing sodium fluoride, ascorbic acid, and ergocalciferol; previously marketed by Ayerst Laboratories, 685 Third Avenue, New York, NY 10017 (NDA 5-743).

The announcement stated that there is a lack of substantial evidence that this drug will have the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling and that each component of the combination drug contributes to the total effects claimed, and that the Commissioner intended to initiate proceedings to withdraw approval of the new drug application. Interested persons were invited to submit any pertinent data bearing on the proposal within 30 days following publication of the announcement. No data have been received, and Ayerst has informed the Administration that marketing of the drug was discontinued in 1971.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72-19566 Filed 11-14-72;8:46 am]

[DESI 6261; Docket No. FDC-D-524; NDA 6-257]

G. D. SEARLE AND CO.

Combination Containing Diphenhydramine, Aminophylline, and Racephedrine Hydrochloride for Oral Use; Notice of Opportunity for Hearing on Proposal to Withdraw Approval of New Drug Application

In an announcement (DESI 6261) published in the FEDERAL REGISTER of July 27, 1972 (37 F.R. 15031), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group on that part of NDA 6-257 pertaining to Hydrvllin with Racephedrine Tablets containing diphenhydramine, aminophylline, and racephedrine hydrochloride; G. D. Searle and Co., Post Office Box 5110, Chicago, Ill. 60680.

The announcement stated that there is a lack of substantial evidence that this fixed combination drug will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling and that each component of such drug contributes to the total effects claimed and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of that part of the new drug application providing for that drug. Interested persons were invited to submit pertinent data bearing on the proposal within 30 days following publication of the announcement. No

data providing substantial evidence of effectiveness have been received.

ing the reasons why approval of the new drug application(s) should not be with-

data providing substantial evidence of effectiveness have been received.

Therefore, notice is given to the holder(s) of the new-drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (e)) withdrawing approval of the application of part(s) of the listed new-drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new-drug application, are covered by the new-drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new-drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD–300), 600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of said parts of the new-drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of said parts of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14 (b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new-drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new-drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

[DESI 10296; Docket No. FDC–D–523; NDA 10–296]

ELI LILLY AND CO.

Combination Drug Containing Diethylstilbestrol, Methyltestosterone and Reserpine for Oral Use; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New-Drug Application

In an announcement (DESI 10296) published in the FEDERAL REGISTER of July 27, 1972 (37 F.R. 15040), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Tylandril Tablets containing diethylstilbestrol, methyltestosterone and reserpine; Eli Lilly and Co., Post Office Box 618, Indianapolis, IN 46206 (NDA 10–296).

The announcement stated that there is a lack of substantial evidence that this fixed-combination drug will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, and that each ingredient of the drug contributes to the total effects claimed, and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of the new-drug application. Interested persons were invited to submit pertinent data bearing on the proposal within 30 days following publication of the announcement. No data has been received.

Therefore, notice is given to the holder(s) of the new-drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new-drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new-drug application, are covered by the new-drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new-drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who

wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD–300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new-drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14 (b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new-drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new-drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[DESI 12056; Docket No. FDC–D–519; NDA 12–056, etc.]

LEDERLE LABORATORIES; ROCHE LABORATORIES

Certain Sulfanomides With Phenazopyridine; Notice of Opportunity for Hearing on a Proposal To Withdraw Approval of New Drug Applications

In the FEDERAL REGISTER of April 26, 1972 (37 F.R. 8405), the Commissioner of Food and Drugs announced his conclusions (DESI 12056) pursuant to evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drugs:

1. Azo Gantanol Tablets containing sulfamethoxazole and phenazopyridine hydrochloride; Roche Laboratories, Division of Hoffmann-La Roche, Inc., 340 Kingsland Avenue, Nutley, NJ 17110 (NDA 13–294).

2. Azo Kynex Tablets containing sulfamethoxypyridazine and phenazopyridine hydrochloride; formerly marketed by Lederle Laboratories, Division of American Cyanamid Co., West Middletown Road, Pearl River, NY 10965 (NDA 12–056).

The announcement stated that there is a lack of substantial evidence, within the meaning of the Federal Food, Drug, and Cosmetic Act, that these fixed combination drugs will have the effects that they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, including their recommended use in certain urinary tract infections associated with pain or discomfort, and that each component of the combination contributes to the total effects claimed for the drugs. It further stated that the Commissioner intended to initiate proceedings to withdraw approval of the new drug applications. Interested persons were invited to submit pertinent data within 30 days.

Lederle Laboratories has advised the Administration that marketing of Azo Kynex has been discontinued. Substantial evidence showing the effectiveness of either of these drugs has not been received.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD–300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will en-

ter a final order withdrawing approval of said parts of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14 (b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new-drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new-drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

[DESI 6363; Docket No. FDC-D-532; NDA 12-281 etc.]

METHOCARBAMOL WITH PHENACETIN, ASPIRIN, HYOSCYAMINE SULFATE AND PHENOBARBITAL; AND METHOCARBAMOL WITH ASPIRIN

Notice of Opportunity for Hearing on Proposal to Withdraw Approval of New Drug Applications

In an announcement (DESI 6363), published in the FEDERAL REGISTER of February 11, 1970 (35 F.R. 2836), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drugs:

1. Robaxisal-PH Tablets; methocavbamol, phenacetin, aspirin, hyoscyamine sulfate and phenobarbital; A. H. Robins Co., 1407 Cummings Drive, Richmond, VA 23220 (NDA 12-399).

2. Robaxisal Tablets; methocarbamol and aspirin; A. H. Robins (NDA 12-281).

The announcement stated that there is a lack of substantial evidence that these drugs are effective as fixed combinations for the uses recommended or suggested in their labeling and that each component of the combination drugs contributes to the total effects claimed, and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of the new drug applications. Interested persons were invited to submit pertinent data bearing on the proposal within 30 days following publication of the announcement. Data submitted by A. H. Robins pursuant to the announcement have been reviewed and found not to provide substantial evidence of effectiveness of the drugs.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72-19568 Filed 11-14-72;8:46 am]

[DESI 10547; Docket No. FDC-D-525; NDA 10-547]

PHILIPS ROXANE LABORATORIES, INC.

Combination Drug Containing Isoproterenol Hydrochloride, Phenylpropanolamine Hydrochloride, and Glyceryl Guaiacolate; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In an announcement (DESI 10547) published in the FEDERAL REGISTER of July 27, 1972 (37 F.R. 15040), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Bronkodyl Tablets containing isoproterenol hydrochloride, phenylpropanolamine hydrochloride, and glyceryl guaiacolate; previously marketed by Philips Roxane Laboratories, Inc., 330 Oak Street, Columbus, Ohio 43216 (NDA 10-547).

The announcement stated that there is a lack of substantial evidence that this fixed combination drug will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, and that each component of the combination contributes to the total effects claimed, and that the Commissioner intended to initiate proceedings to withdraw approval of the new drug application. Interested persons were invited to submit pertinent data bearing on the proposal within 30 days following publication of the announcement. No data have been received pursuant to the announcement. The applicant informed the Food and Drug Administration that the manufacture of Bronkodyl Tablets has been discontinued.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[DESI 10548; Docket No. FDC-D-526; NDA 10-548]

PHILIPS ROXANE LABORATORIES, INC.

Combination Drug Containing Isoproterenol Hydrochloride, Phenylpropanolamine Hydrochloride, and Guaifenesin; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In an announcement (DESI 10548) published in the FEDERAL REGISTER of July 27, 1972 (37 F.R. 15040), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Bronkodyl Tablets containing isoproterenol hydrochloride, phenylpropanolamine hydrochloride, and guaifenesin; previously marketed by Philips Roxane Laboratories, Inc., 330 Oak Street, Columbus, Ohio 43216 (NDA 10-548).

The announcement stated that there is a lack of substantial evidence that this fixed combination drug will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, and that each component of the combination contributes to the total effects claimed, and that the Commissioner intended to initiate proceedings to withdraw approval of the new drug application. Interested persons were invited to submit pertinent data bearing on the proposal within 30 days following publication of the announcement. No data have been received pursuant to the announcement. The applicant informed the Food and Drug Administration that the manufacture of Bronkodyl Tablets has been discontinued.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

If an applicant or any other interested person elects to avail himself of the

[DESI 16; Docket No. FDC-D-521; NDA 16]

RIKER LABORATORIES, INC.

Combination Drug Containing Ephedrine Hydrochloride, Atropine Sulfate, and Pentobarbital for Oral Use; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In an announcement (DESI 16) published in the FEDERAL REGISTER of June 23, 1972 (37 F.R. 12417), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on Rinofeds Capsules, containing ephedrine hydrochloride, atropine sulfate and pentobarbital; Riker Laboratories, Inc., subsidiary of 3M Co., 19901 Nordhoff Street, Northridge, CA 91324 (NDA 16), and previously marketed by Broemmel Pharmaceuticals, 1235 Sutter Street, San Francisco, CA 94109.

The announcement stated that there is a lack of substantial evidence, within the meaning of the Federal Food, Drug, and Cosmetic Act, that this drug is effective as a fixed combination for its labeled claims relating to the treatment of respiratory conditions and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of the new drug application. Interested persons were invited to submit any pertinent data bearing on the proposal within 30 days following publication of the announcement. No data have been received pursuant to the announcement.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), available to him at the time of approval of the application(s), shows there is a evaluated, together with the evidence lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by his notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new-drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his apparance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[DESI 10911; Docket No. FDC-D-530; NDA 10-911]

STUART CO.

Buclizine Hydrochloride with Pyridoxine Hydrochloride, Scopolamine Hydrobromide, Atropine Sulfate, and Hyoscyamine Sulfate; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New-Drug Application

In an announcement (DESI 10911) published in the FEDERAL REGISTER of July 28, 1972 (37 F.R. 15186), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Bucladin Tablets, containing buclizine hydrochloride, pyridoxine hydrochloride, scopolamine hydrobromide, atropine sulfate, and hyoscyamine sulfate; The Stuart Co., Division of Atlas Chemical Industries, Inc., Wilmington, Del. 19899 (NDA 10-911).

The announcement stated that there is a lack of substantial evidence that this fixed combination drug has the effects that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling and that each ingredient contributes to the total effects claimed, and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of the new-drug application. Interested persons were invited to submit pertinent data bearing on the proposal within 30 days following publication of the announcement. No data providing substantial evidence of effectiveness were submitted pursuant to the announcement.

Therefore, notice is given to the holder(s) of the new-drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new-drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new-drug application, are covered by the new-drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new-drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new-drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new-drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new-drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[DESI 11234; Docket No. FDC-D-527; NDA 11-234]

WINTHROP LABORATORIES

Combination Drug Containing Quinacrine Hydrochloride, Chloroquine Phosphate, and Hydroxychloroquine Sulfate; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In an announcement (DESI 11234) published in the FEDERAL REGISTER of July 26, 1972 (37 F.R. 14899), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Triquin tablets containing quinacrine hydrochloride, chloroquine phosphate, and hydroxychloroquine sulfate; formerly marketed by Winthrop Laboratories, 90 Park Avenue, New York, N.Y. 10016 (NDA 11-234).

The announcement stated that there is a lack of substantial evidence that this fixed combination drug will have the effect that it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling and that each component of such drug contributes to the total effects claimed and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of the new drug application. Interested persons were invited to submit any pertinent data bearing on the proposal within 30 days following publication of the announcement. No data have been received pursuant to the announcement.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administra-

tion, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14 (b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 7, 1972.

Office of Education

ADVISORY COMMITTEE ON ACCREDITATION AND INSTITUTIONAL ELIGIBILITY

Notice of Public Meeting

Notice is hereby given, pursuant to Executive Order 11671, that the next meeting of the Advisory Committee on Accreditation and Institutional Eligibility will be held on December 13, 1972, at 9 a.m., local time, in Room 129, the Brookings Institution, 1775 Massachusetts Avenue NW., Washington, DC.

The Advisory Committee on Accreditation and Institutional Eligibility is established pursuant to section 253 of the Veterans' Readjustment Assistance Act (Chapter 33, Title 38 United States Code). The Committee is established to advise the Commissioner of Education in fulfilling his statutory obligations to publish a list of nationally recognized accrediting agencies and associations which he determines to be reliable authority as to the quality of training offered by educational institutions and programs.

The meeting of the Committee shall be open to the public on Wednesday, December 13, 1972. The proposed agenda includes presentations by representatives of accrediting agencies and associations which have petitions for recognition pending before the Committee and a review of the second draft of proposed changes in the Commissioner's Criteria for Recognition of Nationally Recognized Accrediting Agencies and Associations. Records shall be kept of all committee proceedings.

Signed at Washington, D.C., on November 2, 1972.

JOHN R. PROFFITT,
Director, Accreditation and Institutional Eligibility Staff.

ADVISORY COMMITTEE ON OLDER AMERICANS, HEALTH SUBCOMMITTEE

Notice of Public Meeting

The Advisory Committee on Older Americans was established by the Older Americans Act of 1965 for the purpose of advising the Secretary of Health, Education, and Welfare on matters bearing on his responsibilities under this Act and related activities of his Department.

The Health subcommittee of the committee will meet on November 16, 11 a.m. to 5 p.m., HEW North Building, Room 3627, 330 Independence Avenue, SW., Washington, DC. They will review the medical program for the aged of the Veterans' Administration, the implications of the Social Security Amendments of 1972 for health services for the elderly and identify future concern areas for the subcommittee. Meeting open to public observation.

CLEONICE TAVANI,
Staff Director.

[Dockets Nos. 50-342 and 50-343]

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.

Notice of Withdrawal of Application for Utilization Facility Licenses

The Consolidated Edison Company of New York, Inc., 4 Irving Place, New York, NY 10003, by letter dated October 20, 1972, has withdrawn its application for licenses to construct and operate the Verplanck Nuclear Facility, Units 1 and 2, a two-unit nuclear power station at its 130-acre site on the east side of the Hudson River in the town of Cortlandt, Westchester County, N.Y. The site is contiguous to the company's Indian Point site at Buchanan. A copy of the letter of withdrawal is available for inspection in the AEC's Public Document Room, 1717 H Street NW., Washington, DC. The Atomic Energy Commission approves the withdrawal of this application without prejudice.

Notice of receipt of the application was published in the FEDERAL REGISTER on July 7, 1971, 36 F.R. 12322.

Dated at Bethesda, Md., this 6th day of November 1972.

For the Atomic Energy Commission.

INDIANA AND MICHIGAN ELECTRIC CO. AND INDIANA AND MICHIGAN POWER CO.

Notice and Order for Special Prehearing Conference

In the matter of Indiana and Michigan Electric Co. and Indiana and Michigan Power Co. (Donald C. Cook Nuclear Plant Units 1 and 2).

Take notice, that pursuant to the Atomic Energy Commission's "Notice of Hearing On A Facility Operating License," dated September 29, 1972, and in accordance with § 2.751a of said Commission's restructured rules of practice, a special prehearing conference will be held in the subject proceeding on December 7, 1972, at 10 a.m. local time, in Courtroom No. 4 (second floor), Hall of Justice, 333 Monroe Avenue NW., Grand Rapids, MI 49502.

The special prehearing conference will deal with the following matters:

1. The status of negotiations regarding identification and simplification of the issues;

2. The need for discovery, and the time required for such discovery;

3. Establishment of schedules for further action;

4. Procedures, including rules of evidence, to be followed at the actual evidentiary hearing; and

5. Such other matters as may aid in the orderly disposition of the instant proceeding.

It is so ordered.

Issued at Washington, D.C., this 10th day of November 1972.

CIVIL AERONAUTICS BOARD

[Docket No. 23333; Order 72-11-25]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Approving Agreement

Issued under delegated authority November 8, 1972.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's economic regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement, which has been assigned the above-designated CAB agreement number, was adopted at a special meeting held October 3, 1972, in New York.

The agreement, for intended effectiveness January 1, 1973, would amend an attachment to an existing resolution governing terminal charges on freight shipments in international carriage at airports within the continental United States, Alaska and Hawaii, by specifying those items on new U.S. Department of Commerce Form 7525-V Alternate (Shipper's Export Declaration) which may be completed by the carrier at no charge to the shipper. The agreement would also delete references to U.S. Customs Forms 5119 and 7501, pertaining to the assessment of charges for release of parts of multipiece shipments and for partial delivery of a single shipment, in order to insure that these charges may be levied regardless of the particular U.S. Customs Form involved.

Pursuant to authority duly delegated by the Board in the Board's regulations, 14 CFR 385.14, it is not found that the following resolution, incorporated in Agreement CAB 23365, is adverse to the public interest or in violation of the Act:

Agreement CAB	IATA No.	Title	Application
23365	5129	Air Cargo Rates—Airport to Airport	1, 1/2, 1/2 3.

Accordingly, it is ordered, That:

Agreement CAB 23365 be and hereby is approved.

Persons entitled to petition the Board for review of this order pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.72-19642 Filed 11-14-72;8:53 am]

[Docket No. 24599; Order 72-11-26]

TEXAS INTERNATIONAL AIRLINES, INC.

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 9th day of November 1972.

By application in Docket 24599, Texas International Airlines, Inc. (TXI), has requested amendment of its certificate of public convenience and necessity for Route 82 so as to delete Galveston, Tex., therefrom. Simultaneously, TXI filed for the issuance of a show-cause order.

No answers were filed in response to TXI.

Upon consideration of TXI's request and all the relevant facts, we have decided to issue an order to show cause, proposing to grant the requested deletion.

We tentatively find and conclude that the public convenience and necessity require the amendment of TXI's certificate for Route 82, so as to delete Galveston, Tex., therefrom. In support of our ultimate conclusion, we tentatively find and conclude as follows: TXI's Galveston operations have not been and are not likely to be economically sound. Despite intensive promotional efforts by TXI from June 1969 through March 1972 traffic sufficient to sustain economic service has failed to develop.[1] Thus, the passengers boarded by TXI per departure were 3.3 in 1969, 3.6 in 1970 and 4.6 in 1971. Fiscal year 1972 loads averaged less than five passengers per flight on the CV-880. In 1973 we estimate that continued service at Galveston would produce revenues of almost $58,000, incur expenses of almost $115,000, and would fall more than $70,000 short ($24.50 per forecast passenger) of meeting the carrier's full return and tax requirement. Moreover, elimination of Galveston, coupled with an upgrading in service in other markets, would permit the carrier to retain a portion of its Galveston revenues, gain increased revenues in other markets, and eliminate the costs incident to providing direct service at Galveston. We estimate that all such changes in the carrier's operation would result in a decrease in subsidy need of almost $90,000.

[1] In the Trans Texas Airways "Use It or Lose It" investigation (Order E-20283, Dec. 19, 1963) it was decided that Galveston was to be temporarily retained as a subsidized point (Order E-22237, May 28, 1965) because it was anticipated that sufficient traffic would be generated by increasing economic activity in the Galveston area and by the shift of most commercial Houston air traffic from Hobby Airport to the then soon to be opened and more remote Intercontinental Airport. The expected traffic has failed to develop.

V 37 • 221 NOV 15 72 XUM

Galveston is suitably connected to the nearest air service center, Houston International, by convenient and reasonably priced alternate means of transportation. Highways which directly connect Galveston to Houston International provide speedy travel by automobile within a travel time of approximately 75 minutes. Hourly scheduled limousine service is available from Galveston to Houston International between 5 a.m. and 10:30 p.m. and from Houston International to Galveston between 7:30 a.m. and 1 a.m. The traveltime by limousine is 90 minutes. In addition, Galveston is connected to Houston International by an air taxi, Houston Metro, which provides eight round trips per weekday (O.A.G. Nov. 1, 1972).[2]

Interested persons will be given 20 days following service of this order to show cause why the tentative findings and conclusions set forth herein should not be made final. We expect such persons to support their objections, if any, with detailed answers, specifically setting forth the tentative findings and conclusions to which objection is taken. Such objections should be accompanied by arguments of fact or law and should be supported by legal precedent or detailed economic analysis. If any evidentiary hearing is requested, the objector should state in detail why such a hearing is considered necessary and what relevant and material facts he would expect to establish through such a hearing. General, vague, or unsupported objections will not be entertained.

Accordingly, it is ordered, That:

1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein, and amending Texas International Airlines, Inc.'s certificate of public convenience and necessity for route 82 so as to delete Galveston, Tex. therefrom;

2. Any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions, or certificate amendments set forth herein shall, within 20 days after service of a copy of this order, file with the Board and serve upon all persons listed in paragraph 5 a statement of objections together with a summary of testimony, statistical data, and other evidence expected to be relied upon to support the stated objections;[3]

3. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;

4 In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth herein; [4] and

5. A copy of this order shall be served upon Texas International Airlines, Inc., Houston Metro Airlines; mayor, city of Beaumont; mayor, city of Galveston; mayor, city of Houston; mayor, city of Port Arthur; and director, Texas Aeronautics Commission.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.72-19643 Filed 11-14-72;8:53 am]

[2] Houston Metro also provides service between Houston International and Clear Lake. Clear Lake is only 20 miles from Galveston. The TXI fare between Houston and Galveston is $16. The estimated cost of a private auto trip is less than $6. The limousine fare, one way, is $7.50. Metro's fare is $16 from Houston to Galveston and $12 from Houston to Clear Lake.

[3] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further such motions, requests, or petitions for reconsideration of this order will be entertained

[4] By Order 72-9-39, Sept. 12, 1972, the Board proposed to approve an agreement between Texas International Airlines and Houston Metro Airlines which provided for performance of certain reservation and ground services by TXI for Metro's Houston-Galveston flights. On Sept. 22, 1972, TXI filed a letter indicating that the carriers had terminated the agreement.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF CHINA

Entry or Withdrawal From Warehouse for Consumption

NOVEMBER 14, 1972.

On October 4, 1972, there was published in the FEDERAL REGISTER (37 F.R. 20883) a letter of September 29, 1972, from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs implementing those provisions of the bilateral Wool and Man-Made Fiber Textile Agreement of December 30, 1971, between the Governments of the United States and the Republic of China which establish specific export limitations on wool and man-made fiber textile products in certain categories, produced or manufactured in the Republic of China, for the agreement year beginning October 1, 1972.

The bilateral Wool and Man-Made Fiber Textile Agreement also established group ceilings of: (1) 4,390,500 square yards equivalent for wool apparel in Categories 111–125; and (2) 414,000 square yards equivalent for wool fabrics and made-up and miscellaneous textiles in Categories 101–110 and 126–132, produced or manufactured in the Republic of China, for the agreement year beginning October 1, 1972. The U.S. Government has decided to control imports in these groups at the aforestated levels for the remainder of the agreement year.

Accordingly, there is published below a letter of November 14, 1972, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, directing that the amounts of wool textile products in Categories 101–110, 111–125, and 126–132, produced or manufactured in the Republic of China, which may be entered or withdrawn from warehouse for consumption in the United States for the 12-month period beginning October 1, 1972, and extending through September 30, 1973, be limited to the designated levels.

STANLEY NEHMER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary and Director, Bureau of Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS:
Department of the Treasury,
Washington, D.C. 20226.

NOVEMBER 14, 1972.

DEAR MR. COMMISSIONER: Under the provisions of the bilateral Wool and Man-Made Fiber Textile Agreement of December 30, 1971, between the Governments of the United States and the Republic of China and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective as soon as possible, and for the period extending through September 30, 1973, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products produced or manufactured in the Republic of China and exported to the United States on or after October 1, 1972, in excess of the following group levels of restraint:

Categories	12-month levels of restraint [1]
111/125—square yards equivalent	4,390,500
101/110 and 126/132—do	414,000

Inasmuch as the group levels of restraint applicable to the above wool textile products, produced or manufactured in the Republic of China and exported to the United States during the agreement year beginning October 1, 1971, and extending through September 30, 1972, have been exhausted by previous entries, such goods entered on or after the effective date of this directive shall be subject to the levels contained in this letter.

Wool textile products which have been released from the custody of the Bureau of Customs under the provisions of 19 U.S.C. 1448(b) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the wool textile categories in terms of T.S.U.S.A. numbers and conversion factors was published in the FEDERAL REGISTER on April 29, 1972 (37 F.R. 8802).

In carrying out this directive, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of China and with respect to imports of wool textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

STANLEY NEHMER,
Chairman, Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary and Director, Bureau of Resources and Trade Assistance.

[FR Doc.72-19795 Filed 11-14-72;10:44 am]

[1] These levels of restraint have not been adjusted to reflect any entries made on or after October 1, 1972.

ENVIRONMENTAL PROTECTION AGENCY

U.S. BORAX CORP.

Establishment of Temporary Tolerances

U.S. Borax Corp., 412 Crescent Way, Anaheim, CA 92801, submitted a petition (PP 2G1279) requesting establishment of temporary tolerances for negligible residues of the herbicide N^3,N^3-diethyl-2,4-dinitro-6-trifluoromethyl-*m*-phenylenediamine in or on the raw agricultural commodities—bean vines, dried beans, peanuts, and peanut forage, hay, and hulls at 0.05 part per million.

It has been determined that temporary tolerances for negligible residues in or on bean vines, dried beans, peanuts, and peanut forage, hay, and hulls at 0.05 part per million are safe and will protect the public health.

They are therefore established as requested on condition that the herbicides be used in accordance with the temporary permits being issued concurrently by the Environmental Protection Agency and which provide for distribution under the U.S. Borax Corp. name.

These temporary tolerances expire November 9, 1973.

This action is being taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides Programs (36 F.R. 9038).

Dated: November 9, 1972.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticides Programs.

[FR Doc.72-19600 Filed 11-14-72;8:49 am]

UPJOHN CO.

Filing of Petition Regarding Pesticide Chemicals

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), notice is given that a petition (PP 3F1322) has been filed by the Upjohn Co., Kalamazoo, Mich. 49001, proposing establishment of tolerances (40 CFR Part 180) for combined residues of the insectide benzoyl chloride (2,4,6-trichlorophenyl) hydrazone and its metabolite benzoic acid (2,4,6-trichlorophenyl) hydrazide in or on the raw agricultural commodities citrus fruits at 1 part per million and liver of cattle, goats, and sheep at 0.05 part per million.

The analytical method proposed in the petition for determining residues of the insecticide and its metabolite is a gas chromatographic procedure using electron capture detection. The insecticide and its metabolite are first separated by column chromatography and the insecticide is converted to its diethylamine derivative before the gas chromatographic determination is made.

Dated: November 9, 1972.

EDWIN L. JOHNSON,
Acting Deputy Assistant Administrator for Pesticides Programs.

FEDERAL POWER COMMISSION

NATIONAL GAS SURVEY COORDINATING TASK FORCE

Notice of Meeting and Its Agenda

Agenda, meeting, coordinating task force, to be held in Conference Room 4008 of the Federal Power Commission, 441 G Street NW., Washington, DC, November 30, 1972—9:30 a.m.

Presiding: Mr. William J. McCabe, FPC Survey Coordinating Representative and Secretary.

1. Introductory Remarks—Mr. McCabe.

2. General Review—Mr. Richard C. Young, Task Force Director.

3. Report on Work Program of Supply-Technical Advisory Committee—Mr. William T. Slick, Jr., Deputy Vice Chairman, Supply-TAC.

4. Report on Work Program of Transmission-Technical Advisory Committee—Mr. Ferdinand Gagne, Deputy Vice Chairman, Transmission-TAC.

5. Report on Work Program of Distribution-Technical Advisory Committee—Mr. Ralbern H. Murray, Deputy Vice Chairman, Distribution-TAC.

6. Discussion of Assigned Work Program and Estimated Date for Completion—Mr. Young.

7. General Discussion Including Environmental and Ecological Aspects of the National Gas Survey Program—Mr. Thomas H. Jenkins, Director, National Gas Survey.

8. Adjournment—Mr. McCabe.

KENNETH F. PLUMB,
Secretary.

NATIONAL POWER SURVEY EXECUTIVE ADVISORY COMMITTEE

Order Designating Initial Membership and Chairmanship

AUGUST 11, 1972.

The Federal Power Commission hereby determines that the establishment of the National Power Survey Executive Advisory Committee is in the public interest, and necessary and appropriate for the purposes of the Federal Power Act, 16 U.S.C. 791(a) et seq., and the Commission establishes this Committee in accordance with the provisions of the Commission's order issued June 29, 1972, 37 F.R. 13380—Order Authorizing the Establishment of National Power Survey Advisory Committees and Prescribing Procedures and the provisions of this order.

1. *Purpose.* The Executive Advisory Committee shall constitute the principal policy advisory committee to the Commission and its Staff in the Commission's planning, conduct, and execution of the National Power Survey. In this policy advisory role, the Executive Advisory Committee will be called upon to offer suggestions to assist the Commission and staff in their activities in formulating planning assumptions and directing the work of the survey, including the work of other advisory committees; to assist in establishing priorities for work to be performed and in the coordination of all aspects of the survey; to assist in assembling and assimilating comprehensive, accurate, and reliable data required for the survey; and to assist in such other ways as it may from time to time be called upon by the Commission or its staff.

2. *Membership.* The chairman, secretary, and other members of the Executive Advisory Committee, as selected by the Chairman of the Commission, with the approval of the Commission, are designated in the appendix hereto.

3. *Selection of future committee members.* All future committee members, and persons designated to act as committee chairman, shall be selected and designated by the Chairman of the Commission with the approval of the Commission; provided, however, the Chairman of the Commission may select and designate persons to serve in the capacity of alternate secretary.

4. The following paragraphs of the aforementioned Commission order issued June 29, 1972, are hereby incorporated by reference:

3. *Conduct of Meetings.*
4. *Minutes and Records.*
5. *Secretary of the Committee.*
6. *Locaton and Time of Meetings.*
7. *Advice and Recommendations Offered by the Committee.*
8. *Duration of the Committee.*

The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[Docket No. CI73-331]

ATLAS CORP. ET AL.

Notice of Application

NOVEMBER 10, 1972.

Take notice that on November 6, 1972, Atlas Corporation (Applicant), 707 National Bank of Tulsa Building, Tulsa, OK 74103, filed in Docket No. CI73-331 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to United Gas Pipe Line Co. from the Oakes Field, Claiborne Parish, La., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell up to 200 Mcf of natural gas per day at 35.0 cents per Mcf at 15.025 p.s.i.a. for 1 year within contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period less than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 21, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.72-19574 Filed 11-14-72;8:47 am]

[Docket No. R-441]

OPTIONAL PROCEDURE FOR CERTIFICATING NEW PRODUCER SALES OF NATURAL GAS

Order Denying Petition to Reopen and Reconsider

NOVEMBER 9, 1972.

On October 10, 1972, Hamilton Treadway (Petitioner) filed in Docket No. R-441 a petition for rehearing and reconsideration of Commission Order No. 455, Optional Procedure for Certificating New Producer Sales of Natural Gas,[1] alleging that the Commission did not comply with certain provisions of the National Environmental Policy Act of 1969,[2] when it issued Order No. 455.

On October 21, 1972, the Commission submitted the record in Order No. 455 and Order No. 455-A to the United States Court of Appeals for the District of Columbia Circuit, in the matter of John E. Moss, et al. v. F.P.C., CADC, No. 72-1837. According to section 19(b) of the Natural Gas Act, the Court assumes exclusive jurisdiction in the matter once the record has been filed, and the Commission loses jurisdiction thereby. Accordingly, the Commission does not have jurisdiction at the present time in this matter and therefore must deny the petition herein. It is significant, however, to note that Petitioner raises no issues herein which were not fully considered in Order No. 455, as amended by Order No. 455-A.

In Order No. 455 the Commission stated at Paragraphs 79 and 80:

> 79. As we have noted above • • • natural gas is the cleanest burning, and insofar as is known today, the least polluting of all the fossil fuels. This, of course, is one of the reasons for its present enlarged demand and desirability as a fuel. Indeed, in some of our metropolitan areas, "clean-air" regulations and restrictions have made natural gas not only desirable, but almost a necessity for some commercial and industrial users. The Environmental Protection Agency (EPA) filed its response in this proceeding, stating that in its opinion the optional procedure we provide for herein will be a major step towards elimination of the gas shortage and

[1] Issued Aug. 3, 1972, 37 F.R. 16188 (8/11/72), as amended by Order No. 455-A issued Sept. 8, 1972, 37 F.R. 18721 (9/12/72).
[2] 83 Stat. 852.

the nation's air pollution problem through the addition of new gas reserves.

80. These rules herein adopted are inherently procedural, providing an optional method by which to obtain certification; accordingly, our rulemaking involves no direct impact on the environment (such as construction of facilities would) nor does it indirectly affect the environment through the setting of rates. Questions of environmental concern may be proper at the time of certification, but such questions are of no relevance to the establishment of procedural rules.

The Commission finds:

The Commission lacks jurisdiction for the reasons discussed above.

The Commission orders:

The petition to reopen and reconsider Order No. 455, as amended by Order No. 455-A, is hereby denied.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.72-19612 Filed 11-14-72;8:50 am]

[Docket No. CI73-293]

BELCO PETROLEUM CORP.

Notice of Application

NOVEMBER 10, 1972.

Take notice that on October 24, 1972, Belco Petroleum Corp., Agent (Applicant), 630 Third Street, New York, NY 10017, filed in Docket No. CI73-293 an application pursuant to section 7(c) of the Natural Gas Act and § 2.75 of the Commission's general policy and interpretations (18 CFR 2.75) for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), from the West Delta Block 64 Field, offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes under the optional gas pricing procedure to sell natural gas to Tennessee from the West Delta Block 64 Field until June 8, 1982, at an initial rate of 45 cents per Mcf subject to upward B.t.u. adjustment above 1,050 B.t.u.'s per cubic foot at 15.025 p.s.i.a. The subject contract with Tennessee dated June 8, 1972, provides for price escalations of 1.5 cents per Mcf annually.

Applicant asserts that at the 45 cents per Mcf initial price proposed herein, this proposed sale is more reliable and less costly than any of a number of alternative sources of pipeline gas supplies including the importation of foreign gas, liquefied natural gas, and feedstocks, domestic production of synthetic pipeline gas, domestic coal gasification proposals and Alaskan natural gas, which either have been certificated by the Commission, are now pending before the Commission or are under active consideration by pipeline companies. Applicant further asserts that the proposed sale is justified in light of the proposed increase in the price of natural gas for the Appalachian area to 50 cents per Mcf and the prices being paid for natural gas in the intrastate market as evidenced by reports that certain companies have contracted to sell their gas at rates of 52 cents and 73 cents per Mcf in Oklahoma and Ohio, respectively.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 29, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CS72-792]

ALBUQUERQUE NATIONAL BANK AND EXECUTOR OF THE ESTATE OF LEE W. KILGORE

Notice of Redesignation

NOVEMBER 10, 1972.

By letter dated September 5, 1972, Albuquerque National Bank has advised the Commission that it has been appointed as executor of the estate of Lee W. Kilgore, deceased, in accordance with an order of the probate court for San Juan County, N. Mex., on July 20, 1972, and requests that the necessary action be taken to transfer the small producer certificate of public convenience and necessity issued to Lee W. Kilgore in Docket No. CS72-792 to Albuquerque National Bank.

Accordingly the small producer certificate of public convenience and necessity issued purusant to section 7(c) of the Natural Gas Act in Docket No. CS72-792 to Lee W. Kilgore is redesignated as that of Albuquerque National Bank, executor of the estate of Lee W. Kilgore, deceased.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-121]

ALGONQUIN GAS TRANSMISSION CO.

Notice of Application

NOVEMBER 9, 1972.

Take notice that on November 3, 1972, Algonquin Gas Transmission Co. (Applicant), 1284 Soldiers Field Road, Boston, MA 02135, filed in Docket No. CP73-121 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of natural gas for the benefit of New Bedford Gas and Edison Light Co. (New Bedford), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes, pursuant to a temporary exchange-transportation agreement dated October 24, 1972, to reduce its deliveries of natural gas to Commonwealth Gas Co. (Commonwealth) and to deliver to New Bedford through Applicant's existing facilities an amount of natural gas equivalent to the liquefied natural gas, which is to be delivered to Commonwealth by Hopkinton LNG Corp., for the account of New Bedford, all for the period beginning November 16, 1972, and ending April 15, 1973. Applicant asserts that unless it assists New Bedford, it will not be possible for New Bedford to be the beneficiary of such gas this winter.

Applicant proposes to charge New Bedford 10 cents for each Mcf of gas delivered.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 21, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject

to the jurisdiction conferred upon the Federal Power Commission by sections

son wishing to become a party must file a petition to intervene. Copies of this

[Docket No. CP73-116]

ARKANSAS LOUISIANA GAS CO.

Notice of Application

NOVEMBER 9, 1972.

Take notice that on November 1, 1972, Arkansas Louisiana Gas Co. (Applicant), Post Office Box 1126, Shreveport, LA 71163, filed in Docket No. CP73-116 a budget-type application pursuant to section 7(c) of the Natural Gas Act, as implemented by § 157.7(b) of the Commission's Regulations thereunder, for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1973, and operation of certain natural gas purchase facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the purpose of this budget-type application is to augment its ability to act with reasonable dispatch in contracting for and connecting to its pipeline system supplies of natural gas in producing areas generally co-extensive with its system.

The total cost of the facilities proposed herein shall not exceed $7 million with no single project to exceed $1 million. Applicant plans to finance these costs from cash on hand, from cash generated from normal internal sources, and cash from short term bank loans and other short term borrowings utilized in the normal operation of the company's total business.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 4, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project 1196]

ESTES BROTHERS, INC.

Notice of Issuance of Annual License

NOVEMBER 10, 1972.

The licensees for minor Project No. 1196, located on an unnamed creek, which is a tributary of Upper Trail Lake, in Seward Recording District, Third Judicial Division, Alaska, and affecting lands of the United States are Robert R. Estes and Edward R. Estes, operating the project as Estes Brothers, Inc.

The license for Project No. 1196 was issued effective October 13, 1962, for a period ending October 12, 1972. In order to authorize the continued operation of the project pursuant to section 15 of the Federal Power Act, it is appropriate and in the public interest to issue an annual license to Estes Brothers, Inc. for the continued operation and maintenance of Project No. 1196.

Take notice that an annual license is issued to Estes Brothers, Inc. for the period October 13, 1972, to October 12, 1973, or until the issuance of a new license for the project, whichever comes first, for the continued operation and maintenance of Project No. 1196, subject to the terms and conditions of its present license.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP71-87]

MISSISSIPPI RIVER TRANSMISSION CORP.

Notice of Proposed Purchased Gas Adjustment Clause

NOVEMBER 10, 1972.

Take notice that Mississippi River Transmission Corp. (MRT) on October 26, 1972, tendered for filing as part of its FPC Gas Tariff, First Revised Volume No. 1, copies of the following tariff sheets:

Substitute First Revised Sheet No. 27A.
Substitute First Revised Sheet No. 27B.
Substitute First Revised Sheet No. 27C.
Substitute First Revised Sheet No. 27D.
First Revised Sheet No. 27E.
First Revised Sheet No. 27F.
First Revised Sheet No. 27G.
First Revised Sheet No. 27H.
First Revised Sheet No. 27I.[1]

MRT states that the purpose of the filing is to conform MRT's PGA clause to the requirements of § 154.38(d)(4) of the Commission's regulations. MRT claims that the instant filing contains modifications to its effective PGA clause to provide for rate changes concurrent with pipeline supplier rate changes and to reflect the handling of supplier refunds in accordance with the provisions of § 154.38(d)(4).

Because the above listed tariff sheets contain a proposed effective date of August 10, 1972, MRT requests that the Commission waive the notice requirements of § 154.22 of its regulations and permit this filing to become effective as proposed.

On November 1, 1972, MRT filed Seventh Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1 to reflect various rate changes applicable to MRT from its pipeline suppliers and to replace Substitute Fifth Revised Sheet No. 3A.

MRT therefore requests waiver of the requirements of the Commission's Regulations, particularly Section 154 thereof, in order that the Seventh Revised Sheet No. 3A of its FPC Gas Tariff, First Revised Volume No. 1 may become effective December 1, 1972, as proposed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before November 20, 1972. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.72-19605 Filed 11-14-72;8:49 am]

[1] On Nov. 1, 1972, MRT filed copies of substitute Fifth Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, which MRT says it had inadvertently omitted from its Oct. 26, 1972, filing.

[Docket No. CI73-322]

UNION TEXAS PETROLEUM

Notice of Application

NOVEMBER 9, 1972.

Take notice that on October 31, 1972, Union Texas Petroleum, a Division of Allied Chemical Corp. (Applicant), 3000 Richmond Avenue, Houston, TX 77006, filed in Docket No. CI73-322 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas in interstate commerce through Applicant's existing Winnie processing plant supply system in Jefferson County, Tex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Natural Gas Pipeline Company of America (Natural) has entered into a contract with Mitchell Energy Offshore Corp., et al. (Mitchell), providing for the purchase of natural gas produced in the Block 176-S Prospect Area, offshore Texas, and that Natural will transport such gas onshore and deliver it to Applicant in Galveston County, Tex. Applicant proposes to transport the gas to its Winnie plant for processing, compression, and redelivery to Texas Gas Pipe Line Corp. for the account of Natural. Applicant will process the gas for Mitchell but will not purchase any gas. Applicant proposes to charge 3.5 cents per Mcf at 14.65 p.s.i.a. for transportation and 2.5 per Mcf at 14.65 p.s.i.a. for compression. Estimated monthly volumes to be transported are 450,000 Mcf of gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 1, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP 73-123, etc.]

UNITED GAS PIPE LINE CO. ET AL.

Notice of Petition for Declaratory Order, and for Order Directing Compliance, and of Motion for Consolidation of Proceedings

NOVEMBER 8, 1972.

United Gas Pipe Line Company v. Humble Oil & Refining Company and Isaac Arnold et al., Docket No. CP73-123; Texas Gas Exploration Corporation, et al., Docket Nos. CI72-674, et al.

Take notice that on November 2, 1972, United Gas Pipe Line Co. (Petitioner) filed in Docket No. CP 73-123, pursuant to § 1.7(c) of the Commission's rules of practice and procedure and section 554 (e) of the Administrative Procedure Act, a petition for Declaratory Order and for Order Directing Compliance, requesting the Commission to order Humble Oil & Refining Co. (Humble) and Isaac Arnold et al., (Arnold) to desist from reducing deliveries to Petitioner under a 1958 contract, as amended in 1963, between Humble and Arnold as sellers, and Petitioner as buyer, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Concurrently, Petitioner filed a motion for consolidation of the instant docket with the previously consolidated proceedings in Texas Gas Exploration Corp., Docket No. CI72-674, Gulf Oil Corp., Docket No. CI62-965, and Southern Natural Gas Co., Docket No. CP73-72.

At issue in the above-mentioned consolidated proceedings are contractual rights to the gas produced from the Garden City Field, St. Mary Parish, La., which gas is the subject of the Petition for Declaratory Order filed by Petitioner herein.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 20, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-117]

UNITED GAS PIPE LINE CO.

Notice of Application

NOVEMBER 10, 1972.

Take notice that on November 2, 1972, United Gas Pipe Line Co. (Applicant), Post Office Box 1407, Shreveport, LA 71158, filed in Docket No. CP73-117 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the delivery of natural gas to American Cyanamid Co. (American Cyanamid) and the facilities used therefor, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to discontinue deliveries of natural gas on January 1, 1973, to American Cyanamid at its acrylic fiber plant located near Pensacola, Santa Rosa County, Fla. Applicant states that its available supply of natural gas is depleted to the extent that continuance of service to American Cyanamid for the principal purpose for which the gas is used is unwarranted. The application indicates that deliveries to American Cyanamid totaled 2,713,266 Mcf of gas in 1971 and 1,165,867 Mcf of gas through August 31, 1972. Applicant states that American Cyanamid uses 12 Mcf of gas per day as fuel for pilot lights and the remainder of the gas as boiler fuel and that following cessation of service American Cyanamid will use butane as pilot light fuel and fuel oil as boiler fuel.

Applicant proposes to abandon and remove a sales meter and regulator station and to abandon in place 2.5 miles of 6-inch pipeline, all of which have been operated exclusively to serve American Cyanamid.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 4, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding.

PRICE COMMISSION

[Notice 39]

BITUMINOUS COAL INDUSTRY

Allowable Costs Under Price Commission Regulations

The Price Commission has determined that, as a general practice, the following direct and indirect costs incurred after November 11, 1972, will be recognized as "allowable costs" for purposes of justifying price increases by producers of bituminous coal:

1. Cost of wage increases to the extent they do not exceed the formula stated in pargraph 1(a) of Price Commission Ruling 1972-12, January 18, 1972, reduced to reflect productivity gains calculated in accordance with § 300.11a of the Price Commission's regulations using an annual rate of productivity gain of 4.9 percent;

2. Cost of increased employer contributions to:

(i) A pension, profit-sharing, or annuity and savings plan which meets the requirements of sections 401(a), 404(a)(2), 404(c), or 403(b) of the Internal Revenue Code of 1954;

(ii) A group insurance plan;

(iii) A disability and health plan;

(iv) Old-age, survivors, and disability insurance (FICA); or

(v) An unemployment compensation fund; and

3. Costs (including labor costs) to comply with State and federally mandated reclamation and mine health and safety requirements.

With respect to long-term contracts subject to flexible pricing formulas based on costs, the price for each may not be increased over the base price (plus any increases thereto authorized by or under the regulations of the Price Commission before November 12, 1972) by an amount greater than that calculated in accordance with this notice.

An increase calculated in accordance with this notice may be applied to the company's different coal products as sold in different marketing areas, or to different classes of customers. However, if it is applied to different products or classes of products or different marketing areas, it must be applied in reasonable proportion to those products or markets.

The limitations imposed by this determination on the pass-through of increased costs do not apply to sales for export.

The Price Commission will apply the criteria set forth in this notice in acting on requests for price increases, filed by price category I firms engaged in producing coal, to be put into effect after November 11, 1972. Price category II and III firms engaged in the production of coal shall be governed by this notice in implementing price increases after that date.

Issued in Washington, D.C., on November 13, 1972.

C. JACKSON GRAYSON, Jr.,
Chairman, Price Commission.

SECURITIES AND EXCHANGE COMMISSION

[70-5260]

NORTHEAST UTILITIES ET AL.

Notice of Proposed Permanent Financing of Nuclear Fuel Cores

NOVEMBER 8, 1972.

Notice is hereby given that Northeast Utilities (Northeast), Post Office Box 270, Hartford, CT 06101, a registered holding company, and the Connecticut Light & Power Co. (CL&P), the Hartford Electric Light Co. (HELCO), and Western Massachusetts Electric Co. (WMECO), public utility subsidiary companies of Northeast, and the Millstone Point Co. (Millstone), a subsidiary company of Northeast, have filed with this Commission an application-declaration, and amendments thereto, pursuant to the Public Utility Holding Company Act of 1935 (Act), designating sections 6(a), 7, 9, 10, 12, and 13 thereof and Rules 42(b), 43, 45, and 50(a)(2), promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transactions.

CL&P, HELCO, and WMECO (Owners) own, as tenant-in-common, the Millstone Nuclear Power Station (Station), their participation interests therein being 53 percent, 28 percent, and 19 percent, respectively. Under an Operating Agreement (Holding Company Act Release No. 15691, March 20, 1967), Millstone is acting as Owners' agent respecting the construction and operation of the Station, of which the first unit (Unit No. 1) of 660,000 kw. was placed in operation in 1970, and the second unit (Unit No. 2) of 830,000 kw. is expected to begin operation in 1974. Owners expect to install subsequent additional nuclear generating units at the Station or other sites.

Owners have entered into a contract with General Electric Co. covering the furnishing of the nuclear fuel required for the first three complete cores for Unit No. 1 (Unit No. 1 Fuel Contract). The first core (which is already in place) is estimated to cost $31,900,000, and the second and third cores $35,400,000 and $37,900,000, respectively. The initial fuel core for Unit No. 2, including the uranium, will be purchased from Combustion Engineering, Inc. for an estimated $26,100,000. Under its contract with Owners (Unit No. 2 Fuel Contract), Combustion Engineering will also fabricate the second core for an estimated $7,500,000, with uranium (estimated to cost $21,300,000) provided by the applicants. In addition, the anticipated total cost of the fuel and fabrication for the first three cores for a projected 1,100,000 kw. nuclear unit scheduled for 1979 is approximately $101 million.

In a series of orders under File No. 70-4755, the Commission has authorized, among other things: (1) The transfer and assignment by Owners of their respective interests in the Unit No. 1 Fuel Contract to Millstone pursuant to an Interim Agreement, and (2) interim financings by Millstone pending the completion of satisfactory arrangements for the permanent financing of nuclear fuel by the latter. Pursuant to such orders, Millstone is presently authorized to issue and sell to banks a maximum aggregate of $12,500,000 principal amount of short-term notes (Interim Bank Notes) and $12,500,000 principal amount of subordinated notes (Interim Subordinated Notes) to its parent, Northeast. (See Holding Company Act Release No. 17692, Sept. 11, 1972.) Millstone also has outstanding $150,000 principal amount of long-term suborinated notes and $15,000 common equity, all held by Northeast.

Applicants now propose to institute a permanent financing program for Millstone providing, among other things: (1) For the refinancing of Millstone's outstanding Interim Bank Notes and Interim Subordinated Notes (initial phase financing), and (2) for the financing of Millstone's additional capital requirements through 1978 in respect of the procurement of nuclear fuel for Units No. 1 and No. 2 of the Station (subsequent phase financing). In connection therewith, Owners propose to enter into a contract (Fuel Supply Contract) with Millstone, extending until December 1, 1982, whereby (a) Owners' interests in Unit No. 2 Fuel Contract will be assigned to Millstone (their interests in Unit No. 1 Fuel Contract having heretofore been so assigned, as previously indicated); (b) Millstone as the owner thereof will procure and supply nuclear fuel, including replacement fuel, to Owners for use in Units No. 1 and No. 2 of the Station; and (c) Owners will pay Millstone's costs and expenses plus a return on invested capital, as more fully described below. It is further proposed that the Operating Agreement between Owners and Millstone be appropriately amended to reflect the foregoing and the associated proposed financing program.

The payments to Millstone under the Fuel Supply Contract will be made monthly by Owners in proportion to their respective participations in the Station. Such payments (which will be subject to the jurisdiction of the appropriate regulatory commission) are designed to cover (i) amounts chargeable as amortization of costs of the nuclear fuel elements; (ii) all other amounts chargeable to fuel costs for the Station, less applicable credits thereto for the salvage value of uranium and plutonium recovered in fuel reprocessing; (iii) to the extent not chargeable to fuel costs under (i) and (ii), all payments on account of indebtedness or lease obligations incurred in connection with the nuclear core elements, including interest expense and payments of principal when due. In addition, to the extent not reflected in the foregoing, Owners will pay Millstone monthly an amount equal to one-twelfth of 8.5 percent of Millstone's total capitalization. It is intended that the monthly payments shall also cover all other expenses of Millstone incident to its undertaking, such as license fees and all other governmental charges and taxes including taxes on income. The Fuel Supply Contract also obligates Owners to supply, or cause to be supplied, to Millstone such amounts of Equity Capital as shall be required to enable Millstone to comply with the capitalization-ratio covenants of the Indenture applicable to Millstone's secured notes, hereinafter described.

Both the initial and subsequent phases of the proposed permanent financing program will involve the issuance and sale by Millstone of long-term notes (Secured Notes) and short-term notes to banks (Bank Notes); in addition, both phases will involve equity capital investments by Northeast from time to time through purchases of common stock and/or capital contributions.

Millstone's outstanding interim debt is estimated to aggregate $23,200,000 as at December 1, 1972, consisting of $12,500,000 Interim Bank Notes, and $10,700,000 Interim Subordinated Notes held by Northeast. As initial phase financing, it is proposed that Millstone issue and sell $9 million principal amount of Secured Notes (to be designated Series A) and $9,450,000 face amount of Bank Notes—the total proceeds to be used to pay all the outstanding Interim Bank Notes and $5,950,000 of the outstanding Interim Subordinated Notes. It is further proposed that the balance of Millstone's Interim Subordinated Notes ($4,750,000) and the $150,000 of long-term notes—all held by Northeast—be converted into permanent equity capital of Millstone. After giving effect to the foregoing initial phase financing, Millstone's capital structure will consist of approximately 65 percent long-term debt and 35 percent equity capital. Beyond the initial phase financing, Millstone's capital requirements are expected to increase irregularly but substantially as additional nuclear fuel elements (and replacements) are procured by it for use in Units No. 1 and No. 2 of the Station. It is proposed that such procurements be financed through further issuances of Bank Notes and Secured Notes and through equity capital investments by Northeast.

The proposed initial $9 million principal amount of Secured Notes (Series A) will be sold to The Travelers Insurance Co. at 100 percent of principal amount; will bear an interest rate of 8.5 percent per annum; will be dated as of December 1, 1972; and will mature December 1, 1982. The Series A will be issued under an open-end Trust Indenture (Indenture) dated as of December 1, 1972, between Millstone and The Connecticut Bank and Trust Co., Trustee. The Indenture will prohibit the redemption of any of the Series A Secured Notes prior to December 1, 1977, through the direct or indirect use of funds borrowed at an effective interest cost to Millstone of less than 8.5 percent per annum. The Series A Secured Notes will not be subject to a sinking fund. The Indenture will also provide, among other things: (1) An adequate inventory of nuclear fuel elements shall be maintained at all times for efficient operation of the station, the fair value of such inventory fuel to be not less than 100 percent of all Secured Notes outstanding. (2) Additional Secured Notes may be issued in amounts not exceeding 65 percent of the fair value of "eligible nuclear core elements" certified to the Trustee as the basis for such issuance. To be "eligible," the core elements must be at the site of the generating unit referred to in the relevant Fuel Supply Contract and must be useful in such unit. No earnings test is provided; Millstone, however, is required to execute and maintain the Fuel Supply Contract on terms as hereinabove described, with Owners, or, in the case of future Fuel Supply Contracts, with Owners and with other utilities provided for in the Indenture. (3) Millstone shall at all times maintain an amount of Equity Capital (consisting of capital stock and surplus plus any subordinated indebtedness to Northeast or wholly owned subsidiaries thereof) equal to not less than (a) 35 percent of the sum of Equity Capital and Secured Notes, and (b) 17½ percent of the sum of Equity Capital, Secured Notes, and bank borrowings. (4) Cash dividends and other distributions on the common stock after December 1, 1972, shall not in the aggregate exceed Millstone's aggregate earnings applicable to common stock after that date, plus such additional amounts as the Commission may authorize under the Act.

To provide Millstone with financing flexibility in meeting its month-to-month capital requirements, the Commission is requested to authorize the issuance, sale, repayment and/or reissuance of Bank Notes through December 31, 1974, in a total aggregate amount not to exceed $25 million at any one time outstanding. Although no formal commitments have been made for such bank borrowings, Millstone expects that a portion thereof will be effected from the following banks in the amounts indicated:

Maximum Amount	hearing thereon. Any such request should be addressed: Secretary, Securi-	1 percent in the six'h and seventh years. The effective interest rate of the notes

For the Commission, by the Division of Corporate Regulation, pursuant to

MC-129291 (Sub-No. 5), McDaniel Motor Express, Inc., now assigned December 4, 1972,

MC-107515 Sub 799, Refrigerated Transport Co., Inc., now being assigned hearing Janu-

XUM
V37-221-NOV15-72
XUM

Bank	Maximum Amount
The Connecticut Bank and Trust Co.	$9,000,000
Hartford National Bank and Trust Co.	9,000,000
	18,000,000

Bank borrowings to be effected from additional banks or in larger maximum amounts will be the subject of one or more post-effective amendments hereto. The Bank Notes will each be dated the date of issue; will have a maximum maturity date of 9 months with right of renewal; will bear interest at the prime rate in effect from time to time at The Connecticut Bank and Trust Co., adjusted as of the date of any change in such rate; will be subject to prepayment at any time at Millstone's option without premium; and will be subordinated to all Secured Notes issued by Millstone. There will be no compensating-balance requirement.

It is contemplated that after the initial phase financing Millstone's capital requirements will be met in the first instance by the issue and sale of Bank Notes pursuant to the requested authorization. Outstanding Bank Notes will be refinanced from time to time through successive sales of Secured Notes and equity investments by Northeast. The issuance and sale of future series of Secured Notes and the terms thereof (including redemption provisions, sinking fund requirements, etc.) will be the subject of future applications under the Act.

Authorization is requested for the issuance by Millstone of its common stock to, and/or the making of capital contributions by, Northeast, in such amounts as may be required from time to time to meet the capital ratio limitations of the Indenture and to carry out the Fuel Supply Contract. It is estimated that, in all, the amount of common stock issued and capital contributions made before December 31, 1978, will not exceed $25 million. The common stock is without par value; purchases thereof by Northeast will be at a price of $1,000 per share.

A statement of the fees, commissions, and expenses paid or incurred or to be paid or incurred, directly or indirectly, in connection with the proposed transactions will be supplied by amendment.

It is stated that the Massachusetts Department of Public Utilities has approved the form of the Fuel Supply Contract to be executed by WMECO; that the approval of the Connecticut Public Utilities Commission is required for the issue by Millstone of its common stock and Secured Notes; and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than November 29, 1972, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as now amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

WHEELING ELECTRIC CO.

Notice of Proposed Issue and Sale of Long Term Notes to Banks

NOVEMBER 8, 1972.

Notice is hereby given that Wheeling Electric Co. (Wheeling), 51-16th Street, Wheeling, WV 26003, a public-utility subsidiary company of American Electric Power Company, Inc., a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating sections 6(a) and 7 thereof as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Wheeling proposes pursuant to a bank loan agreement to issue and sell on or before November 1, 1975, its unsecured notes maturing November 1, 1979, in the aggregate amount of $19 million outstanding at any one time. The names of the banks and their commitments are as follows:

Mellon National Bank and Trust Co., Pittsburgh, Pa.	$10,000,000
First National City Bank, New York, N.Y.	5,000,000
Bankers Trust Co., New York, N.Y.	4,000,000
	19,000,000

Borrowings from Mellon and Bankers Trust will bear interest at 114 percent of the prime rate in effect at each bank from time to time, plus ¼ of 1 percent in the fourth and fifth years and ½ of 1 percent in the sixth and seventh years. The effective interest rate of the notes sold to First National City will range from 114 percent of its prime rate in the first 2 years to 123 percent of its prime rate in the seventh year. The agreement provides further that the average annual interest rate paid to any of the banks shall not exceed 7.5 percent. Wheeling will pay to each bank substitute interest computed at the rate of ½ of 1 percent per annum on the daily average unused amount of such bank's commitment. Prepayment of the notes, in whole or in part, may be made at any time without premium. Wheeling has agreed not to create or suffer to exist any mortgage upon its property, or to incur any indebtedness for borrowed money (other than short term debt in an amount not exceedinf 10 percent of its capitalization) if the total of all indebtedness (other than short term debt to the extent specified) shall exceed 65 percent of Wheeling's capitalization.

Wheeling states that the $19 million of notes are to be issued for the purpose of (a) paying at maturity the $13 million of its presently outstanding notes due December 1, 1972, (b) prepaying its short term notes payable to banks of which $4,190,000 were outstanding at June 30, 1972, and (c) providing additional cash to be used to pay, in part, the cost of its 1972 and 1973 construction programs estimated to cost approximately $1,600,000 and $1,900,000, respectively.

Fees and expenses to be incurred in connection with the proposed transactions are estimated at $2,500. It is stated that no State or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than November 29, 1972, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

INTERSTATE COMMERCE COMMISSION

[Notice 117]

ASSIGNMENT OF HEARINGS

NOVEMBER 10, 1972.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC-F-11275, Navajo Freight Lines, Inc.—Control—Joe Hodges Transportation Corp., now assigned January 29, 1973, at Denver, Colo., is postponed to January 22, 1973, at Denver, Colo., in a hearing room to be later designated.

Ex Parte No. 270 Sub 1B, Export—Import rates and charges Great Lakes, continued to February 5, 1973 (1 week), at Chicago, Ill., in a hearing room to be later designated.

MC 117304 Sub 30, Don Paffile, doing business as Paffile Truck Lines, now being assigned hearing January 18, 1973 (2 days), at Seattle, Wash., in a hearing room to be later designated.

MC 136070 Sub 1, John F. Schroeder, Inc., now being assigned hearing January 15, 1973 (2 days), at Seattle, Wash., in a hearing room to be later designated.

MC 112989 Sub 25, West Coast Truck Lines, Inc., now being assigned hearing January 17, 1973 (1 day), at Seattle, Wash., in a hearing room to be later designated.

MC 1515 Sub 181, Greyhound Lines, Inc., now being assigned hearing January 22, 1973 (3 days), at Portland, Oreg., in a hearing room to be later designated.

I & S No. 8707, Refrigeration Provisions, Florida East Coast Railway, I & S No. 8720, Icing Services, U.S. Railroads, now assigned November 27, 1972, at Los Angeles, Calif., will be held in Tax Courtroom, Customhouse, Federal Office Building, 300 Los Angeles Street.

MC-C-7823, New England-New York Transport, Inc.—Investigation and revocation of certificates, now assigned December 7, 1972, at Boston, Mass., will be held in Room 2211B, John Fitzgerald Kennedy Building, Government Center.

I & S 8789, Passenger Fare Increase, Penn Central, now assigned December 4, 1972, at Providence, R.I., will be held in Conference Room, State of Rhode Island P.U.C., Alwyn-Mason Building, 169 Weybosset Street.

MC-129291 (Sub-No. 5), McDaniel Motor Express, Inc., now assigned December 4, 1972, will be held in Room G-2, Capitol Plaza Tower, Department of Transportation, Frankfort, Ky.

MC 111812 Sub 478, Midwest Coast Transport, Inc., MC 117799 Sub 37, Best Way Frozen Express, Inc., now being assigned hearing February 1, 1973, at Omaha, Nebr., in a hearing room to be later designated.

MC-F-11372, Roadway Express, Inc.—Control and Merger—Poole Transfer, Inc., continued to November 28, 1972, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC-C-7786, Eck Miller Transportation Corp.—Investigation and revocation of certificates, now assigned December 4, 1972, at Louisville, Ky., is postponed indefinitely.

MC 134847 Sub 3, Bessette Transport, Inc.—Extension-Bedford Slate, now being assigned hearing January 15, 1973 (1 day), at Boston, Mass., in a hearing room to be later designated.

MC 133095 Sub 34, Texas Continental Express, Inc., now being assigned hearing January 16, 1973 (1 day), at Boston, Mass., in a hearing room to be later designated.

MC 108587 Sub 15, Schuster's Express, Inc., now being assigned hearing January 17, 1973 (3 days), at Boston, Mass., in a hearing room to be later designated.

MC 118292 Sub 31, Ballentine Produce, Inc., now being assigned hearing January 29, 1973 (2 days), at San Francisco, Calif., in a hearing room to be later designated.

MC 116474 Sub 21, Leavitts Freight Service, Inc., now being assigned January 25, 1973 (2 days), at Portland, Oreg., in a hearing room to be later designated.

No. 35599, Southern Pacific Transportation Co., Pacific Motor Trucking Co., Bonded Draying Service, Transportation Service Co. and Aldo J. Scoffone—Investigation of Practices, MC-C-7758, Southern Pacific Transportation Co., Pacific Motor Trucking Co., Silas F. Royster doing business as, Royster Trucking Co., Bonded Draying Service, Transportation Service Co., and Aldo J. Scoffone—Investigation of Operations—now being assigned hearing January 31, 1973 (3 days), at San Francisco, Calif., in a hearing room to be later designated.

MC-41432 Sub 128, East Texas Motor Freight Lines, Inc., MC-83539 Sub 345, C & H Transportation Co., Inc., now assigned December 4, 1972; will be held in Room 5A-15, Federal Building, 1100 Commerce Street, Dallas, Tex.

MC-68100 Sub 16, D. P. Bonham Transfer, Inc., now assigned December 5, 1972, will be held in Room 5A-15, Federal Building, 1100 Commerce Street, Dallas, Tex.

MC-110525 Sub 1037, Chemical Leaman Tank Lines, Inc., now assigned December 6, 1972, will be held in Room 5A-15, Federal Building, 1100 Commerce Street, Dallas, Tex.

MC-135021 Sub 1, Texas Overland Trucking Express, Inc., now assigned December 11, 1972, will be held in Room 5B-43, Federal Building, 1100 Commerce Street, Dallas, Tex.

M-55898 Sub 48, Harry A. Decato, doing business as Decato Bros. Trucking Co., now being assigned hearing January 22, 1973 (2 days), at Boston, Mass., in a hearing room to be later designated.

MC-136750 Sub 1, New England Finishing & Furniture Haulers, Inc., now being assigned hearing January 24, 1973 (3 days), at Boston, Mass., in a hearing room to be later designated.

MC-107515 Sub 799, Refrigerated Transport Co., Inc., now being assigned hearing January 22, 1973 (2 weeks), at New York, N.Y., in a hearing room to be later designated.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.72-19622 Filed 11-14-72;8:50 am]

[S.O. 1112, Exception 2]

CERTAIN RAILROAD-OWNED REFRIGERATOR CARS

Exception To Encourage Use by Other Railroads

It appearing, that the supplies of railroad-owned refrigerator cars of mechanical designations RP, RPL, RS, and RSB on owners' lines are adequate; that numerous other carriers have need for such cars; that elimination of empty cars bearing railroad reporting marks and having mechanical designations RP, RPL, RS, and RSB from paragraph (a)(1)(iii) will best encourage their use by other railroads.

It is ordered, That, pursuant to the authority vested in the Railroad Service Board by Service Order No. 1112, paragraph (a)(1)(xiv), empty cars bearing railroad reporting marks and having mechanical designations RP, RPL, RS, and RSB, are hereby eliminated from the car types listed in paragraph (a)(1)(iii) of Service Order No. 1112.

Effective November 7, 1972.

Issued at Washington, D.C., November 8, 1972.

RAILROAD SERVICE BOARD,
ROBERT L. OSWALD,
Secretary.

[FR Doc.72-19626 Filed 11-14-72;8:51 am]

[S. O. 1112, Exception 1]

THE GREAT WESTERN RAILWAY CO. AND UNION PACIFIC RAILROAD CO.

Storage of Empty Covered Hopper Cars

It appearing, that a substantial number of covered hopper cars bearing mechanical designation "LO" are assigned to the exclusive use of the Great Western Sugar Co.; that these cars are loaded at eight different loading points located on The Great Western Railway Co. or the Union Pacific Railroad Co.; that these cars are presently assigned to the shipper at Milliken, Colo., a nonloading point accessible to both railroads, for purposes of distribution; that such assignment to a central distribution point results in increased car utilization and the assignment of fewer cars than would separate assignment to each loading point.

It is ordered, That, pursuant to the authority vested in the Railroad Service Board by Service Order No. 1112, paragraph (a)(1)(xiv), The Great Western Railway Co. and the Union Pacific Railroad Co. are hereby authorized to store

Thence over unnumbered highway to Albion, thence over Michigan Highway 99 to junction Interstate Highway 94, (17) from Kalamazoo, liamstown, Ky., over Kentucky Highway 36 to junction Interstate Highway 75, tion Virginia Highway 10, thence over Virginia Highway 10 to Smithfield, Va.,

No. 221—Pt. I——9

at Milliken, Colo., empty covered hopper cars of mechanical designation "LO" which are assigned to the exclusive use of the Great Western Sugar Co. for loading at any of the stations named herein. Such cars, while stored at Milliken, are subject to the provisions of paragraph (a)(2)(iii) of Service Order No. 1112. When subsequently ordered from Milliken for placement for loading by Great Western Sugar Co. at any of its facilities named herein and located on the lines of the railroad designated opposite each station named, empty car storage charges shall cease, and demurrage or detention charges covering all subsequent detention shall be assessed in accordance with the applicable tariffs.

The provisions of exception to paragraph (a)(1)(ix) of Service Order No. 1112 shall not apply to empty cars ordered from Milliken to any of the stations named herein. Any such car diverted empty while stored at Milliken, or after arrival at one of the named loading points, to any other point, shall be subject to the exception to section (a)(1)(ix) of Service Order No. 1112:

[Notice 30]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

NOVEMBER 10, 1972.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules—Motor Carriers of Passengers, 1969 (49 CFR 1042.2(c)(9)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.2(c)(9)) at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of publication.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PASSENGERS

No. MC-1515 (Deviation No. 634) (Cancels Deviation Nos. 387 and 464), GREYHOUND LINES, INC. (Eastern Division), 1400 West Third Street, Cleveland, OH 44113, filed October 25, 1972. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage, and express and newspapers* in the same vehicle with passengers, over deviation routes as follows: (1) From junction Interstate Highway 94 and U.S. Highway 41, in Hammond, Ind., over Interstate Highway 94 to interchange unnumbered highway (formerly U.S. Highway 12) just southeast of Galesburg, Mich., (2) from the interchange of Interstate Highway 94 and Interstate Highway Business Loop 94, southwest of Battle Creek, Mich., over Interstate Highway 94 to the interchange of Interstate Highway 94 and Interstate Highway Business Loop 94 just east of Jackson, Mich., (3) from the Fletcher Road Interchange with Interstate Highway 94, approximately 1 mile west of Lima, Mich., over Interstate Highway 94 to interchange of U.S. Highway 23 and Interstate Highway 94 south of Ann Arbor, Mich., (4) from Gary, Ind., over city streets to interchange Interstate Highway 94, (5) from junction to U.S. Highway 20 and Indiana Highway 49 over Indiana Highway 49 to interchange Interstate Highway 94, (6) from Michigan City, Ind., over U.S. Highway 421 to junction Interstate Highway 94, (7) from Michigan City, Ind., over U.S. Highway 20 to junction Interstate Highway 94, (8) from Interchange No. 7 of the Indiana East-West Toll Road over Indiana Highway 39 to the Michigan-Indiana State line, thence over Michigan Highway 239 to interchange Interstate Highway 94, (9) from New Buffalo, Mich., over U.S. Highway 12 to interchange with Interstate Highway 94,

(10) From Benton Harbor, Mich., over Interstate Highway B.R. (Business Route) 94 to Interchange Interstate Highway 94 approximately 3 miles east of Benton Harbor, (11) from Coloma, Mich., over Berrien County Highway 706 to interchange Interstate Highway 94, (12) from Watervliet, Mich., over Michigan Highway 140 to interchange Interstate Highway 94, (13) from Paw Paw, Mich., over Michigan Highway 40 to interchange Interstate Highway 94, (14) from Oshtemo, Mich., over Ninth Street to interchange Interstate Highway 94, (15) from Kalamazoo, Mich., over Interstate Highway B.L. (Business Loop) 94 to interchange U.S. Highway 131, thence over U.S. Highway 27 to interchange Interstate Highway 94, west of Kalamazoo, (16) from Kalamazoo, Mich., over Westnedge Avenue to interchange Interstate Highway 94, (17) from Kalamazoo, Mich., over Interstate Highway B.L. (Business Loop) 94 to interchange Interstate Highway 94 east of Kalamazoo, (18) from Battle Creek, Mich., over Michigan Highway 66 to interchange Interstate Highway 94, (19) from Marshall, Mich., over U.S. Highway 27 to interchange Interstate Highway 94, (20) from Marshall, Mich., over Interstate Highway B.L. (Business Loop) 94 to interchange Interstate Highway 94 east of Marshall, (21) from Albion, Mich., over Interstate Highway B.L. (Business Loop) 94 to interchange Interstate Highway 94 north of Albion, (22) from junction Spring Arbor Road and Michigan Highway 60 southwest of Jackson, Mich., over Michigan Highway 60 to interchange Interstate Highway 94, (23) from Jackson, Mich., over U.S. Highway 127 to junction Interstate Highway 94, and (19) also, access and egress to Interstate Highway 94 where it junctions with regular route operations of applicant as follows:

(a) The interchange of the Indiana East-West Toll Road and Interstate Highway 94 in Gary, Ind., (b) the interchange of Interstate Highway B.L. 94 and Interstate Highway 94, 1 mile north of Stevensville, Mich., (c) the interchange of Interstate Highway B.L. 94 and Interstate Highway 94, east of Battle Creek, Mich., and (d) the interchange of Michigan Highway 99 and Interstate Highway 94, east of Albion, Mich., and return over the same routes, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From Chicago, Ill., over U.S. Highway 12 via Michigan City, Ind., to New Buffalo, Mich., thence over Red Arrow Highway (formerly U.S. Highway 12) to junction Interstate Highway B.R. (Business Route) 94, just north of Stevensville, Mich., thence over Interstate Highway B.R. (Business Route) 94 through St. Joseph and Benton Harbor to junction Red Arrow Highway, thence over Red Arrow Highway (formerly U.S. Highway 12) to Coloma, Mich., thence over unnumbered highway (formerly U.S. Highway 12) via Hartford, Lawrence, and Paw Paw to junction Interstate Highway B.L. (Business Loop) 94 at the junction of U.S. Highway 131, thence over Interstate Highway B.L. (Business Loop) 94 through Kalamazoo, Mich., to junction Michigan Highway 96, thence over Michigan Highway 96 to Galesburg, Mich., thence over unnumbered highway to interchange with Interstate Highway 94, thence over Interstate Highway 94 to interchange with Interstate Highway B.L. (Business Loop) 94, just west of Battle Creek, thence over Interstate Highway B.L. (Business Loop) 94 through Battle Creek to junction Interstate Highway 94, thence over unnumbered highway to Marshall, thence over Interstate Highway B.L. (Business Loop) 94 to junction unnumbered highway east of Marshall,

Thence over unnumbered highway to Albion, thence over Michigan Highway 99, crossing Interstate Highway 94 to junction access road to Michigan Avenue, thence over access road to Michigan Avenue, thence over Michigan Avenue, via Parma to Jackson, thence over Interstate Highway B. L. (Business Loop) 94 to junction Interstate Highway 94, thence over Interstate Highway 94 to Fletcher Road Interchange, west of Lima, thence over unnumbered highway via Lima to Ann Arbor, thence over U.S. Highway 23 to junction Interstate Highway 94, thence over Interstate Highway 94 to Ypsilanti, thence over Michigan Highway 17 via Allen Park to junction Southfield Road, thence over Southfield Road to Lincoln Park, Mich., thence over South Fort Road to Detroit, Mich. (also from junction U.S. Highway 12 and Indiana Highway 520, formerly unnumbered highway, approximately 1½ miles west of Michigan City, Ind., over Indiana Highway 520 to junction U.S. Highway 20; also from Michigan City, Ind., east over U.S. Highway 35 to junction U.S. Highway 20; also from Galesburg, Mich., over Michigan Highway 96 via Augusta to Battle Creek; also from Augusta over unnumbered highway to Battle Creek; also from junction Interstate Highway B. L. (Business Loop) 94 and Michigan Avenue just east of Jackson, over Michigan Avenue via Leoni and Gass Lake, Mich., to junction Interstate Highway 94 just north of Sylvan, Mich.; also from Interchange unnumbered highway and Interstate Highway 94 just north of Sylvan over unnumbered highway via Chelsea, Mich., to Fletcher Road Interchange with Interstate Highway 94; also from Ann Arbor over U.S. Highway 23 to junction Interstate Highway 94, thence over Interstate Highway 94 to Ypsilanti, thence over U.S. Highway 12 to Detroit; also from Ann Arbor over Michigan Highway 17 to Ypsilanti; also from interchange of Interstate Highway 94 and Michigan Highway 17 east of Ypsilanti over Interstate Highway 94 to junction U.S. Highway 12; and also from Allen Boulevard to Fort Street, thence over Fort Street to Detroit, Mich.), and return over the same routes.

No. MC-1515 (Deviation No. 635) (Cancels Deviation No. 535), GREYHOUND LINES, INC. (Eastern Division), 1400 West Third Street, Cleveland, OH 44113, filed October 25, 1972. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express and newspapers* in the same vehicle with passengers, over a deviation route as follows: From Covington, Ky., over Interstate Highway 75 to Knoxville, Tenn., with the following access routes (1) from Richwood, Ky., over Kentucky Highway 338 to junction Interstate Highway 75, (2) from Walton, Ky., over Kentucky Highway 14–16 to junction Interstate Highway 75, (3) from Crittenden, Ky., over Kentucky Highway 491 to junction Interstate Highway 75, (4) from Dry Ridge, Ky., over Kentucky Highway 22 to junction Interstate Highway 75, (5) from Williamstown, Ky., over Kentucky Highway 36 to junction Interstate Highway 75, (6) from Corinth, Ky., over Kentucky Highway 330 to junction Interstate Highway 75, (7) from Georgetown, Ky., over U.S. Highway 62 to junction Interstate Highway 75, (8) from Lexington, Ky., over Kentucky Highway 922 to junction Interstate Highway 75, (9) from Richmond, Ky., over U.S. Highway 25 to junction Kentucky Highway 876, thence over Kentucky Highway 876 to junction Interstate Highway 75, (10) from Berea, Ky., over U.S. Highway 25 to junction Kentucky Highway 21, thence over Kentucky Highway 21 to junction Interstate Highway 75, (11) from Mount Vernon, Ky., over U.S. Highway 25 northbound to junction Interstate Highway 75, (12) from Mount Vernon, Ky., over U.S. Highway 25 southeasterly to junction Interstate Highway 75, (13) from Corbin, Ky., over U.S. Highway 25 to junction Kentucky Highway 709, thence over Kentucky Highway 709 to junction Interstate Highway 75, (14) from Corbin, Ky., over U.S. Highway 25–W to junction Interstate Highway 75, (15) from Williamsburg, Ky., over Kentucky Highway 92 to junction Interstate Highway 75, and (16) from Jellico, Tenn., over U.S. Highway 25–W southeasterly to junction Interstate Highway 75, and return over the same routes, for operating convenience only.

The notice indicates that the carrier is presently authorized to transport passengers and the same property, over pertinent service routes, as follows: (1) From Cincinnati, Ohio, over U.S. Highway 25 to Lexington, Ky. (also from Cincinnati across the Ohio River to Covington, Ky., thence over Kentucky Highway 17 to junction U.S. Highway 27, thence over U.S. Highway 27 to Lexington), and thence over U.S. Highway 27 to Chattanooga, Tenn., and (2) from Lexington, Ky., over U.S. Highway 25 via Livingston, Oakley and East Bernstadt, Ky., to Corbin, Ky., thence over U.S. Highway 25–W to Knoxville, Tenn., and return over the same route.

No. MC-13300 (Deviation No. 26), CAROLINA COACH COMPANY, 1201 South Blount Street, Raleigh, NC 27602, filed October 25, 1972. Carrier's representative: James E. Wilson, Suite 1032, Pennsylvania Building, Pennsylvania Avenue and 13th Street, NW., Washington, D.C. 20004. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage, and express and newspapers* in the same vehicle with passengers, over a deviation route as follows: From Richmond, Va., over Interstate Highway 64 to junction Virginia Highway 168, thence over Virginia Highway 168 to junction Interstate Highway 64, thence over Interstate Highway 64 to Norfolk, Va., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From Richmond, Va., over combined U.S. Highways 1 and 301 to junction Virginia Highway 10, thence over Virginia Highway 10 to Smithfield, Va., thence over combined Virginia Highway 10 and U.S. Highway 258 to Benns Church, Va., thence over combined Virginia Highways 10 and 32 to Chuckatuck, Va., thence over Virginia Highway 125 to Driver, Va., thence over Virginia Highway 337 to Portsmouth, Va., thence over U.S. Highway 58 to Norfolk, Va., and return over the same route.

By the Commission.

[Notice 92]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

NOVEMBER 10, 1972.

The following publications are governed by the new Special Rule 1.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.[1]

The publications hereinafter set forth reflect the scope of the applications as filed by applicant, and may include descriptions, restrictions, or limitations which are not in a form acceptable to the Commission. Authority which ultimately may be granted as a result of the applications here noticed will not necessarily reflect the phraseology set forth in the application as filed, but also will eliminate any restrictions which are not acceptable to the Commission.

APPLICATIONS ASSIGNED FOR ORAL HEARING

MOTOR CARRIERS OF PROPERTY

NOTICE FOR FILING PETITIONS

No. MC 107409 (Sub-No. 21) (Notice of Filing of Petition for Modification of Existing Authority), filed November 1, 1972. Petitioner: RATLIFF & RATLIFF, INC., Lexington, N.C. Petitioner's representative: William P. Jackson, Jr., 919 18th Street NW., Washington, DC 20006. Petitioner presently holds a certificate in No. MC 107409 (Sub-No. 21), authorizing, as pertinent, operation as a common carrier by motor vehicle, over irregular routes of: *Manufactured iron and steel products and articles*, on flat bed or on open-top vehicles, from the plantsite of Armco Steel Corp., at or near Ashland, Ky., to points in Virginia, Tennessee, North Carolina, South Carolina, Georgia, and Florida, with no transportation for compensation on return except as otherwise authorized. By the instant petition, petitioner seeks removal of the equipment restriction on its Sub-No. 21 authority. The modified authority sought as to transport, as a motor

[1] Except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

common carrier, over irregular routes: *Manufactured iron and steel products*

among other things, whether transferee, under § 1132.3 of the rules and regula-

sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other

and places in the States named above; *new automobiles, new trucks*, and *new*

ada, of control of such rights through the purchase. Applicant's attorneys: David A. Sutherlund and Robert S. Burk, 2001

for temporary authority under section 210a(b).

By the Commission

common carrier, over irregular routes: *Manufactured iron and steel products and articles*, from the plantsite of Armco Steel Corp., at or near Ashland, Ky., to points in Virginia, Tennessee, North Carolina, South Carolina, Georgia, and Florida, with no transportation for compensation on return except as otherwise authorized. Any interested person desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

No. MC 129228 (Sub-No. 1) (Notice of Filing of Petition To Add an Additional Shipper), filed October 21, 1972. Petitioner: McCABE'S EXPRESS & TRUCKING CO., LTD., 134 Garfield Avenue, Jersey City, NJ 07305. Petitioner's representative: George A Olsen, 69 Tonnele Avenue, Jersey City, NJ 07306. Petitioner presently holds a permit in No. MC 129228 (Sub-No. 1) issued May 16, 1972, authorizing operation as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lighting fixtures and lamps, and equipment, materials, and supplies* used in their manufacture and sale, except commodities in bulk, between Jersey City and Kearny, N.J., on the one hand, and, on the other, points in Louisiana, Minnesota, and Texas, and those points in the United States east of the Mississippi River, under a continuing contract or contracts with Lightolier, Inc., of Jersey City, N.J. By the instant petition, petitioner seeks to add Aluminum Processing Corporation of Fall River, Mass., a subsidiary of Lightolier, Inc., as an additional shipper to its authority herein stated above. Any interested person desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition within 30 days from the date of publication in the FEDERAL REGISTER.

TRANSFER APPLICATIONS TO BE ASSIGNED FOR ORAL HEARING

No. MC–FC–73782. Authority sought by transferee, BEALL'S EXPRESS, INC., 103 Apples Church Road, Thurmont, MD, to transfer to transferee operating rights of transferor, WESTERN EXPRESS, INC., 1522 South Caton Avenue, Baltimore, MD 21227. Transferee's and transferor's representative: James L. Doherty, 425 St. Paul Place, Baltimore MD 21202. Operating rights in Certificate No. MC–21244 sought to be transferred: Such articles as are purchased at auction sales, bankrupts', or sales of merchants' surplus stock in trade, except new furniture, between Baltimore, Md., on the one hand, and, on the other, New York, N.Y., and points and places in New Jersey, Delaware, Pennsylvania, Virginia, Maryland, North Carolina, and the District of Columbia.

The above-entitled transfer application under section 212(b) of the Interstate Commerce Act is to be assigned for hearing for the purpose of determining, among other things, whether transferee, under § 1132.3 of the rules and regulations governing transfer of operating rights, is fit to acquire the rights proposed for transfer. Interested parties have 30 days from the date of this publication in which to file petitions for leave to intervene. Such petitions should state the reason or reasons for the intervention, where the petitioner wishes the hearing to be held, the number of witnesses to be presented, and the estimated time required for the presentation of evidence. The Bureau of Enforcement has been directed to participate as a party in the proceeding for the purpose of presenting evidence and otherwise developing the record.

APPLICATION FOR CERTIFICATE OF PERMIT WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATION UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE

No. MC 127602 (Sub-No. 12) (Amendment), filed September 18, 1972, published in the FEDERAL REGISTER issue of October 4, 1972, and republished as amended, this issue. Applicant: DENVER-MIDWEST MOTOR FREIGHT, INC., 525 Jones Street, Box 156 D.T.S., Omaha, NE 68101. Applicant's representative: Earl H. Scudder, Jr., Post Office Box 82028, 605 South 14th Street, Lincoln, NE 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over regular and irregular routes, transporting: *General commodities* (except commodities in bulk, household goods as defined by the Commission, commodities which because of size or weight require the use of special equipment, and classes A and B explosives). (1) Regular Routes: Serving points in Cook, Lake, McHenry, Kane, Du Page, De Kalb, Kendall, Grundy, Will, and Kankakee Counties, Ill., as off-route points in connection with carrier's existing authority; and (2) Irregular Routes: Between points in those counties named in (1) above, on the one hand, and, on the other, all points in Illinois. NOTE: Applicant states it intends to tack the authority sought with its existing authority at Chicago, Ill., to provide a through service. This application is a matter directly related to MC–F–11662, published in the FEDERAL REGISTER issue of September 27, 1972. The instant application seeks to convert the Certificate of Registration of Streator Transfer & Storage Co. under No. MC 98297 into a Certificate of Public Convenience and Necessity. The purpose of this republication is to reflect: (1) That regular and irregular operations are involved, (2) to redescribe the territorial description, and (3) to change the tacking information. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

APPLICATIONS UNDER SECTIONS 5 AND 210(a)(b)

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto. (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–11683. (Correction) (WILSON FREIGHT COMPANY — PURCHASE (PORTION)—TRANSPORTATION SERVICE, INC., published in the October 18, 1972, issue of the FEDERAL REGISTER on page 22027. Prior notice should have included that transferee operates in the States of Arkansas and Michigan in addition to those shown in the publication.

No. MC–F–11687. Authority sought for purchase by Commercial Carriers, Inc., 10701 Middlebelt Road, Romulus, MI 48174, of the operating rights and property of Paul A. Mavis (a noncarrier), 7101 E. Slauson Avenue, Los Angeles, CA 96022, and for acquisition by American Commercial Lines, Inc., and in turn by Richard C. Young, both of Post Office Box 1160, Owensboro, KY 42301, and Texas Gas Transmission Corp., and in turn by Robert O. Koch, both of 3800 Frederica Street, Owensboro, KY 42301, of control of such rights and property; in No. MC–F–11685, Paul A. Mavis, sought to purchase the operating rights of Robertson Truck-A-Ways, Inc., and these rights in turn will be transferred to Commercial Carriers, Inc. Applicants' attorneys: Charles Pieroni, 400 West Sample Street, South Bend, IN 46627, Jack C. Goodman, 39 South LaSalle Street, Chicago, IL 60603, and E. Phillips Malone, 3800 Frederica Street, Owensboro, KY 42301. Operating rights sought to be transferred: *New automobiles*, in initial movements, as a *common carrier* over irregular routes, from Long Beach, Calif., to points and places in Arizona, New Mexico, Nevada, Oregon, and Utah; *new automobiles* and *new trucks*, in initial movement, from Maywood, Calif., and points and places within 1 mile thereof, to points and places in Arizona, Nevada, and Oregon; *new automobiles*, in secondary movements, from points and places in California, on San Francisco Bay, to points and places in California, except Long Beach, San Pedro, and Wilmington; *new automobiles* and *new trucks*, in secondary movements, from Phoenix, Ariz., to Los Angeles, Calif.; *new automobiles*, *new trucks*, and *new chassis*, in initial movements, in truckaway service, from San Leandro, Calif., and all points and places within 1 mile of San Leandro except points and places in Oakland, Calif., to points and places in California, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming;

New trucks, and *new chassis*, in initial movements, in driveaway service, from the above-specified origin points and places to the destination points and places described immediately above; *new trucks*, in secondary movements, in driveaway and truckaway service, from San Leandro, Calif., and points and places within 20 miles thereof, to points and places in the States named above; *new automobiles*, *new trucks*, and *new chassis*, in secondary movements, in truckaway service, from Salt Lake City, Utah, to San Leandro, Calif., and points and places within 20 miles thereof; *automobiles*, in initial movements, in truckaway service, from the site of the plant of the Chrysler Corp., located adjacent to Maywood, Calif., to points in the Los Angeles Harbor commercial zone, as defined by the Commission, and points in Idaho and Washington; *automobiles*, in secondary movements, in truckaway service, from points in the Los Angeles Harbor commercial zone, as defined by the Commission, to points in Los Angeles County, Calif.; *new automobiles*, in secondary movements, by the truckaway method, from Phoenix, Ariz., to a defined area in California; *automobiles, trucks, and buses*, (except those which have been repossessed, embezzled, stolen, or wrecked, and except trailers), in secondary movements, in truckaway service, from points in Nebraska to points in New Mexico, Arizona, and California, between points in New Mexico, Arizona, and that part of California south of the northern boundaries of San Luis Obispo, Kern, and San Bernardino Counties, Calif.; *automobiles*, (except used automobiles, and except repossessed, embezzled, stolen, or wrecked automobiles), in secondary movements, in truckaway services, from Sacramento, Calif., to points in Arizona and New Mexico, with restriction:

New and used motor vehicles (except trailers), in secondary movements, in truckaway service, between points in Arizona, New Mexico, Nevada, and Utah (except shipments from Phoenix, Ariz.), with restriction, from Phoenix, Ariz., to points in Arizona, New Mexico, Nevada, and Utah; automobiles and trucks, in initial movements, in truckaway service, from the plant site of Chrysler Corp., in Maywood, Calif., to Farwell, Tex., and points in New Mexico, from Maywood, Calif., to points in Montana; *motor vehicles* (except trailers, trucks, imported motor vehicles, and used motor vehicles which have been repossessed, embezzled, stolen, or damaged) in secondary movements, in truckaway service, between points in Nevada and points in that part of California south of the northern boundaries of San Luis Obispo, Kern, and San Bernardino Counties, Calif., with restriction. Vendee is authorized to operate as a *common carrier* in all of the States in the United States (except Alaska and Hawaii) and the District of Columbia. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–11709. Authority sought for purchase by Laidlaw Transport Limited, 65 Guise Street, Hamilton 21, ON, Canada, of the operating rights of C. J. Weber Trucking, Inc., 540 Broad Street, Tonawanda, NY 14150, and for acquisition by Laidlaw Motorways Limited, and in turn by Michael G. DeGroote, both of 65 Guise Street, Hamilton 21, ON, Canada, of control of such rights through the purchase. Applicant's attorneys: David A. Sutherlund and Robert S. Burk, 2001 Massachusetts Avenue NW., Washington, DC 20036, and Timothy C. Leixner, 700 Liberty Bank Building, Buffalo, N.Y. 14202. Operating rights sought to be transferred: *General commodities*, excepting those among others, Classes A and B explosives, household goods and commodities in bulk, as a *common carrier* over irregular routes, between Tonawanda, Buffalo, and Niagara Falls, N.Y. Vendee is authorized to operate as a *common carrier* in New York, Illinois, Indiana, Ohio, Pennsylvania, Michigan, New Jersey, Maryland, and Delaware. Application has been filed for temporary authority under section 210a(b).

No. MC–F–11710. Authority sought for purchase by Western Lines, Inc., Post Office Box 1145, Houston, TX 77001, of the operating rights and property of J. M. Foster, Box 247, Route No. 6, Brookhaven, MS 39601, and for acquisition by Dixie Transport Co. of Texas, Box 5447, Beaumont, TX 77706, of control of such rights and property through the purchase. Applicants' attorney: Austin L. Hatchell, 1102 Perry Brooks Building, Austin, TX 78701. Operating rights sought to be transferred: *Lumber*, as a *common carrier* over irregular routes, between points in Alabama, Georgia, Louisiana, Mississippi, and Tennessee; *crossties*, from points in Mississippi, to points in Alabama and Louisiana. Vendee is authorized to operate as a *common carrier* in Texas, Arkansas, Louisiana, New Mexico, Oklahoma, Tennessee, Mississippi, Kansas, Missouri, North Dakota, Nebraska, South Dakota, and Colorado; and as a *contract carrier* in Arkansas, Kansas, Oklahoma, New Mexico, Texas, Louisiana, Missouri, Nebraska, and Iowa. Application has been filed for temporary authority under section 210a(b).

No. MC–F–11711. Authority sought for purchase by Barrett Mobile Home Transport, Inc., Post Office Box 919, Moorhead, MN 56560, of the operating rights of James M. Crain, doing business as Jim Crain Mobile Home Transport, 3223 Wade Hampton Boulevard, Taylors, SC 29687, and for acquisition by John C. Barrett, River Oaks, Moorhead, Minn., of control of such rights through the purchase. Applicants' attorney and representative: Robert G. Tessar, 1819–Fourth Avenue South, Moorhead, MN 56560, and James M. Crain, 3223 Wade Hampton Boulevard, Taylors, SC 29687. Operating rights sought to be transferred: *Mobile homes*, in secondary movements, in truckaway service, as a *common carrier* over irregular routes, between points in South Carolina, on the one hand, and, on the other, points in North Carolina, Tennessee, Georgia, Alabama, and Florida. Vendee is authorized to operate as a *common carrier* in all of the States in the United States except Hawaii. Application has not been filed for temporary authority under section 210a(b).

By the Commission.

[Notice 149]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

NOVEMBER 8, 1972.

The following are notices of filing of applications[1] for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC–67 (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 17051 (Sub-No. 8 TA), filed October 19, 1972. Applicant: BARNET'S EXPRESS, INC., 758 Lidgerwood Avenue, Post Office Box 111, Elizabethport Station, Mailing: 07207, Elizabeth, NJ 07202. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, NJ 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wearing apparel, equipment materials and supplies* used or useful in the manufacture and sale of wearing apparel for account of Excelled Sportswear, between Somerset, N.J., New York, N.Y., and Athens, Tenn., for 180 days. Supporting shipper: Excelled Sheepskin & Leather Coat Co., Inc., a division of U.S. Industries, Inc., 55 School Avenue, Somerset, NJ 08873. Send protests to: District Supervisor Robert E. Johnston, Bureau of Operations, Interstate Commerce Commission, 970 Broad Street, Newark, NJ 07102.

NOTICE OF FILING OF MOTOR CARRIER INTRASTATE APPLICATIONS

NOVEMBER 10, 1972.

The following applications for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.245 of the Commission's rules of practice, published in

the FEDERAL REGISTER, issue of April 11, 1963, page 3533, which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, any other related matters shall be directed to the State Commission with which the application is filed and shall not be addressed to or filed with the Interstate Commerce Commission.

Montana Docket No. (Unknown) (Amendment), filed September 27, 1972, published in the FEDERAL REGISTER issue of October 12, 1972, amended October 31, 1972, and republished as amended this issue. Applicant: Big Sky Distributing Co., Route 1, Box 218–A, Sidney, MT 59270. Applicant's representative: John Berger (same address as applicant). Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *posts, lumber, and processed feed* in intrastate commerce between points and places in Sheridan, Roosevelt, Daniels, Valley, Garfield, Phillips, Richland, and Dawson Counties. Both intrastate and interstate authority sought. Hearing: Date, time, and place not shown. Requests for procedural information including the time for filing protests concerning this application should be addressed to the Public Service Commission, State of Montana, 1227 Eleventh Avenue, Helena, MT 59601, and should not be directed to the Interstate Commerce Commission. The purpose of this amended notice of filing is to correct the original publication.

Iowa Docket No. H–5083, filed September 6, 1972. Applicant: PRANGE, INC., 1100 Highway, Pleasantville, IA. Applicant's representative: Robert R. Rydell, 900 Savings and Loan Building, Des Moines, IA 50309. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *General commodities*. Between: (A) Des Moines and Indianola, *except* for transportation of freight between Des Moines, Indianola, and points intermediate thereto, (B) Ivy, Prairie City, Monroe, Otley, and Pella and (C) Carlisle, Pleasantville, Knoxville, Attica, Marysville, Hamilton, Bussey, Lovilia, Hagerty *except* locally between Des Moines, Pleasantville, and points intermediate thereto. Both intrastate and interstate authority sought. Hearing: Date, time, and place, none required. Requests for procedural information including the time for filing protests concerning this application should be addressed to the Iowa State Commerce Commission, State Capitol, Des Moines, Iowa 50319 and should not be directed to the Interstate Commerce Commission.

Tennessee Docket No. MC 5312 (Sub-No. 2), filed November 2, 1972. Applicant: S & D TRUCKING COMPANY, INC., Cherry Street, Dyersburg, Tenn. Applicant's representative: Barret Ashley, 322 Church Avenue, Post Office Box H, Dyersburg, TN 38024. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *General commodities*, except household goods, explosives, and commodities requiring special equipment, between Dyersburg and Trenton, to be used in conjunction with applicant's present authority and to remove the restrictions on the present authority under Certificate No. MC 5312 so as to allow interchange at Dyersburg. From Dyersburg, Tenn., to Trenton, Tenn., serving all intermediate points over U.S. Highway 51 to Newbern, over State Highway No. 77 from Newbern to Dyer and over State Highway 45–W from Dyer to Trenton and return over the same route with alternate authority from Dyersburg and Trenton over State Highway 104 and return over the same route serving all intermediate points, with authority to interchange at Trenton and all intermediate points. Applicant seeks coextensive interstate authority. Both intrastate and interstate authority sought.

Hearing: December 11, 1972 at the Commission's Court Room, C–1 Cordell Hull Building, Nashville, Tenn., at 9:30 a.m. Requests for procedural information including the time for filing protests concerning this application should be addressed to the Tennessee Public Service Commission, Cordell Hull Building, Nashville, Tenn. 37219 and should not be directed to the Interstate Commerce Commission.

Virginia Docket No. CC–7132, filed September 15, 1972. Applicant: GROOME TRANSPORTATION, INC., Richard E. Byrd International Airport, Sandston, Va. 23150. Applicant's representative: John J. Wicker, Jr., % Wicker, Goodin & Duling, 706 Mutual Building, Richmond, VA 23219. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of passengers (limousine type service, 1–16 pass.), *baggage, mail, and express*, having a prior or subsequent journey by aircraft. The routes used are used as follows: Start Byrd Airport, Sandston, Va., Krouse Route No. U.S. 60 to Airport Access Road to I64 West to U.S. 33, East (Staples Mill Road) U.S. Route 250 West (Broad St.) to I64 East to I95 North to George Washington Memorial Parkway to Washington National Airport to George Washington Memorial Parkway to I495 South to Dulles Airport Access Highway to Dulles International Airport, Dulles Airport Access Highway to I495 South to I95 South to I64 West to U.S. 33 East (Staples Mill Road) to U.S. 250 West (Broad St.) to I64 East to Airport Access Road to U.S. 60 Krouse Road to Byrd Airport. Both intrastate and interstate authority sought.

Hearing: December 18, 1972, 10 a.m., Courtroom, State Corporation Commission, Blanton Building, Richmond, Va. Request for procedural information including the time for protests concerning this application should be addressed to the Commonwealth of Virginia, State Corporation Commission, Box 1197, Richmond, VA 23209 and should not be directed to the Interstate Commerce Commission.

Florida Docket No. 72614–CCT, filed November 2, 1972. Applicant: TROPICAL DISTRIBUTION INTERNATIONAL, INC., 1201 Northeast 45th Street, Oakland Park, FL 33308. Applicant's representative: Richard B. Austin, 5720 Southwest 17th Street, Miami, FL 33155. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *Motor vehicle parts, components and accessories* over irregular routes and schedules from, to, and between all points and places in Dade, Broward, Palm Beach, Monroe, Lee, and Collier Counties, Fla., and the City of Clewiston, Hendry County, Fla., and its commercial zone. Both intrastate and interstate authority sought.

Hearing: Date, time, and place unknown. Requests for procedural information including the time for filing protests concerning this application should be addressed to the Florida Public Service Commission, 700 South Adams Street, Tallahassee, FL 32304 and should not be directed to the Interstate Commerce Commission.

By the Commission.

Title 40—PROTECTION OF ENVIRONMENT

Chapter I—Environmental Protection Agency

PART 85—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

To facilitate the use of the motor vehicle regulations, and to eliminate confusion over the applicability of certain provisions to certain model years, all regulations applicable to new motor vehicles and new motor vehicle engines are herein republished in a new format.

Each subpart contains all the regulations applicable to a certain type of motor vehicle or motor vehicle engine, e.g., gasoline-fueled heavy duty engines. Within each subpart, general provisions are listed first, followed by regulations applicable to each successive model year. This recompilation begins with the 1973 model year, since the certification process for the 1972 model year is largely completed. Regulations applicable to the 1972 model year appear at 45 CFR Part 1201 (Supp. 1971), as amended at 36 F.R. 5342 (March 20, 1971) and at 36 F.R. 16905 (August 26, 1971).

The only substantive change contained in these regulations makes the definition of "model year", which the July 2, 1971, edition of the FEDERAL REGISTER (36 F.R. 12652) made applicable to the 1975 model year, applicable to the 1973 and 1974 model years as well. This change was prescribed by section 202 of the Clean Air Amendments of 1970 (Public Law 91-604), but was inadvertently omitted in prior publications.

Dated: November 9, 1972.

WILLIAM D. RUCKELSHAUS,
Administrator.

Subpart A—Emission Regulations for New Gasoline-Fueled Light Duty Vehicles

Sec.
85.001 General applicability.
85.002 Definitions.
85.003 Abbreviations.
85.004 General standards; increase in emissions; unsafe conditions.
85.005 Hearings on certification.
85.006 Maintenance of records; submittal of information; right of entry.
85.073-1 Emission standards for 1973 model year vehicles.
85.073-2 Application for certification.
85.073-3 Approval of procedure and equipment; test fleet selections.
85.073-4 Required data.
85.073-5 Test vehicles.
85.073-6 Maintenance.
85.073-7 Mileage accumulation and emission measurements.
85.073-8 Special test procedures
85.073-9 Test procedures.
85.073-10 Gasoline fuel specifications.
85.073-11 Vehicle and engine preparation (fuel evaporative emissions).
85.073-12 Vehicle preconditioning (fuel evaporative emissions).
85.073-13 Evaporative emission collection procedure.
85.073-14 Dynamometer driving schedule.
85.073-15 Dynamometer procedure.
85.073-16 Three-speed manual transmission.
85.073-17 Four-speed and five-speed manual transmissions.
85.073-18 Automatic transmissions.
85.073-19 Engine starting and restarting.
85.073-20 Sampling and analytical system (exhaust emissions).
85.073-21 Sampling and analytical system (fuel evaporative emissions).
85.073-22 Information to be recorded.
85.073-23 Analytical system calibration and sample handling.
85.073-24 Dynamometer test runs.
85.073-25 Chart reading.
85.073-26 Calculations (exhaust emissions).
85.073-27 Calculations (fuel evaporative emissions).
85.073-28 Compliance with emission standards.
85.073-29 Testing by the Administrator.
85.073-30 Certification.
85.073-31 Separate certification.
85.073-32 Addition of a vehicle after certification.
85.073-33 Changes to a vehicle covered by certification.
85.073-34 Alternative procedure for notification of additions and changes.
85.073-35 Labeling.
85.073-36 Submission of vehicle identification numbers.
85.073-37 Production vehicles.
85.073-38 Maintenance instructions.
85.073-39 Submission of maintenance instructions.
85.074-1 Emission standards for 1974 model year vehicles.
85.075-1 Emission standards for 1975 model year vehicles.
85.075-2 Application for certification.
85.075-3 Approval of procedure and equipment; test fleet selections.
85.075-4 Required data.
85.075-5 Test vehicles.
85.075-6 Maintenance.
85.075-7 Mileage accumulation and emission measurements.
85.075-8 Special test procedures.
85.075-9 Test procedures.
85.075-10 Gasoline specifications.
85.075-11 Vehicle and engine preparation (fuel evaporative emissions).
85.075-12 Vehicle preconditioning (fuel evaporative emissions).
85.075-13 Evaporative emission collection procedure.
85.075-14 Dynamometer driving schedule.
85.075-15 Dynamometer procedure.
85.075-16 Three-speed manual transmissions.
85.075-17 Four-speed and five-speed manual transmissions.
85.075-18 Automatic transmissions.
85.075-19 Engine starting and restarting.
85.075-20 Sampling and analytical system (exhaust emissions).
85.075-21 Sampling and analytical system (fuel evaporative emissions).
85.075-22 Information to be recorded.
85.075-23 Analytical system calibration and sample handling.
85.075-24 Dynamometer test runs.
85.075-25 Chart reading.
85.075-26 Calculations (exhaust emissions).
85.075-27 Calculations (fuel evaporative emissions).
85.075-28 Compliance with emission standards.
85.075-29 Testing by the Administrator.
85.075-30 Certification.
85.075-31 Separate certification.
85.075-32 Addition of a vehicle after certification.
85.075-33 Changes to a vehicle covered by certification.
85.075-34 Alternative procedure for notification of additions and changes.
85.075-35 Labeling.
85.075-36 Submission of vehicle identification numbers.
85.075-37 Production vehicles.
85.075-38 Maintenance instructions.
85.075-39 Submission of maintenance instructions.
85.076-1 Emission standards for 1976 model year vehicles.

Subparts B–G—[Reserved]

Subpart H—Emission Regulations for New Gasoline-Fueled Heavy Duty Engines

85.701 General applicability.
85.702 Definitions.
85.703 Abbreviations.
85.704 General standards: Increase in emissions; unsafe conditions.
85.705 Hearings on certification.
85.706 Maintenance of records; submittal of information; right of entry.
85.773-1 Emission standards for 1973 model year engines.
85.773-2 Application for certification.
85.773-3 Approval of procedure and equipment; test fleet selections.
85.773-4 Required data.
85.773-5 Test engines.
85.773-6 Maintenance.
85.773-7 Service accumulation and emission measurements.
85.773-8 Special test procedures.
85.773-9 Test procedures.
85.773-10 Gasoline fuel specifications.
85.773-11 Dynamometer operation cycle and equipment.
85.773-12 Dynamometer procedures.
85.773-13 Sampling and analytical system for measuring exhaust emissions.
85.773-14 Information to be recorded on charts.
85.773-15 Calibration and instrument checks.
85.773-16 Dynamometer test run.
85.773-17 Chart reading.
85.773-18 Calculations.
85.773-19 through 85.773-27 [Reserved]
85.773-28 Compliance with emission standards.
85.773-29 Testing by the Administrator.
85.773-30 Certification.
85.773-31 Separate certification.
85.773-32 Addition of an engine after certification.
85.773-33 Changes to an engine covered by certification.
85.773-34 Alternative procedure for notification of additions and changes.
85.773-35 Labeling.
85.773-36 [Reserved]
85.773-37 Production engines.
85.773-38 Maintenance instructions.
85.773-39 Submission of maintenance instructions.
85.774-1 Emission standards for 1974 model year engines.
85.774-2 Application for certification.
85.774-3 Approval of procedure and equipment; test fleet selections.
85.774-4 Required data.
85.774-5 Test engines.
85.774-6 Maintenance.
85.774-7 Service accumulation and emission measurements.
85.774-8 Special test procedures.
85.774-9 Test procedures.
85.774-10 Gasoline fuel specifications.
85.774-11 Dynamometer operation cycle and equipment.
85.774-12 Dynamometer procedures.

Sec.
85.774-13 Sampling and analytical system measuring exhaust emissions.
85.774-14 Information to be recorded.
85.774-15 Calibration and instrument checks.
85.774-16 Dynamometer test run.
85.774-17 Chart reading.
85.774-18 Calculations.
85.774-19 through 85.774-27 [Reserved]
85.774-28 Compliance with emission standards.
85.774-29 Testing by the Administrator.
85.774-30 Certification.
85.774-31 Separate certification.
85.774-32 Addition of an engine after certification.
85.774-33 Changes to an engine covered by certification.
85.774-34 Alternative procedure for notification of additions and changes.
85.774-35 Labeling.
85.774-36 [Reserved].
85.774-37 Production engines.
85.774-38 Maintenance instructions.
85.774-39 Submission of maintenance instructions.

Subpart I—Engine Smoke Exhaust Emission Regulations for New Diesel Heavy Duty Engines

85.801 General applicability.
85.802 Definitions.
85.803 Abbreviations.
85.804 General standards: increase in emissions; unsafe conditions.
85.805 Hearings on certification.
85.806 Maintenance of records; submittal of information; right of entry.
85.873-1 Smoke exhaust emission standards for 1973 model year engines.
85.873-2 Application for certification.
85.873-3 Approval of procedure and equipment; test fleet selections.
85.873-4 Required data.
85.873-5 Test engines.
85.873-6 Maintenance.
85.873-7 Service accumulation and emission measurements.
85.873-8 Special test procedures.
85.873-9 Test procedures.
85.873-10 Diesel fuel specifications.
85.873-11 Dynamometer operation cycle for smoke emission tests.
85.873-12 Dynamometer and engine equipment.
85.873-13 Smoke measurement system.
85.873-14 Information to be recorded.
85.873-15 Instrument checks.
85.873-16 Test run.
85.873-17 Chart reading.
85.873-18 Calculations.
85.873-19 through 85.873.27 [Reserved]
85.873-28 Compliance with emission standards.
85.873-29 Testing by the Administrator.
85.873-30 Certification.
85.873-31 Separate certification.
85.873-32 Addition of an engine after certification.
85.873-33 Changes to an engine covered by certification.
85.873-34 Alternative procedure for notification of additions and changes.
85.873-35 Labeling.
85.873-36 [Reserved]
85.873-37 Production engines.
85.873-38 Maintenance instructions.
85.873-39 Submission of maintenance instructions.
85.874-1 Smoke exhaust emission standards for 1974 model year engines.
85.874-2 Application for certification.
85.874-3 Approval of procedure and equipment; test fleet selections.
85.874-4 Required data.
85.874-5 Test engines.
85.874-6 Maintenance.
85.874-7 Service accumulation and emission measurements.
85.874-8 Special test procedures.
85.874-9 Test procedures.
85.874-10 Diesel fuel specifications.
85.874-11 Dynamometer operation cycle for smoke emission levels.
85.874-12 Dynamometer and engine equipment.
85.874-13 Smoke measurement system.
85.874-14 Information to be recorded.
85.874-15 Instrument checks.
85.874-16 Test run.
85.874-17 Chart reading.
85.874-18 Calculations.
85.874-19 through 85.874-27 [Reserved]
85.874-28 Compliance with emission standards.
85.874-29 Testing by the Administrator.
85.874-30 Certification.
85.874-31 Separate certification.
85.874-32 Addition of an engine after certification.
85.874-33 Changes to an engine covered by certification.
85.874-34 Alternative procedure for notification of additions and changes.
85.874-35 Labeling.
85.874-36 [Reserved]
85.874-37 Production engines.
85.874-38 Maintenance instructions.
85.874-39 Submission of maintenance instructions.

Subpart J—Engine Exhaust Gaseous Emission Regulations for New Diesel Heavy Duty Engines

85.901 General applicability.
85.902 Definitions.
85.903 Abbreviations.
85.904 General standards: increase in emissions; unsafe conditions.
85.905 Hearings on certification.
85.906 Maintenance of records; submittal of information; right of entry.
85.974-1 Exhaust gaseous emission standards for 1974 model year engines.
85.974-2 Application for certification.
85.974-3 Approval of procedure and equipment; test fleet selection.
85.974-4 Required data.
85.974-5 Test engines.
85.974-6 Maintenance.
85.974-7 Service accumulation and emission measurements.
85.974-8 Special test procedures.
85.974-9 Test procedures.
85.974-10 Diesel fuel specifications.
85.974-11 Dynamometer procedure.
85.974-12 Dynamometer and engine equipment.
85.974-13 Sampling and analytical methods.
85.974-14 Information to be recorded.
85.974-15 Calibration and instrument checks.
85.974-16 Test run.
85.974-17 Chart reading.
85.974-18 Calculations.
85.974-19 through 85.974-27 [Reserved]
85.974-28 Compliance with emission standards.
85.974-29 Testing by the Administrator.
85.974-30 Certification.
85.974-31 Separate certification.
85.974-32 Addition of an engine after certification.
85.974-33 Changes to an engine covered by certification.
85.974-34 Alternative procedure for notification of additions and changes.
85.974-35 Labeling.
85.974-36 [Reserved]
85.974-37 Production engines.
85.974-38 Maintenance instructions.
85.974-39 Submission of maintenance instructions.

Subpart K—O—[Reserved]

Subpart P—Importation of Motor Vehicles and Motor Vehicle Engines

85.1501 Applicability.
85.1502 Admission for testing.
85.1503 Admission pending certification.
85.1504 Admission pending modification.
85.1505 Admission pending receipt of information.
85.1506 Waiver of conditions of admission.
85.1507 Storage and prohibited operation or sale of vehicles or engines conditionally admitted.
85.1508 Prohibited importation; penalties.

Subpart Q—Low-Emission Vehicles

85.1601 Definitions.
85.1602 Low-emission vehicle.
85.1603 Application for certification.
85.1604 Test vehicle selection.
85.1605 Data reporting.
85.1606 Testing by the Administrator.
85.1607 Administrator's determination.
85.1608 Postcertification testing.
Appendix I—EPA Urban Dynamometer Driving Schedule.
Appendix II—Procedure for Dynamometer Road Horsepower Calibration.
Appendix III—Constant Volume Sampler Flow Calibration.
Appendix IV—Durability Driving Schedule.
Appendix V—Oxides of Nitrogen Analytical System.
Appendix VI—Vehicle and Engine Components.

AUTHORITY: The provisions of this Part 85 issued under sections 202, 206, and 301(a) of the Clean Air Act, as amended (42 U.S.C. 1857f-1, 1857f-5, and 1857g(a)).

Subpart A—Emission Regulations for New Gasoline-Fueled Light Duty Vehicles

§ 85.001 General applicability.

(a) For the 1973 and 1974 model years, the provisions of this subpart are applicable to new gasoline-fueled light duty motor vehicles, except motorcycles and vehicles with an engine displacement of less than 50 cubic inches.

(b) For 1975 and later model years, the provisions of this subpart are applicable to new gasoline-fueled light duty motor vehicles, except motorcycles.

§ 85.002 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part A of title II of the Clean Air Act, 42 U.S.C. 1857 f-1 through f-7, as amended by Public Law 91-604.

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year: *Provided*, That if the manufacturer has no annual production period,

V 37-221 NOV 15 72 XUM

the term "model year" shall mean the calendar year.

(4) "Gross vehicle weight" means the manufacturer's gross weight rating for the individual vehicle.

(5) "Light duty vehicle" means any motor vehicle either designed primarily for transportation of property and rated at 6,000 pounds GVW or less or designed primarily for transportation of persons and having a capacity of 12 persons or less.

(6) "Off-road utility vehicle" means a light duty vehicle which incorporates special features for off-road operation such as four-wheel drive.

(7) "Motorcycle" means any light duty vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels (including any tricycle arrangement) in contact with the ground and weighing less than 1,500 pounds.

(8) "Vehicle curb weight" means the actual or the manufacturer's estimated weight of the vehicle in operational status with all standard equipment, and weight of fuel at nominal tank capacity, and the weight of optional equipment computed in accordance with § 85.073–5(g).

(9) "Loaded vehicle weight" means the vehicle curb weight of a light duty vehicle plus 300 pounds.

(10) "System" includes any motor vehicle engine modification which controls or causes the reduction of substances emitted from motor vehicles.

(11) "Engine family" means the basic classification unit of a manufacturer's product line used for the purpose of test fleet selection and determined in accordance with § 85.073–5(a).

(12) "Engine-system combination" means an engine family-exhaust emission control system-fuel evaporative emission control system (where applicable) combination.

(13) "Fuel system" means the combination of fuel tank, fuel pump, fuel lines, and carburetor, or fuel injection components, and includes all fuel system vents and fuel evaporative emission control systems.

(14) "Crankcase emissions" means airborne substances emitted to the atmosphere from any portion of the engine crankcase ventilation or lubrication systems.

(15) "Exhaust emissions" means substances emitted to the atmosphere from any opening downstream from the exhaust port of a motor vehicle engine.

(16) "Fuel evaporative emissions" means vaporized fuel emitted into the atmosphere from the fuel system of a motor vehicle.

(17) "Hot soak loss" means fuel evaporative emissions during the 1-hour hot soak period which begins immediately after the engine is turned off.

(18) "Diurnal breathing loss" means fuel evaporative emissions as a result of the daily range in temperature to which the fuel system is exposed.

(19) "Running loss" means fuel evaporative emissions resulting from an average trip in an urban area or the simulation of such a trip.

(20) "Tank fuel volume" means the volume of fuel in the fuel tank, prescribed to be 40 percent of nominal tank capacity rounded to the nearest whole U.S. gallon.

(21) Zero (0) miles means that point after initial engine starting (not to exceed 10 miles of vehicle operation) at which adjustments are completed.

(22) "Calibrating gas" means a gas of known concentration which is used to establish the response curve of an analyzer.

(23) "Span gas" means a gas of known concentration which is used routinely to set the output level of an analyzer.

(24) "Oxides of nitrogen" means the sum of the nitric oxide and nitrogen dioxide contained in a gas sample as if the nitric oxide were in the form of nitrogen dioxide.

(25) "Useful life" means a period of use of 5 years or 50,000 miles, whichever first occurs.

§ 85.003 Abbreviations.

The abbreviations used in this subpart have the following meanings in both capital and lowercase:

Accel.—Acceleration.
ASTM—American Society for Testing and Materials.
C.—Centigrade.
C.f.h.—Cubic feet per hour.
CO_2—Carbon dioxide.
CO—Carbon monoxide.
Conc.—Concentration.
C.f.m.—Cubic feet per minute.
Cu. in.—Cubic inch(es).
Decel.—Deceleration.
EP—End point.
Evap.—Evaporated.
F.—Fahrenheit.
Gal.—U.S. gallon(s).
Gm.—Gram(s).
GVW—Gross Vehicle Weight.
HC—Hydrocarbon(s).
Hg—Mercury.
Hi.—High.
HP.—Horsepower.
IBP—Initial boiling point.
ID—Internal diameter.
Lb.—Pound(s).
Lb.-ft.—Pound-feet.
Min.—Minute(s).
Ml.—Milliliter(s).
M.p.h.—Miles per hour.
Mm.—Millimeter(s).
Mv.—Millivolt(s).
N—Nitrogen.
NO—Nitric oxide.
NO_2—Nitrogen dioxide.
NO_x—Oxides of nitrogen.
No.—Number.
Pb—Lead.
P.p.m.—Parts per million by volume.
P.s.i.—Pounds per square inch.
P.s.i.g.—Pounds per square inch gauge.
R—Rankine.
R.p.m.—Revolutions per minute.
RVP—Reid vapor pressure.
S.A.E.—Society of Automotive Engineers.
Sec.—Second(s).
Sp.—Speed.
SS—Stainless steel.
TEL—Tetraethyl lead.
TML—Tetramethyl lead.
V.—Volts.
Vs.—Versus.
WOT.—Wide open throttle.
Wt.—Weight.
'—Feet.
''—Inches.
°—Degrees.
%—Percent.

§ 85.004 General standards; increase in emissions; unsafe conditions.

(a) (1) Every new motor vehicle manufactured for sale, sold, offered for sale, introduced or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to sections 85.073–2 through 85.073–4 and 85.073–29 through 85.073–34 of this subpart.

(b) (1) Any system installed on or incorporated in a new motor vehicle to enable such vehicle to conform to standards imposed by this subpart:

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such vehicle without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicles subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicles in accordance with good engineering practice to ascertain that such test vehicles will meet the requirements of this section for the useful life of the vehicle.

§ 85.005 Hearings on certification.

(a) (1) After granting a request for a hearing under § 85.073–30, the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing have not been fixed by the Administrator under § 85.073–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(b) (1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under § 85.073–30, together with any accompanying material, the request for a hearing and the supporting data submitted therewith and all documents relating to the request for certification, including the application for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The appeal file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d) (1) The Presiding Officer upon the request of any party, or in his discretion, may arrange for a prehearing

conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e) (1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial, and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title 18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall, upon a showing satisfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f) (1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 85.006 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle subject to any of the standards prescribed in this subpart shall establish and maintain the following adequately organized and indexed records:

(1) Identification and description of all vehicles for which testing is required under this subpart.

(2) A description of all emission control systems which are installed on or incorporated in each vehicle.

(3) A description of the procedures used to test such vehicles.

(4) Test data on each emission data vehicle which will show its emissions at 0 and 4,000 miles.

(5) Test data on each durability vehicle which will show the performance of the systems installed on or incorporated in the vehicle during extended mileage as well as a record of all pertinent maintenance performed on the vehicle.

(b) The manufacturer of any new motor vehicle subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such vehicle relevant to the control of crankcase, exhaust, or evaporative emissions, issued by the manufacturer for use by other manufacturers, assembly plants, distributors, dealers, and ultimate purchasers: *Provided*, That any material not translated into the English language need not be submitted unless specifically requested by the Administrator.

(c) The manufacturer of any new motor vehicle subject to any of the standards prescribed in this subpart shall permit officers or employees duly designated by the Administrator, upon presenting appropriate credentials and a written notice to the manufacturer:

(1) To enter, at reasonable times, any premises used during the certification procedures for purposes of monitoring tests and mileage accumulation procedures, observing maintenance procedures, and verifying correlation or calibration of test equipment, or

(2) To inspect, at reasonable times, records, files, and papers compiled by such manufacturer in accordance with paragraph (a) of this section.

A separate notice shall be given for each such inspection, but a separate notice shall not be required for each entry made during the period covered by the inspection. Each such inspection shall be commenced and completed with reasonable promptness.

§ 85.073–1 Emission standards for 1973 model year vehicles.

(a) (1) Exhaust emissions from 1973 model year vehicles shall not exceed:

(i) *Hydrocarbons.* 3.4 grams per vehicle mile.

(ii) *Carbon monoxide.* 39.0 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 3.0 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in § 85.073–9 through 85.073–27 and measured and calculated in accordance with those procedures.

(b) (1) Fuel evaporative emissions shall not exceed:

(1) Hydrocarbons. 2 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in § 85.073–9 through 85.073–27 and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new motor vehicle subject to this subpart.

(d) Every manufacturer of new motor vehicles subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicles in accordance with test procedures contained in § 85.073–9 through § 85.073–27 to ascertain that such test vehicles meet the requirements of paragraphs (a), (b), and (c) of this section, as applicable.

§ 85.073–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicles covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the vehicles for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed mileage accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.073–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part

the mileage accumulation procedure and

istrator determines that they may be expected to have different emission char-

transmission type, fuel system, and inertia weight class.

will be added in computing curb weight. Optional equipment weighing less than 3

only with the advance approval of the Administrator.

all test data shall be compiled and provided to the Administrator in accordance

V37-221-NOV 15 72 XUM

the mileage accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.073–5.

§ 85.073–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such vehicles tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the vehicle for extended mileage, as well as a record of all pertinent maintenance performed on the test vehicles.

(b) Emission data on such vehicles tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 miles and 4,000 miles of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.073–1 and the data derived from such tests.

(d) A statement that the test vehicles with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any vehicle tested, the vehicle shall be identified, and all pertinent test data relating thereto shall be supplied.

85.073–5 Test vehicles.

(a) (1) The vehicles covered by the application for certification will be divided into groupings of vehicles whose engines are expected to have similar emission characteristics. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center to center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air-cooled or water-cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves and the valve sizes (within a $\frac{1}{16}$-inch range on the valve head diameter).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(3) Engines identical in all the respects listed in subparagraph (2) of this paragraph may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine:

(i) The bore and stroke.

(ii) The surface to volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in subparagraphs (2) and (3) of this paragraph, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(b) Emission data vehicles:

(1) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system-evaporative emission control system combinations. A projected sales volume will be established for each combination for the 1973 model year. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination will be selected. The vehicle selected for each combination will be specified by the Administrator as to transmission type, fuel system and inertia weight class.

(3) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of the vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio, inertia weight class, transmission options and axle ratios.

(4) If the vehicles selected in accordance with subparagraphs (2) and (3) of this paragraph do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(c) Durability data vehicles:

(1) A durability data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system and inertia weight class.

(2) If an exhaust emission control system fuel evaporative emission control system combination is used in only one engine family, an additional vehicle using that combination in that family will be selected so that the durability data fleet shall contain at least two vehicles with each combination. The additional vehicle will be selected in the same manner as vehicles selected under subparagraph (1) of this paragraph.

(3) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to operate and test additional vehicles shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(d) For purposes of testing under § 85.073–7(g), the Administrator may require additional emission data vehicles and durability data vehicles identical in all material respects to vehicles selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles selected shall not increase the size of either the emission data fleet or the durability data fleet by more than 20 percent or one vehicle, whichever is greater.

(e) Any manufacturer whose projected sales of new motor vehicles subject to this subpart for the 1973 model year is less than 2,000 vehicles may request a reduction in the number of test vehicles determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) In lieu of testing an emission data or durability data vehicle selected under paragraph (b) or (c) of this section, and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit data on a similar vehicle for which certification has previously been obtained.

(g) (1) Where it is expected that more than 33 percent of an engine family will be equipped with an optional item, the full estimated weight of that item shall be included in the curb weight computation for the entire engine family. Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item

will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(2) Where it is expected that more than 33 percent of an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence exhaust or evaporative emissions, then such items of optional equipment shall actually be installed on all emission data and durability data vehicles for such engine family.

§ 85.073–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability vehicles may be performed only under the following provisions:

(i) One major engine tuneup to manufacturer's specifications may be performed at 24,000 miles (±250 miles) of scheduled driving with the following exception: On a vehicle with an engine displacement of 150 cubic inches or less (or a rating of at least 1.20 maximum rated horsepower per cubic inch of displacement), major engine tuneups may be performed at 12,000, 24,000, and 36,000 miles (±250 miles) of scheduled driving. A major engine tuneup shall be restricted to the following:

(a) Replace spark plugs.

(b) Inspect ignition wiring and replace as required.

(c) Replace distributor breaker points and condenser as required.

(d) Lubricate distributor cam.

(e) Check distributor advance and breaker point dwell angle and adjust as required.

(f) Check automatic choke for free operation and correct as required.

(g) Adjust carburetor idle speed and mixture.

(h) Adjust drive belt tension on engine accessories.

(i) Adjust valve lash if required.

(j) Check exhaust heat control valve for free operation.

(k) Check engine bolt torque and tighten as required.

(ii) Spark plugs may be changed if a persistent misfire is detected.

(iii) Normal vehicle lubrication services (engine and transmission oil change and oil filter, fuel filter, and air filter servicing) will be allowed at manufacturer's recommended intervals.

(iv) The crankcase emission control system may be serviced at 12,000-mile intervals (±250 miles) of scheduled driving.

(v) The fuel evaporative emission control system may be serviced at 12,000-mile intervals (±250 miles) of scheduled driving.

(vi) Readjustment of the engine choke mechanism or idle settings may be performed only if there is a problem of stalling at stops.

(vii) Leaks in the fuel system, engine lubrication system, and cooling system may be repaired.

(viii) Engine idle speed may be adjusted at the 4,000-mile test point.

(ix) Any other engine or fuel system maintenance or repairs will be allowed only with the advance approval of the Administrator.

(2) Repairs to vehicle components of the durability data vehicle, other than the engine or fuel system, shall be performed only as a result of part failure or vehicle system malfunction.

(3) Allowable maintenance on emission data vehicles shall be limited to the adjustment of engine idle speed at the 4,000-mile test point, except that other maintenance or repairs may be allowed with the advance approval of the Administrator.

(4) Where the Administrator agrees under § 85.073–7 to a mileage accumulation of less than 50,000-miles for durability testing, he may modify the requirements of this paragraph.

(b) Complete emission tests (see §§ 85.073–10 through 85.073–27) shall be run before and after any vehicle maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.073–4.

(c) If the Administrator determines that maintenance or repairs performed have resulted in a substantial change to the engine-system combination, the vehicle shall not be used as a durability data vehicle.

§ 85.073–7 Mileage accumulation and emission measurements.

The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV to this part. A modified procedure may also be used if approved in advance by the Administrator.

(a) Emission data vehicles: Each emission data vehicle shall be driven 4,000 miles with all emission control systems installed and operating. Emission tests shall be conducted at zero miles and 4,000 miles.

(b) Durability data vehicles: Each durability data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of this procedure. Emission measurements from a cold start shall be made at zero miles and at each 4,000-mile interval.

(c) All tests required by this subpart to be conducted after 4,000 miles of driving or at any multiple of 4,000 miles may be conducted at any accumulated mileage within 250 miles of 4,000 miles or the appropriate multiple of 4,000 miles, respectively.

(d) The results of each emission test shall be supplied to the Administrator immediately after the test. Where a manufacturer conducts multiple tests at any test point or any tests between test points, data on these tests (including voided tests) shall be provided immediately to the Administrator. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.073–4.

(e) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero mile test data to the Administrator and make the vehicle available for such testing under § 85.073–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(f) Once a manufacturer begins to operate an emission data or durability data vehicle, as indicated by compliance with paragraph (e) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 85.073–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(g) (1) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(2) The test procedures in §§ 85.073–10 through 85.073–27 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(3) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

§ 85.073–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.073–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of vehicles with the standards set forth in § 85.073–1.

(a) The test consists of prescribed sequences of fueling, parking, and operating conditions. The exhaust gases generated during vehicle operation are diluted with air and sampled continuously for subsequent analysis of specific components by prescribed analytical techniques. The fuel evaporative emissions are collected for subsequent weigh-

ing during both vehicle parking and

specifications approved by the Administrator, shall be used in exhaust and

(2) The design and installation of the necessary fittings shall not disturb the

tween 76° F. and 86° F. Upon admittance to the 76° F.–86° F. soak area, the pre-

during this phase of the test shall be reconnected for the following phase.

the above impractical), the cooling fan(s) shall be placed in a position to

XUM

V37-221 NOV 15 72 XUM

ing during both vehicle parking and operating events. The test applies to vehicles equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems or to uncontrolled vehicles and engines.

(b) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles from a cold start. The test consists of engine startup and vehicle operation on a chassis dynamometer through a specified driving schedule, as described in Appendix I to this part. A proportional part of the diluted exhaust emissions is collected continuously, for subsequent analysis, using a constant volume (variable dilution) sampler.

(c) The fuel evaporative emission test is designed to determine fuel hydrocarbon evaporative emissions to the atmosphere as a consequence of urban driving, and diurnal temperature fluctuations during parking. It is associated with a series of events representative of a motor vehicle's operation, which result in fuel vapor losses directly from the fuel tank and carburetor. Activated carbon traps are employed in collecting the vaporized fuel. The test procedure is specifically aimed at collecting and weighing:

(1) Diurnal breathing losses from the fuel tank and other parts of the fuel system when the fuel tank is subjected to a temperature increase representative of the diurnal range;

(2) Running losses from the fuel tank and carburetor resulting from a simulated trip from a cold start on a chassis dynamometer; and

(3) Hot soak losses from the fuel tank and carburetor which result when the vehicle is parked and the hot engine is turned off.

(d) All emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all test procedures in this subpart.

§ 85.073–10 Gasoline fuel specifications.

(a) Fuel having the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust and evaporative emission testing. Where the Administrator determines that the vehicles represented by a test vehicle will be operated using fuels of a different lead content or octane rating than that prescribed in this paragraph, he may consent in writing to use of a fuel otherwise substantially equivalent to the following specifications but with a different lead content or octane rating.

Item	ASTM designation	Specifications
Octane, Research, min	D 1656	100
Pb. (organic), gm./U.S. gal	D 526	3.1–3.3
Distillation range	D 86	
IPB, ° F		75–95
10 percent point, ° F		120–135
50 percent point, ° F		200–230
90 percent point, ° F		300–325
EP, ° F. (max.)		415
Sulfur, wt. percent, max	D 1266	0.10
Phosphorus, theory		0.0
RVP,[1] lb	D 323	8.7–9.2
Hydrocarbon composition	D 1319	
Olefins, percent, max		10
Aromatics, percent, max		35
Saturates		Remainder

[1] For testing which is unrelated to fuel evaporative emission control, the specified range is: 8.0–9.2.

(b) Fuel having the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in mileage accumulation. The octane rating of the fuel used shall be in the range recommended by the vehicle or engine manufacturer. The Reid Vapor Pressure of the fuel used shall be characteristic of the seasonal motor fuel. Where the Administrator determines that the vehicles represented by a test vehicle will be operated using fuels of a different lead content than that prescribed in this paragraph, he may consent in writing to use of a fuel otherwise substantially equivalent to the following specifications but with a different lead content.

(c) The specifications of the fuel to be used under paragraph (b) of this section shall be reported in accordance with § 85.073–2(b)(3).

Item	ASTM Designation	Regular	Premium
Pb. (organic), gm./U.S. gal	D 526	2.1–3.2	2.1–3.2
Sulfur, wt. percent	D 1266	0.02–0.10	0.02–0.10
Hydrocarbon composition	D 1319		
Olefins, percent, max		30	15
Aromatics, percent, max		40	40
Saturates		Remainder	Remainder

§ 85.073–11 Vehicle and engine preparation (fuel evaporative emissions).

(a) (1) Apply appropriate leak-proof fittings to all fuel system external vents to permit collection of effluent vapors from these vents during the course of the prescribed tests. Since the prescribed test requires the temporary plugging of the inlet pipe to the air cleaner, it will be necessary to install a probe for collecting the normal effluents from this source. Where antisurge/vent filler caps are employed on the fuel tank, plug off the normal vent if it does not conveniently lend itself to the collection of vapors which emanate from it, and introduce a separate vent, with appropriate fitting, on the cap. Where the fuel tank vent line terminus is inaccessible, sever the line at a convenient point near the fuel tank and install the collection system in a closed circuit assembly with the severed ends. All fittings shall terminate in $\frac{5}{16}$-inch ID tube sections for ready connection to the collection systems and shall be designed for minimum dead space.

(2) The design and installation of the necessary fittings shall not disturb the normal function of the fuel system components or the normal pressure relationships in the system.

(b)(1) Inspect the fuel system carefully to insure the absence of any leaks to the atmosphere of either liquid or vapor which might affect the accuracy of the test or the performance of the control system. Corrective action, if any, shall be reported with the test results under § 85.073–4.

(2) Care should be exercised, in the application of any pressure tests, neither to purge nor load the evaporative emission control system.

(c) Prepare fuel tank for recording the temperature of the prescribed test fuel at its approximate midvolume.

(d) Provide additional fittings and adapters, as required to accommodate a fuel drain at the lowest point possible in the tank as installed on the vehicle.

§ 85.073–12 Vehicle preconditioning (fuel evaporative emissions).

Vehicles to be tested for compliance with the fuel evaporative emissions standard of this subpart shall be preconditioned as follows:

(a) The test vehicle shall be operated under the conditions prescribed for mileage accumulation, § 85.073–7, for 1 hour immediately prior to the operations prescribed below.

(b) The fuel tank shall be drained and specified test fuel (§ 85.073–10(a)) added. The evaporative emission control system or device shall not be abnormally purged or loaded as a result of draining or fueling the tank.

(c) The test vehicle shall be placed on the dynamometer and operated over a simulated trip, according to the applicable requirements and procedures of § 85.073–14 through § 85.073–19 except that the engine need not be cold when starting the run on the dynamometer operation. During the run the ambient temperature shall be between 68° F. and 86° F.

(d) The engine and cooling fan shall be stopped upon completion of the dynamometer operation and the vehicle permitted to soak either on or off the dynamometer stand at an ambient temperature between 76° F. and 86° F. for a period of not less than 1 hour prior to the soak period prescribed in §85.073–13(a)(1).

§ 85.073–13 Evaporative emission collection procedure.

The standard test procedure consists of three parts described below which shall be performed in sequence and without any interruption in the test conditions prescribed.

(a) *Diurnal breathing loss test.* (1) The test vehicle shall be allowed to "soak" in an area where the ambient temperature is maintained between 60° F. and 86° F. for a period of not less than 10 hours. (The vehicle preparation requirements of § 85.073–11 may be performed during this period.) It shall then be transferred to a soak area where the ambient temperature is maintained between 76° F. and 86° F. Upon admittance to the 76° F.–86° F. soak area, the prescribed fuel tank thermocouple shall be connected to the recorder and the fuel and ambient temperatures recorded at a chart speed of approximately 12 inches per hour (or equivalent record).

(2) The fuel tank of the prepared test vehicle, preconditioned according to § 85.073–12, shall be drained and recharged with the specified test fuel, § 85.073–10(a), to the prescribed "tank fuel volume," defined in § 85.002. The temperature of the fuel following the charge to the tank shall be 60° F.±2° F. Care should be exercised against abnormal loading of the evaporative emission control system or device as a result of fueling the tank.

(3) Immediately following the fuel charge to the tank, the exhaust pipe(s) and inlet pipe to the air cleaner shall be plugged and the prescribed vapor collection systems installed on all fuel system external vents. Multiple vents may be connected to a single collection trap provided that, where there is more than one external vent on a fuel system distinguishing between carburetor and tank vapors, separate collection systems shall be employed to trap the vapors from the separate sources. Every precaution shall be taken to minimize the lengths of the collection tubing employed and to avoid sharp bends across the entire system.

(4) Artificial means shall be employed to heat the fuel in the tank to 84° F.±2° F. The prescribed temperature of the fuel shall be achieved over a period of 60 minutes±10 minutes using a constant rate of heat input. After a minimum of 1 hour, following admittance to the 76° F.–86° F. soak area, the vehicle shall be moved onto the dynamometer stand for the subsequent part of the test. The fuel tank thermocouple may be temporarily disconnected to permit moving the test vehicle. Plugs shall be removed from the exhaust pipe(s) and inlet pipe to the air cleaner.

(b) *Running loss test.* (1) The vehicle shall be placed on the dynamometer and the fuel tank thermocouple reconnected. The fuel temperature and the ambient air temperature shall be recorded at a chart speed of approximately 12 inches per hour (or equivalent record).

(2) Where the only external vent(s) is located in the immediate vicinity of the carburetor air horn, such that any "running loss" emissions would be inducted into the engine, there is no requirement to collect any vapor losses during this part of the test and the vapor-loss measurement system shall be temporarily disconnected and clamped.

(3) The vehicle shall be operated on the dynamometer according to the requirements and procedures of § 85.073–14 through § 85.073–24. The engine and fan shall be turned off upon completion of the dynamometer run and the exhaust and air cleaner inlet pipes shall be replugged.

(4) Any vapor collection systems employed during this part of the test shall be left intact for their continued use during the following part. Any part of the vapor collection system disconnected during this phase of the test shall be reconnected for the following phase.

(c) *Hot soak test.* Upon completion of the dynamometer run, the test vehicle shall be permitted to soak with hood down for a period of 1 hour at an ambient temperature between 76° F. and 86° F. This operation completes the test. The traps are disconnected and weighed according to § 84.073–21.

§ 85.073–14 Dynamometer driving schedule.

(a) The dynamometer driving schedule to be followed consists of a nonrepetitive series of idle, acceleration, cruise, and deceleration modes of various time sequences and rates. The driving schedule is defined by a smooth transition through the speed vs. time relationships listed in Appendix I. The time sequence begins upon starting the vehicle according to the startup procedure described in § 85.073–19.

(b) The speed tolerance at any given time on the dynamometer driving schedule prescribed in Appendix I or as printed on a driver's aid chart approved by the Administrator is defined by upper and lower limits. The upper limit is 2 m.p.h. higher than the highest point on the trace within 1 second of the given time. The lower limit is 2 m.p.h. lower than the lowest point on the trace within 1 second of the given time. Speed variations greater than the tolerances (such as occur when shifting manual transmission vehicles) are acceptable provided they occur for less than 2 seconds on any one occasion. Speeds lower than those prescribed are acceptable provided the vehicle is operated at maximum available power during such occurrences. Further, speed deviations from those prescribed due to stalling are acceptable provided the provisions of § 85.073–19(f) are adhered to.

§ 85.073–15 Dynamometer procedure.

(a) The vehicle shall be tested from a cold start. Engine startup and operation over the driving schedule make a complete test run. Exhaust emissions are diluted with air to a constant volume and a portion is sampled continuously during the entire test run. The composite sample, collected in a bag, is analyzed for hydrocarbon, carbon monoxide, and oxides of nitrogen emissions. A parallel sample of the dilution air is similarly analyzed.

(b) During dynamometer operation, a fixed speed cooling fan shall be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. The fan capacity shall normally not exceed 5,300 c.f.m. If, however, the manufacturer can show that during field operation the vehicle receives additional cooling, the fan capacity may be increased or additional fans used if approved in advance by the Administrator. In the case of vehicles with front engine compartments, the fan(s) shall be squarely positioned between 8 and 12 inches in front of the cooling air inlets (grill). In the case of vehicles with rear engine compartments (or if special designs make the above impractical), the cooling fan(s) shall be placed in a position to provide sufficient air to maintain engine cooling.

(c) The vehicle shall be nearly level when tested in order to prevent abnormal fuel distribution.

(d) Flywheels, electrical or other means of simulating inertia as shown in the following table shall be used. If the equivalent inertia specified is not available on the dynamometer being used, the next higher equivalent inertia (not to exceed 250 lbs.) available shall be used.

Loaded vehicle weight, pounds	Equivalent inertia weight, pounds	Road load power at 50 m.p.h. horsepower
Up to 1,125	1,000	5.9
1,126 to 1,375	1,000	6.5
1,376 to 1,625	1,500	7.1
1,626 to 1,875	1,750	7.7
1,876 to 2,125	2,000	8.3
2,126 to 2,375	2,250	8.8
2,376 to 2,625	2,500	9.4
2,626 to 2,875	2,750	9.9
2,876 to 3,250	3,000	10.3
3,251 to 3,750	3,500	11.2
3,751 to 4,250	4,000	12.0
4,251 to 4,750	4,500	12.7
4,751 to 5,250	5,000	13.4
5,251 to 5,750	5,500	13.9
5,751 to above	5,500	14.4

(e) Power absorption unit adjustment. (1) The power absorption unit shall be adjusted to reproduce road load power at 50 m.p.h. true speed. The indicated road load power setting shall take into account the dynamometer friction. The relationship between road load (absorbed) power and indicated road load power for a particular dynamometer shall be determined by the procedure outlined in Appendix II or other suitable means.

(2) The road load power listed in the table above shall be used or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 m.p.h., and

(ii) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 m.p.h. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e. within ±5 mm. Hg.

(iii) The road load power shall be determined according to the procedure outlined in Appendix II and adjusted according to the following if applicable.

(3) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with air conditioning, the road load power listed above or as determined in paragraph 2 of this subsection shall be increased by 10 percent for testing all test vehicles representing such engine family.

(f) The vehicle speed (m.p.h.) as measured from the dynamometer rolls

shall be used for all conditions. A speed

(b) If transmission ratio in first gear

If failure to start is an operational

level; and a second particulate filter to remove charcoal particles from the air-

(14) Three-way solenoid valves (V1 and V2) to direct sample streams to

XUM V37-221 NOV 15 72 XUM

XUM

V37-221 NOV 15 72 XUM

shall be used for all conditions. A speed vs. time recording, as evidence of dynamometer test validity, shall be supplied on request of the Administrator.

(g) Practice runs over the prescribed driving schedule may be performed to find the minimum throttle action to maintain the proper speed-time relationship.

NOTE. When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle in the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. The rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(h) The drive wheel tires may be inflated up to 45 p.s.i.g. in order to prevent tire damage. The drive wheel tire pressure shall be reported with the test results

§ 85.073–16 Three-speed manual transmissions.

(a) All test conditions except as noted shall be run in highest gear.

(b) Cars equipped with free wheeling or overdrive units shall be tested with this unit (free wheeling or overdrive) locked out of operation.

(c) Idle shall be run with transmission in gear and with clutch disengaged (except first idle; see § 85.073–19).

(d) The vehicle shall be driven with minimum throttle movement to maintain the desired speed.

(e) Acceleration modes shall be driven smoothly with the shift speeds as recommended by the manufacturer. If the manufacturer does not recommend shift speeds, the vehicle shall be shifted from first to second gear at 15 m.p.h. and from second to third gear at 25 m.p.h. The operator shall release the accelerator pedal during the shift, and accomplish the shift with minimum closed throttle time. If the vehicle cannot accelerate at the specified rates, the vehicle shall be accelerated at WOT until the vehicle speed reaches the speed at which it should be at that time during the test.

(f) The deceleration modes shall be run with clutch engaged and without shifting gears from the previous mode, using brakes or throttle as necessary to maintain the desired speed. For those modes which decelerate to zero, the clutch shall be depressed when the speed drops below 15 m.p.h., when engine roughness is evident, or when engine stalling is imminent.

(g) Downshifting is allowed at the beginning of or during a power mode if recommended by the manufacturer or if the engine obviously is lugging.

§ 85.073–17 Four-speed and five-speed manual transmissions.

(a) Use the same procedure as for three-speed manual transmissions for shifting from first to second gear and from second to third gear. If the manufacturer does not recommend shift speeds, the vehicle shall be shifted from third to fourth gear at 40 m.p.h. Fifth gear may be used at the manufacturer's option.

(b) If transmission ratio in first gear exceeds 5:1, follow the procedure for three- or four-speed manual transmission vehicles as if the first gear did not exist.

§ 85.073–18 Automatic transmissions.

(a) All test conditions shall be run with the transmission in "Drive" (highest gear). Automatic stick-shift transmissions may be shifted as manual transmissions at the option of the manufacturer.

(b) Idle modes shall be run with the transmission in "Drive" and the wheels braked (except first idle; see § 85.073–19).

(c) The vehicle shall be driven with minimum throttle movement to maintain the desired speed.

(d) Acceleration modes shall be driven smoothly allowing the tranmission to shift automatically through the normal sequence of gears. If the vehicle cannot accelerate at the specified rates, the vehicle shall be accelerated at WOT until the vehicle speed reaches the speed at which it should be at that time during the driving schedule.

(e) The deceleration modes shall be run in gear using brakes or throttle as necessary to maintain the desired speed.

§ 85.073–19 Engine starting and restarting.

(a) The engine shall be started according to the manufacturer's recommended starting procedures. The initial 20-second-idle period shall begin when the engine starts.

(b) Choke operation:

(1) Vehicles equipped with automatic chokes shall be operated according to the instructions which will be included in the manufacturer's operating or owner's manual including choke setting and "kick-down" from cold fast idle. If choke "kick-down" time is not specified, it shall be performed 13 seconds after the engine starts. The transmission shall be placed in gear 15 seconds after the engine is started. If necessary, braking may be employed to keep the drive wheels from turning.

(2) Vehicles equipped with manual chokes shall be operated according to the manufacturer's operating or owner's manual. If not specified, the choke shall be operated to maintain engine idle at 1,100±50 r.p.m. during the initial idle period and used where necessary during the remainder of the test to keep the engine running.

(c) The operator may use more choke, more throttle, etc., where necessary to keep the engine running.

(d) If the vehicle does not start after 10 seconds of cranking, cranking shall cease and the reason for failure to start determined. The revolution counter on the constant volume sampler (see § 85.-073–24, Dynamometer test runs) shall be turned off and the sample solenoid valves placed in the "dump" position during this diagnostic period. In addition, either the positive displacement pump should be turned off or the exhaust tube disconnected from the tailpipe during the diagnostic period. If failure to start is an operational error, the vehicle shall be rescheduled for testing from a cold start. If failure to start is caused by vehicle malfunction, corrective action of less than 30 minutes duration may be taken and the test continued. The sampling system shall be reactivated at the same time cranking is started. When the engine starts, the driving schedule timing sequence shall begin. If failure to start is caused by vehicle malfunction and the vehicle cannot be started, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported.

(e) If the engine "false starts", the operator shall repeat the recommended starting procedure (such as resetting the choke, etc.).

(f) Stalling:

(1) If the engine stalls during an idle period, the engine shall be restarted immediately and the test continued. If the engine cannot be started soon enough to allow the vehicle to follow the next acceleration as prescribed, the driving schedule indicator shall be stopped. When the vehicle restarts, the driving schedule indicator shall be reactivated.

(2) If the engine stalls during some operating mode other than idle, the driving schedule indicator shall be stopped, the vehicle restarted, accelerated to the speed required at that point in the driving schedule and the test continued.

(3) If the vehicle will not restart within 1 minute, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported.

§ 85.073–20 Sampling and analytical system (exhaust emissions).

(a) *Schematic drawings.* The following figures (Figs. A73–1 and A73–2) are schematic drawings of the exhaust gas sampling and analytical systems which will be used for testing under the regulations in this part. Additional components such as instruments, valves, solenoids, pumps, and switches may be used to provide additional information and coordinate the functions of the component systems. In particular, the HC and CO instruments may be connected in series instead of in parallel.

(b) *Component description (exhaust gas sampling system).* The following components will be used in the exhaust gas sampling system for testing under the regulations in this part. See Figure A73–1. Other types of constant volume samplers may be used if shown to yield equivalent results.

(1) A dilution air filter assembly consisting of a particulate (paper) filter to remove solid matter from the dilution air and thus increase the life of the charcoal filter; a charcoal filter to reduce and stabilize the background hydrocarbon

level; and a second particulate filter to remove charcoal particles from the airstream. The filters shall be of sufficient capacity and the duct which carries the dilution air to the point where the exhaust gas is added shall be of sufficient size so that the pressure at the mixing point is less than 1 inch of water pressure below ambient when the constant volume sampler is operating at its maximum flow rate.

(2) A flexible, leak-tight connector and tube to the vehicle tailpipe. The flexible tubing shall be sized and connected in such a manner that the static pressure variations in the vehicle tailpipe(s) remain within ±1 inch of water of the static pressure variations measured during a dynamometer driving cycle with no connections to the tailpipe(s).

(3) A heating system to preheat the heat exchanger to within ±10° F. of its operating temperature before the test begins.

(4) A heat exchanger capable of limiting the gas mixture temperature variation during the entire test to ±10° F. as measured at a point immediately ahead of the positive displacement pump.

(5) A positive displacement pump to pump the dilute exhaust mixture. The pump capacity (300 to 350 c.f.m. is sufficient for testing most vehicles) shall be large enough to virtually eliminate water condensation in the system. See Appendix III for flow calibration techniques.

(6) Temperature sensor (T1) with an accuracy of ±2° F. to allow continuous recording of the temperatures of the dilute exhaust mixture entering the positive displacement pump (see § 85.073–22 (1)).

(7) Gauge (G1) with an accuracy of ±3 mm. Hg to measure the pressure depression of the dilute exhaust mixture entering the positive displacement pump, relative to atmospheric pressure.

(8) Gauge (G2) with an accuracy of ±3 mm. Hg to measure the pressure increase across the positive displacement pump.

(9) Sample probes (S1 and S2) pointed upstream to collect samples from the dilution airstream and the dilute exhaust mixture. Additional sample probes may be used, for example, to obtain continuous concentration traces of the dilute exhaust stream. In such case the sample flow rate, in standard cubic feet per test, must be added to the calculated dilute exhaust volume. The position of the sample probe in Figure A73–1 is pictorial only.

(10) Filters (F1 and F2) to remove particulate matter from dilution air and dilute exhaust samples.

(11) Pumps (P1 and P2) to pump the dilution air and dilute exhaust into their respective sample collection bags.

(12) Flow control valves (N1 and N2) to regulate flows to sample collection bags, at constant flow rates. The minimum sample flow rate shall be 5 c.f.h.

(13) Flowmeters (FL1 and FL2) to insure, by visual observation, that constant flow rates are maintained throughout the test.

(14) Three-way solenoid valves (V1 and V2) to direct sample streams to either their respective bags or overboard.

(15) Quick-connect leak-tight fittings (C1 and C2), with automatic shutoff on bag side, to attach sample bags to sample system.

(16) Sample collection bags for dilution air and exhaust samples of sufficient capacity so as not to impede sample flow.

(17) A revolution counter to count the revolutions of the positive displacement pump while the test is in progress and samples are being collected.

(c) *Component description (exhaust gas analytical system).* The following components will be used in the exhaust gas analytical system for testing under the regulations in this part. The analytical system provides for the determination of hydrocarbon concentrations by flame ionization detector (FID) analysis, the determination of carbon monoxide concentrations by nondispersive infrared (NDIR) analysis and the determination of oxides of nitrogen concentration by chemiluminescence (C1) analysis in dilute exhaust samples. The chemiluminescence method of analysis requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. See Appendix V. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator. See Figure A73–2.

(f) Vehicle: Make—Vehicle identification number—Model year—Transmission

(2) Figure A73-3 represents an arrangement for collecting losses which emanate from the carburetor. Figure A73-4 depicts the means for separately collecting the vapors which emanate from the fuel tank vent line and filler cap. Figure A73-5 shows an arrangement for collecting the losses from a closed fuel system, vented to the atmosphere solely though the air cleaner, as might be the case with certain fuel evaporative emission control devices.

(3) Schematic drawings of arrangements to be employed shall be submitted in accordance with § 85.073-2(b)(3).

(b) *Collection equipment.* The following equipment shall be used for this collection of fuel evaporative emissions. (Item quantities are determined by individual test needs.)

(1) *Activated carbon trap.* See Figure A73-6 for specifications of one design; other configurations may be used: *Provided,* That they give demonstrably equivalent results.

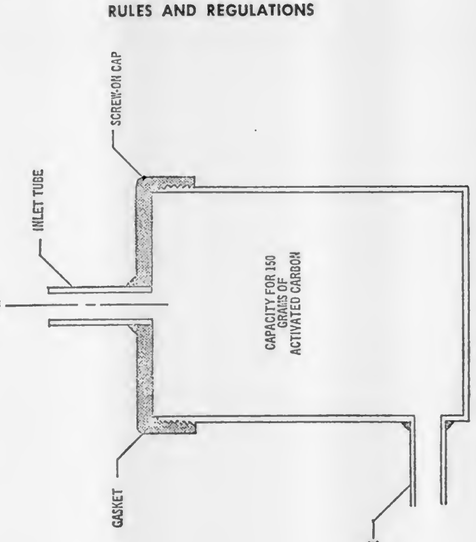

FIGURE A73-6.—Typical activated carbon trap (schematic).

(i) Canister—300±25 ml., cylindrical canister. The canister is designed to container having a length to diameter ratio of 1.4±0.1. An inlet tube, 5/16 inch ID and 1 inch long, is sealed into the top of the canister at its geometric center. A similar outlet tube is sealed into the wall ¼ inch from the bottom of the

withstand an air pressure of 2 p.s.i., when sealed, without evidence of leaking when immersed in water for 30 seconds.

(ii) Activated carbon—meeting the following specifications:

Surface area, min. (N_2 BET method).[1]	1,000 square meters per gram.
Adsorption capacity, min. (carbon tetrachloride).	60 percent, by weight.
Volatile material including adsorbed water vapor.	None.

Screen analysis size:	Percent
Less than 1.4 mm	0
1.7–2.4 mm	90–100
More than 3.0 mm	0

[1] Brunauer, Emmett & Teller; Journal of the American Chemical Society; Vol. 60, p. 309, 1938.

The activated carbon trap is prepared for the test by attaching clamped sections of vinyl tubing to the inlet and outlet tubes of the canister. The canister is then filled with 150±10 gm. hot activated carbon which had previously been oven-dried for 3 hours at 300° F. Loss of carbon through the inlet and outlet tubes is prevented through the use of wire screens of 0.7 mm. mesh or wads of loosely packed glass wool. The canister is closed immediately after filling and the carbon is allowed to cool while the trap is vented through a drying tube via the unclamped outlet arm.

(iii) The trap is sealed and weighed after cooling and the weight, to the nearest 0.1 gram, is inscribed on the canister body. Within 12 hours of the scheduled test, the weight of the trap is checked and if it has changed by more than 0.5 gm., it is redried to constant weight. This redrying operation is performed by passing dry nitrogen, heated to 275° F., through the trap, via the inlet tube, at a rate of 1 liter per minute until checks made at 30-minute intervals do not vary by more than 0.1 percent of the gross weight. The trap and its contents are allowed to cool to room temperature, while vented through a drying tube via the outlet arm, before use.

(2) *Auxiliary collection equipment.* (i) Drying tube—transparent, tubular body ¾ inch ID, 6 inches long, with serrated tips and removable caps.

(ii) Desiccant—indicating variety, 8 mesh. The drying tube is attached to the outlet tube of the collection traps to prevent ambient moisture from entering the trap. It is prepared by filling the empty drying tube with fresh desiccant using loose wad of glass wool to hold the desiccant in place. The desiccant is renewed when three-quarters spent, as indicated by color change.

(iii) Collection tubing—stainless steel or aluminum, 5/16 inch ID, for connecting the collection traps to the fuel system vents.

(iv) Polyvinyl chloride (vinyl) tubing—flexible tubing, 5/16 inch ID, for sealing butt-to-butt joints.

(v) Laboratory tubing—airtight flexible tubing 5/16 inch ID, attached to the outlet end of the drying tubes to equalize collection system pressure.

(vi) Clamps—hosecock, open side, for pinching off flexible tubing.

(c) *Weighing equipment.* The balance and weights used shall be capable of determining the net weight of the activated carbon trap within an accuracy of ±75 mg.

(d) *Temperature measuring equipment.* (1) Temperature recorder—multichannel, variable speed, potentiometric, or substantially equivalent recorder with a temperature range of 50° F. to 100° F. and capable of either simultaneous or sequential recording of the ambient air and fuel temperatures within an accuracy of ±1° F.

(2) Fuel tank thermocouples—iron-constantan (type J) construction.

(3) Other types of temperature sensing systems may be provided by the manufacturer if they record the information specified in subparagraph (1) of this paragraph with the required accuracy and if they are self-contained. Type J thermocouples are required for compatability with recording instruments used in Federal certification facilities.

(e) *Assembly and use of the activated carbon vapor collection system.* (1) The prepared activated carbon trap, dried to constant weight, cooled to the ambient temperature and sealed with clamped sections of vinyl tubing is carefully weighed to the nearest 20 milligrams and the weight recorded as the "tare weight."

(2) A drying tube is attached to the outlet tube and the clamp released, but not removed. A length of flexible tubing, for pressure equalization, is connected to the other end of the drying tube.

(3) The inlet tube of the adsorption trap and external vent(s) of the fuel system will be connected by minimal lengths of stainless steel or aluminum tubing and short sections of vinyl tubing. Butt-to-butt joints shall be made wherever possible and precautions taken against sharp bends in the connection lines, including any manifold systems employed to connect multiple vents to a single trap.

(4) The clamp on the inlet tube of the trap shall be released but not removed. Care shall be exercised to prevent heating the vapor collection trap by radiant or conductive heat from the engine.

(5) Upon completion of the collection sequence, the vinyl tubing sections on each arm of the collection trap shall be clamped tight and the collection system dismantled.

(6) The sealed vapor collection trap shall be weighed carefully to the nearest 20 milligrams. This constitutes the "gross weight," which is appropriately recorded. The difference between the "gross weight" and "tare weight" represents the "net weight" for purposes of calculating the fuel vapor losses.

§ 85.073–22 Information to be recorded.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System or device tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument operator.

(e) Driver or operator.

(f) Vehicle: Make—Vehicle identification number—Model year—Transmission type—Odometer reading—Engine displacement—Engine family—Idle r.p.m.—Nominal fuel tank capacity and location on vehicle—Number of carburetors—Number of carburetor barrels—Inertia loading—Actual road load HP at 50 m.p.h. and drive wheel tire pressure.

(g) Dynamometer serial number and indicated road load power absorption at 50 m.p.h.

(h) All pertinent instrument information such as tuning—gain—serial numbers—detector numbers—range.

(i) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(j) Barometric pressure, ambient temperature and humidity and the temperature of the air in front (from 6 to 12 inches from the grill) of the radiator during the test.

(k) Fuel temperatures, as prescribed.

(l) The temperature and pressure of the mixture of exhaust and dilution air entering the positive displacement pump and the pressure increases across the pump. The temperature of the mixture shall be recorded continuously or digitally at a rate often enough to determine temperature variations, or it may be controlled to ±5° F. of the set point of the temperature control system. In the last case only the set point need be recorded.

(m) The number of revolutions of the positive displacement pump accumulated while the test is in progress and exhaust flow samples are being collected.

§ 85.073–23 Analytical system calibration and sample handling.

(a) Calibrate the analytical assembly at least once every 30 days. Use the same flow rate as when analyzing samples.

(1) Adjust analyzers to optimize performance.

(2) Zero the hydrocarbon analyzer with zero grade air and the carbon monoxide and oxides of nitrogen analyzers with either zero grade air or nitrogen. The allowable zero gas impurity concentrations should not exceed 6 p.p.m. equivalent carbon response, 10 p.p.m. carbon monoxide and 1 p.p.m. nitric oxide .

(3) Set the CO analyzer gain to give the desired range. Select desired attenuation scale of the HC analyzer and set the sample capillary flow rate, by adjusting the back pressure regulator to give the desired range. Select the desired scale of the NO_x analyzer and adjust the phototube high voltage supply or amplifier gain to give the desired range. The operating range of the analyzers shall be such that the analyzer deflection which indicates an emission level equivalent to the respective standard is in the upper two-thirds of the scale.

(4) Calibrate the HC analyzer with propane (air diluent) gases having nominal concentrations of 50 and 100 percent of full scale. Calibrate the CO analyzer with carbon monoxide (nitrogen diluent) gases having nominal concentrations

§ 85.073-21 Sampling and analytical system (fuel evaporative emissions).

(a) *Schematic drawing.* (1) The following figures (Figures A73-3, A73-4, and A73-5) are flow diagrams of typical evaporative loss collection applications.

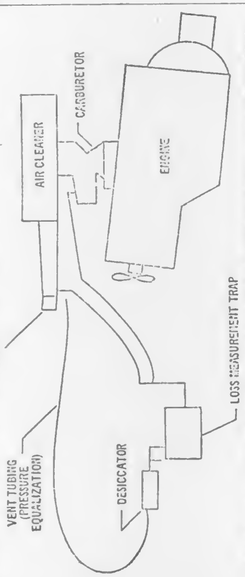

FIGURE A73-3.—Typical carburetor evaporative loss collection arrangement (schematic).

equal to 10, 25, 40, 50, 60, 70, 85, and 100 percent of full scale. Calibrate the NO_x analyzer with nitric oxide (nitrogen diluent) gases having nominal concentrations equal to 50 and 100 percent of full scale. The actual concentrations should be known to within ±2 percent of the true values.

(5) Compare values obtained on the CO analyzer with previous calibration curves. Any significant change reflects some problem in the system. Locate and correct problem, and recalibrate. Use best judgment in selecting curves for data reduction.

(6) Check the NO_x to NO converter efficiency by the following procedure:

(i) Fill a sample bag (one not previously used to collect exhaust gas samples) with air (or oxygen) and NO span gas in proportions which result in a mix in the operating range of the analyzer. Provide enough oxygen for substantial conversion of NO to NO_2.

(ii) Knead bag and immediately connect the bag to the sample inlet and alternately measure the NO and NO_x concentration at 1-minute intervals by alternately passing the sample through the converter and the bypass (close valves N6 and N9 to minimize pump down rate of bag). After several minutes of operation, the recording of NO and NO_x will resemble Figure A73-7 if the converter is efficient. Even though the amount of NO_2 increases with time, the total NO_x ($NO+NO_2$) remains constant. A decay of NO_x with time indicates the converter is not essentially 100 percent efficient and the cause should be determined before the instrument is used.

(iii) The converter efficiency should be checked at least once weekly and preferably once daily.

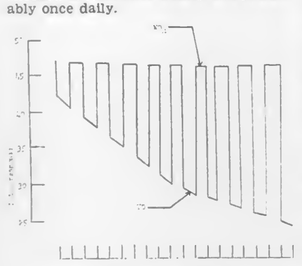

FIGURE A73-7.—Converter efficiency check response.

(b) HC, CO, and NO_x measurements: Allow a minimum of 20 minutes warmup for the HC analyzer and 2 hours for the CO and NO_x analyzers. (Power is normally left on infrared and chemiluminescence analyzers; but when not in use, the chopper motor of the infrared analyzer is turned off and the phototube high voltage supply of the chemiluminescence analyzer is placed in the standby position.) The following sequence of operations should be performed in conjunction with each series of measurements:

(1) Zero the analyzers. Obtain a stable zero on each amplifier meter and recorder. Recheck after test.

(2) Introduce span gases and set the CO analyzer gain, the HC analyzer sample capillary flow rate and the NO_x analyzer high voltage supply or amplifier gain to match the calibration curves. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test samples. Span gases should have concentrations equal to approximately 80 percent of full scale. If gain has shifted significantly on the CO analyzer, check tuning. If necessary, check calibration. Recheck after test. Show actual concentrations on chart.

(3) Check zeroes; repeat the procedure in subparagraphs (1) and (2) of this paragraph if required.

(4) Check flow rates and pressures.

(5) Measure HC, CO, and NO_x concentrations of samples. Prevent moisture from condensing in the sample collection bag.

(6) Check zero and span points.

(c) For the purposes of this paragraph, the term "zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

§ 85.073–24 Dynamometer test runs.

(a) The vehicle shall be allowed to stand with engine turned off for a period of not less than 12 hours before the exhaust emission test, at an ambient temperature as specified in §§ 85.073–12 and 85.073–13. The vehicle shall be stored prior to the emission tests in such a manner that precipitation (e.g., rain or dew) does not occur on the vehicle. During the run the ambient temperature shall be between 68° F. and 86° F. For exhaust emission testing which is unrelated to fuel evaporative emission control, the ambient temperature requirement during storage shall be between 60° F. and 86° F.

(b) The following steps shall be taken for each test:

(1) Place drive wheels of vehicle on dynamometer without starting engine.

(2) Start the cooling fan with the vehicle engine compartment cover open.

(3) With the sample solenoid valves in the "dump" position, connect evacuated sample collection bags to the dilute exhaust sample and the dilution air sample line connectors.

(4) Start the positive displacement pump (if not already on), the sample pumps and the temperature recorder. (The heat exchanger of the constant volume sampler should be preheated to its operating temperature before the test begins.)

(5) Adjust the sample flow rates to the desired flow rate (minimum of 5 c.f.h.).

(6) Attach the flexible exhaust tube to the vehicle tailpipe(s).

(7) Simultaneously start the revolution counter for the positive displacement pump, position the sample solenoid valves to direct the sample flows into the bags, and start cranking the engine.

(8) Fifteen seconds after the engine starts, place the transmission in gear.

(9) Twenty seconds after the engine starts, begin the initial vehicle acceleration of the driving schedule.

(10) Operate the vehicle according to the dynamometer driving schedule. (§ 85.073–14.)

(11) Five seconds after the last deceleration, simultaneously turn off the revolution counter and position the sample solenoid valve to the "dump" position.

(12) Immediately after the end of the sample period turn off the cooling fan and close the engine compartment cover.

(13) Immediately disconnect sample bags, transfer to analytical system and process samples according to § 85.073–23 as soon as practicable, and in no case longer than 10 minutes after the dynamometer run.

(14) Disconnect the exhaust tube from the vehicle tailpipe(s) and remove vehicle from dynamometer.

(15) The positive displacement pump may be turned off, if desired.

§ 85.073–25 Chart reading.

(a) Determine the HC, CO, and NO_x concentrations of the dilution air and dilute exhaust sample bags from the instrument deflection or recordings making use of appropriate calibration charts.

(b) Determine the average dilute exhaust mixture temperature from the temperature recorder trace if a recorder is used.

§ 85.072–26 Calculations (exhaust emissions).

The final reported test results shall be computed by use of the following formulae:

(a) For light duty vehicles, excluding off-road utility vehicles:

(1) Hydrocarbon mass:

$$HC_{mass}=V_{mix}\times Density_{HC}\times\frac{HC_{conc}}{1{,}000{,}000}$$

(2) Carbon monoxide mass:

$$CO_{mass}=V_{mix}\times Density_{CO}\times\frac{CO_{conc}}{100}$$

(3) Oxides of nitrogen mass:

$$NO_{x_{mass}}=V_{mix}\times Density_{NO_2}\times\frac{NO_{x_{conc}}}{1{,}000{,}000}\times K_H$$

(b) For off-road utility vehicles:

(1)

$$HC_{mass}=V_{mix}\times Density_{HC}\times\frac{HC_{conc}}{1{,}000{,}000}\times 0.85$$

(2)

$$CO_{mass}=V_{mix}\times Density_{CO}\times\frac{CO_{conc}}{100}\times 0.85$$

(3)

$$NO_{x_{mass}}=V_{mix}\times Density_{NO_2}\times\frac{NO_{x_{conc}}}{1{,}000{,}000}\times 0.85\times K_H$$

(c) Meaning of symbols:

HC_{mass} = Hydrocarbon emissions, in grams per vehicle mile.

$Density_{HC}$ = Density of hydrocarbons in the exhaust gas, assuming an average carbon to hydrogen ratio of 1:1.85, in grams per cubic foot at 68° F. and 760 mm. Hg pressure (16.33 gm./cu. ft.).

HC_{conc} = Hydrocarbon concentration of the dilute exhaust sample minus hydrocarbon concentration of the dilution air sample in p.p.m. carbon equivalent i.e. equivalent propane ×3.

CO_{mass} = Carbon monoxide emissions, in grams per vehicle mile.

$Density_{CO}$ = Density of carbon monoxide in grams per cubic foot at 68° F. and 760 mm. Hg pressure (32.97 gm./cu. ft.).

CO_{conc} = Carbon monoxide concentration of the dilute exhaust sample minus the carbon monoxide concentration of the dilution air sample, in volume present.

$NO_{x_{mass}}$ = Oxides of nitrogen emissions in grams per vehicle mile.

$Density_{NO_2}$ = Density of oxides of nitrogen in the exhaust gas assuming they are in the form of nitrogen oxide, in grams per cubic foot at 68° F. and 760 mm. Hg pressure (54.16 gm./cu. ft.).

$NO_{x_{conc}}$ = Oxides of nitrogen concentration of the dilute exhaust sample minus the oxides of nitrogen concentration of the dilution air sample, in p.p.m.

V_{mix} = Total dilute exhaust volume in cubic feet per mile, corrected to standard conditions (528° R and 760 mm. Hg).

$$V_{mix}=K_1\times V_s\times N\times\frac{P_B-P_1}{T_p}$$

where:

$K_1=\frac{528°\ R}{760\ mm.\ Hg\times 7.5\ miles}=0.09263.$

V_s = Volume of gas pumped by the positive displacement pump, in cubic feet per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test while samples are being collected.

P_B = Barometric pressure in mm. Hg.

P_1 = Pressure depression below atmosphere measured at the inlet to the positive displacement pump.

T_p = Average temperature of dilute exhaust entering positive displacement pump during test while samples are being collected, in degrees Rankine.

K_H = Humidity correction factor.

$$K_H=\frac{1}{1-0.0047\ (H-75)}$$

where:

H = Absolute humidity in grains of water per pound of dry air.

$$H=\frac{(43.478)\ R_a\times P_d}{P_B-(P_d\times R_a/100)}$$

R_a = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm. Hg at the ambient dry bulb temperature.

(d) Example calculation of mass emissions values:

Assume V_s=0.265 cu. ft. per revolution; N=20,250 revolutions; R_a 65%; P_B=754 mm. Hg; P_d=22.225 mm. Hg; P_1=24 mm.; Hg; T_p=550°R; HC_{conc}=160 p.p.m. carbon equivalent; CO_{conc}=0.09%; and $NO_{x_{conc}}$=70 p.p.m.

Then:

$$V_{mix}=(0.09263)(0.265)(20{,}250)\frac{(754-24)}{(550)}$$
$$=659.8\ \text{cu. ft. per mile.}$$

$$H=\frac{(43.478)(65)(22.225)}{754-(22.225\times 65/100)}=85\ \text{grains per pound of dry air.}$$

$$K_H=\frac{1}{1-0.0047\ (85-75)}=1.049.$$

(1) For a 1973 light duty vehicle.

$$HC_{mass}=659.8\times 16.33\times\frac{160}{1{,}000{,}000}$$
$$=1.72\ \text{grams per vehicle mile.}$$

$$NO_{x_{mass}}=659.8\times 54.16\times\frac{70}{1{,}000{,}000}\times 1.049$$
$$=2.62\ \text{grams per vehicle mile}$$

(2) For a 1973 off-road utility vehicle.

$$CO_{mass}=659.8\times 32.97\times\frac{0.09\times 0.85}{100}$$
$$=16.6\ \text{grams per vehicle mile.}$$

§ 85.073–27 Calculations (fuel evaporative emissions).

The net weights of the individual collection traps employed in § 85.073–13 shall be added together to determine compliance with the fuel evaporative emission standard.

§ 85.073–28 Compliance with emission standards.

(a) The exhaust and fuel evaporative emission standards in § 85.073–1 apply to the emissions of vehicles for their useful life.

(b) Since emission control efficiency decreases with mileage accumulated on the vehicle, the emission level of a vehicle which has accumulated 50,000 miles will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance of a new light duty motor vehicle with exhaust and fuel evaporative emission standards is as follows:

(1) Separate emission deterioration factors shall be determined from the emission results of the durability data vehicles for each engine-system combination. A separate factor shall be established for the combination for exhaust HC, exhaust CO, exhaust NO_x, and fuel evaporative HC.

$$\text{factor}=\frac{\text{exhaust emissions interpolated to 50,000 miles}}{\text{exhaust emissions interpolated to 4,000 miles}}$$

(iv) An evaporative emission deterioration factor shall be calculated for each combination by subtracting the evaporative emissions interpolated to 4,000 miles from the evaporative emissions interpolated to 50,000 miles.

(2) (i) The exhaust emission test results for each emission data vehicle shall be multiplied by the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in subparagraph (1) (iii) of this paragraph is less than 1, that deterioration factor shall be one for the purposes of this subparagraph.

(ii) The evaporative emission test results for each combination shall be adjusted by addition of the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in subparagraph (1) (iv) of this paragraph is less than zero, that deterioration factor shall be zero for the purposes of this subparagraph.

(3) The emissions to compare with the standard shall be the adjusted emissions of subparagraph (2) (i) and (ii) of this paragraph for each emission data vehicle.

(4) Every test vehicle of an engine family must comply with all applicable standards, as determined in subparagraph (3) of this paragraph, before any vehicle in that family may be certified.

§ 85.073–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test vehicles be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b) (1) Whenever the Administrator conducts a test on a test vehicle, the results of that test shall comprise the official data for the vehicle at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause a vehicle to fail due to excessive 4,000 mile or excessive deterioration, then the following procedure shall be observed:

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(a) All emission data from the tests required under § 85.073–7(b), except the zero-mile tests. This shall include the official test results, as determined in § 85.073–29, for all tests conducted on all durability vehicles of the combination selected under § 85.073–5(c) (including all vehicles elected to be operated by the manufacturer under § 85.073–5(c)(3)). Where the Administrator has agreed to a mileage less than 50,000 miles in accordance with § 85.073–7(b), the data for mileages greater than that actually run will be determined by extrapolating the test data generated at lesser mileages.

(b) All emission data from the tests conducted before and after the maintenance provided in § 85.073–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the mileage on the system, rounded to the nearest mile, and the best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 4,000- and 50,000-mile points on this line must be within the standards provided in § 85.073–1 or the data will not be acceptable for use in calculation of a deterioration factor.

(iii) An exhaust emission deterioration factor shall be calculated for each combination as follows:

(i) The manufacturer may request a retest. Before the retest, the vehicle may

the certification test fleet do not meet applicable standards, he will notify the

(b) The Administrator may require the manufacturer to perform such tests

dition or change. If the Administrator determines that test data will be required,

§ 85.073–36 Submission of vehicle identification numbers.

(b) The maintenance instructions required by this section shall contain a

XUM
V37-221 NOV 15 72 XUM

(i) The manufacturer may request a retest. Before the retest, the vehicle may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.073–6. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(ii) The vehicle will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test vehicle would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the vehicle from the test premises.

§ 85.073–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.073–29, the Administrator determines that a test vehicle(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such vehicle(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b) (1) The Administrator will determine whether a vehicle covered by the application complies with applicable standards by observing the following relationships:

(i) A test vehicle selected under § 85.073–5(b) (2) or (4) shall represent all vehicles in the same engine family of the same engine displacement-exhaust emission control system-evaporative emission control system combination.

(ii) A test vehicle selected under § 85.073–5(b)(3) shall represent all vehicles in the same engine family of the same engine displacement-exhaust emission control system-transmission type-fuel system combination.

(iii) A test vehicle selected under § 85.073–5(c)(1) shall represent all vehicles of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.073–29, the Administrator determines that one or more test vehicles of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination, and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.005 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test vehicle(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.005, or

(ii) Delete from the application for certification the vehicles represented by the failing test vehicle. (Vehicles so deleted may be included in a later request for certification under § 85.073–32.) The Administrator will then select in place of each failing vehicle an alternate vehicle chosen in accordance with selection criteria employed in selecting the vehicle that failed, or

(iii) Modify the test vehicle and demonstrate by testing that it meets applicable standards. Another vehicle which is in all material respects the same as the first vehicle, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.073–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all vehicles for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test vehicles and the computation of test results will be determined separately for each application.

§ 85.073–32 Addition of a vehicle after certification.

(a) If a manufacturer proposes to add to his product line a vehicle of the same engine-system combination as vehicles previously certified but which was not described in the application for certification when the test vehicle(s) representing other vehicles of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.073–34. This notification shall include a full description of the vehicle to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test vehicle(s) representing the vehicle to be added which would have been required if the vehicle had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 85.073–29, the Administrator determines that the test vehicle(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test vehicle(s) does not meet applicable standards, he will proceed under § 85.073–30(b).

§ 85.073–33 Changes to a vehicle covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production vehicles in respect to any of the parameters listed in § 85.073–5(a)(3), giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.073–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the vehicle, as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified vehicles, he will notify the manufacturer in writing. Except as provided in § 85.073–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified vehicles would not be covered by the certificate then in effect, then the modified vehicles shall be treated as additions to the product line subject to § 85.073–32.

§ 85.073–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of a vehicle under § 85.073–32 or a change in a vehicle under § 85.073–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce vehicles as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.073–32 (b) and (c), or § 85.073–33 (b) and (c) as appropriate.

(d) Election to produce vehicles under this section will be deemed to be a consent to recall all vehicles which the Administrator determines under § 85.073–32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.073–35 Labeling.

(a)(1) The manufacturer of any light duty motor vehicle subject to the standards prescribed in § 85.073–1 shall, at the time of manufacture, affix a permanent, legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles available for sale to the public and covered by a certificate of conformity under § 85.073–30(a).

(2) A plastic or metal label shall be welded, riveted, or otherwise permanently attached in a readily visible position in the engine compartment.

(3) The label shall be affixed by the vehicle manufacturer, who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label, and shall not be affixed to any equipment which is easily detached from such vehicle.

(4) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(i) The label heading: Vehicle Emission Control Information;

(ii) Full corporate name and trademark of manufacturer;

(iii) Engine displacement (in cubic inches) and engine family identification;

(iv) Engine tuneup specifications and adjustments, as recommended by the manufacturer, including idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g. idle CO, idle air-fuel ratio, idle speed drop). These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air-conditioner), if any should be in operation;

(v) The statement: "This Vehicle Conforms to U.S.E.P.A. Regulations Applicable to 1973 Model Year New Motor Vehicles."

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle conforms to any applicable State emission standards for new motor vehicles or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle.

§ 85.073–36 Submission of vehicle identification numbers.

(a) The manufacturer of any light duty motor vehicle covered by a certificate of conformity under § 85.073–30(a) shall, not later than 60 days after its manufacture, submit to the Administrator the vehicle identification number of such vehicle: *Provided*, That this requirement shall not apply with respect to any vehicle manufactured within any State, as defined in section 302(d) of the Act.

(b) The requirements of this section may be waived with respect to any manufacturer who provides information satisfactory to the Administrator which will enable the Administrator to identify those vehicles which are covered by a certificate of conformity.

§ 85.073–37 Production vehicles.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production vehicles selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These vehicles shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require.

(b) Any manufacturer obtaining certification under this subpart shall notify the Administrator, on a quarterly basis, of the number of vehicles of each engine family - engine displacement - exhaust emission control system-fuel system-transmission type-inertia weight class combination produced for sale in the United States during the preceding quarter. A manufacturer may elect to provide this information every 60 days instead of quarterly, to combine it with the notification required under § 85.073–36.

(c) All light duty vehicles covered by a certificate of conformity under § 85.073–30(a) shall be adjusted by the manufacturer to the ignition timing specification detailed in § 85.073–35(a)(4)(iv).

§ 85.073–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new motor vehicle subject to the standards prescribed in § 85.073–1, written instructions for the maintenance and use of the vehicle by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those vehicle and engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.073–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.073–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.073–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the vehicle's emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

§ 85.074–1 Emission standards for 1974 model year vehicles.

The standards and test procedures set forth in § 85.073 remain applicable for the 1974 model year.

§ 85.075–1 Emission standards for 1975 model year vehicles.

(a) (1) Exhaust emissions from 1975 model year vehicles shall not exceed:

(i) *Hydrocarbons*. 0.41 gram per vehicle mile.

(ii) *Carbon monoxide*. 3.4 grams per vehicle mile.

(iii) *Oxides of nitrogen*. 3.1 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in § 85.075–9 through § 85.075–27 and measured and calculated in accordance with those procedures.

(b) (1) Fuel evaporative emissions shall not exceed:

(i) *Hydrocarbons*—2 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in § 85.075–9 through § 85.075–27 and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new motor vehicle subject to this subpart.

(d) Every manufacturer of new motor vehicles subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicles in accordance

with test procedures contained in § 85.075–9 through § 85.075–27 to ascertain compliance with the general standards in § 85.075–1 and the data

Within each engine family, the requirements of this paragraph must be met.

class as the vehicle selected for that engine-system combination in accord-

A major engine tuneup shall be restricted to the following:

(c) If the Administrator determines that maintenance or repairs performed

XUM V37-221 NOV 15 72 XUM

XUM

V37-221 NOV 15 72

with test procedures contained in § 85.075–9 through § 85.075–27 to ascertain that such test vehicles meet the requirements of paragraphs (a), (b), and (c) of this section, as applicable.

§ 85.075–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the vehicles covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficent to enable the Administrator to select a test fleet representative of the vehicles for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed mileage accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the vehicles covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.075–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the mileage accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.075–5.

§ 85.075–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such vehicles tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the vehicle for extended mileage, as well as a record of all pertinent maintenance performed on the test vehicles.

(b) Emission data on such vehicles tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after zero miles and 4,000 miles of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.075–1 and the data derived from such tests.

(d) A statement that the test vehicles with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any vehicle tested, the vehicle shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.075–5 Test vehicles.

(a) (1) The vehicles covered by the application for certification will be divided into groupings of vehicles whose engines are expected to have similar emission characteristics. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center-to-center dimensions.

(ii) The dimension from the centerline of the crankshaft to the centerline of the camshaft.

(iii) The dimension from the centerline of the crankshaft to the top of the cylinder block head face.

(iv) The cylinder block configuration (air cooled or water cooled; L–6, 90° V–8, etc.).

(v) The location of intake and exhaust valves and the valve sizes (within a ⅛-inch range on the valve head diameter).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(3) Engines identical in all the respects listed in subparagraph (2) of this paragraph may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine:

(i) The bore and stroke.

(ii) The surface-to-volume ratio of the nominally dimensioned cylinder at the top dead center position.

(iii) The intake manifold induction port size and configuration.

(iv) The exhaust manifold port size and configuration.

(v) The intake and exhaust valve sizes.

(vi) The fuel system.

(vii) The camshaft timing and ignition timing characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in subparagraphs (2) and (3) of this paragraph, the Administrator will establish families for those engines based upon the features most related to their emission characteristics.

(b) Emission data vehicles:

(1) Vehicles will be chosen to be operated and tested for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system-evaporative emission control system combinations. A projected sales volume will be established for each combination for the 1975 model year. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination will be selected. The vehicle selected for each combination will be specified by the Administrator as to transmission type, fuel system, and inertia weight class.

(3) The Administrator may select a maximum of four additional vehicles within each engine family based upon features indicating that they may have the highest emission levels of the vehicles in that engine family. In selecting these vehicles, the Administrator will consider such features as the emission control system combination, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, compression ratio, inertia weight class, transmission options, and axle ratios.

(4) If the vehicles selected in accordance with subparagraphs (2) and (3) of this paragraph do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with the control system combination in the engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(c) Durability data vehicles:

(1) A durability data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control-system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system, and inertia weight class.

(2) If an exhaust emission control system–fuel evaporative emission control system combination is used in only one engine family, an additional vehicle using that combination in that family will be selected so that the durability data fleet shall contain at least two vehicles with each combination. The additional vehicle will be selected in the same manner as vehicles selected under subparagraph (1) of this paragraph.

(3) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system, and inertia weight

class as the vehicle selected for that engine-system combination in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to operate and test additional vehicles shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(d) For purposes of testing under § 85.075–7(g), the Administrator may require additional emission data vehicles and durability data vehicles identical in all material respects to vehicles selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of vehicles selected shall not increase the size of either the emission data fleet or the durability data fleet by more than 20 percent or one vehicle, whichever is greater.

(e) Any manufacturer whose projected sales of new motor vehicles subject to this subpart for the 1975 model year is less than 2,000 vehicles may request a reduction in the number of test vehicles determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(f) In lieu of testing an emission data or durability data vehicle selected under paragraph (b) or (c) of this section, and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit data on a similar vehicle for which certification has previously been obtained.

(g) (1) Where it is expected that more than 33 percent of an engine family will be equipped with an optional item, the full estimated weight of that item shall be included in the curb weight computation for the entire engine family. Where it is expected that 33 percent or less of the vehicles in an engine family will be equipped with an item of optional equipment, no weight for that item will be added in computing curb weight. Optional equipment weighing less than 3 pounds per item need not be considered.

(2) Where it is expected that more than 33 percent of an engine family will be equipped with an item of optional equipment that can reasonably be expected to influence exhaust or evaporative emissions, then such items of optional equipment shall actually be installed on all emission data and durability data vehicles for such engine family.

§ 85.075–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability vehicles may be performed only under the following provisions:

(i) One major engine tuneup to manufacturer's specificatons may be performed at 24,000 miles (±250 miles) of scheduled driving with the following exception: On a vehicle with an engine displacement of 150 cubic inches or less (or a rating of at least 1.20 maximum rated horsepower per cubic inch of displacement), major engine tuneups may be performed at 12,000, 24,000 and 36,000 miles (±250 miles) of scheduled driving. A major engine tuneup shall be restricted to the following:

(*a*) Replace spark plugs.

(*b*) Inspect ignition wiring and replace as required.

(*c*) Replace distributor breaker points and condensor as required.

(*d*) Lubricate distributor cam.

(*e*) Check distributor advance and breaker point dwell angle and adjust as required.

(*f*) Check automatic choke for free operation and correct as required.

(*g*) Adjust carburetor idle speed and mixture.

(*h*) Adjust drive belt tension on engine accessories.

(*i*) Adjust valve lash if required.

(*j*) Check exhaust heat control valve for free operation.

(*k*) Check engine bolt torque and tighten as required.

(ii) Spark plugs may be changed if a persistent misfire is detected.

(iii) Normal vehicle lubrication services (engine and transmission oil change and oil filter, fuel filter, and air filter servicing) will be allowed at manufacturer's recommended intervals.

(iv) The crankcase emission control system may be serviced at 12,000-mile intervals (±250 miles) of scheduled driving.

(v) The fuel evaporative emission control system may be serviced at 12,000-mile intervals (±250 miles) of scheduled driving.

(vi) Readjustment of the engine choke mechanism or idle settings may be performed only if there is a problem of stalling at stops.

(vii) Leaks in the fuel system, engine lubrication system and cooling system may be repaired.

(viii) Engine idle speed may be adjusted at the 4,000-mile test point.

(ix) Any other engine or fuel system maintenance or repairs will be allowed only with the advance approval of the Administrator.

(2) Repairs to vehicle components of the durability data vehicle, other than the engine or fuel system, shall be performed only as a result of part failure or vehicle system malfunction.

(3) Allowable maintenance on emission data vehicles shall be limited to the adjustment of engine idle speed at the 4,000-mile test point.

(4) Where the Administrator agrees under § 85.075–7 to a mileage accumulation of less than 50,000 miles for durability testing, he may modify the requirements of this paragraph.

(b) Complete emission tests (see § 85.075–10 through § 85.075–27) shall be run before and after any vehicle maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.075–4.

(c) If the Administrator determines that maintenance or repairs performed have resulted in a substantial change to the engine-system combination, the vehicle shall not be used as a durability data vehicle.

§ 85.075–7 Mileage accumulation and emission measurements.

The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV to this part. A modified procedure may also be used if approved in advance by the Administrator.

(a) Emission data vehicles: Each emission data vehicle shall be driven 4,000 miles with all emission control systems installed and operating. Emission tests shall be conducted at zero miles and 4,000 miles.

(b) Durability data vehicles: Each durability data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of this procedure. Emission measurements from a cold start shall be made at zero miles and at each 4,000-mile interval.

(c) All tests required by this subpart to be conducted after 4,000 miles of driving or at any multiple of 4,000 miles may be conducted at any accumulated mileage within 250 miles of 4,000 miles or the appropriate multiple of 4,000 miles, respectively.

(d) The results of each emission test shall be supplied to the Administrator immediately after the test. Where a manufacturer conducts multiple tests at any test point or any tests between test points, data on these tests (including voided tests) shall be provided immediately to the Administrator. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.075–4.

(e) Whenever the manufacturer proposes to operate and test a vehicle which may be used for emission or durability data, he shall provide the zero mile test data to the Administrator and make the vehicle available for such testing under § 85.075–29 as the Administrator may require before beginning to accumulate mileage on the vehicle. Failure to comply with this requirement will invalidate all test data submitted for this vehicle.

(f) Once a manufacturer begins to operate an emission data or durability data vehicle, as indicated by compliance with paragraph (e) of this section, he shall continue to run the vehicle to 4,000 miles or 50,000 miles, respectively, and the data from the vehicle will be used in the calculations under § 85.075–28. Discontinuation of a vehicle shall be allowed only with the written consent of the Administrator.

(g) (1) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(2) The test procedures in §§ 85.075–10

(1) Diurnal breathing losses from the

vent line terminus is inaccessible, sever

(a) *Diurnal breathing loss test.* (1)

fan shall be turned off upon completion of the dynamometer run and the exhaust

vehicle in an appropriate manner with the engine compartment cover open. The

(2) The test procedures in §§ 85.075–10 through 85.075–27 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(3) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

§ 85.075–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.075–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of vehicles with the standards set forth in § 85.075–1.

(a) The test consists of prescribed sequences of fueling, parking, and operating conditions. The exhaust gases generated during vehicle operation are diluted with air and sampled continuously for subsequent analysis of specific components by prescribed analytical techniques. The fuel evaporative emissions are collected for subsequent weighing during both vehicle parking and operating events. The test applies to vehicles equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems or to uncontrolled vehicles and engines.

(b) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles. The test consists of engine startups and vehicle operation on a chassis dynamometer through a specified driving schedule, as described in Appendix I to this part. A proportional part of the diluted exhaust emissions is collected continuously, for subsequent analysis, using a constant volume (variable dilution) sampler.

(c) The fuel evaporative emission test is designed to determine fuel hydrocarbon evaporative emissions to the atmosphere as a consequence of urban driving, and diurnal temperature fluctuations during parking. It is associated with a series of events representative of a motor vehicle's operation, which result in fuel vapor losses directly from the fuel tank and carburetor. Activated carbon traps are employed in collecting the vaporized fuel. The test procedure is specifically aimed at collecting and weighing:

(1) Diurnal breathing losses from the fuel tank and other parts of the fuel system when the fuel tank is subjected to a temperature increase representative of the diurnal range;

(2) Running losses from the fuel tank and carburetor resulting from a simulated trip on a chassis dynamometer; and

(3) Hot soak losses from the fuel tank and carburetor which result when the vehicle is parked and the hot engine is turned off.

(d) All emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all test procedures in this subpart.

§ 85.075–10 Gasoline specifications.

(a) Fuel having the following specifications or substantially equivalent specifications approved by the Administrator, shall be used in exhaust and evaporative emission testing. The lead content and octane rating of the fuel shall be in the range recommended by the vehicle or engine manufacturer.

Item	ASTM designation	Specifications
Distillation range	D 86	
IBP, ° F		75–95
10 percent point, ° F		120–135
50 percent point, ° F		200–230
90 percent point, ° F		300–325
E.P., ° F (max.)		415
Sulfur, wt. percent, max	D 1266	0.10
Phosphorous, theory		0.0
RVP,[1] lb	D 323	8.7–9.2
Hydrocarbon composition	D 1319	
Olefins, percent, max		10
Aromatics, percent, max		35
Saturates		Remainder

[1] For testing which is unrelated to fuel evaporative emission control, the specified range is 8.0–9.2.

(b) Fuels representative of commercial fuels which will generally be available through retail outlets shall be used in mileage accumulation. The lead content and octane rating of the fuel used shall be in the range recommended by the vehicle or engine manufacturer. The Reid vapor pressure of the fuel used shall be characteristic of the motor fuel during the season during which the mileage accumulation takes place.

(c) The specification range of the fuels to be used under paragraph (b) of this section shall be reported in accordance with § 85.075–2(b)(3).

§ 85.075–11 Vehicle and engine preparation (fuel evaporative emissions).

(a) (1) Apply approximate leak-proof fittings to all fuel system external vents to permit collection of effluent vapors from these vents during the course of the prescribed tests. Since the prescribed test requires the temporary plugging of the inlet pipe to the air cleaner, it will be necessary to install a probe for collecting the normal effluents from this source. Where antisurge/vent filler caps are employed on the fuel tank, plug off the normal vent if it does not conveniently lend itself to the collection of vapors which emanate from it, and introduce a separate vent, with appropriate fitting, on the cap. Where the fuel tank vent line terminus is inaccessible, sever the line at a convenient point near the fuel tank and install the collection system in a closed circuit assembly with the severed ends. All fittings shall terminate in $\frac{5}{16}$-inch ID tube sections for ready connection to the collection systems and shall be designed for minimum dead space.

(2) The design and installation of the necessary fittings shall not disturb the normal function of the fuel system components or the normal pressure relationships in the system.

(b) (1) Inspect the fuel system carefully to insure the absence of any leaks to the atmosphere of either liquid or vapor which might affect the accuracy of the test or the performance of the control system. Corrective action, if any, shall be reported with the test results under § 85.075–4.

(2) Care should be exercised, in the application of any pressure tests, neither to purge nor load the evaporative emission control system.

(c) Prepare fuel tank for recording the temperature of the prescribed test fuel at its approximate midvolume.

(d) Provide additional fittings and adapters, as required, to accommodate a fuel drain at the lowest point possible in the tank as installed on the vehicle.

§ 85.075–12 Vehicle preconditioning (fuel evaporative emissions).

Vehicles to be tested for compliance with the fuel evaporative emissions standard of this subpart shall be preconditioned as follows:

(a) The test vehicle shall be operated under the conditions prescribed for mileage accumulation, § 85.075–7, for 1 hour immediately prior to the operations prescribed below.

(b) The fuel tank shall be drained and specified test fuel (§ 85.075–10(a)) added. The evaporative emission control system or device shall not be abnormally purged or loaded as a result of draining or fueling the tank.

(c) The test vehicle shall be placed on the dynamometer and operated over a simulated trip, according to the applicable requirements and procedures of §§ 85.075–14 through 85.075–19 except that the engine need not be cold when starting the run on the dynamometer and only a single trip of 7.5 miles shall be run. During the run the ambient temperature shall be between 68° F. and 86° F.

(d) The engine and cooling fan shall be stopped upon completion of the dynamometer operation and the vehicle permitted to soak either on or off the dynamometer stand at an ambient temperature between 76° F. and 86° F. for a period of not less than 1 hour prior to the soak period prescribed in § 85.075–13(a)(1).

§ 85.075–13 Evaporative emission collection procedure.

The standard test procedure consists of three parts described below which shall be performed in sequence and without any interruption in the test conditions prescribed.

(a) *Diurnal breathing loss test.* (1) The test vehicle shall be allowed to "soak" in an area where the ambient temperature is maintained between 60° F. and 86° F. for a period of not less than 10 hours. (The vehicle preparation requirements of § 85.075–11 may be performed during this period.) It shall then be transferred to a soak area where the ambient temperature is maintained between 76° F. and 86° F. Upon admittance to the 76° F.–86° F. soak area, the prescribed fuel tank thermocouple shall be connected to the recorder and the fuel and ambient temperatures recorded at a chart speed of approximately 12 inches per hour (or equivalent record).

(2) The fuel tank of the prepared test vehicle, preconditioned according to § 85.075–12, shall be drained and recharged with the specified test fuel, § 85.075–10(a), to the prescribed "tank fuel volume," defined in § 85.002. The temperature of the fuel following the charge to the tank shall be 60° F. ± 2° F. Care should be exercised against abnormal loading of the evaporative emission control system or device as a result of fueling the tank.

(3) Immediately following the fuel charge to the tank, the exhaust pipe(s) and inlet pipe to the air cleaner shall be plugged and the prescribed vapor collection systems installed on all fuel system external vents. Multiple vents may be connected to a single collection trap provided that, where there is more than one external vent on a fuel system distinguishing between carburetor and tank vapors, separate collection systems shall be employed to trap the vapors from the separate sources. Every precaution shall be taken to minimize the lengths of the collection tubing employed and to avoid sharp bends across the entire system.

(4) Artificial means shall be employed to heat the fuel in the tank to 84° F. ±2° F. The prescribed temperature of the fuel shall be achieved over a period of 60 minutes ± 10 minutes using a constant rate of heat input. After a minimum of 1 hour, following admittance to the 76° F.–86° F. soak area, the vehicle shall be moved onto the dynamometer stand for the subsequent part of the test. The fuel tank thermocouple may be temporarily disconnected to permit moving the test vehicle. Plugs shall be removed from the exhaust pipe(s) and inlet pipe to the air cleaner.

(b) *Running loss test.* (1) The vehicle shall be placed on the dynamometer and the fuel tank thermocouple reconnected. The fuel temperature and the ambient air temperature shall be recorded at a chart speed of approximately 12 inches per hour (or equivalent record).

(2) Where an external vent is located such that any "running loss" emissions would be inducted into the engine, the vapor loss measurement system shall be temporarily disconnected from that vent and clamped. Vapor losses from this vent need not be measured during this part of the test.

(3) The vehicle shall be operated on the dynamometer according to the requirements and procedures of §§ 85.075–14 through 85.075–24. The engine and fan shall be turned off upon completion of the dynamometer run and the exhaust and air cleaner inlet pipes shall be replugged.

(4) Vapor losses need not be measured during the 10-minute soak or 505-second "hot" start test. Any vapor loss collection system used during the cold start shall be temporarily disconnected and clamped. At the end of the hot start test, the vapor collection systems shall be reconnected for the following phase.

(c) *Hot soak test.* Upon completion of the dynamometer run, the test vehicle shall be permitted to soak with hood down for a period of 1 hour at an ambient temperature between 76° F. and 86° F. This operation completes the test. The traps are disconnected and weighed according to § 85.075–21.

§ 85.075–14 Dynamometer driving schedule.

(a) The dynamometer driving schedule to be followed consists of a nonrepetitive series of idle, acceleration, cruise, and deceleration modes of various time sequences and rates. The driving schedule is defined by a smooth transition through the speed vs. time relationships listed in Appendix I. The time sequence begins upon starting the vehicle according to the startup procedure described in § 85.075–19.

(b) A speed tolerance of ±2 m.p.h. and a time tolerance of ±1 second (or an algebraic combination of the two) from either the speed-time relationship prescribed in Appendix I or as printed on a driver's aid chart approved by the Administrator are acceptable. Speed tolerances greater than 2 m.p.h. (such as occur when shifting manual transmission vehicles) are acceptable provided they occur for less than 2 seconds on any one occasion. Speeds lower than those prescribed may be acceptable provided that the vehicle is operated at maximum available power during such occurrences. Further, speed deviations from those prescribed due to stalling are acceptable provided the provisions of § 85.075–19(f) are adhered to.

§ 85.075–15 Dynamometer procedure.

(a) The dynamometer run consists of two tests, a "cold" start test after a minimum 12-hour soak according to the provisions of §§ 85.075–12 and 85.075–13 and a "hot" start test with a 10-minute soak between the two tests. Engine startup, operation over the driving schedule, and engine shutdown make a complete cold start test. Engine startup and operation over the first 505 seconds of the driving schedule complete the hot start test. The exhaust emissions are diluted with air to a constant volume and a portion is sampled continuously during each test. The composite samples collected in bags are analyzed for hydrocarbons, carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbon, carbon monoxide, and oxides of nitrogen.

(b) During dynamometer operation, a fixed speed cooling fan shall be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. The fan capacity shall normally not exceed 5,300 c.f.m. If, however, the manufacturer can show that during field operation the vehicle receives additional cooling, the fan capacity may be increased or additional fans used if approved in advance by the Administrator. In the case of vehicles with front engine compartments, the fan(s) shall be squarely positioned between 8 and 12 inches in front of the cooling air inlets (grill). In the case of vehicles with rear engine compartments (or if special designs make the above impractical), the cooling fan(s) shall be placed in a position to provide sufficient air to maintain engine cooling.

(c) The vehicle shall be nearly level when tested in order to prevent abnormal fuel distribution.

(d) Flywheels, electrical or other means of simulating inertia as shown in the following table shall be used. If the equivalent inertia specified is not available on the dynamometer being used, the next higher equivalent inertia (not to exceed 250 lbs.) available shall be used.

Loaded vehicle weight, pounds	Equivalent inertia weight, pounds	Road load power @ 50 m.p.h., horsepower
Up to 1,125	1,000	5.9
1,126 to 1,375	1,000	6.5
1,376 to 1,625	1,500	7.1
1,626 to 1,875	1,750	7.7
1,876 to 2,125	2,000	8.3
2,126 to 2,375	2,250	8.8
2,376 to 2,625	2,500	9.4
2,626 to 2,875	2,750	9.9
2,876 to 3,250	3,000	10.3
3,251 to 3,750	3,500	11.2
3,751 to 4,250	4,000	12.0
4,251 to 4,750	4,500	12.7
4,751 to 5,250	5,000	13.4
5,251 to 5,750	5,500	13.9
5,751 to above	5,500	14.4

(e) Power absorption unit adjustment.

(1) The power absorption unit shall be adjusted to reproduce road load power at 50 m.p.h. true speed. The indicated road load power setting shall take into account the dynamometer friction. The relationship between road load (absorbed) power and indicated road load power for a particular dynamometer shall be determined by the procedure outlined in Appendix II or other suitable means.

(2) The road load power listed in the table above shall be used or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 m.p.h., and

(ii) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 m.p.h. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e. within ±5 mm. Hg.

(iii) The road load power shall be de-

roughness is evident, or when engine

more throttle, etc., where necessary to

to provide additional information and coordinate the functions of the compo-

(10) Filters (F1 and F2) to remove particulate matter from dilution air and

(1) Quick-connect leak-tight fitting (C4) to attach sample bags to analytical

XUM
V 37 • 221 NOV 15 72 V
XUM

(iii) The road load power shall be determined according to the procedure outlined in Appendix II and adjusted according to the following if applicable.

(3) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with air conditioning, the road load power listed above or as determined in paragraph 2 of this subsection shall be increased by 10 percent for testing all test vehicles representing such engine family.

(f) The vehicle speed (m.p.h.) as measured from the dynamometer rolls shall be used for all conditions. A speed vs. time recording, as evidence of dynamometer test validity, shall be supplied on request of the Administrator.

(g) Practice runs over the prescribed driving schedule may be performed to find the minimum throttle action to maintain the proper speed-time relationship.

NOTE: When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle in the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. The rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(h) The drive wheel tires may be inflated up to 45 p.s.i.g. in order to prevent tire damage. The drive wheel tire pressure shall be reported with the test results.

(i) If the dynamometer has not been operated during the 2-hour period immediately preceding the test it shall be warmed up for 15 minutes by operating it at 30 m.p.h. using a nontest vehicle.

§ 85.075–16 Three-speed manual transmissions.

(a) All test conditions except as noted shall be run in highest gear.

(b) Cars equipped with free wheeling or overdrive units shall be tested with this unit (free wheeling or overdrive) locked out of operation.

(c) Idle shall be run with transmission in gear and with clutch disengaged (except first idle; see § 85.075–19).

(d) The vehicle shall be driven with minimum throttle movement to maintain the desired speed.

(e) Acceleration modes shall be driven smoothly with the shift speeds as recommended by the manufacturer. If the manufacturer does not recommend shift speeds, the vehicle shall be shifted from first to second gear at 15 m.p.h. and from second to third gear at 25 m.p.h. The operator shall release the accelerator pedal during the shift, and accomplish the shift with minimum closed throttle time. If the vehicle cannot accelerate at the specified rates, the vehicle shall be accelerated at WOT until the vehicle speed reaches the speed at which it should be at that time during the test.

(f) The deceleration modes shall be run with clutch engaged and without shifting gears from the previous mode, using brakes or throttle as necessary to maintain the desired speed. For those modes which decelerate to zero, the clutch shall be depressed when the speed drops below 15 m.p.h., when engine roughness is evident, or when engine stalling is imminent.

(g) Downshifting is allowed at the beginning of or during a power mode if recommended by the manufacturer or if the engine obviously is lugging.

§ 85.075–17 Four-speed and five-speed manual transmissions.

(a) Use the same procedure as for three-speed manual transmissions for shifting from first to second gear and from second to third gear. If the manufacturer does not recommend shift speeds, the vehicle shall be shifted from third to fourth gear at 40 m.p.h. Fifth gear may be used at the manufacturer's option.

(b) If transmission ratio in first gear exceeds 5:1, follow the procedure for three- or four-speed manual transmission vehicles as if the first gear did not exist.

§ 85.075–18 Automatic transmissions.

(a) All test conditions shall be run with the transmission in "Drive" (highest gear). Automatic stick-shift transmissions may be shifted as manual transmissions at the option of the manufacturer.

(b) Idle modes shall be run with the transmission in "Drive" and the wheels braked (except first idle; see § 85.075–19).

(c) The vehicle shall be driven with minimum throttle movement to maintain the desired speed.

(d) Acceleration modes shall be driven smoothly allowing the transmission to shift automatically through the normal sequence of gears. If the vehicle cannot accelerate at the specified rates, the vehicle shall be accelerated at WOT until the vehicle speed reaches the speed at which it should be at that time during the driving schedule.

(e) The deceleration modes shall be run in gear using brakes or throttle as necessary to maintain the desired speed.

§ 85.075–19 Engine starting and restarting.

(a) The engine shall be started according to the manufacturer's recommended starting procedures. The initial 20-second-idle period shall begin when the engine starts.

(b) Choke operation:

(1) Vehicles equipped with automatic chokes shall be operated according to the manufacturer's operating or owner's manual including choke setting and "kick-down" from cold fast idle. If choke "kick-down" time is not specified, it shall be performed 13 seconds after the engine starts. The transmission shall be placed in gear 15 seconds after the engine is started. If necessary, braking may be employed to keep the drive wheels from turning.

(2) Vehicles equipped with manual chokes shall be operated according to the instructions which will be included in the manufacturer's operating or owner's manual. If not specified, the choke shall be operated to maintain engine idle at 1,100±50 r.p.m. during the initial idle period and used where necessary during the remainder of the test to keep the engine running.

(c) The operator may use more choke, more throttle, etc., where necessary to keep the engine running.

(d) If the manufacturer's operating or owner's manual does not specify a warm engine starting procedure, the engine (automatic and manual choke engines) shall be started by depressing the acceleration pedal about half way and cranking the engine until it starts.

(e) If the vehicle does not start after 10 seconds of cranking, cranking shall cease and the reason for failure to start determined. The revolution counter on the constant volume sampler (see § 85.075–24, Dynamometer test runs) shall be turned off and the sample solenoid valves placed in the "dump" position during this diagnostic period. In addition, either the positive displacement pump should be turned off or the exhaust tube disconnected from the tailpipe during the diagnostic period. If failure to start is an operational error, the vehicle shall be rescheduled for testing from a cold start. If failure to start is caused by vehicle malfunction, corrective action of less than 30 minutes duration may be taken and the test continued. The sampling system shall be reactivated at the same time cranking is started. When the engine starts, the driving schedule timing sequence shall begin. If failure to start is caused by vehicle malfunction and the vehicle cannot be started, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported.

(e) If the engine "false starts", the operator shall repeat the recommended starting procedure (such as resetting the choke, etc.).

(f) Stalling:

(1) If the engine stalls during an idle period, the engine shall be restarted immediately and the test continued. If the engine cannot be started soon enough to allow the vehicle to follow the next acceleration as prescribed, the driving schedule indicator shall be stopped. When the vehicle restarts the driving schedule indicator shall be reactivated.

(2) If the engine stalls during some operating mode other than idle, the driving schedule indicator shall be stopped, the vehicle restarted, accelerated to the speed required at that point in the driving schedule and the test continued.

(3) If the vehicle will not restart within 1 minute, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported.

§ 85.075–20 Sampling and analytical system (exhaust emissions).

(a) *Schematic drawings.* The following figures (Figs. A75–1 and A75–2) are schematic drawings of the exhaust gas sampling and analytical systems which will be used for testing under the regulations in this part. Additional components such as instruments, valves, solenoids, pumps, and switches may be used

to provide additional information and coordinate the functions of the component systems.

(b) *Component description (exhaust gas sampling system).* The following components will be used in the exhaust gas sampling system for testing under the regulations in this part. See Figure A75–1. Other types of constant volume samplers may be used if shown to yield equivalent results.

(1) A dilution air filter assembly consisting of a particulate (paper) filter to remove solid matter from the dilution air and thus increase the life of the charcoal filter; a charcoal filter to reduce and stabilize the background hydrocarbon level; and a second particulate filter to remove charcoal particles from the air stream. The filters shall be of sufficient capacity and the duct which carries the dilution air to the point where the exhaust gas is added shall be of sufficient size so that the pressure at the mixing point is less than 1 inch of water pressure below ambient when the constant volume sampler is operating at its maximum flow rate.

(2) A flexible, leak-tight connector and tube to the vehicle tailpipe. The flexible tubing shall be sized and connected in such a manner that the static pressure variations in the vehicle tailpipe(s) remain within ±1 inch of water of the static pressure variations measured during a dynamometer driving cycle with no connections to the tailpipe(s).

(3) A heating system to preheat the heat exchanger to within ±10° F. of its operating temperature before the test begins.

(4) A heat exchanger capable of limiting the gas mixture temperature variation during the entire test to ±10° F. as measured at a point immediately ahead of the positive displacement pump.

(5) A positive displacement pump to pump the dilute exhaust mixture. The pump capacity (300 to 350 c.f.m. is sufficient for testing most vehicles) shall be large enough to virtually eliminate water condensation in the system. See Appendix III for flow calibration techniques.

(6) Temperature sensor (T1) with an accuracy of ±2° F. to allow continuous recording of the temperature of the dilute exhaust mixture entering the positive displacement pump. (See § 85.075–22)(1).)

(7) Gauge (G1) with an accuracy of ±3 mm. Hg to measure the pressure depression of the dilute exhaust mixture entering the positive displacement pump, relative to atmospheric pressure.

(8) Gauge (G2) with an accuracy of ±3 mm. Hg to measure the pressure increase across the positive displacement pump.

(9) Sample probes (S1 and S2) pointed upstream to collect samples from the dilution air stream and the dilute exhaust mixture. Additional sample probes may be used, for example, to obtain continuous concentration traces of the dilute exhaust stream. In such case the sample flow rate, in standard cubic feet per test phase, must be added to the calculated dilute exhaust volume. The position of the sample probe in Figure A75–1 is pictorial only.

(10) Filters (F1 and F2) to remove particulate matter from dilution air and dilute exhaust samples.

(11) Pumps (P1 and P2) to pump the dilution air and dilute exhaust into their respective sample collection bags.

(12) Flow control valves (N1 and N2) to regulate flows to sample collection bags, at constant flow rates. The minimum sample flow rate shall be 10 c.f.h.

(13) Flowmeters (FL1 and FL2) to insure, by visual observation, that constant flow rates are maintained throughout the test.

(14) Three-way solenoid valves (V1, V2, V3, and V4) to direct sample streams to either their respective bags or overboard.

(15) Quick-connect, leak-tight fittings (C1, C2, C3, and C4) with automatic shutoff on bag side to attach sample bags to sample system.

(16) Sample collection bags for dilution air and exhaust samples of sufficient capacity so as not to impede sample flow.

(17) Revolution counters to count the revolutions of the positive displacement pump while each test phase is in progress and samples are being collected.

(c) *Component description (exhaust gas analytical system).* The following components will be used in the exhaust gas analytical system for testing under the regulations in this part. The analytical system provides for the determination of hydrocarbon concentrations by flame ionization detector (FID) analysis, the determination of carbon monoxide and carbon dioxide concentrations by nondispersive infrared (NDIR) analysis and the determination of oxides of nitrogen concentrations by chemiluminescence (CL) analysis in dilute exhaust samples. The chemiluminescence method of analysis requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. See Appendix V. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator. See Figure A75–2.

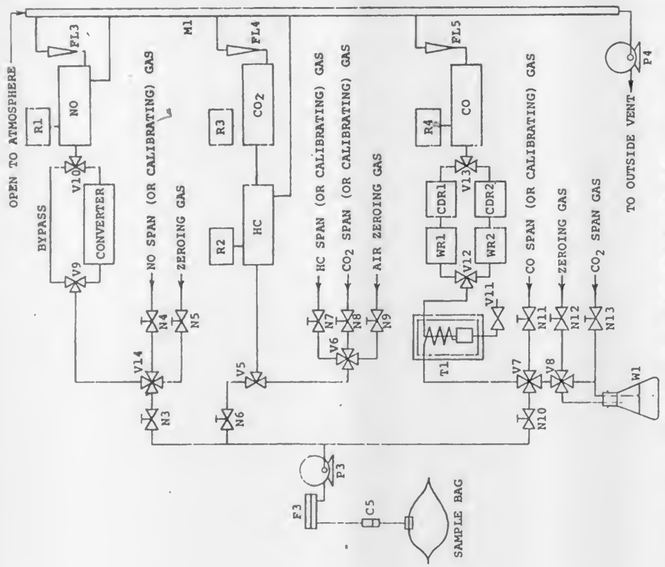

FIGURE A75-2.—Exhaust gas analytical system.

§ 85.075-21 Sampling and analytical system (fuel evaporative emissions).

(a) *Schematic drawing.* (1) The following figures (Figures A75-3, A75-4, and A75-5) are flow diagrams of typical evaporative loss collection applications.

(2) Figure A75-3 represents an arrangement for collecting losses which emanate from the carburetor. Figure A75-4 depicts the means for separately collecting the vapors which emanate from the fuel tank vent line and filler cap. Figure A75-5 shows an arrangement for collecting the losses from a closed fuel system, vented to the atmosphere solely through the air cleaner, as might be the case with certain fuel evaporative emission control devices.

(3) Schematic drawings of arrangements to be employed shall be submitted in accordance with § 85.075-2(b)(3).

(b) *Collection equipment.* The following equipment shall be used for this collection of fuel evaporative emissions. (Item quantities are determined by individual test needs.)

(1) *Activated carbon trap.* See Figure A75-6 for specifications of one design; other configurations may be used: *Provided,* That they give demonstrably equivalent results.

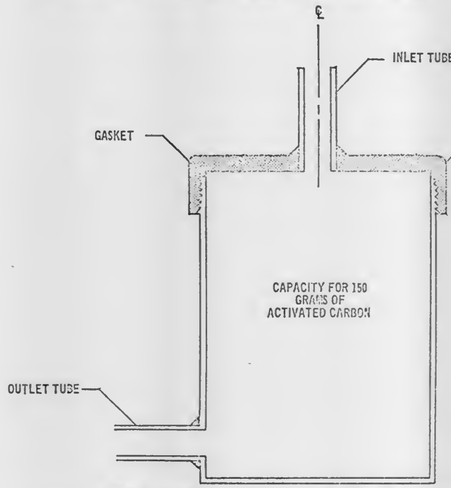

FIGURE A75-6.—Typical activated carbon trap (schematic).

(i) Canister—300±25 ml., cylindrical container having a length to diameter ratio of 1.4±0.1. An inlet tube, 5/16 inch ID and 1 inch long is sealed into the top of the canister, at its geometric center. A similar outlet tube is sealed into the wall ¼ inch from the bottom of the canister. The canister is designed to withstand an air pressure of 2 p.s.i., when sealed, without evidence of leaking when immersed in water for 30 seconds.

(ii) Activated carbon—meeting the following specifications:

Surface area, min. (N_2 BET method).[1]	1,000 square meters per gram.
Adsorption capacity, min. (carbon tetrachloride)	60 percent, by weight.
Volatile material including adsorbed water vapor.	None.
Screen analysis size:	*Percent*
Less than 1.4 mm	0
1.7–2.4 mm	90–100
More than 3.0 mm	0

[1] Brunauer, Emmett & Teller: Journal of the American Chemical Society, Vol. 60, p. 309, 1938.

The activated carbon trap is prepared for the test by attaching clamped sections of vinyl tubing to the inlet and outlet tubes of the canister. The canister is then filled with 150±10 gm. hot activated carbon which had previously been oven-dried for 3 hours at 300° F. Loss of carbon through the inlet and outlet tubes is prevented through the use of wire screens of 0.7 mm. mesh or wads of loosely packed glass wool. The canister is closed immediately after filling and the carbon is allowed to cool while the trap is vented through a drying tube via the unclamped outlet arm.

(iii) The trap is sealed and weighed after cooling and the weight, to the nearest 0.1 gram, is inscribed on the canister body. Within 12 hours of the scheduled test, the weight of the trap is checked and if it has changed by more than 0.5 gm., it is redried to constant weight. This redrying operation is performed by passing dry nitrogen, heated to 275° F., through the trap, via the inlet tube, at a rate of 1 liter per minute until checks made at 30-minute intervals do not vary by more than 0.1 percent of the gross weight. The trap and its contents are allowed to cool to room temperature, while vented through a drying tube via the outlet arm, before use.

(2) *Auxiliary collection equipment.* (i) Drying tube—transparent, tubular body ¾ inch ID, 6 inches long, with serrated tips and removable caps.

(ii) Desiccant—indicating variety, 8 mesh. The drying tube is attached to the outlet tube of the collection traps to prevent ambient moisture from entering the trap. It is prepared by filling the empty drying tube with fresh desiccant using loose wad of glass wool to hold the desiccant in place. The desiccant is renewed when three-quarters spent, as indicated by color change.

(iii) Collection tubing—stainless steel or aluminum, 5/16 inch ID, for connecting the collection traps to the fuel system vents.

(iv) Polyvinyl chloride (vinyl) tubing—flexible tubing, 5/16 inch ID, for sealing butt-to-butt joints.

(v) Laboratory tubing—air tight flexible tubing 5/16 inch ID, attached to the outlet end of the drying tubes to equalize collection system pressure.

(vi) Clamps—hosecock, openside, for pinching off flexible tubing.

(c) *Weighing equipment.* The balance and weights used shall be capable of determining the net weight of the activated carbon trap within an accuracy of ±75 mg.

(d) *Temperature measuring equipment.* (1) Temperature recorder—multichannel, variable speed, potentiometric, or substantially equivalent, recorder with a temperature range of 50° F. to 100° F. and capable of either simultaneous or sequential recording of the ambient air and fuel temperatures within an accuracy of ±1° F.

(2) Fuel tank thermocouples—iron-constantan (type J) construction.

(3) Other types of temperature sensing systems may be provided by the manufacturer if they record the information specified in subparagraph (1) of this paragraph with the required accuracy and if they are self-contained. Type J thermocouples are required for compatibility with recording instruments used in Federal certification facilities.

(e) *Assembly and use of the activated carbon vapor collection system.* (1) The prepared activated carbon trap, dried to constant weight, cooled to the ambient temperature and sealed with clamped sections of vinyl tubing is carefully weighed to the nearest 20 milligrams and the weight recorded as the "tare weight."

(2) A drying tube is attached to the outlet tube and the clamp released, but not removed. A length of flexible tubing, for pressure equalization, is connected to the other end of the drying tube.

(3) The inlet tube of the adsorption trap and external vent(s) of the fuel system will be connected by minimal lengths of stainless steel or aluminum tubing and short sections of vinyl tub-

ing. Butt-to-butt joints shall be made

§ 85.075-23 Analytical system calibra-

(iii) The converter efficiency should

(5) Measure HC, CO, CO_2, and NO_x concentrations of samples. Care should "transient" exhaust sample bag and the "transient" dilution air sample bag, and and dilute exhaust sample bags from the instrument deflections or recordings

V37-221-NOV15-72 XUM

ing. Butt-to-butt joints shall be made wherever possible and precautions taken against sharp bends in the connection lines, including any manifold systems employed to connect multiple vents to a single trap.

(4) The clamp on the inlet tube of the trap shall be released but not removed. Care shall be exercised to prevent heating the vapor collection trap by radiant or conductive heat from the engine.

(5) Upon completion of the collection sequence, the vinyl tubing sections on each arm of the collection trap shall be clamped tight and the collection system dismantled.

(6) The sealed vapor collection trap shall be weighed carefully to the nearest 20 milligrams. This constitutes the "gross weight," which is appropriately recorded. The difference between the "gross weight" and "tare weight" represents the "net weight" for purposes of calculating the fuel vapor losses.

§ 85.075–22 Information to be recorded.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System or device tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument operator.

(e) Driver or operator.

(f) Vehicle: Make—Vehicle Identification number—Model year—Transmission type—Odometer reading—Engine displacement—Engine family—Idle r.p.m.—Nominal fuel tank capacity and location on vehicle—Number of carburetors—Number of carburetor barrels—Inertia loading—Actual road load HP. at 50 m.p.h. and drive wheel tire pressure.

(g) Dynamometer serial number and indicated road load power absorption at 50 m.p.h.

(h) All pertinent instrument information such as tuning—gain—serial numbers—detector numbers—range.

(i) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(j) Barometric pressure, ambient temperature and humidity and the temperature of the air in front (from 6 to 12 inches from the grill) of the radiator during the test.

(k) Fuel temperatures, as prescribed.

(l) The temperature and pressure of the mixture of exhaust and dilution air entering the positive displacement pump and the pressure increases across the pump. The temperature of the mixture shall be recorded continuously or digitally at a rate often enough to determine temperature variations, or it may be controlled to ±5° F. of the set point of the temperature control system. In the last case only the set point need be recorded.

(m) The number of revolutions of the positive displacement pump accumulated while the test is in progress and exhaust flow samples are being collected.

(n) The humidity of the dilution air.

§ 85.075–23 Analytical system calibration and sample handling.

(a) Calibrate the analytical assembly at least once every 30 days. Use the same flow rate as when analyzing samples.

(1) Adjust analyzers to optimize performance.

(2) Zero the hydrocarbon analyzer with zero grade air and the carbon monoxide, carbon dioxide, and oxides of nitrogen analyzers with zero grade nitrogen. The allowable zero gas impurity concentrations should not exceed 1 p.p.m. equivalent carbon response, 1 p.p.m. carbon monoxide, 300 p.p.m. (0.03 mole percent) carbon dioxide, and 0.1 p.p.m. nitric oxide.

(3) Set the CO and CO_2 analyzer gains to give the desired ranges. Select the desired attenuation scale of the HC analyzer and set the sample capillary flow rate, by adjusting the back pressure regulator, to give the desired range. Select the desired scale of the NO_x analyzer and adjust the phototube high voltage supply or the amplifier gain to give the desired range.

(4) Calibrate the HC analyzer with propane (air diluent) gases having nominal concentrations equal to 50 and 100 percent of full scale. Calibrate the CO analyzer with carbon monoxide (nitrogen diluent) gases and the CO_2 analyzer with carbon dioxide (nitrogen diluent) gases having nominal concentrations equal to 10, 25, 40, 50, 60, 70, 85, and 100 percent of full scale. Calibrate the NO_x analyzer with nitric oxide (nitrogen diluent) gases having nominal concentrations equal to 50 and 100 percent of full scale. The actual concentrations should be known to within ±2 percent of the true values.

(5) Compare values obtained on the CO and CO_2 analyzers with previous calibration curves. Any significant change reflects some problem in the system. Locate and correct problem, and recalibrate. Use best judgment in selecting curves for data reduction.

(6) Check the NO_x to NO converter efficiency by the following procedure:

(i) Fill a new (not previously used to collect exhaust gas samples) sample bag with air (or oxygen) and NO span gas in proportions which result in a mix in the operating range of the analyzer. Provide enough oxygen for substantial conversion of NO to NO_2.

(ii) Knead bag and immediately connect the bag to the sample inlet and alternately measure the NO and NO_x concentration at 1-minute intervals by alternately passing the sample through the converter and the bypass (close valves N6 and N10 to minimize pump down rate of bag). After several minutes of operation, the recording of NO and NO_x will resemble Figure A75–7 if the converter is efficient. Even though the amount of NO_2 increases with time, the total NO_x ($NO+NO_2$) remains constant. A decay of NO_x with time indicates the converter is not essentially 100 percent efficient and the cause should be determined before the instrument is used.

(iii) The converter efficiency should be checked at least once weekly and preferably once daily.

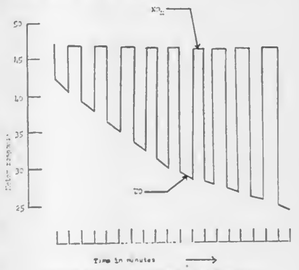

FIGURE A75–7.—Converter efficiency check response.

(7) Check the efficiency of the sample conditioning system by the following procedure:

(i) Zero and span the CO instrument on its most sensitive scale.

(ii) Recheck zero.

(iii) Bubble CO_2 span gas through water and then through the sample conditioning system into the CO instrument. If the CO instrument shows no response to the wet CO_2 the columns are in good condition.

(iv) If the CO instrument responds to wet CO_2, replace columns as necessary to bring response back to zero.

(v) The conditioning system efficiency should be checked daily.

(b) HC, CO, CO_2, and NO_x measurements: Allow a minimum of 20 minutes warmup for the HC analyzer and 2 hours for the CO, CO_2, and NO_x analyzers. (Power is normally left on infrared and chemiluminescence analyzers; but when not in use, the chopper motors of the infrared analyzers are turned off and the phototube high voltage supply of the chemiluminescence analyzer is placed in the standby position.) The following sequence of operations should be performed in conjunction with each series of measurements:

(1) Zero the analyzers. Obtain a stable zero on each amplifier meter and recorder. Recheck after tests.

(2) Introduce span gases and set the CO and CO_2 analyzer gains, the HC analyzer sample capillary flow rate and the NO_x analyzer high voltage supply or amplifier gain to match the calibration curves. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test samples. Span gases should have concentrations equal to approximately 80 percent of full scale. If gain has shifted significantly on the CO or CO_2 analyzers, check tuning. If necessary, check calibration. Recheck after test. Show actual concentrations on chart.

(3) Check zeroes; repeat the procedure in subparagraphs (1) and (2) of this paragraph if required.

(4) Check flow rates and pressures.

(5) Measure HC, CO, CO_2, and NO_x concentrations of samples. Care should be exercised to prevent moisture from condensing in the sample collection bag.

(6) Check zero and span points.

(c) For the purposes of this section, the term "zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

§ 85.075–24 Dynamometer test runs.

(a) The vehicle shall be allowed to stand with the engine turned off for a period of not less than 12 hours before the cold start exhaust emission test, at an ambient temperature as specified in §§ 85.075–12 and 85.075–13. The vehicle shall be stored prior to the emission tests in such a manner that precipitation (e.g. rain or dew) does not occur on the vehicle. The complete dynamometer test consists of a cold start drive of 7.5 miles and simulates a hot start drive of 7.5 miles. The vehicle is allowed to stand on the dynamometer during the 10-minute time period between the cold and hot start tests. The cold start test is divided into two periods. The first period, representing the cold start "transient" phase, terminates at the end of the deceleration which is scheduled to occur at 505 seconds of the driving schedule. The second period, representing the "stabilized" phase, consists of the remainder of the driving schedule including engine shutdown. The hot start test similarly consists of two periods. The first period, representing the hot start "transient" phase, terminates at the same point in the driving schedule as the first phase of the cold start test. The second period of the hot start test, "stabilized" phase, is assumed to be identical to the second period of the cold start test. Therefore, the hot start test terminates after the first period (505 seconds) is run. During the tests the ambient temperature shall be between 68° F. and 86° F.

(b) The following steps shall be taken for each test:

(1) Place drive wheels of vehicle on dynamometer without starting engine.

(2) Open the vehicle engine compartment cover and start the cooling fan.

(3) With the sample solenoid valves in the "dump" position connect evacuated sample collection bags to the two dilute exhaust sample connectors and to the two dilution air sample line connectors.

(4) Start the positive displacement pump (if not already on), the sample pumps, and the temperature recorder. (The heat exchanger of the constant volume sampler should be preheated to its operating temperature before the test begins.)

(5) Adjust the sample flow rates to the desired flow rate (minimum of 10 c.f.h.) and set the revolution counters to zero.

(6) Attach the flexible exhaust tube to the vehicle tailpipe(s).

(7) Simultaneously start the revolution counter for the positive displacement pump, position the sample solenoid valves to direct the sample flow into the "transient" exhaust sample bag and the "transient" dilution air sample bag, and start cranking the engine.

(8) Fifteen seconds after the engine starts, place the transmission in gear.

(9) Twenty seconds after the engine starts, begin the initial vehicle acceleration of the driving schedule.

(10) Operate the vehicle according to the dynamometer driving schedule (§ 85.075–14).

(11) At the end of the deceleration which is scheduled to occur at 505 seconds, simultaneously switch the sample flows from the "transient" bags to the "stabilized" bags, switch off revolution counter No. 1 and start counter No. 2. As soon as possible and in no case longer than 20 minutes after the end of this portion of the test disconnect the "transient" exhaust and dilution air sample bags, transfer them to the analytical system and process the samples according to § 85.075–23.

(12) Immediately after the end of the sample period turn off the cooling fan and close the engine compartment cover.

(13) Five seconds after the engine stops running, simultaneously turn off revolution counter No. 2 and position the sample solenoid valves to the "dump" position. As soon as possible and in no case longer than 20 minutes after the end of this portion of the test disconnect the "stabilized" exhaust and dilution air sample bags, transfer them to the analytical system and process the samples according to § 85.075–23.

(14) Immediately after the end of the sample period, disconnect the exhaust tube from the tailpipe(s), turn off the cooling fan and close the engine compartment cover.

(15) Turn off the positive displacement pump.

(16) Repeat the steps in subparagraphs (2) through (10) of this paragraph for the hot start test except only one evacuated sample bag is required for sampling exhaust gas and one for dilution air. The step in subparagraph (7) of this paragraph shall begin between 9 and 11 minutes after the end of the sample period for the cold start test.

(17) At the end of the deceleration which is scheduled to occur at 505 seconds, simultaneously turn off the No. 1 revolution counter and position the sample solenoid valve to the "dump" position. (Engine shutdown is not part of the hot start test sample period.)

(18) As soon as possible and in no case longer than 20 minutes after the end of this portion of the test disconnect the hot start "transient" exhaust and dilution air sample bags, transfer them to the analytical system and process the samples according to § 85.075–23.

(19) Disconnect the exhaust tube from the vehicle tailpipe(s) and remove vehicle from dynamometer.

(20) The positive displacement pump may be turned off, if desired.

§ 85.075–25 Chart reading.

(a) Determine the HC, CO, CO_2 and NO_x concentrations of the dilution air and dilute exhaust sample bags from the instrument deflections or recordings making use of appropriate calibration charts.

(b) Determine the average dilute exhaust mixture temperatures from the temperature recorder trace if a recorder is used.

§ 85.075–26 Calculations (exhaust emissions).

The final reported test results shall be computed by use of the following formulae:

(a) For light duty vehicles:

$$Y_{wm} = (0.43\,Y_{ct} + 0.57\,Y_{ht} + Y_s)/7.5$$

where:

Y_{wm} = Weighted mass emissions of each pollutant, i.e. HC, CO, or NO_x, in grams per vehicle mile.

Y_{ct} = Mass emissions as calculated from the "transient" phase of the cold start test, in grams per test phase.

Y_{ht} = Mass emissions as calculated from the "transient" phase of the hot start test, in grams per test phase.

Y_s = Mass emissions as calculated from the "stabilized" phase of the cold start test, in grams per test phase.

(b) The mass of each pollutant for each phase of both the cold start test and the hot start test is determined from the following:

(1) Hydrocarbon Mass:

$$HC_{mass} = V_{mix} \times \text{Density}_{HC} \times \frac{HC_{conc}}{1{,}000{,}000}$$

(2) Oxides of nitrogen Mass:

$$NO_{x_{mass}} = V_{mix} \times \text{Density}_{NO_x} \times \frac{NO_{x_{conc}}}{1{,}000{,}000} \times K_H$$

(3) Carbon monoxide Mass:

$$CO_{mass} = V_{mix} \times \text{Density}_{CO} \times \frac{CO_{conc}}{1{,}000{,}000}$$

(c) Meaning of symbols:

HC_{mass} = Hydrocarbon emissions, in grams per test phase.

Density_{HC} = Density of hydrocarbons in the exhaust gas, assuming an average carbon to hydrogen ratio of 1:1.85, in grams per cubic foot at 68° F. and 760 mm. Hg pressure (16.33 gm./cu. ft).

HC_{conc} = Hydrocarbon concentration of the dilute exhaust sample corrected for background, in p.p.m. carbon equivalent, i.e. equivalent propane × 3.

$$HC_{conc} = HC_e - HC_d(1 - 1/DF)$$

where:

HC_e = Hydrocarbon concentrations of the dilute exhaust sample as measured, in p.p.m. carbon equivalent.

HC_d = Hydrocarbon concentration of the dilution air as measured in p.p.m. carbon equivalent.

$NO_{x_{mass}}$ = Oxides of nitrogen emissions, in grams per test phase.

Density_{NO_x} = Density of oxides of nitrogen in the exhaust gas, assuming they are in the form of nitrogen dioxide, in grams per cubic foot at 68° F. and 760 mm. Hg pressure (54.16 gm./cu. ft.).

$NO_{x_{conc}}$ = Oxides of nitrogen concentration of the dilute exhaust sample corrected for background, in p.p.m.

$$NO_{x_{conc}} = NO_{x_e} - NO_{x_d}(1 - /vDF)$$

where:

(d) Example calculation of mass emission values:

mm. Hg; P_1=70 mm. Hg; T_p=570°R; HC_e=105.8 p.p.m. carbon equivalent;

less than one, that deterioration factor shall be one for the purposes of this

(4) If sufficient durability data is not available, at the time of any emission

trator finds that the request raises a substantial factual issue, he shall provide

where:

NO_{x_r} = Oxides of nitrogen concentration of the dilute exhaust sample as measured, in p.p.m.

NO_{x_d} = Oxides of nitrogen concentration of the dilution air as measured, in p.p.m.

CO_{mass} = Carbon monoxide emissions, in grams per test phase.

Density$_{CO}$ = Density of carbon monoxide in grams per cubic foot at 68° F. and 760 mm. Hg pressure (32.97 gm./cu. ft.).

CO_{conc} = Carbon monoxide concentration of the dilute exhaust sample corrected for background, water vapor and CO_2 extraction, in p.p.m.

$$CO_{conc} = CO_r - CO_d(1 - 1/DF)$$

where:

CO_r = Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in p.p.m. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$$CO_r = (1 - 0.01925CO_{f_r} - 0.00323R)\,CO_m$$

where:

CO_m = Carbon monoxide concentration of the dilute exhaust sample as measured in p.p.m.

CO_{f_r} = Carbon dioxide concentration of the dilute exhaust sample, in mole percent.

R = Relative humidity of the dilution air, in percent.

CO_d = Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in p.p.m.

$$CO_d = (1 - 0.000323R)\,CO_{d_m}$$

where:

CO_{d_m} = Carbon monoxide concentration of the dilution air sample as measured, in p.p.m.

$$DF = \frac{13.4}{CO_{f_r} + (HC_r + CO_r) \times 10^{-4}}$$

V_{mix} = Total dilute exhaust volume in cubic feet per test phase corrected to standard conditions (528°R and 760 mm. Hg).

$$V_{mix} = V_s \times N \frac{(P_B - P_1)\,(528°R)}{(760\text{ mm. }Hg)\,(T_p)}$$

where:

V_s = Volume of gas pumped by the positive displacement pump, in cubic feet per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test phase while samples are being collected.

P_B = Barometric pressure in mm. Hg.

P_1 = Pressure depression below atmosphere measured at the inlet to the positive displacement pump.

T_p = Average temperature of dilute exhaust entering positive displacement pump during test while samples are being collected, in degrees Rankine.

K_H = Humidity correction factor.

$$K_H = \frac{1}{1 - 0.0047\,(H - 75)}$$

where:

H = Absolute humidity in grains of water per pound of dry air.

$$H = \frac{(43.478)\,R_a \times P_d}{P_B - P_d \times R_a/100)}$$

R_a = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm. Hg at the ambient dry bulb temperature.

(d) Example calculation of mass emission values:

(1) For the "transient" phase of the cold start test assume V_s=0.29344 cu. ft. per revolution; N=10,485; R=48.0%; R_a=48.2%; P_B=762 mm. Hg; P_d=22.225 mm. Hg; P_1=70 mm. Hg; T_p=570°R; HC_r=105.8 p.p.m. carbon equivalent; NO_{x_r}=11.2 p.p.m.; CO_m=306.6 p.p.m.; CO_{f_r}=1.43%; HC_d=12.1 p.p.m.; NO_{x_d}=0.8 p.p.m.; CO_{d_m}=15.3 p.p.m. Then:

$$V_{mix} = \frac{(0.29344)\,(10{,}485)\,(762 - 70)\,(528)}{(760)\,(570)} = 2595.0 \text{ cu. ft. per test phase.}$$

$$H = \frac{(43.478)\,(48.2)\,(22.225)}{762 - (22.225 \times 48.2/100)}$$

$$K_H = \frac{1}{1 - 0.0047\,(62 - 75)} = 0.9424.$$

$$CO_r = (1 - 0.01925\,(1.43) - 0.000323\,(48))\,306.0 = 293.4 \text{ p.p.m.}$$

$$CO_d = (1 - 0.000323\,(48))\,15.3 = 15.1 \text{ p.p.m.}$$

$$DF = \frac{13.4}{1.43 + (105.8 + 293.4) \times 10^{-4}} = 9.116.$$

$$HC_{conc} = 105.8 - 12.1\,(1 - 1/9.116) = 95.03.$$

$$HC_{mass} = (2595)\,(16.33)\,(95.03/1{,}000{,}000) = 4.027 \text{ grams per test phase.}$$

$$NO_{x_{conc}} = 11.2 - 0.8\,(1 - 1/9.116) = 10.49.$$

$$NO_{x_{mass}} = (2595)\,(54.16)\,(10.49/1{,}000{,}000)\,(0.9424) = 1.389 \text{ grams per test phase.}$$

$$CO_{conc} = 293.4 - 15.1\,(1 - 1/9.116) = 280.$$

$$CO_{mass} = (2595)\,(32.97)\,(280/1{,}000{,}000) = 23.96 \text{ grams per test phase.}$$

(2) For the "stabilized" portion of the cold start test assume that similar calculations resulted in HC_{mass}=0.62 grams per test phase; $NO_{x_{mass}}$=1.27 grams per test phase; and CO_{mass}=5.98 grams per test phase.

(3) For the "transient" portion of the hot start test assume that similar calculations resulted in HC_{mass}=0.51 grams per test phase; $NO_{x_{mass}}$=1.38 grams per test phase; and CO_{mass}=5.01 grams per test phase.

(4) For a 1975 light duty vehicle:

$$HC_{wm} = ((0.43)\,(4.027) + (0.57)\,(0.51) + 0.62)/7.5 = 0.352 \text{ gram per vehicle mile.}$$

$$NO_{x_{wm}} = ((0.43)\,(1.389) + (0.57)\,(1.38) + 1.27)/7.5 = 0.354 \text{ gram per vehicle mile.}$$

$$CO_{wm} = ((0.43)\,(23.96) + (0.57)\,(5.01) + 5.98)/7.5 = 2.55 \text{ grams per vehicle mile.}$$

§ 85.075–27 Calculations (fuel evaporative emissions).

The net weights of the individual collection traps employed in § 85.075–13 shall be added together to determine compliance with the fuel evaporative emission standard.

§ 85.075–28 Compliance with emission standards.

(a) The exhaust and fuel evaporative emission standards in § 85.075–1 apply to the emissions of vehicles for their useful life.

(b) Since emission control efficiency decreases with mileage accumulated on the vehicle, the emission level of a vehicle which has accumulated 50,000 miles will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance of a new light duty motor vehicle with exhaust and fuel evaporative emission standards is as follows:

(1) Separate emission deterioration factors shall be determined from the emissions results of the durability data vehicles for each engine-system combination. A separate factor shall be established for the combination for exhaust *HC*, exhaust *CO*, exhaust NO_x, and fuel evaporative HC.

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*a*) All emission data from the tests required under § 85.075–7(b), except the zero mile tests. This shall include the official test results, as determined in § 85.075–29, for all tests conducted on all durability vehicles of the combination selected under § 85.075–5(c) (including all vehicles elected to be operated by the manufacturer under § 85.075–5(c)(3)). Where the Administrator has agreed to a mileage less than 50,000 miles in accordance with § 85.075–7(b), the data for mileages greater than that actually run will be determined by extrapolating the test data generated at lesser mileages.

(*b*) All emission data from the tests conducted before and after the maintenance provided in § 85.075–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the mileage on the system, rounded to the nearest mile, and the best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 4,000- and 50,000-mile points on this line must be within the standards provided in § 85.075–1 or the data will not be acceptable for use in calculation of a deterioration factor.

(iii) An exhaust emission deterioration factor shall be calculated for each combination as follows:

$$\text{factor} = \frac{\text{exhaust emissions interpolated to 50,000 miles}}{\text{exhaust emissions interpolated to 4,000 miles}}$$

(iv) An evaporative emission deterioration factor shall be calculated for each combination by subtracting the evaporative emissions interpolated to 4,000 miles from the evaporative emissions interpolated to 50,000 miles.

(2) (i) The exhaust emission test results for each emission data vehicle shall be multiplied by the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in subparagraph (1)(iii) of this paragraph is less than one, that deterioration factor shall be one for the purposes of this subparagraph.

(ii) The evaporative emission test results for each combination shall be adjusted by addition of the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in subparagraph (1)(iv) of this paragraph is less than zero, that deterioration factor shall be zero for the purposes of this subparagraph.

(3) The emissions to compare with the standard shall be the adjusted emissions of subparagraph (2) (i) and (ii) of this paragraph for each emission data vehicle.

(4) Every test vehicle of an engine family must comply with all applicable standards, as determined in subparagraph (3) of this paragraph, before any vehicle in that family may be certified.

§ 85.075–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test vehicles be submited to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b)(1) Whenever the Administrator conducts a test on a test vehicle, the results of that test shall comprise the official data for the vehicle at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause a vehicle to fail due to excessive 4,000-mile or excessive deterioration, then the following procedure shall be observed:

(i) The manufacturer may request a retest. Before the retest, the vehicle may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.075–6. All work on the vehicle shall be done at such location and under such conditions as the Administrator may prescribe.

(ii) The vehicle will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test vehicle would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the vehicle from the test premises.

§ 85.075–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.075–29, the Administrator determines that a test vehicle(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such vehicle(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b)(1) The Administrator will determine wther a vehicle covered by the application complies with applicable standards by observing the following relationships:

(i) A test vehicle selected under § 85.075–5(b)(2) or (4), shall represent all vehicles in the same engine family of the same engine displacement-exhaust emission control system-evaporative emission control system combination.

(ii) A test vehicle selected under § 85.075–5(b)(3), shall represent all vehicles in the same engine family of the same engine displacement-exhaust emission control system-transmission type-fuel system combination.

(iii) A test vehicle selected under § 85.075–5(c)(1), shall represent all vehicles of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.075–29, the Administrator determines that one or more test vehicles of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination, and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.005 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test vehicle(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.005, or

(ii) Delete from the application for certification the vehicles represented by the failing test vehicle. (Vehicles so deleted may be included in a later request for certification under § 85.075–32.) The Administrator will then select in place of each failing vehicle an alternate vehicle chosen in accordance with selection criteria employed in selecting the vehicle that failed, or

(iii) Modify the test vehicle and demonstrate by testing that it meets applicable standards. Another vehicle which is in all material respects the same as the first vehicle, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.075–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all vehicles for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test vehicles and the computation of test results will be determined separately for each application.

§ 85.075–32 Addition of a vehicle after certification.

(a) If a manufacturer proposes to add to his product line a vehicle of the same engine-system combination as vehicles previously certified but which was not described in the application for certification when the test vehicle(s) representing other vehicles of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.075–34. This notification shall include a full description of the vehicle to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test vehicle(s) representing the vehicle to be added which would have been required if the vehicle had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 85.075–29, the Administrator determines that the test vehicle(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test vehicle(s)

XUM

does not meet applicable standards, he

§ 85.075–35 Labeling.

tions to determine whether they are reasonable and necessary to assure the

(7) "System" includes any motor vehicle engine modification which controls or causes the reduction of substances

Max.—Maximum.
Min.—Minimum.
N_x—Nitrogen.

does not meet applicable standards, he will proceed under § 85.075–30(b).

§ 85.075–33 Changes to a vehicle covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production vehicles in respect to any of the parameters listed in § 85.075–5(a)(3), giving a full description of the chnage. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.075–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator many require or conduct, the Administrator will determine whether the vehicle, as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified vehicles, he will notify the manufacturer in writing. Except as provided in § 85.075–34 the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified vehicles would not be covered by the certificate then in effect, then the modified vehicles shall be treated as additions to the product line subject to § 85.075–32.

§ 85.075–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of a vehicle under § 85.075–32 or a change in a vehicle under § 85.075–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce vehicles as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.075–32 (b) and (c), or § 85.075–33 (b) and (c) as appropriate.

(d) Election to produce vehicles under this section will be deemed to be a consent to recall all vehicles which the Administrator determined under § 85.075–32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.075–35 Labeling.

(a) (1) The manufacturer of any light duty motor vehicle subject to the standards prescribed in § 85.075–1 shall, at the time of manufacture, affix a permanent, legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles available for sale to the public and covered by a certificate of conformity under § 85.075–30(a).

(2) A plastic or metal label shall be welded, riveted, or otherwise permanently attached in a readily visible position in the engine compartment.

(3) The label shall be affixed by the vehicle manufacturer, who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label, and shall not be affixed to any equipment which is easily detached from such vehicle.

(4) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(i) The label heading: Vehicle Emission Control Information;

(ii) Full corporate name and trademark of manufacturer;

(iii) Engine displacement (in cubic inches) and engine family identification:

(iv) Engine tuneup specifications and adjustments, as recommended by the manufacturer, including idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g. idle CO, idle air-fuel ratio, idle speed drop). These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air-conditioner), if any, should be in operation;

(v) The statement: "This Vehicle Conforms to U.S.E.P.A. Regulations Applicable to 1975 Model Year New Motor Vehicles."

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle or engine conforms to any applicable State emission standards for new motor vehicles or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle.

§ 85.075–36 Submission of vehicle identification numbers.

(a) The manufacturer of any light duty motor vehicle covered by a certificate of conformity under § 85.075–30(a) shall, not later than 60 days after its manufacture, submit to the Administrator the vehicle identification number of such vehicle: *Provided*, That this requirement shall not apply with respect to any vehicle manufactured within any State, as defined in section 302(d) of the Act.

(b) The requirements of this section may be waived with respect to any manufacturer who provides information satisfactory to the Administrator which will enable the Administrator to identify those vehicles which are covered by a certificate of conformity.

§ 85.075–37 Production vehicles.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production vehicles selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These vehicles shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require.

(b) Any manufacturer obtaining certification under this subpart shall notify the Administrator, on a quarterly basis, of the number of vehicles of each engine family-engine displacement-exhaust emission control system-fuel system-transmission type-inertia weight class combination produced for sale in the United States during the preceding quarter. A manufacturer may elect to provide this information every 60 days instead or quarterly, to combine it with the notification required under § 85.075–36.

(c) All light duty vehicles covered by a certificate of conformity under § 85.075–30(a) shall be adjusted by the manufacturer to the ignition timing specification detailed in § 85.072–35(a)(4)(iv).

§ 85.075–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new motor vehicle subject to the standards prescribed in § 85.075–1, written instructions for the maintenance and use of the vehicle by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those vehicle and engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.075–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.075–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.075–38(a). The Administrator will review such instruc-

tions to determine whether they are reasonable and necessary to assure the proper functioning of the vehicle's emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

§ 85.076–1 Emission standards for 1976 model year vehicles.

With the exception of the nitrogen oxides exhaust emission standard, the standards and test procedures set forth in § 85.075 remain applicable for the 1976 model year. Exhaust emissions from 1976 model year vehicles shall not exceed:

(a) *Hydrocarbons.* 0.41 gram per vehicle mile.

(b) *Carbon monoxide.* 3.4 grams per vehicle mile.

(c) *Oxides of nitrogen.* 0.40 gram per vehicle mile.

Subparts B–G [Reserved]

Subpart H—Emission Regulations for New Gasoline-Fueled Heavy Duty Engines

§ 85.701 General applicability.

The provisions of this subpart are applicable to new gasoline-fueled heavy duty engines beginning with the 1973 model year.

§ 85.702 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part A of Title II of the Clean Air Act, 42 U.S.C. 1857f–1 through f–7, as amended by Public Law 91–604.

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year: *Provided*, That if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

(4) "Gross vehicle weight" means the manufacturer's gross weight rating for the individual vehicle.

(5) "Heavy duty vehicle" means any motor vehicle either designed primarily for transportation of property and rated at more than 6,000 pounds GVW or designed primarily for transportation of persons and having a capacity of more than 12 persons.

(6) "Heavy duty engine" means any engine which the engine manufacturer could reasonably expect to be used for motive power in a heavy duty vehicle.

(7) "System" includes any motor vehicle engine modification which controls or causes the reduction of substances emitted from motor vehicle engines.

(8) "Engine family" means the basic classification unit of a manufacturer's product line used for the purpose of test fleet selection and determined in accordance with § 85.773–5(a).

(9) "Engine-system combination" means an engine family-exhaust emission control system-fuel evaporative emission control system (where applicable) combination.

(10) "Fuel system" means the combination of fuel tank, fuel pump, fuel lines, and carburetor, or fuel injection components, and includes all fuel system vents and fuel evaporative emission control systems.

(11) "Crankcase emissions" means airborne substances emitted to the atmosphere from any portion of the engine crankcase ventilation or lubrication systems.

(12) "Exhaust emissions" means substances emitted to the atmosphere from any opening downstream from the exhaust port of a motor vehicle engine.

(13) Zero (0) hours means that point after normal assembly line operations and adjustments and before one additional operating hour has been accumulated.

(14) "Calibrating gas" means a gas of known concentration which is used to establish the response curve of an analyzer.

(15) "Span gas" means a gas of known concentration which is used routinely to set the output level of an analyzer.

(16) "Oxides of Nitrogen" means the sum of the nitric oxide and nitrogen dioxide contained in a gas sample as if the nitric oxide were in the form of nitrogen dioxide.

(17) "Useful life" means a period of use of 5 years or of 50,000 miles of vehicle operation or 1,500 hours of engine operation (or an equivalent period of 1,500 hours of dynamometer operation), whichever first occurs.

§ 85.703 Abbreviations.

The abbreviations used in this subpart have the following meanings in both capital and lowercase:

ASTM—American Society for Testing and Materials.
BHP—Brake horsepower.
BSCO—Brake specific carbon monoxide.
BSHC—Brake specific hydrocarbons.
BSNO$_x$—Brake specific oxides of nitrogen.
C.—Centigrade.
C.f.h.—Cubic feet per hour.
CO_2—Carbon dioxide.
CO—Carbon monoxide.
Conc.—Concentration.
CT—Closed Throttle
C.f.m.—Cubic feet per minute.
EP—End point.
F.—Fahrenheit.
FL—Full load.
Gal.—U.S. Gallon(s).
Gm.—Gram(s)

§ 85.704 General standards; Increase in emissions; unsafe conditions.

(a) (1) Every new motor vehicle engine manufactured for sale, sold, offered for sale, introduced or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to § 85.773–2 through § 85.773–4 and § 85.773–29 through § 85.773–34 of this subpart.

(2) No heavy duty vehicle manufacturer shall take any of the actions specified in section 203(a)(1) of the Act with respect to any gasoline-fueled heavy duty vehicle which uses an engine which has not been certified as meeting applicable standards. Such manufacturer shall provide to the Administrator prior to the beginning of each model year a statement signed by an authorized representative which includes the following information:

(i) A description of the vehicles which will be produced subject to this section;

(ii) Identification of the engines used in the vehicles;

(iii) Projected sales data on each vehicle engine combination;

(iv) A statement that the engines will not be modified by the vehicle manufacturer or a detailed specification of any changes which will be made. Changes made solely for the purpose of mounting an engine in a vehicle need not be included.

(b) (1) Any system installed on or incorporated in a new motor vehicle engine to enable such vehicle to conform to standards imposed by this subpart:

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such engine without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicle engines subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with good engineering practice to ascertain that such

test engines will meet the requirements

(4) Hearings shall be reported ver-

maintenance, or testing of such engine relevant to the control of crankcase or

§ 85.773–2 Application for certification.

applicable test procedures, that they meet the requirement of such tests, and that,

selected under subparagraph (1) of this paragraph.

XUM V37-221 NOV 15 72 XUM

test engines will meet the requirements of this section for the useful life of the engine.

§ 85.705 Hearings on certification.

(a) (1) After granting a request for a hearing under § 85.773–30, the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing have not been fixed by the Administrator under § 85.773–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(b) (1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under § 85.773–30, together with any accompanying material, the request for a hearing and the supporting data submitted therewith and all documents relating to the request for certification, including the application for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The appeal file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d) (1) The Presiding Officer upon the request of any party, or in his discretion, may arrange for a prehearing conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e) (1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial, and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title 18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall, upon a showing satisfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f) (1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 85.706 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall establish and maintain the following adequately organized and indexed records:

(1) Identification and description of all engines for which testing is required under this subpart.

(2) A description of all emission control systems which are installed on or incorporated in each engine.

(3) A description of the procedures used to test such engines.

(4) Test data on each emission data engine which will show its emissions at zero and 125 hours.

(5) Test data on each durability engine which will show the performance of the systems installed on or incorporated in the engine during extended operation, as well as a record of all pertinent maintenance performed on the engine.

(b) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such engine relevant to the control of crankcase or exhaust emissions, issued by the manufacturer for use by other manufacturers, assembly plants, distributors, dealers, and ultimate purchasers: *Provided*, That any material not translated into the English language need not be submitted unless specifically requested by the Administrator.

(c) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall permit officers or employees duly designated by the Administrator, upon presenting appropriate credentials and a written notice to the manufacturer:

(1) To enter, at reasonable times, any premises used during the certification procedure for purposes of monitoring tests and service accumulation procedures, observing maintenance procedures, and verifying correlation or calibration of test equipment, or

(2) To inspect, at reasonable times, records, files, and papers compiled by such manufacturer in accordance with paragraph (a) of this section.

A separate notice shall be given for each such inspection, but a separate notice shall not be required for each entry made during the period covered by the inspection. Each such inspection shall be commenced and completed with reasonable promptness.

§ 85.773–1 Emission standards for 1973 model year engines.

(a) (1) Exhaust emissions from new gasoline-fueled heavy duty engines shall not exceed:

(i) *Hydrocarbons*—275 p.p.m.

(ii) *Carbon monoxide*—1.5 percent by volume.

(2) The standards set forth in paragraph (a)(1) of this section refer to a composite sample representing the operating cycles set forth in § 85.773–9 through § 85.773–18 and measured in accordance with those procedures.

(b) [Reserved]

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new motor vehicle engine subject to this subpart.

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in § 85.773–9 through § 85.773–18 to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section. If, pursuant to § 85.773–30(a), the Administrator issues a certificate of conformity for the class or classes of motor vehicle engines represented by such test engines, any new motor vehicle engine which is in all material respects of substantially the same construction as such test engines shall be deemed to be in conformity with the requirements of paragraphs (a) and (c) of this section.

§ 85.773–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle engine shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the engines covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the engines for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed service accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the engines covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.773–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the service accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.773–5.

§ 85.773–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such engines tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the engine for extended operation, as well as a record of all pertinent maintenance performed on the test engines.

(b) Emission data on such engines tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 hours and 125 hours of operations.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.773–1 and the data derived from such tests.

(d) A statement that the test engines with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any engine tested, the engine shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.773–5 Test engines.

(a) The engines covered by the application for certification will be divided into engine families based upon the criteria outlined in § 85.073–5(a).

(b) Emission data engines:

(1) Engines will be chosen to be run for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Engines of each engine family will be divided into engine displacement-exhaust emission control system combinations. A projected sales volume will be established for each combination for the model year for which certification is sought. One engine of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of engines of that family is represented, or until a maximum of four engines is selected. The engines selected for each combination will be specified by the Administrator as to fuel system.

(3) The Administrator may select a maximum of two additional engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in that engine family. In selecting these engines, the Administrator will consider such features as the exhaust emission control system, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, and compression ratio.

(4) If the engines selected in accordance with subparagraphs (2) and (3) of this paragraph do not represent each engine-system combination, then one engine of each engine-system combination not represented shall be selected by the Administrator. The engine selected shall be of the displacement with the largest projected sales volume of engines with the exhaust emission control system in the family and will be designated by the Administrator as to fuel system.

(c) Durability data engines:

(1) A durability data engine will be selected by the Administrator to represent each engine-system combination. The engine selected shall be of the displacement with the largest projected sales volume of engines with that exhaust emission control system in that engine family and will be designated by the Administrator as to fuel system.

(2) If an exhaust emission control system is used in only one engine family, an additional engine using that control system in that family will be selected so that the durability data fleet shall contain at least two engines with each control system. The additional engine will be selected in the same manner as engines selected under subparagraph (1) of this paragraph.

(3) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same engine displacement and fuel system as the engine selected for that combination in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to run additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(d) Any manufacturer whose projected sales of new motor vehicle engines subject to this subpart for the 1973 model year is less than 700 engines may request a reduction in the number of test engines determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines will meet the objectives of this procedure.

(e) In lieu of testing an emission data or durability data engine selected under paragraph (b) or (c) of this section and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit data on a similar engine for which certification has previously been obtained.

§ 85.773–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability engines may be performed only under the following provisions:

(i) Two major engine tuneups to manufacturer's specifications may be performed at 500 and 1,000 hours (±8 hours) of scheduled dynamometer operation with the following exception: On engines with a displacement of 200 cubic inches or less, a major engine tuneup may be performed at 375, 750, and 1,125 hours (±8 hours) of scheduled dynamometer operation. A major engine tuneup shall be restricted to the following:

(*a*) Replace spark plugs.

(*b*) Inspect ignition wiring and replace as required.

(*c*) Replace distributor breaker points and condenser as required.

(*d*) Lubricate distributor cam.

(*e*) Check distributor advance and breaker point dwell angle and adjust as required.

(*f*) Check automatic choke for free operation and correct as required.

(*g*) Adjust carburetor idle speed and mixture.

(*h*) Adjust drive belt tension on engine accessories.

(*i*) Adjust valve lash if required.

(*j*) Check exhaust heat control valve for free operation.

(*k*) Check engine bolt torque and tighten as required.

(ii) Spark plugs may be changed if a persistent misfire is detected.

(iii) Normal services (engine oil change, and oil filter, fuel filter and air filter servicing) will be allowed at manufacturer's recommended intervals.

(iv) The crankcase emission control system may be serviced at 375-hour in-

tervals (±8 hours) of dynamometer operation.

hours or the appropriate multiple of 125 hours, respectively.

(d) All emission control systems installed on or incorporated in a new motor

Sequence No.	Mode	Manifold vacuum	Time in Mode-Secs.	Cumulative Time-Secs.	Weighting factors

(12) Pumps P1, P2, and P3 for pulling sample from source.

(13) Filters F1, F2, and F3 remove

XUM

V37-221-NOV15-72 XUM

tervals (±8 hours) of dynamometer operation.

(v) Readjustment of the engine choke mechanism or idle settings may be performed only if there is a problem of stalling at idle.

(vi) Leaks in the fuel system, engine lubrication system and cooling system may be repaired.

(vii) Engine idle speed may be adjusted at the 125-hour test point.

(viii) Any other engine or fuel system maintenance or repairs will be allowed only with the advance approval of the Administrator.

(2) Allowable maintenance on emission data engines shall be limited to the adjustment of engine idle speed at the 125-hour test point, except that other maintenance or repairs may be allowed with the advance approval of the Administrator.

(b) Complete emission tests (see § 85.773–10 through § 85.773–18) shall be run before and after any engine maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.773–4.

(c) If the Administrator determines that maintenance or repairs have resulted in a substantial change to the engine-system combination, the engine shall not be used as a durability data engine.

§ 85.773–7 Service accumulation and emission measurements.

The engine dynamometer service accumulation schedule will consist of several operating conditions which give the same percentage of time at various manifold vacuums and the modes as specified in the emission test cycle. The average speed shall be between 1,650 and 1,700 r.p.m. with some operation at 3,200 r.p.m. or governed speed, whichever is lower. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.

(a) Emission data engines: Each emission data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours.

(b) Durability data engines: Each durability data engine shall be operated, with all emission control systems installed and operating, for 1,500 hours. Emission measurements, as prescribed, shall be made at zero hours and at each 125-hour interval.

(c) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(d) The results of each emission test shall be supplied to the Administrator immediately after the test. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.773–4.

(e) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero-hour test data to the Administrator and make the engine available for such testing under § 85.773–29 as the Administrator may require, before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(f) Once a manufacturer begins to operate an emission data or durability data engine, as indicated by compliance with paragraph (e) of this section, he shall continue to run the engine to 125 hours or 1,500 hours, respectively, and the data from the engine will be used in the calculations under § 85.773–19. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

§ 85.773–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.773–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standards set forth in § 85.773–1.

(a) The test consists of prescribed sequences of engine operating conditions to be conducted on an engine dynamometer. The exhaust gases generated during engine operation are sampled continuously for specific component analysis through the analytical train. The test is applicable to engines equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems, or to uncontrolled engines.

(b) The exhaust emission test is designed to determine hydrocarbon and carbon monoxide concentrations during a truck driving pattern in a metropolitan area as simulated on an engine dynamometer. The test consists of two warmup cycles and two hot cycles. The average concentrations for the warmup cycles and the hot cycles are combined to yield the reported values.

(c) When an engine is tested for exhaust emissions or is operated for durability testing on an engine dynamometer the complete engine shall be used with all accessories which might reasonably be expected to influence emissions to the atmosphere installed and functioning.

(d) All emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all test procedures in this subpart.

§ 85.773–10 Gasoline fuel specifications.

(a) Fuel having the following specifications or substantially equivalent specifications approved by the Administrator shall be used in exhaust emission testing. Where the Administrator determines that the engines represented by a test engine will be operated using fuels of a different lead content or octane rating than that prescribed in this paragraph, he may consent in writing to use of a fuel otherwise substantially equivalent to the following specifications but with a different lead content or octane rating.

Item	ASTM designation	Specifications
Octane, Research, min	D 1656	100
Pb, (organic), gm./U.S. gal.	D 526	3.1–3.3
Distillation range	D 86	
IBP, °F		75–95
10 percent point, °F		120–135
50 percent point, °F		200–230
90 percent point, °F		300–325
EP, °F, (max.)		415
Sulfur, wt. percent max	D 1266	0.10
Phosphorus, theory		0.0
RVP, lb	D 323	8.7–9.2
Hydrocarbon composition	D 1319	
Olefins, percent, max		10
Aromatics, percent, max		35
Saturates		Remainder

(b) Fuel having the following specifications, or substantially equivalent specifications approved by the Administrator shall be used in service accumulation. The octane rating of the fuel used shall be in the range recommended by the engine manufacturer. The Reid vapor pressure of the fuel used shall be characteristic of the seasonal motor fuel. Where the Administrator determines that the engines represented by a test engine will be operated using fuels of a different lead content than that prescribed in this paragraph, he may consent in writing to use of a fuel otherwise substantially equivalent to the following specifications but with a different lead content.

Item	ASTM Designation	Regular	Premium
Pb, (organic), gm./U.S.	D 526	2.1–3.2	2.1–3.2
Sulfur, wt. percent	D 1266	0.02–0.10	0.02–0.10
Hydrocarbon composition	D 1319		
Olefins, percent, max		30	15
Aromatics, percent, max		40	40
Saturates		Remainder	Remainder

(c) The specifications of the fuel to be used under paragraph (b) of this section shall be reported in accordance with § 85.773–2(b)(3).

§ 85.773–11 Dynamometer operation cycle and equipment.

(a) (1) The following nine-mode cycle shall be followed in dynamometer operation tests of gasoline-fueled heavy duty engines.

Sequence No.	Mode	Manifold vacuum	Time in Mode-Secs.	Cumulative Time-Secs.	Weighting factors
1	Idle		70	70	0.036
2	Cruise	16′ Hg	23	93	.069
3	PTA	10′ Hg	44	137	.257
4	Cruise	16′ Hg	23	160	.069
5	PTD	19′ Hg	17	177	.047
6	Cruise	16′ Hg	23	200	.069
7	FL	3′ Hg	34	234	.353
8	Cruise	16′ Hg	23	257	.069
9	CT		43	300	.021

(2) The engine dynamometer shall be operated at a constant speed of 2,000 r.p.m.±100 r.p.m. (exception: representative engine speed for a given displacement engine as determined by its application, but not less than 1,800 r.p.m. nor greater than 2,500 r.p.m.).

(3) The idle operating mode shall be carried out at the manufacturer's recommended engine speed. The CT operating mode shall be carried out at the same engine speed as in subparagraph (2) of this paragraph.

(b) The following equipment shall be used for dynamometer tests.

(1) An engine dynamometer capable of maintaining constant speed±100 r.p.m. from full throttle to closed throttle motoring.

(2) A chassis-type exhaust system or substantially equivalent exhaust system, shall be used.

(3) A radiator typical of that used with the engine in a vehicle, or other means of engine cooling which will maintain the engine operating temperatures at approximately the same temperature as would the radiator, shall be used. An auxiliary fixed speed fan may be used to maintain engine cooling during sustained operation on the dynamometer.

§ 85.773–12 Dynamometer procedures.

An initial 5-minute idle, two warmup cycles, and two hot cycles constitute a a complete dynamometer run. Idle modes may be run at the beginning and end of each test, thus eliminating the need to change speed between cycles. One idle mode preceding the first cycle and one following the fourth cycle is sufficient. The results of the first idle shall be used for calculation of the second cycle emissions and the fourth idle results shall be used for calculation of the third cycle emissions.

§ 85.773–13 Sampling and analytical system for measuring exhaust emissions.

(a) *Schematic drawing.* The following (fig. H773–1) is a schematic drawing of the exhaust gas sampling and analytical system which shall be used for testing under the regulations in this subpart.

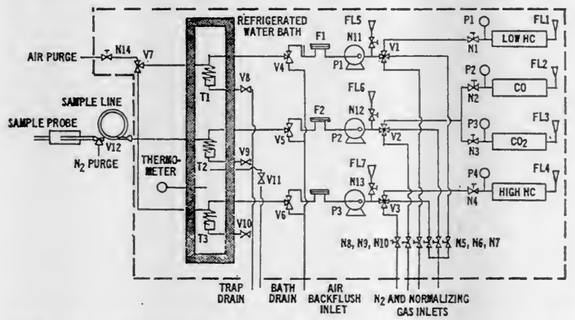

FIGURE H773–1.—Flow schematic of exhaust gas analysis system employed in Federal facilities.

(b) *Component description.* The following components shall be used in sampling and analytical systems for testing under the regulations in this part.

(1) Flowmeters FL1, FL2, FL3, and FL4 indicate the sample flow rate through the analyzers.

(2) Low range hydrocarbon analyzer.

(3) Carbon monoxide analyzer.

(4) Carbon dioxide analyzer.

(5) High range hydrocarbon analyzer.

(6) Pressure gauges P1, P2, and P3 indicate the analyzer sample pressure.

(7) Needle valves N1, N2, N3, and N4 regulate sample flow rate to the analyzers.

(8) Needle valves N5, N6, N7, N8, N9, and N10 regulate the flow rates of N_2 and normalizing gases to the analyzers.

(9) Ball valves V1, V2, and V3 for directing either sample or calibration gases to the analyzers.

(10) Needle valves N11, N12, and N13 regulate the sample flow rate through the bypass network.

(11) Flowmeters FL5, FL6, and FL7 indicate the flow rate through the bypass system.

(12) Pumps P1, P2, and P3 for pulling sample from source.

(13) Filters F1, F2, and F3 remove contaminants from sample prior to analysis.

(14) Ball valves V4, V5, and V6 for directing sample to the analyzer or directing air in the reverse direction as a backflush.

(15) Toggle valves V8, V9, V10, and V11 for draining condensate traps and refrigerated bath.

(16) Traps T1, T2, and T3 for condensing water vapor and cooling exhaust sample.

(17) Ball valve V7 for diverting air to low HC analyzer during periods of high hydrocarbon response.

(18) Needle valve N14 for regulating air flow to low hydrocarbon analyzer during purge conditions.

(19) Thermometer for indicating bath temperature.

(20) Refrigerated water bath for condensing water vapor and cooling exhaust sample.

(21) Sample line from vehicle to analysis system.

(22) Sample probe to extract exhaust gas sample downstream of muffler.

(23) Ball valve V12 for directing N_2 to hydrocarbon analyzers.

(c) *Hang up reduction.* Stringent methods to reduce hang up may be employed. All methods must be approved in advance by the Administrator.

§ 85.773–14 Information to be recorded on charts.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument operator.

(e) Driver or operator.

(f) Engine make—identification number—date of manufacture—number of hours — engine displacement — engine family—idle r.p.m.—number of carburetors—number of carburetor venturis.

(g) All pertinent instrument information such as tuning—gain—serial numbers—detector numbers—range.

(h) Recorder charts: Identify zero, span, exhaust gas sample traces.

(i) Barometric pressure, intake air temperature, and humidity and, as applicable, the temperature of the air in front of the radiator during the test.

(j) A continuous trace of intake manifold vacuum and engine r.p.m., recorded on the same chart with an automatic marker indicating 1-second intervals.

§ 85.773–15 Calibration and instrument checks.

(a) The instrument assembly shall be calibrated at least once every 30 days, using the same flow rate as when sampling exhaust and proceeding as follows:

(1) Tune analyzers.

(2) Zero on nitrogen: Check each cylinder of N_2 for contamination with hydrocarbons. Set the instrument gain to

give the desired range. Normal operating

(3) Calibrate with the following nor-

For each warmup or hot cycle to be

(1) Separate emission deterioration

(b) All emission data from the tests

standards by observing the following relationships:

give the desired range. Normal operating ranges are as follows:

Low-range hydrocarbon analyzer.	0 to 1,000 p.p.m. hexane equivalent.
High-range hydrocarbon analyzer.	0 to 10,000 p.p.m. hexane equivalent.
CO analyzer	0 to 10 percent CO.
CO_2 analyzer	0 to 16 percent CO_2.

Low range HC analyzer	High range HC analyzer	CO and CO_2 analyzers Blend of CO and CO_2 containing:		
Hexane equivalent[1]	*Hexane equivalent*	*Mole percent CO*	Plus	*Mole percent CO_2*
100 p.p.m.	600 p.p.m.	0.5		16.0
200 p.p.m.	1,000 p.p.m.	1.0		15.0
300 p.p.m.	1,500 p.p.m.	2.0		14.0
400 p.p.m.	2,500 p.p.m.	3.0		13.0
600 p.p.m.	4,000 p.p.m.	4.0		12.0
800 p.p.m.	6,000 p.p.m.	6.0		10.0
1,000 p.p.m.	8,000 p.p.m.	8.0		8.0
	10,000 p.p.m.	10.0		6.0

[1] The hexane equivalent of propane, when used as the normalizing gas for calibrating nondispersive infrared analyzers, is prescribed to be 0.52 (Propane Concentration×0.52=Hexane Equivalent Concentration).

Minimum storage temperature of the cylinders shall be 60° F.; minimum use temperature shall be 68° F.

(4) Compare values with previous curves. Any significant change reflects some problem in the system. Locate and correct problem, and recalibrate. Use best judgment in selecting curve for data reduction.

(5) Check response of hydrocarbon analyzer to 100 percent CO_2. If response is greater than 0.5 percent full scale, refill filter cells with 100 percent CO_2 and recheck. Note any remaining response on chart. If response still exceeds 0.5 percent, replace detector.

(6) Check response of hydrocarbon analyzers to nitrogen saturated with water at ambient temperature. Record ambient temperature. If the low-range instrument response exceeds 5 percent of full scale with saturated nitrogen at 75° F., replace the detector. If the high-range response exceeds 0.5 percent of full scale, check detector on low-range instrument, then reject if response exceeds 5 percent of full scale at 75° F.

(b) The following daily instrument check shall be performed, allowing a minimum of 2 hours warmup for infrared analyzers. (Power is normally left on continuously; but, when instruments are not in use, chopper motor is turned off.):

(1) Zero on clean nitrogen introduced at analyzer inlet. Obtain a stable zero on the amplifier meter and recorder. Recheck after test.

(2) Introduce normalizing gas and set gain to match calibration curve. In order to avoid a correction for sample cell pressure, normalize and calibrate at the same flow rates used for exhaust sampling. Normalizing or span gases: (See paragraph (a)(3) of this section for allowable variation.)

Low-range hydrocarbon analyzer.	1,000 p.p.m. hexane equivalent in prepurified N_2.
High-range hydrocarbon analyzer.	10,000 p.p.m. hexane equivalent in prepurified N_2.
CO analyzer	10 percent CO in prepurified N_2.
CO_2 analyzer	12 to 16 percent CO_2 in prepurified N_2.

(3) Calibrate with the following normalizing gases. Flow rates should be set at 10 c.f.h. on the hydrocarbon analyzers and 5 c.f.h. on the carbon monoxide and carbon dioxide analyzers. The concentrations given indicate nominal concentrations, and actual concentrations should be known to within ±2 percent of true value. Prepurified N_2 is used as the diluent.

If gain has shifted significantly, check tuning. If necessary, check calibration. Recheck after test. Record actual concentrations on chart.

(3) Check nitrogen zero, repeat the procedure in subparagraphs (1) and (2) of this paragraph if required.

(4) Check flow rates and pressures.

§ 85.773–16 Dynamometer test run.

(a) The engine shall be allowed to stand with engine turned off for at least 1 hour before the exhaust emission test at an ambient temperature of 60° F. to 86° F. The engine shall be stored prior to the emission tests in such a manner that it is not exposed to precipitation or condensation. During the dynamometer run, the ambient temperature shall be between 68° F. and 86° F.

(b) The following steps shall be taken for each test:

(1) Mount test engine on the engine dynamometer.

(2) Calibrate exhaust emission analyzer assembly.

(3) Start cooling system, if it is to be used.

(4) Start engine and idle at 1,000–1,200 r.p.m. for 5 minutes.

(5) Obtain normal idle speed, record it, and start exhaust sampling.

(6) Run four 9-mode cycles.

(c) Upon completion of the test, purge the sample line with nitrogen to establish a constant hydrocarbon "hangup" level. The hydrocarbon concentration shall drop to 5 percent of scale in 10 seconds, and 3 percent of scale in 3 minutes, or the test is invalid. Check calibration of exhaust emission instruments. A drift in excess of ±2 percent of scale in the calibration of any one of the exhaust emission analyzers will invalidate the test results.

§ 85.773–17 Chart reading.

The recorder response for measuring exhaust gas concentrations always lags the engine's operation because of a variable exhaust system delay and a fixed sample system delay. Therefore, the concentrations for each mode will not be located on the charts at a point corresponding to the exact time of the mode. For each warmup or hot cycle to be evaluated, proceed as follows:

(a) Determine whether the cycle was run in accordance with the specified cycle timing by observing either chart pips, speed trace, manifold vacuum trace, or concentration traces. Deviation by more than 2 seconds from the specified time for the closed throttle mode (sequence 9) or deviation of more than ±0.2" Hg. from the specified mode vacuums during the last 10 seconds of a mode will invalidate the data.

(b) Time correlate the hydrocarbon, carbon monoxide, and carbon dioxide charts. Determine the location on the chart of concentrations corresponding to each mode. Determine and compensate for trace abnormalities.

(c) For all open throttle (3", 10", 16", and 19" Hg.) and idle modes, integrate the last 3 seconds of the HC, CO and CO_2 traces.

(d) The values recorded for the initial idle mode are used for both warmup cycles 1 and 2. The final idle mode values are applied to hot cycles 3 and 4.

(e) Integrate the complete HC, CO, and CO_2 traces during this 43-second closed throttle mode of each cycle.

(f) Direct computer analysis of analyzer output may be utilized provided that the analysis is sufficiently similar to the above procedures to result in comparable data results.

§ 85.773–18 Calculations.

The final reported test results shall be derived through the following steps:

(a) Determine composite hydrocarbon and carbon monoxide concentrations for the first and second cycles. Average the results of these two cycles.

(b) Determine composite hydrocarbon and carbon monoxide concentrations for the third and fourth cycles. Average the results of these two cycles.

(c) Combine the results of paragraphs (a) and (b) of this section according to the formula: 0.35(a) plus 0.65(b). Since hydrocarbon, carbon monoxide, and carbon dioxide are all measured with essentially the same moisture content, no moisture correction is required to convert the results to a dry basis. The correction factor:

$$\frac{14.5}{\%\ CO_2+(0.5)\%\ CO+(1.8\times6)\ \%\ HC}$$

shall be applied to the measured concentrations of hydrocarbon and carbon monoxide to correct these observed values for dilution of the exhaust.

§§ 85.773–19—85.773–27 [Reserved]

§ 85.773–28 Compliance with emission standards.

(a) The exhaust emission standards in § 85.773–1 apply to the emissions of engines for their useful life.

(b) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,500 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(1) Separate emission deterioration factors shall be determined from the emission results of the durability data engines for each engine-system combination. Separate factors shall be established for HC and CO for each combination.

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*a*) All emission data from the tests required under § 85.773–7(b), except the zero-hour tests. This shall include the official test results, as determined in § 85.773–29, for all tests conducted on all durability engines of the combination selected under § 85.773–5(c) (including all engines elected to be operated by the manufacturer under § 85.773–5(c)(3)).

(b) All emission data from the tests conducted before and after the maintenance provided in § 85.773–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the hours on the system, rounded to the nearest hour, and the best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1,500-hour points on this line must be within the standard provided in § 85.773–1 or the data shall not be used in calculation of a deterioration factor.

(iii) An exhaust emision deterioration factor shall be calculated for each combination as follows:

$$\text{factor}=\frac{\text{exhaust emissions interpolated to 1,500 hours}}{\text{exhaust emissions interpolated to 125 hours}}$$

(2) The exhaust emission test results for each emission data engine shall be multiplied by the appropriate deterioration factor: *Provided*, That if a deterioration factor as computed in subparagraph (1) of this paragraph is less than one, that deterioration factor shall be one for the purposes of this subparagraph.

(3) The emissions to compare with the standard shall be the adjusted emissions of subparagraph (2) of this paragraph for each emission data engine.

(4) Every test engine of an engine family must comply with all applicable standards, as determined in subparagraph (3) of this paragraph, before any engine in that family will be certified.

§ 85.773–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b)(1) Whenever the Administrator conducts a test on a test engine, the results of that test shall comprise the official data for the engine at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause an engine to fail due to excessive 125-hour emissions or excessive deterioration, then the following procedure shall be observed:

(i) The manufacturer may request a retest. Before the retest, the engine may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.773–6. All work on the engine shall be done at such location and under such conditions as the Administrator may prescribe.

(ii) The engine will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test engine would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 85.773–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.773–29, the Administrator determines that a test engine(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such engine(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle engine covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b) (1) The Administrator will determine whether an engine covered by the application complies with applicable standards by observing the following relationships:

(i) A test engine selected under § 85.773–5(b)(2) or (4) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(ii) A test engine selected under § 85.773–5(b)(3), shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system-transmission type-fuel system combination.

(iii) A test engine selected under § 85.773–5(c)(1) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the engines belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.773–29, the Administrator determines that one or more test engines of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination, and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.705 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.705, or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 85.773–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed, or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.773–31 Separate certification.

§ 85.773–34 Alternative procedure for

emission control systems. The Administ-

(6) At the option of the manufacturer,

gines of that family is represented. or until a maximum of four engines is

XUM V37-221 NOV 15 72 XUM

§ 85.773–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all engines for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test engines and the computation of test results will be determined separately for each application.

§ 85.773–32 Addition of an engine after certification.

(a) If a manufacturer proposes to add to his product line an engine of the same engine-system combination as engines previously certified but which was not described in the application for certification when the test engine(s) representing other engines of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.773–34. This notification shall include a full description of the engine to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test engine(s) representing the engine to be added which would have been required if the engine had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 85.773–29, the Administrator determines that the test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test engine(s) does not meet applicable standards, he will proceed under § 85.773–30(b).

§ 85.773–33 Changes to an engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production engines in respect to any of the parameters listed in § 85.073–5(a)(3), giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.773–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the engine, as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified engines, he will notify the manufacturer in writing. Except as provided in § 85.773–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified engines would not be covered by the certificate then in effect, then the modified engines shall be treated as additions to the product line subject to § 85.773–32.

§ 85.773–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of an engine under § 85.773–32 or a change in an engine under § 85.773–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce engines as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.773–32 (b) and (c), or § 85.773–33 (b) and (c) as appropriate.

(d) Election to produce engines under this section will be deemed to be a consent to recall all engines which the Administrator determines under § 85.773–32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.773–35 Labeling.

(a) The manufacturer of any heavy duty gasoline-fueled engine subject to the standards prescribed in § 85.773–1 shall, at the time of manufacture, affix a permanent, legible plastic or metal label, containing the information hereinafter provided to all production models of such engines available for sale to the public, and covered by a certificate of conformity under § 85.773–30(a). The label shall be affixed at such a location that it will be readily accessible for inspection after the engine is installed in a vehicle and shall read as follows:

ENGINE EMISSION CERTIFICATION

This engine is, in all material respects, of substantially the same construction as test engines certified by the U.S. Environmental Protection Agency as conforming to Federal regulations pertaining to crankcase and exhaust emissions.
Engine family identification and engine displacement (in cubic inches)----------
Date of manufacture----------
(Month and year)
Name of manufacturer----------
(The information applicable to each engine is to be inserted on the appropriate line.)

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such engine conforms to any applicable State emission standards for new motor vehicle engines or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the engine.

§ 85.773–36 [Reserved]

§ 85.773–37 Production engines.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production engines selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These engines shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) Any manufacturer obtaining certification under this subpart shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

§ 85.773–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new motor vehicle engine subject to the standards prescribed in § 85.773–1, written instructions for the maintenance and use of the engine by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.773–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.773–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.773–38 (a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the engine's

emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

§ 85.774–1 Emission standards for 1974 model year engines.

(a)(1) Exhaust emissions from new gasoline-fueled heavy duty engines shall not exceed:

(i) *Hydrocarbons plus oxides of nitrogen (as NO_2).* 16 grams per brake horsepower hour.

(ii) *Carbon monoxide.* 40 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a)(1) of this section refer to a composite sample representing the operating cycle set forth in § 85.774–9 through § 85.774–18 and measured in accordance with those procedures.

(b) [Reserved]

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any new motor vehicle engine subject to this subpart.

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in § 85.774–9 through § 85.774–18 to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section.

§ 85.774–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle engine shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the engines covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the engines for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed service accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the engines covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.774–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the service accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.774–5.

§ 85.774–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such engines tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the engine for extended operation, as well as a record of all pertinent maintenance performed on the test engines.

(b) Emission data on such engines tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 hours, and 125 hours of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.774–1 and the data derived from such tests.

(d) A statement that the test engines with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any engine tested, the engine shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.774–5 Test engines.

(a) The engines covered by the application for certification will be divided into engine families based upon the criteria outlined in § 85.073–5(a).

(b) Emission data engines:

(1) Engines will be chosen to be run for emission data based upon the engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Engines of each engine family will be divided into engine displacement-exhaust emission control system combinations. A projected sales volume will be established for each combination for the 1974 model year. One engine of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of engines of that family is represented, or until a maximum of four engines is selected. The engines selected for each combination will be specified by the Administrator as to fuel system.

(3) The Administrator may select a maximum of two additional engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in that engine family. In selecting these engines, the Administrator will consider such features as the exhaust emission control system, induction system characteristics, ignition system characteristics, fuel system, rated horsepower, rated torque, and compression ratio.

(4) If the engines selected in accordance with subparagraphs (2) and (3) of this paragraph do not represent each engine-system combination, then one engine of each engine-system combination not represented shall be selected by the Administrator. The engine selected shall be of the displacement with the largest projected sales volume of engines with the exhaust emission control system in the family and will be designated by the Administrator as to fuel system.

(c) Durability data engines:

(1) A durability data engine will be selected by the Administrator to represent each engine-system combination. The engine selected shall be of the displacement with the largest projected sales voulme of engines with that exhaust emission control system in that engine family and will be designated by the Administrator as to fuel system.

(2) If an exhaust emission control system is used in only one engine family, an additional engine using that control system in that family will be selected so that the durability data fleet shall contain at least two engines with each control system. The additional engine will be selected in the same manner as engines selected under subparagraph (1) of this paragraph.

(3) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same engine displacement and fuel system as the engine selected for that combination in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to run additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection.

(d) Any manufacturer whose projected sales of new motor vehicle engines subject to this subpart for the 1974 model year is less than 700 engines may request a reduction in the number of test engines determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines will meet the objectives of this procedure.

(e) In lieu of testing an emission data or durability data engine selected under paragraph (b) or (c) of this section and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit

data on a similar engine for which certification has been granted by the Administrator, or by the Environmental Protection Agency, or by a State with which the Administrator has entered into a reciprocal agreement, in lieu of testing under this subpart. Such data will be accepted by the Administrator if he determines that the engine for which data is submitted is sufficiently similar to the engine for which certification is sought. Such determination will be based on such factors as the displacement, the number of cylinders, the induction system, the ignition system, the fuel system, the exhaust system, the cooling system, the combustion chamber design, the valve system, the camshaft system, the rated horsepower, the rated torque, and the compression ratio of the engines involved.

(f) Any manufacturer may request that the Administrator test a specific engine in addition to those selected by the Administrator. The Administrator will comply with such request if he determines that the engine is sufficiently different from the engines selected by the Administrator to be a worthwhile test.

(g) The Administrator may require that any engine selected under this section be delivered to a location designated by the Administrator within 10 days of the selection.

§ 85.774–6 Test procedures.

(a) The test procedures for the 1974 model year are those described in the Federal Register publication of November 15, 1972.

(b) The test procedures for the 1975 model year are those described in the Federal Register publication of November 15, 1972.

§ 85.774–7 Test fuels.

(a) The gasoline fuel to be used for testing under this subpart shall have a minimum octane rating of 91 Research Octane Number and shall be commercially available.

(b) The diesel fuel to be used for testing under this subpart shall be commercially available.

consists of two warmup cycles and two

(c) The specifications of the fuel to be used under paragraph (b) of this section

XUM
V37-221 NOV 15 72
XUM

data on a similar engine for which certification has previously been obtained.

(f) For purposes of testing under § 85.774–7(g), the Administrator may require additional emission data engines and durability data engines identical in all material respects to engines selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of engines selected shall not increase the size of either the emission data fleet or the durability data fleet by more than 20 percent or one engine, whichever is greater.

§ 85.774–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability engines may be performed only under the following provisions:

(i) Two major engine tuneups to manufacturer's specifications may be performed at 500 and 1,000 hours (±8 hours) of scheduled dynamometer operation with the following exception: On engines with a displacement of 200 cubic inches or less, a major engine tuneup may be performed at 75, 750, and 1,125 hours (±8 hours) of scheduled dynamometer operation. A major engine tuneup shall be restricted to the following:

(*a*) Replace spark plugs.

(*b*) Inspect ignition wiring and replace as required.

(*c*) Replace distributor breaker points and condensor as required.

(*d*) Lubricate distributor cam.

(*e*) Check distributor advance and breaker point dwell angle and adjust as required.

(*f*) Check automatic choke for free operation and correct as required.

(*g*) Adjust carburetor idle speed and mixture.

(*h*) Adjust drive belt tension on engine accessories.

(*i*) Adjust valve lash if required.

(*j*) Check exhaust heat control valve for free operation.

(*k*) Check engine bolt torque and tighten as required.

(ii) Spark plugs may be changed if a persistent misfire is detected.

(iii) Normal services (engine oil change, and oil filter, fuel filter, and air filter servicing) will be allowed at manufacturer's recommended intervals.

(iv) The crankcase emission control system may be serviced at 375 hour intervals (±8 hours) of dynamometer operation.

(v) Readjustment of the engine choke mechanism or idle settings may be performed only if there is a problem of stalling at idle.

(vi) Leaks in the fuel system, engine lubrication system and cooling system may be repaired.

(vii) Engine idle speed may be adjusted at the 125-hour test point.

(viii) Any other engine or fuel system maintenance or repairs will be allowed only with the advance approval of the Administrator.

(2) Allowable maintenance on emission data engines shall be limited to the adjustment of engine idle speed at the 125-hour test point, except that other maintenance or repairs may be allowed with the advance approval of the Administrator.

(b) Complete emission tests (see § 85.774–10 through § 85.774–18) shall be run before and after any engine maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.774–4.

(c) If the Administrator determines that maintenance or repairs have resulted in a substantial change to the engine-system combination, the engine shall not be used as a durability data engine.

§ 85.774–7 Service accumulation and emission measurements.

The engine dynamometer service accumulation schedule will consist of several operating conditions which give the same percentage of time at various manifold vacuums and the modes as specified in the emission test cycle. The average speed shall be between 1,650 and 1,700 r.p.m. Subject to the requirements as to average speed, there must be operation at speeds in excess of 3,200 r.p.m. (but not in excess of governed speed for governed engines or rated speed for nongoverned engines) for a cumulative maximum of 0.5 percent of the actual cycle time, excluding time in transient conditions. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.

(a) Emission data engines: Each emission data engine shall be operated for 125 hours with all emission control systems installed and operating. Emission tests shall be conducted at zero and 125 hours. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(b) Durability data engines: Each durability data engine shall be operated, with all emission control systems installed and operating, for 1,500 hours. Emission measurements, as prescribed, shall be made at zero hours and at each 125-hour interval. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the induction systems.

(c) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(d) The results of each emission test shall be supplied to the Administrator immediately after the test. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.774–4.

(e) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero-hour test data to the Administrator and make the engine available for such testing under § 85.774–29 as the Administrator may require, before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(f) Once a manufacturer begins to operate an emission data or durability data engine, as indicated by compliance with paragraph (e) of this section, he shall continue to run the engine to 125 hours or 1,500 hours, respectively, and the data from the engine will be used in the calculations under § 85.774–19. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(g) (1) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases, the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(2) The test procedures (§ 85.770–10 through §85.774–18) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(3) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

§ 85.774–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.774–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standards set forth in § 85.774–1.

(a) The test consists of prescribed sequences of engine operating conditions to be conducted on an engine dynamometer. The exhaust gases generated during engine operation are sampled continuously for specific component analysis through the analytical train. The test is applicable to engines equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems, or to uncontrolled engines.

(b) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen concentrations during a truck driving pattern in a metropolitan area as simulated on an engine dynamometer. The test

consists of two warmup cycles and two hot cycles. The average concentrations for the warmup cycles and the hot cycles are combined to yield the reported values.

(c) When an engine is tested for exhaust emissions or is operated for durability testing on an engine dynamometer, the complete engine shall be used with all accessories which might reasonably be expected to influence emissions to the atmosphere installed and functioning. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

§ 85.774–10 Gasoline fuel specifications.

(a) Fuel having the following specifications or substantially equivalent specifications approved by the Administrator shall be used in exhaust emission testing. Where the Administrator determines that the engines represented by a test engine will be operated using fuels of a different lead content or octane rating than that prescribed in this paragraph, he may consent in writing to use of a fuel otherwise substantially equivalent to the following specifications but with a different lead content or octane rating.

Item	ASTM designation	Specifications
Octane, Research, min	D 1656	100
Pb. (organic), gm./U.S. gal	D 526	3.1–3.3
Distillation range	D 86	
IBP, °F		75–95
10 percent point, °F		120–135
50 percent point, °F		200–230
90 percent point, °F		300–325
EP, °F. (max.)		415
Sulfur, wt. percent max	D 1266	0.10
Phosphorus, theory		0.0
RVP lb	D 323	8.7–9.7
Hydrocarbon composition	D 1319	
Olefins, percent, max		10
Aromatics, percent, max		35
Saturates		Remainder

(b) Fuel having the following specifications, or substantially equivalent specifications approved by the Administrator shall be used in service accumulation. The octane rating of the fuel used shall be in the range recommended by the engine manufacturer. The Reid Vapor Pressure of the fuel used shall be characteristic of the seasonal motor fuel. Where the Administrator determines that the engines represened by a test engine will be operated using fuels of a different lead content than that prescribed in this paragraph, he may consent in writing to use of a fuel otherwise substantially equivalent to the following specifications but with a different lead content.

Item	ASTM Designation	Regular	Premium
Pb. (organic), gm./U.S. gal.	D 526	2.1–3.2	2.1–3.2
Sulphur, wt. percent	D 1266	0.02–0.10	0.02–0.10
Hydrocarbon composition	D 1319		
Olefins, percent max		30	15
Aromatics, percent, max		40	40
Saturates		Remainder	Remainder

(c) The specifications of the fuel to be used under paragraph (b) of this section shall be reported in accordance with § 85.774–2(b)(3).

§ 85.774–11 Dynamometer operation cycle and equipment.

(a) (1) The following nine-mode cycle shall be followed in dynamometer operation tests of gasoline-fueled heavy duty engines.

Sequence No.	Mode	Manifold vacuum	Time in Mode-Secs.	Cumulative Time-Secs.	Weighting factors
1	Idle		70	70	0.232
2	Cruise	16″ Hg	23	93	.077
3	PTA	10″ Hg	44	137	.147
4	Cruise	16″ Hg	23	160	.077
5	PTD	19″ Hg	17	177	.057
6	Cruise	16″ Hg	23	200	.077
7	FL	3″ Hg	34	234	.113
8	Cruise	16″ Hg	23	257	.077
9	CT		43	300	.143

(2) The engine dynamometer shall be operated at a constant speed of 2,000 r.p.m.±100 r.p.m. (exception: representative engine speed for a given displacement engine as determined by its application, but not less than 1,800 r.p.m. nor greater than 2,500 r.p.m.).

(3) The idle operating mode shall be carried out at the manufacturer's recommended engine speed. The CT operating mode shall be carried out at the same engine speed as in subparagraph (2) of this paragraph.

(4) If the specified manifold vacuum can not be reached during the PTD mode, the engine shall be operated at closed throttle during that mode. If the specified manifold vacuum can not be reached during the FL mode, the engine shall be operated at wide open throttle during that mode.

(b) The following equipment shall be used for dynamometer tests.

(1) An engine dynamometer capable of maintaining constant speed±100 r.p.m. from full throttle to closed throttle motoring.

(2) A chassis-type exhaust system or substantially equivalent exhaust system shall be used.

(3) A radiator typical of that used with the engine in a vehicle, or other means of engine cooling which will maintain the engine operating temperatures at approximately the same temperature as would the radiator, shall be used. An auxiliary fixed speed fan may be used to maintain engine cooling during sustained operation on the dynamometer.

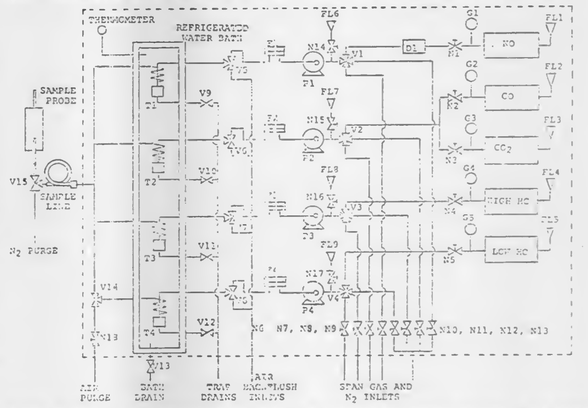

FIGURE H774–1.—Flow schematic of exhaust gas analysis system employed in Federal facilities.

§ 85.774–12 Dynamometer procedures.

An initial 5-minute idle, two warmup cycles, and two hot cycles constitute a complete dynamometer run. Idle modes may be run at the beginning and end of each test, thus eliminating the need to change speed between cycles. One idle mode preceding the first cycle and one following the fourth cycle is sufficient. The results of the first idle shall be used for calculation of the second cycle emissions and the fourth idle results shall be used for calculation of the third cycle emissions.

§ 85.774–13 Sampling and analytical system for measuring exhaust emissions.

(a) *Schematic drawing.* The following (fig. H774–1) is a schematic drawing of the exhaust gas sampling and analytical system which shall be used for testing under the regulations in this subpart.

(b) *Component description.* The following components shall be used in sam-

FIGURE H774-1.—Flow schematic of exhaust gas analysis system employed in Federal facilities.

(b) *Component description.* The following components shall be used in sampling and analytical systems for testing under the regulations in this part.

(1) Flowmeters FL1, FL2, FL3, FL4, and FL5 for indicating the sample flow rate through the analyzers.

(2) Nitric oxide NDIR analyzer.

(3) Carbon monoxide NDIR analyzer.

(4) Carbon dioxide NDIR analyzer.

(5) High-range hydrocarbon NDIR analyzer.

(6) Low-range hydrocarbon NDIR analyzer.

(7) Pressure gauges G1, G2, G3, G4, and G5 for indicating the analyzer sample pressure.

(8) Needle valves N1, N2, N3, N4, and N5 for regulating the sample flow rate to the analyzers.

(9) Drier D1 for removing water vapor from the sample.

(10) Needle valves N6, N7, N8, N9, N10, N11, N12, and N13 for regulating the flow rates of N_2 and span gases to the analyzers.

(11) Ball valves V1, V2, V3, and V4 for directing either sample or span gases to the analyzers.

(12) Needle valves N14, N15, N16, and through the bypass system.

(13) Flowmeters FL6, FL7, FL8, and FL9 for indicating the flow rate through the bypass system.

(14) Pumps P1, P2, P3, and P4 for forcing the sample through the analyzers.

(15) Filters F1, F2, F3, and F4 for removing contaminants from sample prior N17 for regulating the sample flow rate to analysis.

(16) Ball valves V5, V6, V7, and V8 for directing sample gas to the analyzers or for backflushing the sampling system with air or nitrogen.

(17) Toggle valves V9, V10, V11, V12, and V13 for draining the condensate traps and the refrigerated bath.

(18) Traps T1, T2, T3, and T4 for separating condensed water vapor from the cooled sample gases.

(19) Ball valve V14 for diverting air to the low-range hydrocarbon analyzer during periods of high hydrocarbon concentrations in the exhaust sample.

(20) Needle valve N18 for regulating the air flow to the low-range hydrocarbon analyzer during purge conditions.

(21) Thermometer for indicating the bath temperature.

(22) Refrigerated water bath for cooling the sample gases.

(23) Sample line for connecting the analysis system to the sample probe.

(24) Sample probe for extracting a sample of the exhaust downstream of the muffler.

(25) Ball valve V15 for directing nitrogen through the sampling system.

§ 85.774–14 Information to be recorded.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument Operator.

(e) Driver or Operator.

(f) Engine Make—identification number—date of manufacture—number of hours—engine displacement—engine family—idle r.p.m.—number carburetors—number of carburetor venturis.

(g) All pertinent instrument information such as tuning—gain—serial numbers—detector numbers—range.

(h) Barometric pressure, intake air temperature and humidity and, as applicable, the temperature of the air in front of the radiator during the test.

(i) Brake horsepower and fuel consumption.

(j) Analyzer responses, continuously recorded with zero, span and sample traces identified on each chart.

(k) Intake manifold vacuum and engine r.p.m. continuously recorded on the same chart with an automatic marker indicating one second intervals. Chart paper preprinted with one second intervals may be used in lieu of the automatic marker provided the use of the correct chart speed is verified on the chart for each test run.

§ 85.774–15 Calibration and instrument checks.

(a) The instrument assembly shall be calibrated at least once every 30 days, using the same flow rate as when sampling exhaust and proceeding as follows:

(1) Tune analyzers.

(2) Zero the analyzers with zero grade air or nitrogen. The allowable zero gas impurity concentrations should not exceed 10 p.p.m equivalent carbon response, 10 p.p.m. carbon monoxide and 1 p.p.m. nitric oxide. Set the instrument gain to give the desired range. Normal operating ranges are as follows:

Low-range hydrocarbon analyzer.	0–1,000 p.p.m. hexane equivalent.
High-range hydrocarbon analyzer.	0–10,000 p.p.m. hexane equivalent.
CO analyzer	0–10 percent CO.
CO_2 analyzer	0–16 percent CO.
NO analyzer	0–4,000 p.p.m. NO.

Lower operating ranges may be used as required.

(3) Calibrate with the following calibration gases. Flow rates should be set at 10 c.f.h. on the hydrocarbon and nitric oxide analyzers and 5 c.f.h. on the carbon monoxide and carbon dioxide analyzers. The concentrations given indicate nominal concentrations, and actual concentrations should be known to within ±2 percent of true value. Prepurified N_2 is used as the diluent.

Low range HC analyzer—Hexane equivalent[1]	High range HC analyzer—Hexane equivalent	NO analyzer—NO	CO and CO_2 analyzers—Blend of CO and CO_2 containing—	
			CO	plus CO_2
p.p.m.	*p.p.m.*	*p.p.m.*	*Mole percent*	*Mole percent*
100	600	250	0.5	16.0
200	1,000	500	1.0	15.0
300	1,500	750	2.0	14.0
400	2,500	1,000	3.0	13.0
600	4,000	1,500	4.0	12.0
800	6,000	2,000	6.0	10.0
1,000	8,000	2,500	8.0	8.0
	10,000	3,000	10.0	6.0
		3,500		
		4,000		

[1] The hexane equivalent of propane, when used as the normalizing gas for calibrating nondispersive infrared analyzers, is prescribed to be 0.52 (propane concentration × 0.52=hexane equivalent concentration). Minimum storage temperature of the cylinders shall be 60° F.; minimum use temperature shall be 68° F.

(4) Compare values with previous curves. Any significant change reflects some problem in the system. Locate and correct problem, and recalibrate. Use best judgment in selecting curve for data reduction.

(5) Check response of hydrocarbon analyzer to 100 percent CO_2. If response is greater than 0.5 percent full scale, refill filter cells with 100 percent CO_2 and recheck. Note any remaining response on chart. If response still exceeds 0.5 percent, replace detector.

(6) Check response of hydrocarbon analyzers to nitrogen saturated with water at ambient temperature. Record ambient temperature. If the low-range instrument response exceeds 5 percent of full scale with saturated nitrogen at 75° F., replace the detector. If the high-range response exceeds 0.5 percent of full scale, check detector on low-range instrument, then reject if response exceeds 5 percent of full scale at 75° F.

(b) The following daily instrument check shall be performed, allowing a minimum of 2 hours warmup for infrared analyzers. (Power is normally left on continuously; but, when instruments are not in use, chopper motor is turned off.):

(1) Zero on clean nitrogen introduced at analyzer inlet. Obtain a stable zero on the amplifier meter and recorder. Recheck after test.

(2) Introduce the span gas and set the analyzer gain to match the response to the value indicated by the calibration curve. In order to avoid a correction for sample cell pressure, use the same flow rate as that used to calibrate the analyzer. The span gas should produce a signal from 80 to 100 percent of the full scale response. The concentration of the span gas should be known within ±2 percent of the actual gain. If gain has shifted by more than 3 percent of scale, check tuning. If necessary, check calibration. Recheck after test. Record actual concentrations on chart.

(3) Check nitrogen zero, repeat the procedure in subparagraphs (1) and (2) of this paragraph if required.

(4) Check flow rates and pressures.

§ 85.774–16 Dynamometer test run.

(a) The engine shall be allowed to stand with engine turned off for at least 1 hour before the exhaust emission test at an ambient temperature of 60° F. to 86° F. The engine shall be stored prior to the emission tests in such a manner that it is not exposed to precipitation or condensation. During the dynamometer run, the ambient temperature shall be between 68° F. and 86° F.

(b) The following steps shall be taken for each test:

(1) Mount test engine on the engine dynamometer.

(2) Calibrate exhaust emission analyzer assembly.

(3) Check the condition of the drier in the nitric oxide analyzer sampling line. Replace the drying agent if necessary.

(4) Insert the sample line at least 2 feet into the tailpipe. When this is not possible, a tailpipe extension should be used.

(5) Start cooling system, if it is to be used.

(6) Start engine and idle at 1,000 to 1,200 r.p.m. for 5 minutes.

(7) Obtain normal idle speed, record it and start exhaust sampling.

(8) Run four 9-mode cycles.

(c) Upon completion of the test, purge the sample line with nitrogen to establish a constant hydrocarbon "hangup" level. The hydrocarbon concentration shall drop to 5 percent of scale in 10 seconds, and 3 percent of scale in 3 minutes, or the test is invalid. Check calibration of exhaust emission instruments. A drift in excess of ±2 percent of scale in the calibration of any one of the exhaust emission analyzers will invalidate the test results.

§ 85.774–17 Chart reading.

The recorder response for measuring exhaust gas concentrations always lags the engine's operation because of a variable exhaust system delay and a fixed sample system delay. Therefore, the concentrations for each mode will not be located on the charts at a point corresponding to the exact time of the mode. For each warmup or hot cycle to be evaluated, proceed as follows:

(a) Determine whether the cycle was run in accordance with the specified cycle timing by observing either chart pips, speed trace, manifold vacuum trace, or concentration traces. Deviation by more than 2 seconds from the specified time for the CT mode, or deviation of more than 0.3" Hg during the cruise and PTD modes, or more than 0.2" Hg during the PTA and FL modes, from the specified mode vacuums during the last 10 seconds of a mode will invalidate the data.

(b) Time correlate the hydrocarbon, carbon monoxide, carbon dioxide, and nitric oxide charts. Determine the location on the chart of concentrations corresponding to each mode. Determine and compensate for trace abnormalities.

(c) For all open throttle (3 inches, 10 inches, 16 inches, and 19 inches Hg) and idle modes, average the last 3 seconds of the HC, CO, CO_2 and NO traces.

(d) The values recorded for the initial idle mode are used for both warmup cycles 1 and 2. The final idle mode values are applied to hot cycles 3 and 4.

(e) Average the complete HC, CO, CO_2 and NO traces during the 43-second closed throttle mode of each cycle.

(f) Direct computer analysis of analyzer output may be utilized provided that the analysis is sufficiently similar to the above procedures to result in comparable data results.

§ 85.774–18 Calculations.

The final reported test results shall be derived through the following steps:

(a) Determine total carbon (TC) equivalent concentration in accordance with the following:

$$TC = \%CO_2 + \%CO + (1.8\times 6)\,\%HC$$

(b) Calculate the mass emission for HC (HC_{mass}), CO (CO_{mass}), and NO_x ($NO_{x\,mass}$) in grams per hour for each mode as follows:

$$(1)\quad HC_{mass} = 10.8\times 10^{-4}\times HC_{conc}\ (\text{p.p.m.}) \times \frac{\text{Fuel consumption (gms./hr.)}}{TC}$$

$$(2)\quad CO_{mass} = 2.02\times CO_{conc}(\%) \times \frac{\text{Fuel consumption (gms./hr.)}}{TC}$$

$$(3)\quad NO_{x_{mass}} = 3.32\times 10^{-4}\times NO_{conc}\ (\text{p.p.m.}) \times \frac{\text{Fuel consumption (gms./hr.)}}{TC}$$

(c) Multiply the HC_{mass}, CO_{mass}, and $NO_{x\,mass}$ values for each mode by the appropriate weighting factors.

(d) Multiply the measured brake horsepower values for each mode by the appropriate weighting factors. (Negative values are not used.)

(e) Calculate the brake specific emissions for HC, CO, and NO_x for each cycle as follows:

$$(1)\quad BSHC = \frac{\Sigma(HC_{mass}\times \text{WF})}{\Sigma(\text{Measured } BHP\times WF)}$$

$$(2)\quad BSCO = \frac{\Sigma(CO_{mass}\times \text{WF})}{\Sigma(\text{Measured } BHP\times WF)}$$

$$(3)\quad BSNO_x = \frac{\Sigma(NO_{x_{mass}}\times \text{WF})}{\Sigma(\text{Measured } BHP\times WF)}$$

(f) Average the composite BSHC, BSCO, $BSNO_x$ emissions of the first and second cycles.

(g) Average the composite BSHC, BSCO, and $BSNO_x$ emissions of the third and fourth cycles.

(h) Combine the results of (f) and (g) according to the formula: 0.35×composite of (f) +0.65×composite of (g).

(i) Correct the $BSNO_x$ value for the humidity at test conditions by multiplying by conversion factor "K" where:

$$K = 0.634 + 0.00654H - 0.0000222H^2$$

H = Humidity at test conditions, grain H_2O/lb. dry air.

§§ 85.774–19—85.774–27 [Reserved]

§ 85.774–28 Compliance with emission standards.

(a) The exhaust emission standards in § 85.774–1 apply to the emissions of engines for their useful life.

(b) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,500 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(1) Separate emission deterioration factors shall be determined from the emission results of the durability data engines for each engine-system combination. Separate factors shall be established for CO and for the combined emissions of HC and NO_x.

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*a*) All emission data from the tests required under § 85.774–7(b), except the zero-hour tests. This shall include the official test results, as determined in § 85.774–29, for all tests conducted on all durability engines of the combination selected under § 85.774–5(c) (including all engines elected to be operated by the manufacturer under § 85.774–5(c)(3)).

(*b*) All emission data from the tests conducted before and after maintenance provided in § 85.774–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the hours on the system, rounded to the nearest hour, and the best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1,500-hour points on this line must be within the standard provided in § 85.774–1 or the data shall not be used in calculation of a deterioration factor.

(iii) An exhaust emission deterioration factor shall be calculated for each combination as follows:

Factor = Exhaust emissions interpolated to 1,500 hours minus the exhaust emissions interpolated to 125 hours.

(2) The appropriate deterioration factor shall be added to the exhaust emission test results for each emission data engine: *Provided*, That if a deterioration factor as computed in subparagraph (1) of this paragraph is negative, that deterioration factor shall be zero when comparing adjusted emissions to the standards.

(3) The emissions to compare with the standard shall be the adjusted emissions of subparagraph (2) of this paragraph for each emission data engine.

(4) Every test engine of an engine family must comply with all applicable standards, as determined in subparagraph (3) of this paragraph, before any engine in that family will be certified.

§ 85.774–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b)(1) Whenever the Administrator conducts a test on a test engine, the results of that test shall comprise the official data for the engine at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of cor-

relation between the manufacturer's test

gines of the same engine-system com-

engine-system combination as engines

notification to the Administrator for a maximum of 20 days, unless the Admin-

(b) The provisions of this section shall not prevent a manufacturer from also

§ 85.774–4, a copy of the maintenance instructions which the manufacturer pro-

FEDERAL REGISTER VOL 37 NO 221 NOV 15 1972 XUM

relation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause an engine to fail due to excessive 125-hour emissions or excessive deterioration, then the following procedure shall be observed:

(i) The manufacturer may request a retest. Before the retest, the engine may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.774–6. All work on the engine shall be done at such location and under such conditions at the Administrator may prescribe.

(ii) The engine will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test engine would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 85.774–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.774–29, the Administrator determines that a test engine(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such engine(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle engine covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b) (1) The Administrator will determine whether an engine covered by the application complies with applicable standards by observing the following relationships:

(i) A test engine selected under § 85.774–5(b) (2) and (4), shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(ii) A test engine selected under § 85.774–5(b)(3), shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system-transmission type-fuel system combination.

(iii) A test engine selected under § 85.774–5(c)(1), shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the engines belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.774–29, the Administrator determines that one or more test engines of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination, and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.705 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.705, or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 85.774–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed, or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.774–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all engines for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test engines and the computation of test results will be determined separately for each application.

§ 85.774–32 Addition of an engine after certification.

(a) If a manufacturer proposes to add to his product line an engine of the same engine-system combination as engines previously certified but which was not described in the application for certification when the test engine(s) representing other engines of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.774–34. This notification shall include a full description of the engine to be added.

(b) The Administrator may require the manufacturer to perform such tests on the engine(s) representing the engine to be added which would have been required if the engine had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 85.774–29, the Administrator determines that the test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test engine(s) does not meet applicable standards, he will proceed under § 85.774–30(b).

§ 85.774–33 Changes to an engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production engines in respect to any of the parameters listed in § 85.073–5(a)(3), giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.774–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the engine, as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified engines, he will notify the manufacturer in writing. Except as provided in § 85.774–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified engines would not be covered by the certificate then in effect, then the modified engines engines shall be treated as additions to the product line subject to § 85.774–32.

§ 85.774–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of an engine under § 85.774–32 or a change in an engine under § 85.774–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce engines as described in the

notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.774–32 (b) and (c), or § 85.774–33 (b) and (c) as appropriate.

(d) Election to produce engines under this section will be deemed to be a consent to recall all engines which the Administrator determines under § 85.774–32(c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.774–35 Labeling.

(a) (1) The manufacturer of any heavy duty gasoline-fueled engine subject to the standards prescribed in § 85.744–1 shall, at the time of manufacture, affix a permanent, legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such engines available for sale to the public and covered by a certificate of conformity under § 85.774–30(a).

(2) The plastic or metal label shall be welded, bonded, or otherwise permanently attached to the engine in a position in which it will be readily visible after installation in the vehicle.

(3) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(4) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(i) The label heading: Engine Exhaust Emission Control Information;

(ii) Full corporate name and trademark of manufacturer;

(iii) Engine displacement (in cubic inches) and engine family identification;

(iv) Date of engine manufacture (month and year);

(v) Engine tuneup specifications and adjustments as recommended by the manufacturer, including idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop) and valve lash. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(vi) The statement: "This Engine Conforms to U.S. Environmental Protection Agency Regulations Applicable to 1974 Model Year Gasoline-Fueled Heavy Duty Engines."

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such engine conforms to any applicable State emission standards for new motor vehicle engines or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle or engine.

(c) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine part.

§ 85.774–36 [Reserved]

§ 85.774–37 Production engines.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production engines selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These engines shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) Any manufacturer obtaining certification under this subpart shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family - engine displacement - exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

§ 85.774–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new motor vehicle engine subject to the standards prescribed in § 85.774–1, written instructions for the maintenance and use of the engine by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.774–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.774–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.774–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the engine's emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

Subpart I—Engine Smoke Exhaust Emission Regulations for New Diesel Heavy Duty Engines

§ 85.801 General applicability.

The provisions of this subpart are applicable to new diesel heavy duty engines beginning with the 1973 model year.

§ 85.802 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part A of title II of the Clean Air Act, 42 U.S.C. 1857 f–1 through f–7, as amended by Public Law 91–604.

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year: *Provided*, That if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

(4) "Gross vehicle weight" means the manufacturer's gross weight rating for the individual vehicle.

(5) "Heavy duty vehicle" means any motor vehicle either designed primarily for transportation of property and rated at more than 6,000 pounds GVW or designed primarily for transportation of persons and having a capacity of more than 12 persons.

(6) "Heavy duty engine" means any engine which the engine manufacturer could reasonably expect to be used for motive power in a heavy duty vehicle.

(7) "System" includes any motor vehicle engine modification which controls or causes the reduction of substances emitted from motor vehicle engines.

(8) "Engine family" means the basic classification unit of a manufacturer's product line used for the purpose of test fleet selection and determined in accordance with § 85.873–5(a).

(9) "Engine-system combination" means an engine family–exhaust emis-

sion control system–fuel evaporative emission control system (where appli-

§ 85.804 General standards; increase in emissions; unsafe conditions.

place fixed by the Administrator or by the Presiding Officer.

(f) (1) The Presiding Officer shall make an initial decision which shall in-

(1) To enter, at reasonable times, any premises used during the certification

(3) A description of the test equipment and fuel proposed to be used.

XUM
V37-221 NOV 15 72 XUM

sion control system-fuel evaporative emission control system (where applicable) combination.

(10) "Fuel system" means the combination of fuel tank, fuel pump, fuel lines, and carburetor, or fuel injection components, and includes all fuel system vents and fuel evaporative emission control systems.

(11) "Crankcase emissions" means airborne substances emitted to the atmosphere from any portion of the engine crankcase ventilation or lubrication systems.

(12) "Exhaust emissions" means substances emitted to the atmosphere from any opening downstream from the exhaust port of a motor vehicle engine.

(13) "Smoke" means the matter in exhaust emissions which obscures the transmission of light.

(14) "Maximum rated horsepower" means the maximum brake horsepower output of an engine as stated by the manufacturer in his sales and service literature and his application for certification under § 85.873–2.

(15) "Rated speed" means the speed at which the manufacturer specifies the maximum rated horsepower of an engine.

(16) "Maximum rated torque" means the maximum torque produced by an engine as stated by the manufacturer in his sales and service literature and his application for certification under § 85.873–2.

(17) "Opacity" means the fraction of a beam of light, expressed in percent, which fails to penetrate a plume of smoke.

(18) Zero (0) hours means that point after initial engine starting (not to exceed 1 hour of engine operation) at which adjustments are completed [definition applicable to the 1973 model year].

(19) Zero (0) hours means that point after normal assembly line operations and adjustments and before 1 additional operating hour has been accumulated [definition applicable beginning with the 1974 model year].

(20) "Useful life" means a period of use of 5 years or 100,000 miles of vehicle operation or 3,000 hours of engine operation (or an equivalent period of 1,000 hours of dynamometer operation), whichever first occurs.

(21) "Peak torque speed" means the speed at which an engine develops maximum torque.

(22) "Military engine" means any engine manufactured solely for the Department of Defense to meet military specifications.

§ 85.803 Abbreviations.

The abbreviations used in this subpart have the following meanings in both capital and lowercase:

API—American Petroleum Institute.
ASTM—American Society for Testing and Materials.
EP—End point.
F—Fahrenheit.
Hg—Mercury.
IBP—Initial boiling point.
Min.—Minimum.
°—Degrees.

§ 85.804 General standards; increase in emissions; unsafe conditions.

(a) (1) Every new motor vehicle engine manufactured for sale, sold, offered for sale, introduced, or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to § 85.873–2 through § 85.873–4 and § 85.873–29 through § 85.873–34 of this subpart.

(2) No heavy duty vehicle manufacturer shall take any of the actions specified in section 203(a)(1) of the Act with respect to any diesel-powered heavy duty vehicle which uses an engine which has not been certified as meeting applicable standards. Such manufacturer shall provide to the Administrator prior to the beginning of each model year a statement signed by an authorized representative which includes the following information:

(i) A description of the vehicles which will be produced subject to this section;

(ii) Identification of the engines used in the vehicles;

(iii) Projected sales data on each vehicle-engine combination;

(iv) A statement that the engines will not be modified by the vehicle manufacturer or a detailed specification of any changes which will be made. Changes made solely for the purpose of mounting an engine in a vehicle need not be included.

(b) (1) Any system installed on or incorporated in a new motor vehicle engine to enable such vehicle to conform to standards imposed by this subpart:

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such engine without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicle engines subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with good engineering practice to ascertain that such test engines will meet the requirements of this section for the useful life of the engine.

§ 85.805 Hearings on certification.

(a) (1) After granting a request for a hearing under § 85.873–30, the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing have not been fixed by the Administrator under § 85.873–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(b) (1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under § 85.873–30, together with any accompanying material, the request for a hearing and the supporting data submitted therewith and all documents relating to the request for certification, including the application for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The appeal file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d) (1) The Presiding Officer, upon the request of any party or in his discretion, may arrange for a prehearing conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e) (1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial, and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title 18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall, upon a showing satisfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f) (1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence, or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 85.806 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall establish and maintain the following adequately organized and indexed records:

(1) Identification and description of all engines for which testing is required under this subpart.

(2) A description of all emission control systems which are installed on or incorporated in each engine.

(3) A description of the procedures used to test such engines.

(4) Test data on each emission data engine which will show its emissions at 0 and 125 hours.

(5) Test data on each durability engine which will show the performance of the systems installed on or incorporated in the engine during extended operation, as well as a record of all pertinent maintenance performed on the engine.

(b) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such engine relevant to the control of exhaust emissions, issued by the manufacturer for use by other manufacturers, assembly plants, distributors, dealers, and ultimate purchasers: *Provided*, That any material not translated into the English language need not be submitted unless specifically requested by the Administrator.

(c) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall permit officers or employees duly designated by the Administrator, upon presenting appropriate credentials and a written notice to the manufacturer:

(1) To enter, at reasonable times, any premises used during the certification procedure for purposes of monitoring tests and service accumulation procedures, observing maintenance procedures, and verifying correlation or calibration of test equipment, or

(2) To inspect, at reasonable times, records, files, and papers compiled by such manufacturer in accordance with paragraph (a) of this section.

A separate notice shall be given for each such inspection, but a separate notice shall not be required for each entry made during the period covered by the inspection. Each such inspection shall be commenced and completed with reasonable promptness.

§ 85.873 Smoke exhaust emission standards for 1973 model year engines.

(a) (1) The opacity of smoke emissions from new diesel engines subject to this subpart shall not exceed:

(i) 40 percent during the engine acceleration mode.

(ii) 20 percent during the engine lugging mode.

(2) The standards set forth in paragraph (a)(1) of this section refer to exhaust smoke emissions generated under the conditions set forth in § 85.873–9 through § 85.873–18 and measured and calculated in accordance with those procedures.

(b) [Reserved]

(c) [Reserved]

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in § 85.873–9 through § 85.873–18, to ascertain that such test engines meet the requirements of paragraph (a) of this section. If, pursuant to § 85.873–30(a), the Administrator issues a certificate of conformity for the class or classes of motor vehicle engines represented by such test engines, any motor vehicle engine which is in all material respects of substantially the same construction as such test engines shall be deemed to be in conformity with the requirements of paragraph (a) of this section.

§ 85.873–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle engine shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the engines covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the engines for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed service accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the engines covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.873–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the service accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.873–5.

§ 85.873–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such engines tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the engine for extended operation, as well as a record of all pertinent maintenance performed on the test engines.

(b) Emission data on such engines tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 hours and 125 hours of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.873–1 and the data derived from such tests.

(d) A statement that the test engines with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any engine tested, the engine shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.873–5 Test engines.

(a) The engines covered by the application for certification will be divided into engine families based upon the criteria outlined in § 85.073–5(a).

(b) Emission data engines:

proval of the Administrator, submit data on a similar engine for which certifica-

eter for 125 hours with the dynamometer and engine adjusted so that the engine is

§ 85.873–9 Test procedures.

The procedures described in this and

the standards. The engine is then returned to the idle condition and the ac-

moved rapidly to the closed position and the preselected load required to perform

XUM
V37-221 NOV 15 72 XUM

(b) Emission data engines:

(1) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Engines of each engine family will be divided into groups based upon exhaust emission control system. Two engines of each engine-system combination shall be run for smoke emission data as prescribed in § 85.872–7(a). Within each combination, the engines that feature the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will be selected. In the case where more than one engine in an engine-system combination have the highest fuel feed per stroke, the engine with the highest maximum rated torque will be selected. If there are military engines with higher fuel rates than other engines in the same engine-system combination, then two military engines with the highest fuel feed per stroke shall be also selected.

(c) Durability data engines:

(1) One engine from each engine-system combination shall be tested as prescribed in § 85.872–7(b). Within each combination, the engine which features the highest fuel feed per stroke, primarily at rated speed and secondarily at the speed of maximum rated torque, will be selected for durability testing. In the case where more than one engine in an engine-system combination have the highest fuel feed per stroke, the engine with the highest maximum rated horsepower will be selected for durability testing. If an engine-system combination includes both military and nonmilitary engines, then the nonmilitary engine with the highest maximum rated horsepower will be selected for durability testing.

(2) A manufacturer may select to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same model and fuel system as the engine selected in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to test additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine-system combination.

(d) Any manufacturer whose projected sales of new motor vehicle engines subject to this subpart for the 1973 model year is less than 200 engines may request a reduction in the number of test engines determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(e) In lieu of testing an emission data or durability data engine selected under paragraph (b) or (c) of this section and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit data on a similar engine for which certification has previously been obtained.

§ 85.873–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability engines may be performed only under the following provisions:

(i) One major engine servicing to manufacturer's specifications may be performed at 500 hours (±8 hours) of dynamometer operation. A major engine servicing shall be restricted to the following:

(a) Adjust low idle speed.
(b) Adjust valve lash if required.
(c) Adjust injector timing.
(d) Adjust governor.
(e) Clean and service injector tips.

(ii) Injectors may be changed if a persistent misfire is detected.

(iii) Normal engine lubrication services (engine oil change and oil filter, fuel filter, and air filter servicing and adjustment of drive belt tension and engine bolt torque, as required) will be allowed at manufacturer's recommended intervals.

(iv) Readjustment of the engine fuel rates may be performed only if there is a problem of dropping below 95 percent of maximum rated horsepower at 95 to 100 percent rated speed.

(v) Leaks in the fuel system, engine lubrication system and cooling system may be repaired.

(vi) Engine low idle speed may be adjusted at the 125-hour test point.

(vii) Any other engine or fuel system maintenance or repair will be allowed only with the advance approval of the Administrator.

(2) Allowable maintenance on emission data engines shall be limited to the adjustment of engine low idle speed at the 125-hour test point, except that other maintenance or repair may be allowed with the advance approval of the Administrator.

(b) Complete emission tests (see § 85.873–10 through § 85.873–18) shall be run before and after any engine maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.873–4.

(c) If the Administrator determines that maintenance or repairs performed have resulted in a substantial change to the engine-system combination, the engine shall not be used as a durability data engine.

§ 85.873–7 Service accumulation and emission measurements.

Service accumulation shall be accomplished by operation of an engine on a dynamometer.

(a) Emission data engines: Each engine shall be operated on a dynamometer for 125 hours with the dynamometer and engine adjusted so that the engine is operating at 95 to 100 percent of rated speed and at least 95 percent of maximum rated horsepower. During such operation, the engine shall be run at the exhaust back pressure specified in § 85.873–12(c) and the air inlet restriction specified in § 85.873–12(d) except that the tolerances shall be ±0.5 inches of Hg and ±3 inches of water respectively. Exhaust smoke tests shall be conducted at zero and 125 hours of operation.

(b) Durability data engines: Each engine shall be operated on a dynamometer for 1,000 hours with the dynamometer and engine adjusted so that the engine is operating at 95 to 100 percent of rated speed and at least 95 percent of maximum rated horsepower. During such operation, the engine shall be run at the exhaust back pressure specified in § 85.873–12(c) and the air inlet restriction specified in § 85.873–12(d) except that the tolerance shall be ±0.5 inches of Hg and ±3 inches of water respectively. Exhaust smoke measurements shall be made at zero hours and at each 125 hours of operation. All results except the zero hour results shall be used to establish the deterioration factors (see § 85.873–19).

(c) All tests required by this subpart to be conducted after 125 hours of dynamometer operation or at any multiple of 125 hours may be conducted at any accumulated hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(d) The results of each emission test shall be supplied to the Administrator immediately after the test. In addition all test data shall be compiled and provided to the Administrator in accordance with § 85.873–4.

(e) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero hour test data to the Administrator and make the engine available for such testing under § 85.873–29 as the Administrator may require before beginning to accumulate hours on the engine. Failure to comply with this requirement shall invalidate all test data submitted for this engine.

(f) Once a manufacturer begins to operate an emission data or durability data engine, as indicated by compliance with paragraph (e) of this section, he shall continue to run the engine to 125 hours or 1,000 hours, respectively, and the data from the engine shall be used in the calculations under § 85.873–19. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

§ 85.873–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.873–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standards set forth in § 85.873–1.

(a) The test consists of a prescribed sequence of engine operating conditions on an engine dynamometer with continuous examination of the exhaust gases. The test is applicable equally to controlled engines equipped with means for preventing, controlling, or eliminating smoke emissions and to uncontrolled engines.

(b) The test is designed to determine the opacity of smoke in exhaust emissions during those engine operating conditions which tend to promote smoke from diesel-powered vehicles.

(c) The test procedure begins with a warm engine which is then run through preloading and preconditioning operations. After an idling period, the engine is operated through acceleration and lugging modes during which smoke emission measurements are made to compare with the standards. The engine is then returned to the idle condition and the acceleration and lugging modes are repeated. Three sequences of acceleration and lugging constitute the full set of operating conditions for smoke emission measurement.

(d) All emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all test procedures in this subpart.

§ 85.873–10 Diesel fuel specifications.

(a) The diesel fuels employed shall be clean and bright, with pour and cloud points adequate for operability. The fuels may contain nonmetallic additives as follows: cetane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(b) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emission testing. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test method No.	Type 1-D	Type 2-D
Cetane	D 613	48–54	42–50
Distillation range	D 86		
IBP, °F		330–390	340–400
10 percent point, °F		370–430	400–460
50 percent point, °F		410–480	470–540

Flash point, °F (Min.)	D 93	130	130
Viscosity, centistokes	D 445	1.6–2.0	2.0–3.2

(c) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in service accumulation. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test method No.	Type 1-D	Type 2-D
Cetane	D 613	48–54	42–55
Distillation range	D 86		
IBP, °F		330–390	340–410
10 percent point, °F		370–430	400–470
50 percent point, °F		410–480	470–540
90 percent point, °F		460–520	550–610
EP, °F		500–560	580–660
Gravity, °API	D 287	40–44	33–40
Total sulfur, percent	D 129 or D 2622	0.05–0.20	0.2–0.5
Flash point, °F (Min.)	D 93	120	130
Viscosity, centistokes	D 445	1.6–2.0	2.0–3.2

(d) The type fuel, including additive and other specifications, used under paragraphs (b) and (c) of this section shall be reported in accordance with § 85.873–2(b)(3).

§ 85.873–11 Dynamometer operation cycle for smoke emission tests.

(a) The following sequence of operations shall be performed during engine dynamometer testing of smoke emissions, starting with the dynamometer preloading determined and the engine preconditioned (§ 85.873–16(c)).

(1) *Idle mode.* The engine is caused to idle for 5 to 5.5 minutes at the manufacturer's recommended low idle speed. The dynamometer controls shall be set to provide minimum load by turning the load switch to the "off" position or by adjusting the controls to the minimum load position.

(2) *Acceleration mode.* (i) The engine speed shall be increased to 200±50 r.p.m. above the manufacturer's recommended low idle speed within 3 seconds.

(ii) The engine shall be accelerated at full-throttle against the inertia of the engine and dynamometer or alternately against a preselected dynamometer load such that the engine speed reaches 85 to 90 percent of rated speed in 5±1.5 seconds.

(iii) When the engine reaches the speed required in subdivision (ii) of this subparagraph, the throttle shall be moved rapidly to the closed position and the preselected load required to perform the acceleration in subdivision (iv) of this subparagraph shall be applied. The engine speed shall be reduced to the speed of maximum rated torque or 60 percent of rated speed (whichever is higher), within ±50 r.p.m. Smoke emissions during this transitional mode are not used in determining smoke emissions to compare with the standard.

(iv) The throttle shall be moved rapidly to the full-throttle position and the engine accelerated against the preselected dynamometer load such that the engine speed reaches 95 to 100 percent of rated speed in 10±2 seconds.

(3) *Lugging mode.* (i) Proceeding from the acceleration mode, the dynamometer controls shall be adjusted to permit the engine to develop maximum horsepower at rated speed. Smoke emissions during this transitional mode are not used in determining smoke emissions to compare with the standard.

(ii) Without changing the throttle position, the dynamometer controls shall be adjusted gradually to slow the engine to the speed of maximum torque or to 60 percent of rated speed, whichever is higher. This engine lugging operation shall be performed smoothly over a period of 35±5 seconds. The rate of slowing of the engine shall be linear, within ±100 r.p.m.

(4) *Engine unloading.* After completion of the lugging mode in subparagraph (3)(ii) of this paragraph, the dynamometer and engine shall be returned to the idle condition described in subparagraph (1) of this paragraph.

(b) The procedures described in paragraph (a) (1) through (4) of this section shall be repeated until the entire cycle has been run three times.

§ 85.873–12 Dynamometer and engine equipment.

The following equipment shall be used for smoke emission testing of engines on engine dynamometers.

(a) An engine dynamometer with adequate characteristics to perform the test cycle described in § 85.873–10.

(b) An engine cooling system having sufficient capacity to maintain the engine at normal operating temperatures during conduct of the prescribed engine tests.

(c) A noninsulated exhaust system extending 12±2 feet from the exhaust manifold of the engine and presenting an exhaust back pressure within ±0.2 inches Hg. of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during smoke emission testing. The terminal 2 feet of the exhaust pipe shall be of circular cross section and be free of elbows and bends. The end of the pipe shall be cut off squarely. The terminal 2 feet of the exhaust pipe shall

have a diameter in accordance with the engine being tested, as specified below:

smoke emissions because of such conditions.

(b) The governor and fuel system

½-second readings during the lugging mode of each dynamometer cycle.

factor shall be zero for the purposes of this subparagraph.

(3) Every test engine of an engine

XUM
V37-221 NOV 15 72 XUM

turer may, with the prior written approval of the Administrator, install such engine in a vehicle for the purpose of conducting the tests set forth herein.

have a diameter in accordance with the engine being tested, as specified below:

Maximum rated horsepower	Exhaust pipe size
Less than 101	2"
101 to 200	3"
201 to 300	4"
301 or more	5"

(d) An engine air inlet system presenting an air inlet restriction within ±1 inch of water of the upper limit for the engine operating condition which results in maximum air flow, as established by the engine manufacturer in his sales and service literature, for the engine being tested.

§ 85.873–13 Smoke measurement system.

(a) *Schematic drawing.* The following figure (fig. 1873–1) is a schematic drawing of the optical system of the light extinction meter.

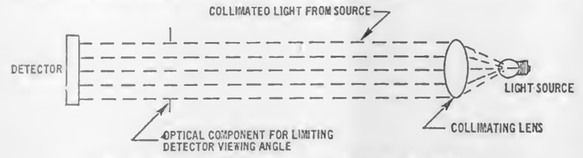

FIGURE 1873–1.—EPA smokemeter optical system (schematic).

(b) *Equipment.* The following equipment shall be used in the system:

(1) Adapter—the smokemeter optical unit may be mounted on a fixed or movable frame. The normal unrestricted shape of the exhaust plume shall not be modified by the adapter, the meter, or any ventilation system used to remove the exhaust from the test site.

(2) Smokemeter (light extinction meter)—continuous recording, full-flow light obscuration meter. It shall be positioned near the end of the exhaust pipe so that a built-in light beam traverses the exhaust smoke plume which issues from the pipe at right angles to the axis of the plume. The light source is an incandescent lamp operated at a constant voltage of not less than 15 percent of the manufacturer's specified voltage. The lamp output is collimated to a beam with a nominal diameter of 1.125 inches. The angle of divergence of the collimated beam shall be within 4° included angle. A light detector, directly opposed to the light source, measures the amount of light blocked by the smoke in the exhaust. The detector sensitivity is restricted to the visual range and comparable to that of the human eye. A collimating tube with apertures equal to the beam diameter is attached to the detector. It restricts the viewing angle of the detector to within 16° included angle. An amplified signal corresponding to the amount of light blocked is recorded continuously on a remote recorder. An air curtain across the light source and detector window assemblies may be used to minimize deposition of smoke particles on those surfaces provided that it does not measurably affect the opacity of the plume. The meter consists of two units, an optical unit, and a remote control unit. Light extinction meters employing substantially identical measurement principles and producing substantially equivalent results but which employ other electronic and optical techniques may be used only after having been approved in advance by the Administrator.

(3) Recorder—a continuous recorder, with variable chart speed over a minimal range of 0.5 to 8.0 inches per minute (or equivalent) and an automatic marker indicating 1-second intervals shall be used for continuously recording the transient conditions of exhaust gas opacity, engine r.p.m. and torque. The recorder scale for opacity shall be linear and calibrated to read from 0 to 100 percent opacity full scale. The opacity trace shall have a resolution within 1 percent opacity. The recorder scale for engine r.p.m. and the recorder scale for observed engine torque shall be linear and shall have full scale calibration such as to facilitate chart reading. The r.p.m. trace shall have a resolution within 30 r.p.m. The torque trace shall have a resolution within 10 lb.-ft. Any means other than strip chart recorder may be used provided it produces a permanent visual data record of quality equal to or better than that described above.

(4) The recorder used with the smokemeter shall be capable of full-scale deflection in 0.5 second or less. The smokemeter-recorder combination may be damped so that signals with a frequency higher than 10 cycles per second are attenuated. A separate low-pass electronic filter with the following performance characteristics may be installed between the smokemeter and the recorder to achieve the high-frequency attenuation.

(i) 3 decibel point—10 cycles per second.

(ii) Insertion loss—zero ±0.5 decibels.

(iii) Selectivity—12 decibels per octave above 10 cycles per second.

(iv) Attenuation—27 decibels down at 40 cycles per second minimum.

(c) *Assembling equipment.* (1) The optical unit of the smokemeter shall be mounted radially to the exhaust pipe so that the measurement will be made at right angles to the axis of the exhaust plume. The distance from the optical centerline to the exhaust pipe outlet shall be 1.0 to 1.5 pipe diameters but never less than 4 inches. The full flow of the exhaust stream shall be centered between the source and detector apertures (or windows and lenses) and on the axis of the light beam.

(2) Power shall be supplied to the control unit of the smokemeter in time (at least 15 minutes prior to testing) to allow for stabilization.

§ 85.873–14 Information to be recorded.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) Date and time of day.

(c) Instrument operator.

(d) Engine operator.

(e) Engine Identification numbers—Date of manufacture—Number of hours of operation accumulated on engine—Engine Family—Exhaust pipe diameter—Fuel Injector type—Maximum measured fuel rate at maximum measured torque and horsepower—Air aspiration system—Low idle r.p.m.—Maximum governed r.p.m.—Maximum measured horsepower at r.p.m.—Maximum measured torque at r.p.m.—Exhaust system back pressure—Air inlet restriction.

(f) Smokemeter: Number—Zero control setting—Calibration control setting—Gain.

(g) Recorder chart: Identify zero traces—Calibration traces—Idle traces—Acceleration and lug-down test traces—Start and finish of each test.

(h) Ambient temperature in dynamometer testing room.

(i) Engine intake air temperature and humidity.

(j) Barometric pressure.

(k) Observed engine torque.

§ 85.873–15 Instrument checks.

(a) The smokemeter shall be checked according to the following procedure prior to each test:

(1) The optical surfaces of the optical section shall be checked to verify that they are clean and free of foreign material and fingerprints.

(2) The zero control shall be adjusted under conditions of "no smoke" to give a recorder trace of zero.

(3) Calibrated neutral density filters having approximately 20 percent and 40 percent opacity shall be employed to check the linearity of the instrument. The filter(s) shall be inserted in the light path perpendicular to the axis of the beam and adjacent to the opening from which the beam of light from the light source emanates, and the recorder response shall be noted. The nominal opacity value of the filter will be confirmed by the Administrator. Deviations in excess of 1 percent of the nominal opacity shall be corrected.

(b) The instruments for measuring and recording engine r.p.m., engine torque, air inlet restrictions, exhaust system back pressure, etc., which are used in the tests prescribed herein shall be calibrated from time to time in accordance with good technical practice.

§ 85.873–16 Test run.

(a) The temperature of the air supplied to the engine shall be between 68° F. and 86° F. The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance will be made for possible increased

smoke emissions because of such conditions.

(b) The governor and fuel system shall have been adjusted to provide engine performance at the levels specified by the engine manufacturer for maximum rated horsepower and maximum rated torque. These specifications shall be reported in accordance with § 85.873–2(b)(3).

(c) The following steps shall be taken for each test:

(1) Start cooling system.

(2) Starting with a warmed engine, determine by experimentation the dynamometer inertia and dynamometer load required to perform the acceleration in the dynamometer cycle for smoke emission tests (§ 85.873–11(a)(2)). In a manner appropriate for the dynamometer and controls being used, arrange to conduct the acceleration mode.

(3) Install smokemeter optical unit and connect it to the recorder. Connect the engine r.p.m. and torque sensing devices to the recorder.

(4) Turn on purge air to the optical unit of the smokemeter, if purge air is used.

(5) Check and record zero and span settings of the smokemeter recorder at a chart speed of approximately 1 inch per minute. (The optical unit shall be retracted from its position about the exhaust stream if the engine is left running.)

(6) Precondition the engine by operating it for 10 minutes at maximum rated horsepower.

(7) Proceed with the sequence of smoke emission measurements on the engine dynamometer as prescribed in § 85.873–11.

(8) During the test sequence of § 85.873–11, continuously record smoke measurements, engine r.p.m. and torque at a chart speed of approximately 1 inch per minute minimum during the idle mode and transitional modes and 8 inches per minute minimum during the acceleration and lugging modes.

(9) Turn off engine.

(10) Check zero and reset if necessary and check span of the smokemeter recorder by inserting neutral density filters. If either zero or span drift is in excess of 2 percent opacity, the test results shall be invalidated.

§ 85.873–17 Chart reading.

(a) The following procedures shall be employed in reading the smokemeter recorder chart.

(1) Locate the acceleration mode (§ 85.873–11(a)(2)) and the lugging mode (§ 85.873–11(a)(3)) on the chart. Divide each mode into ½-second intervals beginning at the start of each mode. Determine the average smoke reading during each ½-second interval except those recorded during the transitional portions of the acceleration mode (§ 85.873–11(a)(2)(iii)) and the lugging mode (§ 85.873–11(a)(3)(i)).

(2) Locate and record the 15 highest ½-second readings during the acceleration mode of each dynamometer cycle.

(3) Locate and record the five highest ½-second readings during the lugging mode of each dynamometer cycle.

§ 85.873–18 Calculations.

(a) Average the 45 readings in § 85.873–17(a)(2) and designate the value as "a."

(b) Average the 15 readings in § 85.873–17(a)(3) and designate the value as "b."

§§ 85.873–19—85.873–27 [Reserved]

§ 85.873–28 Compliance with emission standards.

(a) The emission standards in § 85.873–1 apply to the emissions of engines for their useful life.

(b) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance with exhaust smoke emission standards in heavy duty diesel engines is as follows:

(1) Emission deterioration factors for the acceleration mode (designated as "A") and the lugging mode (designated as "B") shall be established separately for each engine-system combination.

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(a) All emission data from the tests required under § 85.873–7(b), except the zero hour tests. This shall include the official test results, as determined in § 85.873–29, for all tests conducted on all durability engines of the combination selected under § 85.873–5(c) (including all engines elected to be operated by the manufacturer under § 85.873–5(c)(2)).

(b) All emission data from the tests conducted before and after the maintenance provided in § 85.873–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the hours on the system, rounded to the nearest hour, and the best fit straight line, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1,000-hour points on this line must be within the standard provided in § 85.873–1 or the data shall not be used in calculation of a deterioration factor.

(iii) The deterioration factors will be calculated as follows:

A—Percent opacity "a," interpolated to 1,000 hours, minus percent opacity "a," interpolated to 125 hours.

B—Percent opacity "b," interpolated to 1,000 hours, minus percent opacity "b," interpolated to 125 hours.

(2) The "percent opacity" values to compare with the standards shall be the opacity values "a" and "b" for each emission data engine within an engine-system combination to which are added the respective factors "A" and "B" of subparagraph (1) of this paragraph for that engine-system combination: *Provided*, That if a deterioration factor as computed in subparagraph (1) of this paragraph is less than zero, that deterioration factor shall be zero for the purposes of this subparagraph.

(3) Every test engine of an engine family must comply with all applicable standards, as determined in subparagraph (2) of this paragraph, before any engine in that family will be certified.

§ 85.873–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b) (1) Whenever the Administrator conducts a test on a test engine, the results of that test shall comprise the official data for the engine at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause an engine to fail due to excessive 125-hour emissions or excessive deterioration, then the following procedure shall be observed:

(i) The manufacturer may request a retest. Before the retest, the engine may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.873–6. All work on the engine shall be done at such location and under such conditions as the Administrator may prescribe.

(ii) The engine will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test engine would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 85.873–30 Certification.

each failing engine an alternate engine chosen in accordance with selection

would still be covered by the certificate of conformity then in effect.

regulations pertaining to exhaust smoke emission.

§ 85.873–39 Submission of maintenance instructions.

test fleet representative of the engines for which certification is requested.

XUM
V37-221 NOV 15 72 XUM

§ 85.873–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.873–29, the Administrator determines that a test engine(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such engine(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle engine covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b) (1) The Administrator will determine whether an engine covered by the application complies with applicable standards by observing the following relationships:

(i) A test engine selected under § 85.873–5(b) (2) or (4) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(ii) [Reserved]

(iii) A test engine selected under § 85.873–5(c) (1) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the engines belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.873–29, the Administrator determines that one or more test engines of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.805 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.805, or

(ii) Delete from the application for certification, the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 85.873–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed, or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.873–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all engines for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test engines and the computation of test results will be determined separately for each application.

§ 85.873–32 Addition of an engine after certification.

(a) If a manufacturer proposes to add to his product line an engine of the same engine-system combination as engines previously certified but which was not described in the application for certification when the test engine(s) representing other engines of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.873–34. This notification shall include a full description of the engine to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test engine(s) representing the engine to be added which would have been required if the engine had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conduted under § 85.873–29, the Administrator determines that the test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test engine(s) does not meet applicable standards, he will proceed under § 85.873–30(b).

§ 85.873–33 Changes to an engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production engines in respect to any of the parameters listed in § 85.073–5(a) (3), giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.873–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the engine, as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified engines, he will notify the manufacturer in writing. Except as provided in § 85.873–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified engines would not be covered by the certificate then in effect, then the modified engines shall be treated as additions to the product line subject to § 85.873–32.

§ 85.873–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of an engine under § 85.873–32 or a change in an engine under § 85.873–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce engines as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.873–32(b) and (c), or § 85.873–33(b) and (c), as appropriate.

(d) Election to produce engines under this section will be deemed to be a consent to recall all engines which the Administrator determines under § 85.873–32 (c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.873–35 Labeling.

(a) The manufacturer of any heavy duty diesel engine subject to the standard prescribed in § 85.873–1 shall, at the time of manufacture, affix a permanent, legible plastic or metal label containing the information hereinafter provided to all production models of such engines available for sale to the public, and covered by a certificate of conformity under § 85.873–30(a). The label shall be affixed at such a location that it will be readily accessible for inspection after the engine is installed in a vehicle and shall read as follows:

ENGINE SMOKE EMISSION CERTIFICATION

This engine is, in all material respects, of substantially the same construction as test engines certified by the U.S. Environmental Protection Agency as conforming to Federal

regulations pertaining to exhaust smoke emission.

Engine family identification and model ----------

Date of manufacture ---------- (Month and year)

Name of manufacturer ----------

(The information applicable to each engine is to be inserted on the appropriate line.)

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such engine conforms to any applicable State emission standards for new motor vehicle engines or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the engine.

§ 85.873–36 [Reserved]

§ 85.873–37 Production engines.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production engines selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These engines shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) Any manufacturer obtaining certification under this subpart shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

§ 85.873–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new engine subject to the standard prescribed in § 85.873–1, written instructions for the maintenance and use of the engine by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.873–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.873–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.873–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the engine's emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

§ 85.874–1 Smoke exhaust emission standards for 1974 model year engines.

(a) (1) The opacity of smoke emissions from new diesel engines subject to this subpart shall not exceed:

(i) 20 percent during the engine acceleration mode.

(ii) 15 percent during the engine lugging mode.

(iii) 50 percent during the peaks in either mode.

(2) The standards set forth in paragraph (a)(1) of this section refer to exhaust smoke emissions generated under the conditions set forth in § 85.874–9 through § 85.874–18 and measured and calculated in accordance with those procedures.

(b) [Reserved]

(c) [Reserved]

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in § 85.874–9 through § 85.874–18, to ascertain that such test engines meet the requirements of paragraph (a) of this section.

§ 85.874–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle engine shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the engines covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the engines for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed service accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the engines covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.874–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the service accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disapproved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.874–5.

§ 85.874–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such engines tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the engine for extended operation, as well as a record of all pertinent maintenance performed on the test engines.

(b) Emission data on such engines tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 hours and 125 hours of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.874–1 and the data derived from such tests.

(d) A statement that the test engines with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any engine tested, the engine shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.874–5 Test engines.

(a) The engines covered by the application for certification will be divided

into engine families based upon the

proval of the Administrator, submit data

(c) If the Administrator determines

(g) Once a manufacturer begins to operate an emission data or durability

preloading and preconditioning operations. After an idling period, the engine is operated through acceleration and lug-

§ 85.874–10 Diesel fuel specifications.

(a) The diesel fuels employed shall be

XUM
V37-221 NOV 15 72 XUM

into engine families based upon the criteria outlined in § 85.073–5(a).

(b) Emission data engines:

(1) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family, the requirements of this paragraph must be met.

(2) Engines of each engine family will be divided into groups based upon exhaust emission control system. Two engines of each engine-system combination shall be run for smoke emission data as prescribed in § 85.874–7(a). Within each combination, the engines that feature the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will be selected. In the case where more than one engine in an engine-system combination have the highest fuel feed per stroke, the engine with the highest maximum rated torque will be selected. If there are military engines with higher fuel rates than other engines in the same engine system combination, then two military engines with the highest fuel feed per stroke shall be also selected.

(c) Durability data engines:

(1) One engine from each engine-system combination shall be tested as prescribed in § 85.874–7(b). Within each combination, the engine which features the highest fuel feed per stroke, primarily at rated speed and secondarily at the speed of maximum rated torque, will be selected for durability testing. In the case where more than one engine in an engine-system combination has the highest fuel feed per stroke, the engine with the highest maximum rated horsepower will be selected for durability testing. If an engine system combination includes both military and nonmilitary engines, then the nonmilitary engine with the highest maximum rated horsepower will be selected for durability testing.

(2) A manufacturer may elect to operate and test additional engines to represent any engine-system combination. The additional engines must be of the same model and fuel system as the engine selected in accordance with the provisions of subparagraph (1) of this paragraph. Notice of an intent to test additional engines shall be given to the Administrator not later than 30 days following notification of the test fleet selection. Deterioration factors calculated for each engine-system combination shall be applied separately to military and nonmilitary engines within the same engine system combination.

(d) Any manufacturer whose projected sales of new motor vehicle engines subject to this subpart for the 1974 model year is less than 200 engines may request a reduction in the number of test engines determined in accordance with the foregoing provisions of this section. The Administrator may agree to such lesser number as he determines would meet the objectives of this procedure.

(e) In lieu of testing an emission data or durability data engine selected under paragraph (b) or (c) of this section and submitting data therefor, a manufacturer may, with the prior written approval of the Administrator, submit data on a similar engine for which certification has previously been obtained.

(f) For purposes of testing under § 85.874–7(g), the Administrator may require additional emission data engines and durability data engines identical in all material respects to engines selected in accordance with paragraphs (b) and (c) of this section: *Provided*, That the number of engines selected shall not increase the size of either the emission data fleet or the durability data fleet by more than 20 percent or one engine, whichever is greater.

§ 85.874–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability engines may be performed only under the following provisions:

(i) One major engine servicing to manufacturer's specifications may be performed at 500 hours (±8 hours) of dynamometer operation. A major engine servicing shall be restricted to the following:

(*a*) Adjust low idle speed.
(*b*) Adjust valve lash if required.
(*c*) Adjust injector timing.
(*d*) Adjust governor.
(*e*) Clean and service injector tips.

(ii) Injectors may be changed if a persistent misfire is detected.

(iii) Normal engine lubrication services (engine oil change and oil filter, fuel filter, and air filter servicing and adjustment of drive belt tension and engine bolt torque, as required) will be allowed at manufacturer's recommended intervals.

(iv) Readjustment of the engine fuel rates may be performed only if there is a problem of dropping below 95 percent of maximum rated horsepower at 95–100 percent rated speed.

(v) Leaks in the fuel system, engine lubrication system and cooling system may be repaired.

(vi) Engine low-idle speed may be adjusted at the 125-hour test point.

(vii) Any other engine or fuel system maintenance or repair will be allowed only with the advance approval of the Administrator.

(2) Allowable maintenance on emission data engines shall be limited to the adjustment of engine low idle speed at the 125-hour test point, except that other maintenance or repair may be allowed with the advance approval of the Administrator.

(b) Complete emission tests (see §§ 85.874–10 through 85.874–18) shall be run before and after any engine maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.874–4.

(c) If the Administrator determines that maintenance or repairs performed have resulted in a substantial change to the engine-system combination, the engine shall not be used as a durability data engine.

§ 85.874–7 Service accumulation and emission measurements.

Service accumulation shall be accomplished by operation of an engine on a dynamometer.

(a) Emission data engines: Each engine shall be operated on a dynamometer for 125 hours with the dynamometer and engine adjusted so that the engine is operating at 95–100 percent of rated speed and at least 95 percent of maximum rated horsepower. During such operation, the engine shall be run at the exhaust back pressure specified in § 85.874–12(c) and the air inlet restriction specified in § 85.874–12(d) except that the tolerances shall be ±0.5 inch of Hg and ±3 inches of water respectively. Exhaust emission tests shall be conducted at zero and 125 hours of operation.

(b) Durability data engines: Each engine shall be operated on a dynamometer for 1,000 hours with the dynamometer and engine adjusted so that the engine is operating at 95–100 percent of rated speed and at least 95 percent of maximum rated horsepower. During such operation, the engine shall be run at the exhaust back pressure specified in § 85.874–12(c) and the air inlet restriction specified in § 85.874–12(d) except that the tolerances shall be ±0.5 inch of Hg and ±3 inches of water respectively. Exhaust emission measurements shall be made at zero hours and at each 125 hours of operation. All results except the zero-hour results shall be used to establish the deterioration factors (see § 85.874–19).

(c) A break-in procedure, not to exceed 20 hours, may be run if approved in writing in advance by the Administrator. This procedure would be run after the zero-hour test; and the hours accumulated would not be counted as part of the service accumulation.

(d) All tests required by this subpart to be conducted after 125 hours of dynamometer operation or at any multiple of 125 hours may be conducted at any accumulated hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(e) The results of each emission test shall be supplied to the Administrator immediately after the test. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.874–4.

(f) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero-hour test data to the Administrator and make the engine available for such testing under § 85.874–29 as the Administrator may require before beginning to accumulate hours on the engine. Failure to comply with this requirement shall invalidate all test data submitted for this engine.

(g) Once a manufacturer begins to operate an emission data or durability data engine, as indicated by compliance with paragraph (e) of this section, he shall continue to run the engine to 125 hours or 1,000 hours, respectively, and the data from the engine shall be used in the calculations under § 85.874–19. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(h) (1) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases, the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(2) The test procedures (§ 85.874–9 through § 85.874–18) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(3) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(i) All emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all test procedures in this subpart.

§ 85.874–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.874–9 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standard set forth in § 85.874–1.

(a) The test consists of a prescribed sequence of engine operating conditions on an engine dynamometer with continuous examination of the exhaust gases. The test is applicable equally to controlled engines equipped with means for preventing, controlling, or eliminating smoke emissions and to uncontrolled engines.

(b) The test is designed to determine the opacity of smoke in exhaust emissions during those engine operating conditions which tend to promote smoke from diesel-powered vehicles.

(c) The test procedure begins with a warm engine which is then run through preloading and preconditioning operations. After an idling period, the engine is operated through acceleration and lugging modes during which smoke emission measurements are made to compare with the standards. The engine is then returned to the idle condition and the acceleration and lugging modes are repeated. Three sequences of acceleration and lugging constitute the full set of operating conditions for smoke emission measurement.

(d) All emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all test procedures in this subpart.

(d) The type fuel, including additive and other specifications, used under paragraphs (b) and (c) of this section shall be reported in accordance with § 85.874–2(b)(3).

§ 85.874–11 Dynamometer operation cycle for smoke emission tests.

(a) The following sequence of operations shall be performed during engine dynamometer testing of smoke emissions, starting with the dynamometer preloading determined and the engine preconditioned (§ 85.874–16(c)).

(1) *Idle mode.* The engine is caused to idle for 5 to 5.5 minutes at the manufacturer's recommended low idle speed. The dynamometer controls shall be set to provide minimum load by turning the load switch to the "off" position or by adjusting the controls to the minimum load position.

(2) *Acceleration mode.* (i) The engine speed shall be increased to 200±50 r.p.m. above the manufacturer's recommended low idle speed within 3 seconds.

(ii) The engine shall be accelerated at full-throttle against the inertia of the engine and dynamometer or alternately against a preselected dynamometer load such that the engine speed reaches 85 to 90 percent of rated speed in 5±1.5 seconds. This acceleration shall be linear within ±100 r.p.m.

(iii) When the engine reaches the speed required in subdivision (ii) of this subparagraph, the throttle shall be moved rapidly to the closed position and the preselected load required to perform the acceleration in subdivision (iv) of this subparagraph shall be applied. The engine speed shall be reduced to the speed of maximum rated torque or 60 percent of rated speed (whichever is higher), within ±50 r.p.m. Smoke emissions during this transitional mode are not used in determining smoke emissions to compare with the standard.

(iv) The throttle shall be moved rapidly to the full-throttle position and the engine accelerated against the preselected dynamometer load such that the engine speed reaches 95 to 100 percent of rated speed in 10±2 seconds.

§ 85.874–10 Diesel fuel specifications.

(a) The diesel fuels employed shall be clean and bright, with pour and cloud points adequate for operability. The fuels may contain nonmetallic additives as follows: cetane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(b) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emission testing. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D," shall be used.

(3) *Lugging mode.* (i) Proceeding

(4) Turn on purge air to the optical unit of the smokemeter, if purge air is

§ 85.874–28 Compliance with emission standards.

XUM
V37-221 NOV 15 72 XUM

(3) *Lugging mode.* (i) Proceeding from the acceleration mode, the dynamometer controls shall be adjusted to permit the engine to develop maximum horsepower at rated speed. Smoke emissions during this transitional mode are not used in determining smoke emissions to compare with the standard.

(ii) Without changing the throttle position, the dynamometer controls shall be adjusted gradually to slow the engine to the speed of maximum torque or to 60 percent of rated speed, whichever is higher. This engine lugging operation shall be performed smoothly over a period of 35±5 seconds. The rate of slowing of the engine shall be linear, within ±100 r.p.m.

(4) *Engine unloading.* After completion of the lugging mode in subparagraph (3)(ii) of this paragraph, the dynamometer and engine shall be returned to the idle condition described in subparagraph (1) of this paragraph.

(b) The procedures described in paragraph (a) (1) through (4) of this section shall be repeated until the entire cycle has been run three times.

§ 85.874–12 Dynamometer and engine equipment.

The following equipment shall be used for smoke emission testing of engines on engine dynamometers.

(a) An engine dynamometer with adequate characteristics to perform the test cycle described in §85.874–10.

(b) An engine cooling system having sufficient capacity to maintain the engine at normal operating temperatures during conduct of the prescribed engine tests.

(c) A noninsulated exhaust system extending 15±5 feet from the exhaust manifold, or the crossover junction in the case of Vee engines, and presenting an exhaust back pressure within ±0.2 inch Hg. of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during smoke emission testing. The terminal 2 feet of the exhaust pipe shall be circular cross section and be free of elbows and bends. The end of the pipe shall be cut off squarely. The terminal 2 feet of the exhaust pipe shall have a diameter in accordance with the engine being tested, as specified below:

Maximum rated horsepower:	*Exhaust pipe diameter (inches)*
Less than 101	2
101–200	3
201–300	4
301 or more	5

(d) An engine air inlet system presenting an air inlet restriction within ±1 inch of water of the upper limit for the engine operating condition which results in maximum air flow, as established by the engine manufacturer in his sales and service literature, for the engine being tested.

§ 85.874–13 Smoke measurement system.

(a) *Schematic drawing.* The following figure (fig. I874–1) is a schematic drawing of the optical system of the light extinction meter.

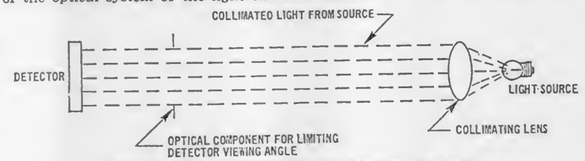

FIGURE I874–1.—EPA smokemeter optical system (schematic).

(b) *Equipment.* The following equipment shall be used in the system:

(1) Adapter—the smokemeter optical unit may be mounted on a fixed or movable frame. The normal unrestricted shape of the exhaust plume shall not be modified by the adapter, the meter, or any ventilation system used to remove the exhaust from the test site.

(2) Smokemeter (light extinction meter)—continuous recording, full-flow light obscuration meter. It shall be positioned near the end of the exhaust pipe so that a built-in light beam traverses the exhaust smoke plume which issues from the pipe at right angles to the axis of the plume. The light source is an incandescent lamp operated at a constant voltage of not less than 15 percent of the manufacturer's specified voltage. The lamp output is collimated to a beam with a nominal diameter of 1.125 inches. The angle of divergence of the collimated beam shall be within 4° included angle. A light detector, directly opposed to the light source, measures the amount of light blocked by the smoke in the exhaust. The detector sensitivity is restricted to the visual range and comparable to that of the human eye. A collimating tube with apertures equal to the beam diameter is attached to the detector. It restricts the viewing angle of the detector to within 16° included angle. An amplified signal corresponding to the amount of light blocked is recorded continuously on a remote recorder. An air curtain across the light source and detector window assemblies may be used to minimize deposition of smoke particles on those surfaces provided that it does not measurably affect the opacity of the plume. The meter consists of two units, an optical unit and a remote control unit. Light extinction meters employing substantially identical measurement principles and producing substantially equivalent results but which employ other electronic and optical techniques may be used only after having been approved in advance by the Administrator.

(3) Recorder—a continuous recorder, with variable chart speed over a minimal range of 0.5 to 8.0 inches per minute (or equivalent) and an automatic marker indicating 1-second intervals shall be used for continuously recording the transient conditions of exhaust gas opacity, engine r.p.m. and torque. The recorder scale for opacity shall be linear and calibrated to read from 0 to 100 percent opacity full scale. The opacity trace shall have a resolution within 1 percent opacity. The recorder scale for engine r.p.m. and the recorder scale for observed engine torque shall be linear and shall have full scale calibration such as to facilitate chart reading. The r.p.m. trace shall have a resolution within 30 r.p.m. The torque trace shall have a resolution within 10 lb.-ft. Any means other than strip chart recorder may be used provided it produces a permanent visual data record of quality equal to or better than that described above.

(4) The recorder used with the smokemeter shall be capable of full-scale deflection in 0.5 second or less. The smokemeter-recorder combination may be damped so that signals with a frequency higher than 10 cycles per second are attenuated. A separate low-pass electronic filter with the following performance characteristics may be installed between the smokemeter and the recorder to achieve the high-frequency attenuation.

(i) 3 decibel point—10 cycles per second.

(ii) Insertion loss-zero ±0.5 decibels.

(iii) Selectivity—12 decibels per octave above 10 cycles per second.

(iv) Attenuation—27 decibles down at 40 cycles per second minimum.

(c) *Assembling equipment.* (1) The optical unit of the smokemeter shall be mounted radially to the exhaust pipe so that the measurement will be made at right angles to the axis of the exhaust plume. The distance from the optical centerline to the exhaust pipe outlet shall be 5±1 inch. The full flow of the exhaust stream shall be centered between the source and detector apertures (or windows and lenses) and on the axis of the light beam.

(2) Power shall be supplied to the control unit of the smokemeter in time to allow at least 15 minutes for stabilization prior to testing.

§ 85.874–14 Information to be recorded.

The following information shall be recorded with respect to each test:

(a) Test number.
(b) Date and time of day.
(c) Instrument operator.
(d) Engine operator.
(e) Engine Identification numbers—Date of manufacture—Number of hours of operation accumulated on engine—Engine family—Exhaust pipe diameter—Fuel injector type—Maximum measured fuel rate at maximum measured torque and horsepower—Air aspiration system—Low idle r.p.m.—Maximum governed r.p.m.—Maximum measured horsepower at r.p.m.—Maximum measured torque at r.p.m.—Exhaust system back pressure—Air inlet restriction.

(f) Smokemeter: Number—Zero control setting—Calibration control setting—Gain.

(g) Recorder chart: Identify zero traces—Calibration traces—Idle traces—Acceleration and lug-down test traces—Start and finish of each test.

(h) Ambient temperature in dynamometer testing room.

(i) Engine intake air temperature and humidity.

(j) Barometric pressure.

(k) Observed engine torque.

§ 85.874–15 Instrument checks.

(a) The smokemeter shall be checked according to the following procedure prior to each test:

(1) The optical surfaces of the optical section shall be checked to verify that they are clean and free of foreign material and fingerprints.

(2) The zero control shall be adjusted under conditions of "no smoke" to give a recorder trace of zero.

(3) Calibrated neutral density filters having approximately 10, 20, and 40 percent opacity shall be employed to check the linearity of the instrument. The filter(s) shall be inserted in the light path perpendicular to the axis of the beam and adjacent to the opening from which the beam of light from the light source emanates, and the recorder response shall be noted. The nominal opacity value of the filter will be confirmed by the Administrator. Deviations in excess of 1 percent of the nominal opacity shall be corrected.

§ 85.874–16 Test run.

(a) The temperature of the air supplied to the engine shall be between 68° F. and 86° F. The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance will be made for possible increased smoke emissions because of such conditions.

(b) The governor and fuel system shall have been adjusted to provide engine performance at the levels specified by the engine manufacturer for maximum rated horsepower and maximum rated torque. These specifications shall be reported in accordance with § 85.874–2(b)(3).

(c) The following steps shall be taken for each test:

(1) Start cooling system.

(2) Starting with a warmed engine, determine by experimentation the dynamometer inertia and dynamometer load required to perform the acceleration in the dynamometer cycle for smoke emission tests (§ 85.874–11(a)(2)). In a manner appropriate for the dynamometer and controls being used, arrange to conduct the acceleration mode.

(3) Install smokemeter optical unit and connect it to the recorder. Connect the engine r.p.m. and torque sensing devices to the recorder.

(4) Turn on purge air to the optical unit of the smokemeter, if purge air is used.

(5) Check and record zero and span settings of the smokemeter recorder at a chart speed of approximately 1 inch per minute. (The optical unit shall be retracted from its position about the exhaust stream if the engine is left running.)

(6) Precondition the engine by operating it for 10 minutes at maximum rated horsepower.

(7) Proceed with the sequence of smoke emission measurements on the engine dynamometer as prescribed in § 85.874–11.

(8) During the test sequence of § 85.874–11, continuously record smoke measurements, engine r.p.m. and torque at a chart speed of 1 inch per minute minimum during the idle mode and transitional modes and 8 inches per minute minimum during the acceleration and lugging modes. The smokemeter zero and full scale recorder deflections may be rechecked during the idle mode of each test sequence. If either zero or full scale drift is in excess of 2 percent opacity, the smokemeter controls must be readjusted and the test must be repeated.

(9) Turn off engine.

(10) Check zero and reset if necessary and check span of the smokemeter recorder by inserting neutral density filters. If either zero or span drift is in excess of 2 percent opacity, the test results shall be invalidated.

§ 85.874–17 Chart reading.

(a) The following procedure shall be employed in reading the smokemeter recorder chart.

(1) Locate the acceleration mode (§ 85.874–11(a)(2)) and the lugging mode (§ 85.874–11(a)(3)) on the chart. Divide each mode into ½-second intervals beginning at the start of each mode. Determine the average smoke reading during each ½-second interval except those recorded during the transitional portions of the acceleration mode (§ 85.874–11(a)(2)(iii)) and the lugging mode (§ 85.874–11(a)(3)(i)).

(2) Locate and record the 15 highest ½-second readings during the acceleration mode of each dynamometer cycle.

(3) Locate and record the five highest ½-second readings during the lugging mode of each dynamometer cycle.

(4) Examine the average ½-second values which were determined in paragraphs (2) and (3) above and record the three highest values for each dynamometer cycle.

§ 85.874–18 Calculations.

(a) Average the 45 readings in § 85.874–17(a)(2) and designate the value as "a".

(b) Average the 15 readings in § 85.874–17(a)(3) and designate the value as "b".

(c) Average the nine readings in § 85.874–17(a)(4) and designate the value as "c".

§§ 85.874–19—85.874–27 [Reserved]

§ 85.874–28 Compliance with emission standards.

(a) The emission standards in § 85.874–1 apply to the emissions of engines for their useful life.

(b) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance with exhaust smoke emission standards in heavy duty diesel engines is as follows:

(1) Emission deterioration factors for the acceleration mode (designated as "A"), the lugging mode (designated as "B"), and the peak opacity (designated as "C") shall be established separately for each engine-system combination.

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(a) All emission data from the tests required under § 85.874–7(b), except the zero-hour tests. This shall include the official test results, as determined in § 85.874–29, for all tests conducted on all durability engines of the combination selected under § 85.874–5(c) (including all engines selected to be operated by the manufacturer under § 85.874–5(c)(2)).

(b) All emission data from the tests conducted before and after the maintenance provided in § 85.874–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the hours on the system, rounded to the nearest hour, and the best fit-straight line, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1,000-hour points on this line must be within the standard provided in § 85.874–1 or the data shall not be used in calculation of a deterioration factor.

(iii) The deterioration factors will be calculated as follows:

A—Percent opacity "a," interpolated to 1,000 hours, minus percent opacity "a," interpolated to 125 hours.

B—Percent opacity "b," interpolated to 1,000 hours, minus percent opacity "b," interpolated to 125 hours.

C—Percent opacity "c," interpolated to 1,000 hours, minus percent opacity "c," interpolated to 125 hours.

(2) The "percent opacity" values to compare with the standards shall be the opacity values "a," "b," and "c" for each emission data engine within an engine-system combination to which are added the respective factors "A," "B," and "C" of subparagraph (1) of this paragraph for that engine-system combination: *Provided*, That if a deterioration factor as computed in subparagraph (1) of this paragraph is less than zero, that deterioration factor shall be zero for the purposes of this subparagraph.

(2) Every test engine of an engine family must comply with all applicable standards, as determined in subparagraph (2) of this paragraph, before any engine in that family will be certified.

§ 85.874–29 Testing by the Administrator.

§ 85.874–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b) (1) Whenever the Administrator conducts a test on a test engine, the results of that test shall comprise the official data for the engine at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause an engine to fail due to excessive 125-hour emissions or excessive deterioration, then the following procedure shall be observed:

(i) The manufacturer may request a retest. Before the retest, the engine may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.874–6. All work on the engine shall be done at such location and under such conditions as the Administrator may prescribe.

(ii) The engine will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test engine would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 85.874–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.874–29, the Administrator determines that a test engine(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such engine(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor engine covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b) (1) The Administrator will determine whether an engine covered by the application complies with applicable standards by observing the following relationships:

(i) A test engine selected under § 85.874–5(b) (2) or (4) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(ii) [Reserved]

(iii) A test engine selected under § 85.874–5(c)(1) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the engines belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.874–29, the Administrator determines that one or more test engines of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer, and shall include a statement specifying the manufacturer's objections to the Administrator's determination, and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.805 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.805, or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 85.874–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed, or

(iii) Modify the test engine and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.874–31 Separate certification.

Where possible, a manufacturer should include in a single application for certification all engines for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test engines and the computation of test results will be determined separately for each application.

§ 85.874–32 Addition of an engine after certification.

(a) If a manufacturer proposes to add to his product line an engine of the same engine-system combination as engines previously certified but which was not described in the application for certification when the test engine(s) representing other engines of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.874–34. This notification shall include a full description of the engine to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test engine(s) representing the engine to be added which would have been required if the engine had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 85.874–29, the Administrator determines that the test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test engine(s) does not meet applicable standards, he will proceed under § 85.874–30(b).

§ 85.874–33 Changes to an engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production engines in respect to any of the parameters listed in § 85.073–5(a)(3), giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.874–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the engine, as modified,

would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified engines, he will notify the manufacturer in writing. Except as provided in § 85.874–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified engines would not be covered by the certificate then in effect, then the modified engines shall be treated as additions to the product line subject to § 85.874–32.

§ 85.874–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of an engine under § 85.874–32 or a change in an engine under § 85.874–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce engines as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.874–32 (b) and (c), or § 85.874–33 (b) and (c) as appropriate.

(d) Election to produce engines under this section will be deemed to be a consent to recall all engines which the Administrator determines under § 85.874–32 (c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.874–35 Labeling.

(a) (1) The manufacturer of any heavy duty diesel engine subject to the standards prescribed in § 85.874–1 shall, at the time of manufacture, affix a permanent, legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such engines available for sale to the public and covered by a certificate of conformity under § 85.874–30(a).

(2) A plastic or metal label shall be welded, bonded, or otherwise permanently attached to the engine in a position in which it will be readily visible after installation in the vehicle.

(3) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(4) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(i) The label heading: Engine Exhaust Emission Control Information;

(ii) Full corporate name and trademark of manufacturer;

(iii) Engine family identification and model;

(iv) Date of engine manufacture (month and year);

(v) Engine specification:

Advertised hp.———— @ ———— r.p.m.
Fuel rate @ advertised hp.—— mm.³/stroke.
Valve lash ———————— (inches)
Initial injection timing (if adjustable) ——
————————.
(The information applicable to each engine is to be inserted on the appropriate line.)

(vi) The statement: This engine conforms to U.S. Environmental Protection Agency Regulations applicable to 1974 model year heavy duty diesel engines.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such engine conforms to any applicable State emission standards for new motor vehicle engines or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the engine.

(c) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine or vehicle part as applicable.

§ 85.874–36 [Reserved]

§ 85.874–37 Production engines.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production engines selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These engines shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) Any manufacturer obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

§ 85.874–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new motor vehicle engine subject to the standards prescribed in § 85.874–1, written instructions for the maintenance and use of the engine by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instructions required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.874–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.874–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.874–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the engine's emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

Subpart J—Engine Exhaust Gaseous Emission Regulations for New Diesel Heavy Duty Engines

§ 85.901 General applicability.

The provisions of this subpart are applicable to new diesel heavy duty engines beginning with the 1974 model year.

§ 85.902 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part A of title II of the Clean Air Act, 42 U.S.C. 1357 f–1 through f–7, as amended by Public Law 91–604.

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year: *Provided*, That if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

(4) "Gross vehicle weight" means the

(20) "Percent load" means the frac-

to enable such vehicle to conform to standards imposed by this subpart;

(e) (1) Hearings shall be conducted by the Presiding Officer in an informal

(2) A description of all emission control systems which are installed on or

(d) Every manufacturer of new motor vehicle engines subject to the standards

V37-221-NOV15-72 XUM

(4) "Gross vehicle weight" means the manufacturer's gross weight rating for the individual vehicle.

(5) "Heavy duty vehicle" means any motor vehicle either designed primarily for transportation of property and rated at more than 6,000 pounds GVW or designed primarily for transportation of persons and having a capacity of more than 12 persons.

(6) "Heavy duty engine" means any engine which the engine manufacturer could reasonably expect to be used for motive power in a heavy duty vehicle.

(7) "System" includes any motor vehicle engine modification which controls or causes the reduction of substances emitted from motor vehicle engines.

(8) "Engine family" means the basic classification unit of a manufacturer's product line used for the purpose of test fleet selection and determined in accordance with § 85.974–5(a).

(9) "Engine-system combination" means an engine family-exhaust emission control system-fuel evaporative emission control system (where applicable) combination.

(10) "Fuel system" means the combination of fuel tank, fuel pump, fuel lines, and carburetor, or fuel injection components, and includes all fuel system vents and fuel evaporative emission control systems.

(11) "Crankcase emissions" means airborne substances emitted to the atmosphere from any portion of the engine crankcase ventilation or lubrication systems.

(12) "Exhaust emissions" means substances emitted to the atmosphere from any opening downstream from the exhaust port of a motor vehicle engine.

(13) "Maximum rated horsepower" means the maximum brake horsepower output of an engine as stated by the manufacturer in his sales and service literature and his application for certification under § 85.874–2.

(14) "Rated speed" means the speed at which the manufacturer specifies the maximum rated horsepower of an engine.

(15) "Maximum rated torque" means the maximum torque produced by an engine as stated by the manufacturer in his sales and service literature and his application for certification under § 85.874–2.

(16) "Zero (O) hours" means that point after normal assembly line operations and adjustments and before one additional operating hour has been accumulated.

(17) "Oxides of Nitrogen" means the sum of the nitric oxide and nitrogen dioxide contained in a gas sample as if the nitric oxide were in the form of nitrogen dioxide.

(18) "Useful life" means a period of use of 5 years or 100,000 miles of vehicle operation or 3,000 hours of engine operation (or an equivalent period of 1,000 hours of dynamometer operation, whichever first occurs.

(19) "Peak torque speed" means the speed at which an engine develops maximum torque.

(20) "Percent load" means the fraction of the maximum available torque at an engine speed.

(21) "Intermediate speed" means the peak torque speed or 60 percent of rated speed, whichever is higher.

(22) "Military engine" means any engine manufactured solely for the Department of Defense to meet military specifications.

§ 85.903 Abbreviations.

The abbreviations used in this subpart have the following meanings in both capital and lower case:

ASTM—American Society for Testing and Materials.
BHP—Brake horsepower.
BSCO—Brake specific carbon monoxide.
BSHC—Brake specific hydrocarbons.
$BSNO_x$—Brake specific oxides of nitrogen.
CO—Carbon Monoxide.
Conc.—Concentration.
F—Fahrenheit.
GVW—Gross Vehicle Weight.
HC—Hydrocarbon(s).
Hg—Mercury.
HP.—Horsepower.
Hr.—Hour.
Lb.—Pound(s).
Min.—Minimum.
NO—Nitric Oxide.
NO_x—Oxides of Nitrogen.
R.p.m.—Revolutions per minute.
S.A.E.—Society of Automotive Engineers.
WF—Weighting factor.
°—Degrees.
%—Percent.
Σ—Summation.

§ 85.904 General standards: increase in emissions; unsafe conditions.

(a) (1) Every new motor vehicle engine manufactured for sale, sold, offered for sale, introduced or delivered for introduction into commerce, or imported into the United States for sale or resale which is subject to any of the standards prescribed in this subpart shall be covered by a certificate of conformity issued pursuant to § 85.974–2 through § 85.974–4 and § 85.974–29 and § 85.974–34 of this subpart.

(2) No heavy duty vehicle manufacturer shall take any of the actions specified in section 203(a)(1) of the Act with respect to any diesel-powered heavy duty vehicle which uses an engine which has not been certified as meeting applicable standards. Such manufacturer shall provide to the Administrator prior to the beginning of each model year a statement signed by an authorized representative which includes the following information:

(i) A description of the vehicles which will be produced subject to this section;

(ii) Identification of the engines used in the vehicles;

(iii) Projected sales data on each vehicle-engine combination;

(iv) A statement that the engines will not be modified by the vehicle manufacturer or a detailed specification of any changes which will be made. Changes made solely for the purpose of mounting an engine in a vehicle need not be included.

(b) (1) Any system installed on or incorporated in a new motor vehicle engine to enable such vehicle to conform to standards imposed by this subpart:

(i) Shall not in its operation or function cause the emission into the ambient air of any noxious or toxic substance that would not be emitted in the operation of such engine without such system, except as specifically permitted by regulation; and

(ii) Shall not in its operation, function, or malfunction result in any unsafe condition endangering the motor vehicle, its occupants, or persons or property in close proximity to the vehicle.

(2) Every manufacturer of new motor vehicle engines subject to any of the standards imposed by this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with good engineering practice to ascertain that such test engines will meet the requirements of this section for the useful life of the engine.

§ 85.905 Hearings on certification.

(a) (1) After granting a request for a hearing under § 85.974–30, the Administrator will designate a Presiding Officer for the hearing.

(2) The General Counsel will represent the Environmental Protection Agency in any hearing under this section.

(3) If a time and place for the hearing have not been fixed by the Administrator under § 85.974–30, the hearing shall be held as soon as practicable at a time and place fixed by the Administrator or by the Presiding Officer.

(b) (1) Upon his appointment pursuant to paragraph (a) of this section, the Presiding Officer will establish a hearing file. The file shall consist of the notice issued by the Administrator under § 85.974–30, together with any accompanying material, the request for a hearing and the supporting data submitted therewith and all documents relating to the request for certification, including the application for certification and all documents submitted therewith, and correspondence and other data material to the hearing.

(2) The appeal file will be available for inspection by the applicant at the office of the Presiding Officer.

(c) An applicant may appear in person, or may be represented by counsel or by any other duly authorized representative.

(d) (1) The Presiding Officer upon the request of any party, or in his discretion, may arrange for a prehearing conference at a time and place specified by him to consider the following:

(i) Simplification of the issues;

(ii) Stipulations, admissions of fact, and the introduction of documents;

(iii) Limitation of the number of expert witnesses;

(iv) Possibility of agreement disposing of all or any of the issues in dispute;

(v) Such other matters as may aid in the disposition of the hearing, including such additional tests as may be agreed upon by the parties.

(2) The results of the conference shall be reduced to writing by the Presiding Officer and made part of the record.

(e) (1) Hearings shall be conducted by the Presiding Officer in an informal but orderly and expeditious manner. The parties may offer oral or written evidence, subject to the exclusion by the Presiding Officer of irrelevant, immaterial, and repetitious evidence.

(2) Witnesses will not be required to testify under oath. However, the Presiding Officer shall call to the attention of witnesses that their statements may be subject to the provisions of title18 U.S.C. 1001 which imposes penalties for knowingly making false statements or representations, or using false documents in any matter within the jurisdiction of any department or agency of the United States.

(3) Any witness may be examined or cross-examined by the Presiding Officer, the parties, or their representatives.

(4) Hearings shall be reported verbatim. Copies of transcripts of proceedings may be purchased by the applicant from the reporter.

(5) All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall, upon a showing satisfactory to the Presiding Officer of their authenticity, relevancy, and materiality, be received in evidence and shall constitute a part of the record.

(6) Oral argument may be permitted in the discretion of the Presiding Officer and shall be reported as part of the record unless otherwise ordered by him.

(f) (1) The Presiding Officer shall make an initial decision which shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law or discretion presented on the record. The findings, conclusions, and written decision shall be provided to the parties and made a part of the record. The initial decision shall become the decision of the Administrator without further proceedings unless there is an appeal to the Administrator or motion for review by the Administrator within 20 days of the date the initial decision was filed.

(2) On appeal from or review of the initial decision the Administrator shall have all the powers which he would have in making the initial decision including the discretion to require or allow briefs, oral argument, the taking of additional evidence or the remanding to the Presiding Officer for additional proceedings. The decision by the Administrator shall include written findings and conclusions and the reasons or basis therefor on all the material issues of fact, law, or discretion presented on the appeal or considered in the review.

§ 85.906 Maintenance of records; submittal of information; right of entry.

(a) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall establish and maintain the following adequately organized and indexed records:

(1) Identification and description of all engines for which testing is required under this subpart.

(2) A description of all emission control systems which are installed on or incorporated in each engine.

(3) A description of the procedures used to test such engines.

(4) Test data on each emission data engine which will show its emissions at 0 and 125 hours.

(5) Test data on each durability engine which will show the performace of the systems installed on or incorporated in the engine during extended operation, as well as a record of all pertinent maintenance performed on the engine.

(b) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall submit to the Administrator at the time of issuance by the manufacturer copies of all instructions or explanations regarding the use, repair, adjustment, maintenance, or testing of such engine relevant to the control of exhaust emissions issued by the manufacturer for use by other manufacturers, assembly plants, distributors, dealers, and ultimate purchasers: *Provided*, That any material not translated in the English language need not be submitted unless specifically requested by the Administrator.

(c) The manufacturer of any new motor vehicle engine subject to any of the standards prescribed in this subpart shall permit officers or employees duly designated by the Administrator, upon presenting appropriate credentials and a written notice to the manufacturer:

(1) To enter, at reasonable times, any premises used during the certification procedure for purposes of monitoring tests and service accumulation procedures, observing maintenance procedures and verifying correlation or calibration of test equipment, or

(2) To inspect, at reasonable times, records, files, and papers compiled by such manufacturer in accordance with paragraph (a) of this section.

A separate notice shall be given for each such inspection, but a separate notice shall not be required for each entry made during the period covered by the inspection. Each such inspection shall be commenced and completed with reasonable promptness.

§ 85.974–1 Exhaust gaseous emission standards for 1974 model year engines.

(a) (1) Exhaust gaseous emissions from new heavy duty diesel engines shall not exceed:

(i) *Hydrocarbons plus oxides of nitrogen* (as NO_2).—16 grams per brake horsepower hour.

(ii) *Carbon monoxide.*—40 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a) of this section refer to exhaust gaseous emissions generated under the conditions set forth in § 85.974–9 through § 85.974–18 and measured and calculated in accordance with those procedures.

(b) [Reserved]

(c) [Reserved]

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a)(1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in § 85.974–9 through § 85.974–18 to ascertain that such test engines meet the requirements of paragraph (a) of this section.

§ 85.974–2 Application for certification.

(a) An application for a certificate of conformity to the regulations applicable to any new motor vehicle engine shall be made to the Administrator by the manufacturer.

(b) The application shall be in writing, signed by an authorized representative of the manufacturer, and shall include the following:

(1) Identification and description of the engines covered by the application and a description of their emission control systems.

(2) Projected U.S. sales data sufficient to enable the Administrator to select a test fleet representative of the engines for which certification is requested.

(3) A description of the test equipment and fuel proposed to be used.

(4) A description of the proposed service accumulation procedure for durability testing.

(5) A statement of recommended maintenance and procedures necessary to assure that the engines covered by a certificate of conformity in operation conform to the regulations, and a description of the program for training of personnel for such maintenance, and the equipment required.

(6) At the option of the manufacturer, the proposed composition of the emission data and durability data test fleet.

§ 85.974–3 Approval of procedure and equipment; test fleet selections.

Based upon the information provided in the application for certification, and any other information the Administrator may require, the Administrator will approve or disapprove in whole or in part the service accumulation procedure and equipment and fuel proposed by the manufacturer, and notify him in writing of such determination. Where any part of a proposal is disaporoved, such notification will specify the reasons for disapproval. The Administrator will select a test fleet in accordance with § 85.974–5.

§ 85.974–4 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such engines tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the engine for extended operation, as well as a record of all pertinent maintenance performed on the test engines.

(b) Emission data on such engines tested in accordance with the applicable test procedures of this subpart, and in such numbers as therein specified, which will show the performance of the systems installed on or incorporated in the engine for extended operation, as well as a record of all pertinent maintenance performed on the test engines.

(c) Such other information as may be required by the Administrator to determine whether the engines may be expected to meet the requirements of this subpart during their useful life.

(d) All records, reports or information required by or submitted to the Administrator under this subpart shall be available during normal business hours for inspection by the Administrator or his authorized representative, and the manufacturer shall make available to the Administrator or his authorized representative such records, reports or information upon his request.

§ 85.974–5 Test fleet selection.

(a) Prior to the production of engines for which certification is requested, the manufacturer shall select a test fleet representative of the engines for which certification is requested. The selection of the test fleet shall be made in accordance with good engineering practice for the purpose of establishing that the engines in production will meet the requirements of this subpart during their useful life.

(b) The Administrator may reject any engine selected by the manufacturer for testing if he determines that such engine does not meet the requirements of paragraph (a) of this section. In such case, the Administrator will notify the manufacturer in writing of his reasons for rejecting the engine. Such notification must be made within 30 days after selection of the engine by the manufacturer.

(c) If the Administrator rejects any engine selected by the manufacturer for testing, the manufacturer shall select another engine for testing.

§ 85.974–6 Maintenance of engines prior to testing.

(a) Engines which are to be tested to determine conformity with the regulations in this subpart may be subjected to service accumulation and maintenance only in accordance with the manufacturer's written instructions and procedures.

(b) Any maintenance, modification, purging, or preconditioning of test engines beyond that specified in this subpart must be approved in advance by the Administrator.

§ 85.974–7 Emission data engines.

(a) Engines which are to be tested to determine conformity with the regulations in this subpart shall be operated for a sufficient period of time to stabilize emission levels. The period shall be established by the manufacturer in accordance with good engineering practice unless otherwise specified by the Administrator.

(b) Engines using fuel meeting specifications approved by the Administrator, shall be used in exhaust emission testing.

(c) Engines which are to be tested shall be equipped with all components required to meet the applicable emission standards during normal operation. Components which are not operational during normal engine operation shall be adjusted to their normal operational mode during testing.

(d) Engines which are to be tested shall be equipped with instrumentation for measuring engine torque, speed, fuel consumption, and air consumption. Instrumentation for measuring engine torque, speed, fuel consumption, and air consumption shall be of a design and accuracy approved by the Administrator.

§ 85.974–8 Test engine dynamometer.

(a) The engine dynamometer shall be capable of controlling engine speed and load within the limits specified in § 85.974–9.

(b) The engine dynamometer shall be capable of controlling engine speed and load within the limits specified in § 85.974–9.

§ 85.974–9 Engine dynamometer test procedure.

(a) The engine dynamometer test procedure is the 13-mode steady-state test cycle specified in the Society of Automotive Engineers Recommended Practice, "Engine Exhaust Measurement Procedure—Diesel Engines," SAE J177a, dated November 1970.

(b) The determination of the intake air flow rate, exhaust gas flow rate, and fuel flow rate shall be made in accordance with the Society of Automotive Engineers Recommended Practice, "Measurement of Diesel Exhaust," dated November 1970.

(b) Emission data on such engines tested in accordance with the applicable emission test procedures of this subpart and in such numbers as therein specified, which will show their emissions after 0 hours and 125 hours of operation.

(c) A description of tests performed to ascertain compliance with the general standards in § 85.974–1 and the data derived from such tests.

(d) A statement that the test engines with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirement of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this subpart. If such statements cannot be made with respect to any engine tested, the engine shall be identified, and all pertinent test data relating thereto shall be supplied.

§ 85.974–5 Test engines.

The test engines selected for testing under § 85.874–5 shall be used as the test engines for this subpart. The engines may be tested with the test procedure in § 85.874 and the test procedure in § 85.-974–9 through § 85.974–18 consecutively at each test point irrespective of the requirements of § 85.874–19(b) and § 85.974–7(a).

§ 85.974–6 Maintenance.

(a) (1) Maintenance on the engines and fuel systems of durability engines may be performed only under the following provisions:

(i) One major engine servicing to manufacturer's specifications may be performed at 500 hours (±8 hours) of dynamometer operation. A major engine servicing shall be restricted to the following:

(a) Adjust low idle speed.
(b) Adjust valve lash if required.
(c) Adjust injector timing.
(d) Adjust governor.
(e) Clean and service injector tips.

(ii) Injectors may be changed if a persistent misfire is detected.

(iii) Normal engine lubrication services (engine oil change and oil filter, fuel filter, and air filter servicing and adjustment of drive belt tension and engine bolt torque, as required, will be allowed at manufacturer's recommended intervals.

(iv) Readjustment of the engine fuel rates may be performed only if there is a problem of dropping below 95 percent of maximum rated horsepower at 95–100 percent rated speed.

(v) Leaks in the fuel system, engine lubrication system and cooling system may be repaired.

(vi) Engine low-idle speed may be adjusted at the 125-hour test point.

(vii) Any other engine or fuel system maintenance or repair will be allowed only with the advance approval of the Administrator.

(2) Allowable maintenance on emission data engines shall be limited to the adjustment of engine low idle speed at the 125-hour test point, except that other maintenance or repair may be allowed with the advance approval of the Administrator.

(b) Complete emission tests (see § 85.974–10 through § 85.974–18) shall be run before and after any engine maintenance which may reasonably be expected to affect emissions. These test data shall be supplied to the Administrator immediately after the tests, along with a complete record of all pertinent maintenance, including an engineering report of any malfunction diagnosis and the corrective action taken. In addition, all test data and maintenance reports shall be compiled and provided to the Administrator in accordance with § 85.974–4.

(c) If the Administrator determines that maintenance or repairs performed have resulted in a substantial change to the engine-system combination, the engine shall not be used as a durability data engine.

§ 85.974–7 Service accumulation and emission measurements.

Service accumulation shall be accomplished by operation of an engine on a dynamometer.

(a) Emission data engines: Each engine shall be operated on a dynamometer for 125 hours with the dynamometer and engine adjusted so that the engine is operating at 95–100 percent of rated speed and at least 95 percent of maximum rated horsepower. During such operation, the engine shall be run at the exhaust back pressure specified in § 85.974–12(c) and the air inlet restriction specified in § 85.974–12(d) except that the tolerances shall be ±0.5 inches of Hg. and ±3 inches or water respectively. Exhaust smoke tests shall be conducted at zero and 125 hours of operation.

(b) Durability data engines: Each engine shall be operated on a dynamometer for 1,000 hours with the dynamometer and engine adjusted so that the engine is operating at 95–100 percent of rated speed and at least 95 percent of maximum rated horsepower. During such operation, the engine shall be run at the exhaust back pressure specified in § 85.974–12(c) and the air inlet restriction specified in § 85.974–12(d) except that the tolerances shall be ±0.5 inches of Hg. and ±3 inches of water respectively. Exhaust smoke measurements shall be made at zero hours and at each 125 hours of operation. All results except the zero hour results shall be used to establish the deterioration factors (see § 85.974–19).

(c) All tests required by this subpart to be conducted after 125 hours of dynamometer operation or at any multiple of 125 hours may be conducted at any accumulated hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(d) The result of each emission test shall be supplied to the Administrator immediately after the test. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 85.974–4.

(e) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide the zero hour test data to the Administrator and make the engine available for such testing under § 85.974–29 as the Administrator may require before beginning to accumulate hours on the engine. Failure to comply with this requirement shall invalidate all test data submitted for this engine.

(f) Once a manufacturer begins to operate an emission data or durability data engine, as indicated by compliance with paragraph (e) of this section, he shall continue to run the engine to 125 hours or 1,000 hours, respectively, and the data from the engine shall be used in the calculations under § 85.974–19. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(g) All emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all test procedures in this subpart.

§ 85.974–8 Special test procedures.

The Administrator may, on the basis of a written application therefor by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein.

§ 85.974–9 Test procedures.

The test procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standards set forth in § 85.974–1.

(a) The test procedure begins with a warm engine and consists of a prescribed sequence of engine operating conditions on an engine dynamometer with continuous examination of the exhaust gases.

(b) The test is designed to determine the brake-specific emissions of hydrocarbons, carbon monoxide and oxides of nitrogen when an engine is operated through a cycle which consists of three idle modes and five power modes at each of two speeds which span the typical operating range of diesel engines. The procedure requires the determination of the concentration of each pollutant, the exhaust flow and the power output during each mode. The measured values are weighted and used to calculate the grams of each pollutant emitted per brake-horsepower hour.

(c) When an engine is tested for exhaust emissions or is operated for durability testing on an engine dynamometer, the complete engine shall be tested with all standard accessories which might reasonably be expected to influence emissions to the atmosphere installed and functioning.

§ 85.974–10 Diesel fuel specifications.

(a) The diesel fuels employed shall be clean and bright, with pour and cloud points adequate for operability. The fuels may contain nonmetallic additives as follows: cetane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(b) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emission testing. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test method No.	Type 1–D	Type 2–D
Cetane	D 613	48–54	42–50
Distillation range	D 86		
IBP, °F		330–390	340–400
10 percent point, °F		370–430	400–460
50 percent point, °F		410–480	470–540
90 percent point, °F		460–520	550–610
EP, °F		500–560	580–660
Gravity, ° API	D 287	40–44	33–37
Total sulfur, percent	D 129 or D 2622	0.05–0.20	0.2–0.5
Hydrocarbon composition	D 1319		
Aromatics, percent		8–15	27 (Min.)
Paraffins, Naphthenes, Olefins		Remainder	Remainder
Flash point, °F (Min.)	D 93	120	130
Viscosity, centistokes	D 445	1.6–2.0	2.0–3.2

(c) Fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in service accumulation. The grade of fuel recommended by the engine manufacturer, commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM test method No.	Type 1–D	Type 2–D
Cetane	D 613	48–54	42–55
Distillation range	D 86		
IBP, °F		330–390	340–410
10 percent point, °F		370–430	400–470
50 percent point, °F		410–480	470–540
90 percent point, °F		460–520	550–610
EP, °F		500–560	580–660
Gravity, °API	D 287	40–44	33–40
Total sulfur, percent	D 129 or D 2622	0.05–0.20	0.2–0.5
Flash point, °F (Min.)	D 93	120	130
Viscosity, centistokes	D 445	1.6–2.0	2.0–3.2

(d) The type fuel, including additive and other specifications, used under paragraphs (b) and (c) of this section shall be reported in accordance with § 85.974–2(b)(3).

§ 85.974–11 Dynamometer procedure.

(a) The following 13 mode cycle shall be followed in dynamometer operation tests of heavy-duty diesel engines:

Mode No.	Engine speed	Percent load
1	Low idle	0
2	Intermediate	2
3	do	25
4	do	50
5	do	75
6	do	100
7	Low idle	0
8	Rated	100
9	do	75
10	do	50
11	do	25
12	do	2
13	Low idle	0

(b) During each mode the specified speed shall be held to within 50 r.p.m. and the specified torque shall be held to within 2 percent of the maximum torque at the test speed. For example, the torque for mode 4 shall be between 48 and 52 percent of the maximum torque measured at the intermediate speed.

§ 85.974–12 Dynamometer and engine equipment.

The following equipment shall be used for emission testing of engines on engine dynamometers:

(a) An engine dynamometer with adequate characteristics to perform the test cycle described in § 85.974–11.

(b) An engine cooling system having sufficient capacity to maintain the engine at normal operating temperatures during conduct of the prescribed engine tests.

(c) A noninsulated exhaust system extending 15±5 feet from the exhaust manifold, or the crossover junction in the case of Vee engines, and presenting an exhaust back pressure within ±0.2 inch Hg. of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during emission testing.

(d) An engine air inlet system presenting an air inlet restriction within ±1 inch of water of the upper limit for the engine operating condition which results in maximum airflow, as established by the engine manufacturer in his sales and service literature, for the engine being tested.

§ 85.974–13 Sampling and analytical methods.

(a) The determination of the carbon monoxide and nitric oxide concentrations shall be accomplished using sampling and analysis components as specified in sections 2.1 and 2.2 of SAE Recommended Practice No. J177 titled, "Measurement of Carbon Dioxide, Carbon Monoxide and Oxides of Nitrogen in Diesel Exhaust," dated June 1970.

(b) The determination of the hydrocarbon concentrations shall be accomplished using sampling and analysis components as specified in sections 2.1 and 2.2 of SAE Recommended Practice No. J215 titled, "Continuous Hydrocarbon Analysis of Diesel Exhaust," dated November 1970.

(c) The determination of the intake airflow or exhaust flow shall be accomplished using SAE Recommended Practice No. J244 titled, "The Measurement of Intake or Exhaust Flow in Diesel Engines," dated May 1971.

§ 85.974–14 Information.

The following information shall be recorded:

(a) Test number.
(b) Date and time of day.
(c) Instrument operator.
(d) Engine operator.
(e) Engine identification numbers—date of manufacture—number of hours of operation accumulated on engine—engine family—exhaust pipe diameter—fuel injector type—low idle r.p.m., governed speed, maximum power and torque speeds—maximum horsepower and torque—fuel consumption at maximum power and torque—air aspiration system—exhaust system back pressure—air inlet restriction.
(f) All pertinent instrument information such as tuning—gain—serial numbers—detector numbers—range.
(g) Recorder chart. Identify zero traces—calibration or span traces—emission concentration traces for each test mode—start and finish of each test.
(h) Ambient temperature in dynamometer testing room.
(i) Engine intake air temperature and humidity for each mode.
(j) Barometric pressure.
(k) Observed engine torque for each mode.
(l) Intake airflow or exhaust flow for each mode.
(m) Fuel flow and temperature for each mode.

§ 85.974–15 Calibration and instrument checks.

Calibration and instrument checks shall be performed according to section 2.3.1 of SAE Recommended Practice No. J177, dated June 1970, and sections 3 and 7 of SAE Recommended Practice No. J215, dated November 1970, except that the instrument zeros need not be checked after each analysis but as necessary to maintain test validity. Calibration and checks of other instruments used for the test shall be performed as necessary according to good practice.

§ 85.974–16 Test run.

(a) The temperature of the air supplied to the engine shall be between 68° F. and 86° F. The fuel temperature at the pump inlet shall be 100° F. ±10° F. The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance shall be made for increased emissions because of such conditions.

(b) The governor and fuel system shall have been adjusted to provide engine performance at the levels specified by the engine manufacturer for maximum rated horsepower and maximum rated torque. These specifications

shall be reported in accordance with

Where H is the humidity of the inlet air

not be used in calculation of a deteriora-

and under such conditions as the Administrator may prescribe.

objections. If, after a review of the request and supporting data, the Admin-

amended accordingly. If the Administrator determines that the test engine(s)

XUM
V37-221-NOV15-72-XUM

shall be reported in accordance with § 85.974–2(b)(3).

(c) The following steps shall be taken for each test:

(1) Install instrumentation and sample probes as required.

(2) Start cooling system.

(3) Start the engine, warm it up and precondition it by running it at rated speed and maximum horsepower for 10 minutes or until all temperatures and pressures have reached equilibrium.

(4) Determine by experimentation the maximum torque at rated speed and intermediate speed to calculate the torque values for the specified test modes.

(5) Zero and span the emission analyzers.

(6) Start the test sequence of § 85.974–11. Operate the engine for 10 minutes in each mode, completing engine speed and load changes in the first minute. Record the responses of the analyzers on a strip chart recorder for the full 10 minutes with exhaust gas flowing through the analyzers at least during the last 5 minutes. Record the engine speed and load, intake air temperature and restriction, exhaust back pressure, fuel flow and air or exhaust flow during the last 5 minutes of each mode, making certain that the speed and load requirements of § 85.974–11(b) are met during the last minute of each mode. Fuel flow during idle or 2 percent load conditions may be determined just prior to or immediately following the dynamometer sequence if longer times are required for accurate measurements.

(7) Read and record any additional data as required for § 85.974–14.

(8) Check and reset the zero and span settings of the emission analyzers as required, but at least at the end of the second idle mode (mode No. 7) and at the end of the test. If a change of over 2 percent of full-scale response is observed, make necessary adjustments to the analyzers and repeat all test modes since the last zero and span check.

(9) Backflush condensate trap and replace filters as required.

§ 85.974–17 Chart reading.

(a) Locate the last 60 seconds of each mode and determine the average chart reading for HC, CO, and NO over the 1-minute period.

(b) Determine the concentration of HC, CO, NO during each mode from the average chart readings and the corresponding calibration data.

§ 85.974–18 Calculations.

The final reported test results shall be derived through the following steps:

(a) Determine the exhaust gas mass-flow rate for each mode according to the SAE Recommended Practice J244 dated May 1971.

(b) Convert the measured carbon monoxide and nitric oxide concentrations to a wet basis according to sections 4 and 5.4 of SAE Recommended Practice No. J177 (See § 85.974–13(a)).

(c) Multiply the corrected nitric oxide values by the following humidity correction factor.

$$\frac{1}{1-0.0025\,(H-75)}$$

Where H is the humidity of the inlet air measured as grains of H_2O per pound of dry air.

(d) Calculate the mass emissions of HC (HC_{mass}), CO (CO_{mass}), and NO_x ($NO_{x\,mass}$) in grams per hour for each mode as follows:

(1) $HC_{mass} = 0.0132 \times HC_{conc} \times$ exhaust mass (lb./min.).

(2) $CO_{mass} = 0.0263 \times CO_{conc} \times$ exhaust mass (lb. min.).

(3) $NO_{x_{mass}} = 0.0432 \times NO_{conc} \times$ exhaust mass (lb./min.).

(e) Calculate the weighted brake horsepower and HC, CO, and $NO_{x\,mass}$ values as follows:

(1) Multiply the average of the three idle values by a weighting factor of 0.2.

(2) Multiply the values for all of the other modes by a weighting factor of 0.08.

(f) Calculate the brake specific emissions for HC, CO, and NO_x for each set of data as follows:

$$BSHC = \frac{\Sigma(HC_{mass} \times WF)}{\Sigma(\text{Measured } BHP \times WF)}$$

$$BSCO = \frac{\Sigma(CO_{mass} \times WF)}{\Sigma(\text{Measured } BHP \times WF)}$$

$$BSNO_x = \frac{\Sigma(NO_{x_{mass}} \times WF)}{\Sigma(\text{Measured } BHP \times WF)}$$

§§ 85.974–19—85.974–27 [Reserved]

§ 85.974–28 Compliance with emission standards.

(a) The exhaust gaseous emission standards in § 85.974–1 apply to the emissions of engines for their useful life.

(b) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of an engine which has accumulated 1,000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(c) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(1) Separate emission deterioration factors shall be determined from the emission results of the durability data engines for each engine-system combination. Separate factors shall be established for CO and for the combined emissions of HC and NO_x.

(i) The applicable results to be used in determining the deterioration factors for each combination shall be:

(*a*) All emission data from the tests required under § 85.874(b) except the zero-hour tests. This shall include the official test results, as determined in § 85.974–29, for all tests conducted on all durability engines of the combination selected under § 85.874–5(c) (including all engines selected to be operated by the manufacturer under § 85.874–5(c)(2)).

(*b*) All emission data from the tests conducted before and after the maintenance provided in § 85.874–6(a)(1)(i).

(ii) All applicable results shall be plotted as a function of the hours on the system, rounded to the nearest hour, and the best fit straight line, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125- and 1,000-hour points on this line must be within the standard provided in § 85.974–1 or the data shall not be used in calculation of a deterioration factor.

(iii) An exhaust emission deterioration factor shall be calculated for each combination as follows:

factor = exhaust emissions interpolated to 1000 hours minus the exhaust emissions interpolated to 125 hours.

(2) The appropriate deterioration factor shall be added to the exhaust emissions test results for each emission data engine: *Provided*, That if a deterioration factor as computed in subparagraph (1) of this paragraph is negative, that deterioration factor shall be zero when comparing adjusted emissions to the standards.

(3) The emissions to compare with the standard shall be the adjusted emissions of subparagraph (2) of this paragraph for each emission data engine.

(4) Every test engine of an engine family must comply with all applicable standards, as determined in subparagraph (3) of this paragraph, before any engine in that family will be certified.

§ 85.974–29 Testing by the Administrator.

(a) The Administrator may require that any one or more of the test engines be submitted to him, at such place or places as he may designate, for the purpose of conducting emissions tests. The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment specified by the Administrator shall be made available by the manufacturer for test operations. Any testing conducted at a manufacturer's facility pursuant to this paragraph shall be scheduled by the manufacturer as promptly as possible.

(b)(1) Whenever the Administrator conducts a test on a test engine, the results of that test shall comprise the official data for the engine at that prescribed test point.

(2) Whenever the Administrator does not conduct a test on a test engine at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided*, That if the Administrator makes a determination based on testing under paragraph (a) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer.

(3) If the Administrator determines that the test data developed under paragraph (a) of this section would cause an engine to fail due to excessive 125-hour emissions or excessive deterioration, then the following procedure shall be observed:

(i) The manufacturer may request a retest. Before the retest, the engine may be adjusted to manufacturer's specifications, and parts may be replaced in accordance with § 85.974–6. All work on the engine shall be done at such location

and under such conditions as the Administrator may prescribe.

(ii) The engine will be retested by the Administrator and the results of this test shall comprise the official data for that prescribed test point.

(4) If sufficient durability data is not available, at the time of any emission test conducted under paragraph (a) of this section, to enable the Administrator to determine whether a test engine would fail, the manufacturer may request a retest in accordance with the provisions of subparagraph (3) (i) and (ii) of this paragraph. If the manufacturer does not promptly make such request, he shall be deemed to have waived the right to a retest. A request for retest must be made before the manufacturer removes the engine from the test premises.

§ 85.974–30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.974–29, the Administrator determines that a test engine(s) conforms to the regulations of this subpart, he will issue a certificate of conformity with respect to such engine(s).

(2) Such certificate will be issued for such period not more than 1 year as the Administrator may determine and upon such terms as he may deem necessary to assure that any new motor vehicle engine covered by the certificate will meet the requirements of these regulations relating to durability and performance.

(b)(1) The Administrator will determine whether an engine covered by the application complies with applicable standards by observing the following relationships:

(i) A test engine selected under § 85.974–5(b)(2) or (4) shall represent all engines in the same engine family of the same engine displacement-exhaust emission control system combination.

(ii) [Reserved]

(iii) A test engine selected under § 85.974–5(c)(1) shall represent all engines of the same engine-system combination.

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the engines belonging to an engine family all of which comply with applicable standards.

(3) If, after a review of the test reports and data submitted by the manufacturer and data derived from any additional testing conducted pursuant to § 85.974–29, the Administrator determines that one or more test engines of the certification test fleet do not meet applicable standards, he will notify the manufacturer in writing, setting forth the basis for his determination. Within 30 days following receipt of the notification, the manufacturer may request a hearing on the Administrator's determination. The request shall be in writing, signed by an authorized representative of the manufacturer and shall include a statement specifying the manufacturer's objections to the Administrator's determination, and data in support of such objections. If, after a review of the request and supporting data, the Administrator finds that the request raises a substantial factual issue, he shall provide the manufacturer a hearing in accordance with § 85.905 with respect to such issue.

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any engine family represented by a test engine(s) determined not in compliance with applicable standards:

(i) Request a hearing under § 85.905, or

(ii) Delete from the application for certification the engines represented by the failing test engine. (Engines so deleted may be included in a later request for certification under § 85.974–32.) The Administrator will then select in place of each failing engine an alternate engine chosen in accordance with selection criteria employed in selecting the engine that failed, or

(iii) Modify the test vehicle and demonstrate by testing that it meets applicable standards. Another engine which is in all material respects the same as the first engine, as modified, shall then be operated and tested in accordance with applicable test procedures.

(5) If the manufacturer does not request a hearing or present the required data under subparagraph (4) of this paragraph, the Administrator will deny certification.

§ 85.974–31 Separate certification.

Where possible a manufacturer should include in a single application for certification all engines for which certification is required. A manufacturer may, however, choose to apply separately for certification of part of his product line. The selection of test engines and the computation of test results will be determined separately for each application.

§ 85.974–32 Addition of an engine after certification.

(a) If a manufacturer proposes to add to his product line an engine of the same engine-system combination as engines previously certified but which was not described in the application for certification when the test engine(s) representing other engines of that combination was certified, he shall notify the Administrator. Such notification shall be in advance of the addition unless the manufacturer elects to follow the procedure described in § 85.974–34. This notification shall include a full description of the engine to be added.

(b) The Administrator may require the manufacturer to perform such tests on the test engine(s) representing the engine to be added which would have been required if the engine had been included in the original application for certification.

(c) If, after a review of the test reports and data submitted by the manufacturer, and data derived from any testing conducted under § 85.974–29, the Administrator determines that the test engine(s) meets all applicable standards, the appropriate certificate will be amended accordingly. If the Administrator determines that the test engine(s) does not meet applicable standards, he will proceed under § 85.974–30(b).

§ 85.974–33 Changes to an engine covered by certification.

(a) The manufacturer shall notify the Administrator of any change in production engines in respect to any of the parameters listed in § 85.073–5(a)(3), giving a full description of the change. Such notification shall be in advance of the change unless the manufacturer elects to follow the procedure described in § 85.974–34.

(b) Based upon the description of the change, and data derived from such testing as the Administrator may require or conduct, the Administrator will determine whether the engine, as modified, would still be covered by the certificate of conformity then in effect.

(c) If the Administrator determines that the outstanding certificate would cover the modified engines, he will notify the manufacturer in writing. Except as provided in § 85.974–34, the change may not be put into effect prior to the manufacturer's receiving this notification. If the Administrator determines that the modified engines would not be covered by the certificate then in effect, then the modified engines shall be treated as additions to the product line subject to § 85.974–32.

§ 85.974–34 Alternative procedure for notification of additions and changes.

(a) A manufacturer may, in lieu of notifying the Administrator in advance of an addition of an engine under § 85.974–32 or a change in an engine under § 85.974–33, notify him concurrently with the making of the change if the manufacturer believes the addition or change will not require any testing under the appropriate section. Upon notification to the Administrator, the manufacturer may proceed to put the addition or change into effect.

(b) The manufacturer may continue to produce engines as described in the notification to the Administrator for a maximum of 30 days, unless the Administrator grants an extension in writing. This period may be shortened by a notification in accordance with paragraph (c) of this section.

(c) If the Administrator determines, based upon a description of the addition or change, that no test data will be required, he will notify the manufacturer in writing of the acceptability of the addition or change. If the Administrator determines that test data will be required, he will notify the manufacturer to rescind the change within 5 days of receipt of the notification. The Administrator will then proceed as in § 85.974–32 (b) and (c), or § 85.974–33 (b) and (c) as appropriate.

(d) Election to produce engines under this section will be deemed to be a consent to recall all engines which the Administrator determines under § 85.974–32 (c) do not meet applicable standards, and to cause such nonconformity to be remedied at no expense to the owner.

§ 85.974–35 Labeling.

(a) (1) The manufacturer of any

appropriately equipped for operation on a chassis dynamometer.

new and used motor vehicles or engines manufactured after the effective date of

ported pursuant to 19 CFR 12.73(b)(5)(x) under a declaration that it is not

formity, and what modifications or testing, if any, are required to bring the

on this line must be within the standard provided in § 85.974–1 or the data shall

cordance with § 85.974–6. All work on the engine shall be done at such location

§ 85.974–35 Labeling.

(a) (1) The manufacturer of any heavy duty diesel engine subject to the standards prescribed in § 85.974–1 shall, at the time of manufacture, affix a permanent, legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such engines available for sale to the public and covered by a certificate of conformity under § 85.974–30(a).

(2) A plastic or metal label shall be welded, bonded, or otherwise permanently attached to the engine in a position in which it will be readily visible after installation in the vehicle.

(3) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(4) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(i) The label heading: Engine Exhaust Emission Control Information;

(ii) Full corporate name and trademark of manufacturer;

(iii) Engine family identification and model;

(iv) Date of engine manufacture (month and year);

(v) Engine specification:

Advertised hp. ------ @ ------ r.p.m.
Fuel rate @ advertised hp. ------ m.m.³/stroke.
Valve lash ------ (inches).
Initial injection timing (if adjustable) ------.
(The information applicable to each engine is to be inserted on the appropriate line.)

(vi) The statement: This Engine Conforms to U.S. Environmental Protection Agency Regulations Applicable to 1974 model year heavy duty diesel engines.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such engine conforms to any applicable State emission standards for new motor vehicle engines or any other information that such manufacturer deems necessary for, or useful to the proper operation and satisfactory maintenance of the engine.

(c) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine or vehicle part as applicable.

§ 85.974–36 [Reserved]

§ 85.974–37 Production engines.

(a) Any manufacturer obtaining certification under this subpart shall supply to the Administrator, upon his request, a reasonable number of production engines selected by the Administrator which are representative of the engines, emission control systems, fuel systems, and transmissions offered and typical of production models available for sale under the certificate. These engines shall be supplied for testing at such time and place and for such reasonable periods as the Administrator may require. Engines supplied under this paragraph may be required to be mounted in chassis and appropriately equipped for operation on a chassis dynamometer.

(b) Any manufacturer obtaining certification under this part shall notify the Administrator, on a quarterly basis, of the number of engines of each engine family-engine displacement-exhaust emission control system-fuel system combination produced for sale in the United States during the preceding quarter.

§ 85.974–38 Maintenance instructions.

(a) The manufacturer shall furnish or cause to be furnished to the ultimate purchaser of each new engine subject to the standards prescribed in § 85.974–1, written instructions for the maintenance and use of the vehicle or engine by the ultimate purchaser as may be reasonable and necessary to assure the proper functioning of emission control systems.

(1) Such instructions shall be provided for those engine components listed in Appendix VI to this part (and for any other components) to the extent that maintenance of these components is necessary to assure the proper functioning of emission control systems.

(2) Such instructions shall be in clear, and to the extent practicable, nontechnical language.

(b) The maintenance instruction required by this section shall contain a general description of the documentation which the manufacturer will require from the ultimate purchaser or any subsequent purchaser as evidence of compliance with the instructions.

§ 85.974–39 Submission of maintenance instructions.

(a) The manufacturer shall provide to the Administrator, no later than the time of the submission required by § 85.974–4, a copy of the maintenance instructions which the manufacturer proposes to supply to the ultimate purchaser in accordance with § 85.974–38(a). The Administrator will review such instructions to determine whether they are reasonable and necessary to assure the proper functioning of the engine's emission control systems. The Administrator will notify the manufacturer of his determination whether such instructions are reasonable and necessary to assure the proper functioning of the emission control systems.

(b) Any revision to the maintenance instructions which will affect emissions shall be supplied to the Administrator at least 30 days before being supplied to the ultimate purchaser unless the Administrator consents to a lesser period of time.

Subpart P—Importation of Motor Vehicles and Motor Vehicle Engines

§ 85.1501 Applicability.

(a) The provisions of this subpart are applicable to new motor vehicles and new motor vehicle engines which are offered for importation or imported into the United States by any person. As used in this subpart, "new motor vehicles" and "new motor vehicle engines" mean new and used motor vehicles or engines manufactured after the effective date of a regulation issued under section 202 of the Act which is applicable to such vehicles or engines (or which would have been applicable to such vehicles or engines had they been manufactured for importation into the United States). The term United States means the customs territory of the United States as defined in 19 U.S.C. 1202, and the Virgin Islands, Guam, and American Samoa.

(b) Regulations prescribing further procedures for entry of motor vehicles and motor vehicle engines into the customs territory of the United States, as defined in 19 U.S.C. 1202, are set forth in 19 CFR 12.73.

§ 85.1502 Admission for testing.

A motor vehicle or motor vehicle engine offered for importation or imported pursuant to 19 CFR 12.73(b)(5)(vi), solely for purposes of testing, may be operated on the public streets or highways for a period not to exceed 1 year from the date of importation if the importer or consignee receives prior written approval of such operation from the Administrator. Requests for such approval shall be in writing, and shall briefly describe the proposed testing program, including the estimated duration of such program.

§ 85.1503 Admission pending certification.

A motor vehicle or motor vehicle engine offered for importation or imported pursuant to 19 CFR 12.73(b)(5)(ix) under a declaration that it is one of a class of vehicles or engines represented by test vehicles or engines for which an application for certification of conformity with Federal motor vehicle emission standards is pending before the Administrator may be conditionally admitted into the United States, but shall be refused final admission unless:

(a) Not later than 5 days following such conditional admission the importer or consignee has submitted to the Administrator a written request that such vehicle or engine be permitted conditional admission pending certification of the test vehicle which represents the class of vehicles or engines to which such vehicle or engine belongs, which request shall contain the following:

(1) Identification of the test vehicle or engine which represents such vehicle or engine;

(2) Identification of the place where such vehicle or engine will be stored while the application for certification is pending before the Administrator: *Provided*, That such vehicle or engine shall not be stored on the premises of, or subject to access by or control of, any dealer;

(3) An acknowledgment of responsibility for the custody of the vehicle or engine while certification is pending; and

(b) The Administrator has issued the requested certificate of conformity.

§ 85.1504 Admission pending modification.

Any motor vehicle or motor vehicle engine offered for importation or imported pursuant to 19 CFR 12.73(b)(5)(x) under a declaration that it is not covered by a certificate of conformity with Federal motor vehicle emission standards may be conditionally admitted into the United States, but shall be refused final admission unless:

(a) Not later than 5 days following such conditional admission, the importer or consignee has submitted to the Administrator a written request that he be allowed to modify the vehicle or engine so that it will be in conformity with applicable emission standards, which request shall contain the following:

(1) A statement, acceptable to the Administrator, that specifies the modifications which are necessary to render the vehicle or engine in conformity with a test vehicle or engine for which a certificate of conformity has been issued; or, if the vehicle or engine cannot be modified to bring it within a class of vehicles or engines represented by a test vehicle or engine for which a certificate of conformity has been issued, the request shall state that the importer or consignee will demonstrate that the vehicle or engine is in conformity with applicable emission standards by testing the vehicle or engine or causing it to be tested in accordance with test procedures prescribed in 40 CFR Part 85;

(2) The date by which the modifications will be accomplished;

(3) Identification of the place where the vehicle or engine will be stored pending a determination of conformity under this paragraph: *Provided*, That such vehicle or engine shall not be stored on the premises of, or subject to access by or control of any dealer;

(4) An acknowledgment of responsibility for the custody of the vehicle or engine while the modifications are being made and while a determination of conformity is pending;

(5) Authorization for representatives of the Environmental Protection Agency to inspect or test the vehicle or engine at any reasonable time for the purpose of making a determination of conformity; and

(b) The Administrator has issued a written determination stating that the vehicle or engine is in conformity with Federal motor vehicle emission standards.

§ 85.1505 Admission pending receipt of information.

Any motor vehicle or motor vehicle engine offered for importation or imported pursuant to 19 CFR 12.73(b)(5)(xi) under a declaration that the importer or consignee does not possess sufficient information to make a knowledgeable declaration may be conditionally admitted into the United States, but shall be refused final admission unless:

(a) Not later than 5 days following such conditional admission, the importer or consignee has submitted to the Administrator a written request that such vehicle or engine be permitted entry pending receipt of sufficient information to determine whether such vehicle or engine is covered by a certificate of conformity, and what modifications or testing, if any, are required to bring the vehicle or engine into conformity with applicable emission standards, which request shall contain the following:

(1) Identification of the place where the vehicle or engine will be stored while the receipt of the information is pending: *Provided*, That such vehicle shall not be stored on the premises of or subject to access by or control of, any dealer; and

(2) An acknowledgment of responsibility for the custody of the vehicle or engine during the period; and

(b) The importer or consignee redeclares the vehicle in accordance with 19 CFR 12.73(b)(5)(i) through (x).

§ 85.1506 Waiver of conditions of admission.

Upon the written request of the importer or consignee, and for good cause shown, the Administrator may waive any of the conditions of admission set forth in §§ 85.1502, 85.1503(a), 85.1504(a), and 85.1505(a), and may give written consent to admission of a vehicle or engine upon such terms and conditions as the Administrator may specify.

§ 85.1507 Storage and prohibited operation or sale of vehicles or engines conditionally admitted.

A motor vehicle or engine conditionally admitted pursuant to § 85.1503, § 85.1504, or § 85.1505 shall be stored and shall not be operated on the public highways or sold until such vehicle or engine has been granted final admission. Failure to comply with this provision shall constitute a violation of section 203(a)(1) of the Clean Air Act, as amended.

§ 85.1508 Prohibited importation; penalties.

(a) The importation of any motor vehicle or motor vehicle engine otherwise than in accordance with any applicable provisions of this subpart and the bonding and entry regulations of the Bureau of Customs set forth in 19 CFR 12.73 is prohibited.

(b) Any vehicle or engine conditionally admitted pursuant to § 85.1503, § 85.1504, or § 85.1505 and not granted final admission within 90 days of such conditional admission, or within such additional time as the Bureau of Customs may allow for good cause shown pursuant to 19 CFR 12.73(c), shall be deemed to be unlawfully imported into the United States in violation of section 203(a)(1) of the Clean Air Act unless such vehicle or engine shall have been delivered to the Bureau of Customs for export or other disposition under applicable Customs laws and regulations. Any importer or consignee who violates section 203(a)(1) of the Clean Air Act is subject to a civil penalty of not more than $10,000 for each violation. In addition to the penalty provided in the Clean Air Act, any importer or consignee who fails to deliver such vehicle or engine to the Bureau of Customs is liable for liquidated damages in the amount of the bond required by applicable Customs laws and regulations.

Subpart Q—Low-Emission Vehicles

§ 85.1601 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Clean Air Act (42 U.S.C. 1857f–1 et seq.) and in § 85.002:

(1) "Motor vehicle" means any self-propelled vehicle designed for use in the United States on the highways, other than a vehicle designed or used for military field training, combat, or tactical purposes.

(2) "Inherently low-polluting vehicle" means any low-emission vehicle which is powered by a propulsion system which does not require control devices, for exhaust emissions, external to the engine.

(3) "Anticipated certification period" means the 1-year period which begins 270 days after submission of a completed certification application to the Administrator.

(4) "Model year" as used in this subpart shall have the same meaning as that term has under section 202(b)(3)(A)(i) of the Clean Air Act.

(5) "Light duty motor vehicle" as used in this subpart means a motor vehicle which may be a suitable substitute for a class or model of light duty motor vehicles as defined at § 85.002(a)(5).

§ 85.1602 Low-emission vehicle.

(a) A "low-emission vehicle" for the purpose of being certified as a suitable substitute for any class or model of light duty motor vehicles means any motor vehicle for which a completed certification application has been filed in accordance with § 85.1603 and which—

(1) Meets the most stringent crankcase emission and fuel evaporative standards which will apply under section 202 of the Clean Air Act during any part of the anticipated certification period to motor vehicles of that type; and

(2) Produces exhaust emissions of (i) hydrocarbons or carbon monoxide which meet the emission standards applicable under section 202 of the Act to model year 1975 gasoline-fueled light duty vehicles, or (ii) oxides of nitrogen which meet the emission standard applicable under section 202 to model year 1976 gasoline-fueled light duty vehicles; and

(3) Does not exceed the following exhaust emission standards:

(i) *Hydrocarbons*. 3 grams per vehicle mile;

(ii) *Carbon monoxide*. 28 grams per

(iii) *Oxides of nitrogen*. 3.1 grams per vehicle mile; and

(4) Emits no air pollutant other than those pollutants which are emitted by any class or model of motor vehicles for which the applicant vehicle may be a suitable substitute, unless the Administrator determines that such other emissions will not contribute significantly to air pollution which causes or contributes to the endangerment of public health or welfare; and

(5) Does not significantly increase the

§ 400.4 of this title, the Administrator

tion, publish in the FEDERAL REGISTER

APPENDIX I—Continued

APPENDIX I—Continued

APPENDIX I—Continued

V37-221 NOV 15 72 XUM

XUM

(5) Does not significantly increase the emissions of any air pollutant not subject to an emission standard under section 202 of the Act by comparison to the emissions of such pollutant by any class or model of motor vehicles for which the applicant vehicle may be a suitable substitute.

(b) The applicable test procedures for determining compliance with the standards established by paragraph (a) of this section shall be those in effect under section 202 of the Act for 1975 model year gasoline-fueled light duty motor vehicles, except as provided in § 85.1603(b).

§ 85.1603 **Application for certification.**

(a) Any person desiring certification of a test vehicle under section 212 of the Clean Air Act shall submit to the Administrator a notice of intent to submit a certification application with respect to such vehicle. The notice of intent shall contain a description of the vehicle, including the propulsion system and the fuel used by it, and such other information as the Administrator may request. The Administrator will transmit a copy of the notice of intent to the Low-Emission Vehicle Certification Board.

(b) As soon as practicable after receipt of a notice of intent to submit a certification application for a vehicle, the Administrator shall determine whether the test procedures required under § 85.1602(b) are applicable to that vehicle. If he determines they are inapplicable, he shall, as soon as practicable thereafter, prescribe test procedures for determining whether such vehicle is a low-emission vehicle, and, if necessary, he shall establish emission standards equivalent to those in effect under paragraph (a) of § 85.1602. He shall also select test vehicles in accordance with § 85.1603.

(c) After completion of testing of all test vehicles in accordance with applicable test procedures and with § 85.1604, the person desiring certification shall submit to the Administrator a written application signed by an authorized representative of the applicant. The application shall contain all emission data from the tests of the emission and durability data test vehicles and all data required by the Board under § 400.4 of this title, relative to the following vehicle characteristics:

(1) Safety;
(2) Performance characteristics;
(3) Reliability potential;
(4) Serviceability;
(5) Fuel availability;
(6) Noise level; and
(7) Maintenance costs.

(d) Any certification application must be filed prior to July 8, 1972, in order for that vehicle to be eligible for certification, except that the Administrator may, after consultation with the Board, accept an application filed no later than December 31, 1972, if he determines that it is likely that the Board will be able to make the determination required by § 400.6 of this title no later than April 2, 1973.

(e) In addition to the information required under this section, and under § 400.4 of this title, the Administrator may require the applicant to submit any other information which the Administrator deems necessary in determining whether the test vehicle is a low-emission vehicle. The application for certification may be considered incomplete, unless all information required by the Administrator and the Low-Emission Vehicle Certification Board has been submitted.

(f) The Administrator shall, immediately upon receipt of a completed application for certification under paragraph (c) of this section, publish in the FEDERAL REGISTER notice of receipt of the application, the name of the applicant, a brief description of the propulsion system and fuel used by the applicant vehicle, and information concerning the method by which the public may have access to data relating to the emission characteristics of the applicant vehicle.

§ 85.1604 **Test vehicle selection.**

(a) The test vehicles covered by the application for certification shall be divided into engine families in accordance with § 85.073–5(a)(2) unless the Administrator approves an alternative procedure under § 85.1603(b).

(b) Except as the Administrator may require pursuant to § 85.1603(b), the applicant shall test or cause to be tested two durability data vehicles of each engine-system combination and four emission data vehicles of each engine family described in the notice of intent. The test vehicles shall be selected by the Administrator upon receipt of the notice of intent and after consultation with the Board to determine the models or classes of vehicles for which the test vehicle may be a suitable substitute.

§ 85.1605 **Data reporting.**

(a) All data on emission data and durability data test vehicles shall be reported in accordance with §§ 85.073–4(a), and 85.073–20(d).

(b) For the purpose of this subpart, § 85.073–7(e) shall not apply.

§ 85.1606 **Testing by the Administrator.**

The Administrator may require that any one or more of the applicant's test vehicles be submitted to him, at such place or places and at such time or times as he may designate for the purpose of conducting emission tests.

§ 85.1607 **Administrator's determination.**

(a) The Administrator shall, within 90 days after receipt of a completed application for certification, determine whether the applicant vehicle is a low-emission vehicle. Such determination shall be based upon an evaluation of the data provided to the Administrator in the application for certification, any supporting information the Administrator may obtain from the applicant, any relevant information obtained from the public, and the results of any testing the Administrator may have conducted in accordance with § 85.1606.

(b) The Administrator shall, immediately upon making the determination required in paragraph (a) of this section, publish in the FEDERAL REGISTER notice of such determination and the reasons therefor.

(c) The Administrator may make any recommendation which he deems appropriate concerning whether any applicant vehicle is an inherently low-polluting vehicle.

(d) If at any time after making an affirmative determination under paragraph (a) of this section but prior to certification by the Board, the Administrator obtains information which demonstrates that the applicant vehicle is not a low-emission vehicle, he may revoke such determination. The Administrator must immediately thereafter notify the Board and publish in the FEDERAL REGISTER notice of such revocation and the reasons therefor.

§ 85.1608 **Postcertification testing.**

The Administrator shall, at the request of the Board, test the emissions from certified low-emission vehicles purchased by the Federal Government. If these tests show that the emissions exceed the rates on which the Administrator based his determination under § 85.1607, the Administrator shall notify the Board.

APPENDIX I

EPA URBAN DYNAMOMETER DRIVING SCHEDULE
(Speed versus Time Sequence)

Time (sec.)	Speed (m.p.h.)	Time (sec.)	Speed (m.p.h.)	Time (sec.)	Speed (m.p.h.)

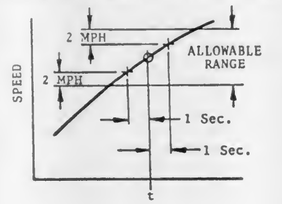
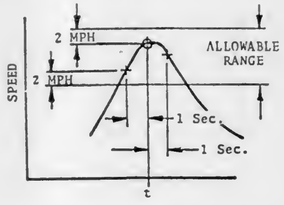
1,190	0.0	1,281	24.0	1,372	0.0

The diagrams below show the range of acceptable speed tolerances for typical points. The curve on the left is typical of portions of the speed curve which are increasing or decreasing throughout the two second time interval. The curve on the right is typical of portions of the speed curve which include a maximum or minimum value.





APPENDIX II

PROCEDURE FOR DYNAMOMETER ROAD HORSEPOWER CALIBRATION

This appendix describes the method for determining the road horsepower absorbed by a chassis dynamometer. The measured absorbed road horsepower includes the dynamometer friction as well as the power absorbed by the power absorption unit. The dynamometer is driven above the test speed range. The device used to drive the dynamometer is then disengaged from the dynamometer and the roll(s) is allowed to coast down. The kinetic energy of the system is dissipated by the dynamometer friction and absorption unit. This method neglects the variations in roll bearing friction due to the drive axle weight of the vehicle. The difference in coast down time of the free (rear) roll relative to the drive (front) roll may be neglected in the case of dynamometers with paired rolls.

These procedures shall be followed:

1. Devise a method to determine the speed of the drive roll if not already measured. A fifth wheel, revolution pickup or other suitable means may be used.

2. Place a vehicle on the dynamometer or devise another method of driving the dynamometer.

3. Engage inertia flywheel for the most common vehicle weight class for which the dynamometer is used.

4. Drive dynamometer up to 50 m.p.h.

5. Record indicated road horsepower.

6. Drive dynamometer up to 60 m.p.h.

7. Disengage the device used to drive the dynamometer.

8. Record the time for the dynamometer drive roll to coast down from 55 m.p.h. to 45 m.p.h.

9. Adjust the power absorption unit to a different level.

10. Repeat steps 4 to 9 above sufficient times to cover the range of road horsepower used.

11. Calculate absorbed road horsepower from:

$HP_6 = (1/2)\,(W_1/82.2)\,(V_1^2 - V_2^2)\,/\,(550t)$

$HP_4 = 0.06073\,(W_1/t)$

Where:

W_1 = Equivalent inertia in lb.

V_1 = Initial velocity in ft./sec. (55 m.p.h. = 80.67ft./sec.).

V_2 = Final velocity in ft./sec. (45 m.p.h. = 66 ft./sec.).

t = Elapsed time for rolls to coast from 55 m.p.h. to 45 m.p.h.

12. Plot indicated road load horsepower at 50 m.p.h. versus road load horsepower at 50 m.p.h.

EXAMPLE: Dynamometer calibration curve (Sec. No. CR-21a-R) 9-24-43

13. The road load horsepower reported in § 85.073–15 is obtained by entering the plot at the indicated road load horsepower determined in § 85.073–15(c)(1)(ii).

14. Once the road load horsepower at 50 m.p.h. is known for a vehicle, it may be tested on other dynamometers using a similar calibration.

APPENDIX III

CONSTANT VOLUME SAMPLER FLOW CALIBRATION

The following procedure is used in Federal laboratories to calibrate the gas flow of constant volume samplers which use positive displacement pumps. First, the gas flow as a function of the pressure increase across the pump is determined. Second, the whole system, including the instruments, is checked to determine if it accounts for an amount of pure propane or carbon monoxide (caution—carbon monoxide is extremely toxic) introduced into the system.

The following steps are followed to determine the gas flow as a function of the pressure increase across the pump in cubic feet per pump revolution.

1. The pump inlet pressure depression during a typical test is determined.

2. A variable flow restrictor, such as a slide valve, is attached to the CVS at a point upstream of the positive displacement pump. The dilution air filter system may or may not be in use during calibration, depending on the particular CVS design.

3. A flow measuring device (laminar flow element) is attached ahead of the flow restrictor.

4. The CVS is operated at several different pump inlet pressure settings (controlled by the flow restrictor) and the measurements as specified in § 85.073–22 (h), (j), (l), (m), the time per test, and the measurements related to the flow device are recorded. The data points are equally spaced around the normal operating condition.

5. The gas flow, Q, at each test point is calculated in standard cubic feet per minute from the flow device data.

6. The gas flow (at pump inlet pressure and temperature) is calculated in cubic feet per revolution from the following:

$$V_o = \frac{Q}{n} \times \frac{T_p}{528} \times \frac{760}{P_p}$$

Where:

Q = Gas flow in standard cubic feet per minute.

n = Pump speed in revolution per minute. See § 85.073–26 for remainder of definitions.

7. V_o is plotted versus the square root of the pressure increase across the pump, ΔP, and a linear fit is performed.

The following procedure is followed to check the CVS calibration using a known quantity of injected gas. It assumes a reliable analyzer calibration.

1. A small cylinder is charged with pure propane or carbon monoxide gas (caution—carbon monoxide is extremely toxic).

2. The cylinder is weighed to the nearest 0.01 gram.

3. The CVS is operated in the normal manner and a quantity of pure propane or carbon monoxide is released into the system.

4. The calculations of § 85.073–26 are performed in the normal way except the density of propane (17.30 grams/cu. ft./carbon atom) is used in place of the density of exhaust hydrocarbons.

5. The CVS measured mass is compared to the gravimetric measured mass.

6. The reason for any discrepancy is found and corrected.

APPENDIX IV

DURABILITY DRIVING SCHEDULE

The schedule consists basically of 11 laps of 3.7 mile course. The basic vehicle speed for each lap is listed below:

Lap	Speed-m.p.h.
1	40
2	30
3	40
4	40
5	35
6	30
7	35
8	45
9	35
10	55
11	70

During each of the first nine laps there are 4 stops with 15 second idle. Normal accelerations and decelerations are used. In addition, there are 5 light decelerations each lap from the base speed to 20 m.p.h. followed by light accelerations to the base speed.

The 10th lap is run at a constant speed of 55 m.p.h.

The 11th lap is begun with a wide open throttle acceleration from stop to 70 m.p.h. A normal deceleration to idle followed by a second wide open throttle acceleration occurs at the midpoint of the lap.

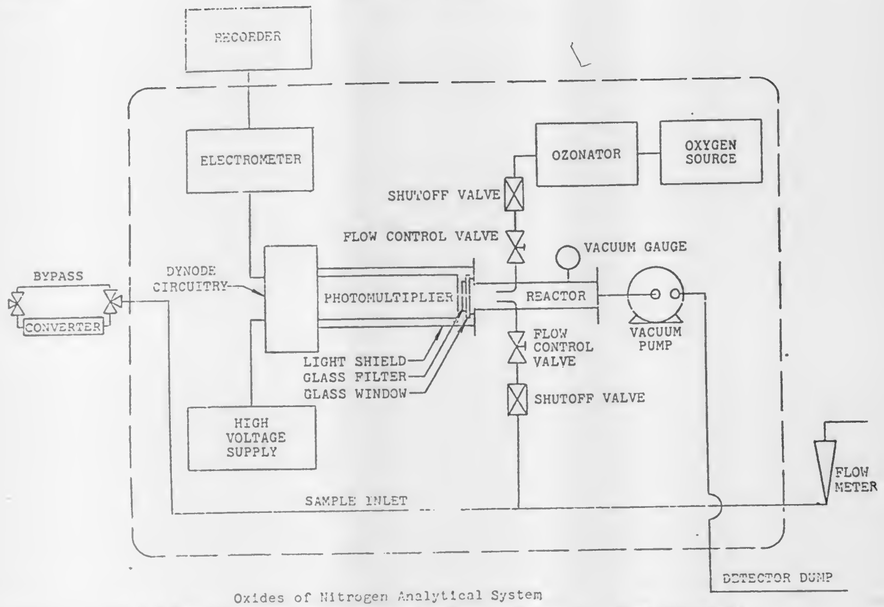
FEDERAL REGISTER, VOL. 37, NO. 221—WEDNESDAY, NOVEMBER 15, 1972



Oxides of Nitrogen Analytical System

APPENDIX V—OXIDES OF NITROGEN ANALYTICAL SYSTEM

The chemiluminescence method utilizes the principle that nitric oxide (NO) reacts with ozone (O_3) to give nitrogen dioxide (NO_2) and oxygen (O_2). Approximately 10 percent of the NO_2 is electronically excited. The transition of excited NO_2 to the ground state yields a detectable light emission (590-630 nanometer region) at low pressures. The intensity of this emission is proportional to the mass flow rate of NO into the reactor. The light emission can be measured utilizing a photomultiplier tube and associated electronics.

The method also utilizes the principle that the thermal decomposition of NO_2 ($2NO_2 \rightarrow 2NO + O_2$) is complete at about 600° C. The rate constant for the dissociation of NO_2 at 600° C. is approximately 10^4 (liters/mole-second). A 6-foot length of one-eighth inch outside diameter, 0.028 wall thickness, flawless stainless steel tubing resistance heated using a low voltage, high current power supply to a temperature of 650° C. (1200° F.) provides sufficient residence time at a sample flow rate of 700 cc. per minute (1.5 c.f.h.) for essentially complete conversion of nitrogen dioxide to nitric oxide. Other converter designs may be used if shown to yield essentially 100 percent conversion of NO_2 to NO.

The method permits continuous monitoring of NO_x concentrations over a wide range. Response time (2 to 4 seconds is typical) is primarily dependent on the mechanical pumping rate at the operating pressure of the reactor. The operating pressure of the reactor is generally less than 5 torr.

The following figure is a flow schematic illustrating one configuration of the major components required for the oxides of nitrogen analytical system.

APPENDIX VI

VEHICLE AND ENGINE COMPONENTS

A. Gasoline Fueled Light Duty Vehicles and Heavy Duty Engines.

I. Basic Mechanical Componente—Engine:
1. Intake and exhaust valves.
2. Drive belts.
3. Manifold and cylinder head bolts.
4. Engine oil and filter.
5. Engine coolant.
6. Cooling system hoses and connections.
7. Vacuum fittings, hoses and connections.

II. Fuel System
1. Fuel specification—octane rating, lead content.
2. Carburetor—idle r.p.m., mixture ratio.
3. Choke mechanism.
4. Fuel system filter and fuel system lines and connections.
5. Choke plate and linkage.

III. Ignition Components
1. Ignition timing and advance systems.
2. Distributer breaker points and condenser.
3. Spark plugs.
4. Ignition wiring.
5. Operating parts of distributor.

IV. Crankcase Ventilation System:
1. PCV valve.
2. Ventilation hoses.
3. Oil filler breather cap.
4. Manifold inlet (carburetor spacer, etc.).

V. External Exhaust Emission Control System:
1. Secondary air injection system hoses.
2. Air system manifolds.
3. Control valves and air pump.
4. Manifold reactors.
5. Catalytic mufflers.
6. Exhaust recirculation.
7. Water injection.

VI. Evaporative Emission Control System:
1. Engine compartment hose connections.
2. Carbon storage media.
3. Fuel tank pressure-relief valve operation.
4. Fuel vapor control valves.

VII. Air Inlet Components
1. Carburetor air cleaner filter.
2. Hot air control valve.

B. Heavy Duty Diesel Engines.

I. Engine Mechanical Components:
1. Valve train.
2. Cooling system.
   a. Coolant.
   b. Thermostat.
   c. Filter.
3. Lubrication.
   a. Oil Filter.
   b. Lubricant.

II. Fuel System:
1. Fuel type.
2. Fuel pump.
3. Fuel filters.
4. Injectors.
5. Governor.

III. Air Inlet Components:
1. Air cleaner.
2. Inlet ducting.

IV. External Exhaust Emission Control System:
1. Rack limiting devices (aneroid, throttle delay, etc.).
2. Manifold reactor.
3. Catalytic mufflers.
4. Exhaust recirculation.
5. Water injection.

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$3.00 per copy.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

ECONOMIC STABILIZATION—IRS rules relating to notice of apparent liability for rent violations 24334

DOMESTIC QUARANTINES—
USDA revises golden nematode regulations 24330
USDA revises Japanese beetle regulations by adding Alabama and Missouri to list of regulated States 24327

RELOCATION ASSISTANCE AND PROPERTY ACQUISITION—USDA proposes regulations for equitable treatment in conjunction with Federal financially assisted programs; comments within 45 days 24357

POSTAL SERVICE—Miscellaneous amendments regarding apartment house mail boxes, records reproduction, disposition of valuables recovered by inspectors and conduct on Postal Service property (2 documents) 24346

DRUGS—
HEW requires warning statements regarding side effects from use of intramammary infusion products containing corticosteroid drugs 24343
HEW revises sterility test for ampicillin trihydrate 24344
HEW announces opportunity for hearing to withdraw approval of metaxalone tablets; hearing requests within 30 days 24374

CONSTRUCTION SAFETY—Labor Dept. amendments 24345

PUBLIC LANDS—Interior Dept. notice of opening in Arizona 24337

Guide to Record Retention Requirements

[Revised as of January 1, 1972]

This useful reference tool is designed to keep businessmen and the general public informed concerning the many published requirements in Federal laws and regulations relating to record retention.

The 92-page "Guide" contains over 1,000 digests which tell the user (1) what type records must be kept, (2) who must keep them, and (3) how long they must be kept. Each digest carries a reference to the full text of the basic law or regulation providing for such retention.

The booklet's index, numbering over 2,200 items, lists for ready reference the categories of persons, companies, and products affected by Federal record retention requirements.

Price: $1.00

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FEDERAL REGISTER

Area Code 202 Phone 962-8626

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended (44 U.S.C. 1510). The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

Title 7—AGRICULTURE

Chapter III—Animal and Plant Health Inspection Service, Department of Agriculture

PART 301—DOMESTIC QUARANTINE NOTICES

Subpart—Japanese Beetle

MISCELLANEOUS AMENDMENTS

Pursuant to sections 8 and 9 of the Plant Quarantine Act, as amended, and section 106 of the Federal Plant Pest Act (7 U.S.C. 161, 162, 150ee), Notice of Quarantine No. 48 relating to the Japanese beetle and regulations supplemental to said quarantine (7 CFR 301.48, 301.48–1, 301.48–2, 301.48–3 et seq.), are hereby revised to read as follows:

QUARANTINE AND REGULATIONS

Sec.

301.48 Quarantine; restriction on interstate movement of specified regulated articles.
301.48–1 Definitions.
301.48–2 Authorization to designate, and terminate designation of, regulated areas and suppressive or generally infested areas; and to exempt articles from certification, permit or other requirements.
301.48–3 Conditions governing the interstate movement of regulated articles from quarantined States.
301.48–4 Issuance and cancellation of certificates and permits.
301.48–5 Compliance agreement, and cancellation thereof.
301.48–6 Assembly and inspection of regulated articles.
301.48–7 Attachment and disposition of certificates or permits.
301.48–8 Inspection and disposal of regulated articles and pests.
301.48–9 Movement of live Japanese beetles.
301.48–10 Nonliability of the Department.

§ 301.48 Quarantine; restriction on interstate movement of specified regulated articles.

(a) *Notice of quarantine.* (1) Pursuant to the provisions of sections 8 and 9 of the Plant Quarantine Act of August 20, 1912, as amended, and section 106 of the Federal Plant Pest Act (7 U.S.C. 161, 162, 150ee), the Secretary of Agriculture heretofore determined after public hearing that it was necessary to quarantine the States [1] of Connecticut, Delaware, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and the District of Columbia in order to prevent the spread of the Japanese beetle, a dangerous insect injurious to cultivated crops and not theretofore widely prevalent or distributed within and throughout the United States and accordingly quarantined said States.

(2) Pursuant to the said provisions and after public hearing the Secretary has now determined that it is necessary also to quarantine the States of Alabama and Missouri to prevent the spread of the Japanese beetle. Under the authority of said provisions, the Secretary hereby quarantines the States of Alabama and Missouri, and continues in effect the quarantine of the other specified States as aforesaid, with respect to the interstate movement from the quarantined States of the articles described in paragraph (b) of this section, issues the regulations in this subpart governing such movement, and gives notice of said quarantine and regulations.

(b) *Quarantine restrictions on interstate movement of specified regulated articles.* No common carrier or other person shall move interstate from any quarantined State any of the following articles (defined in § 301.48–1(o) as regulated articles), except in accordance with the conditions prescribed in this subpart:

(1) When moved from any generally infested area, or any area outside the regulated areas, in a quarantined State:

(i) Soil, compost, decomposed manure, humus, muck, and peat, separately or with other things;

(ii) Plants with roots, except soil-free aquatic plants, moss, and Lycopodium (clubmoss or ground pine or running pine);

(iii) Grass sod;

(iv) Plant crowns and roots for propagation;

(v) True bulbs, corms, rhizomes, and tubers of ornamental plants, when freshly harvested or uncured;

(vi) Used mechanized soil-moving equipment;

(vii) Any other products, articles, or means of conveyance of any character whatsoever, not covered by subdivisions (i) through (vi) of this subparagraph, when it is determined by an inspector that they present a hazard of spread of the Japanese beetle and the person in possession thereof has been so notified.

(2) When moved from any suppressive area in a quarantined State:

(i) Bulk soil.

(ii) Used mechanized soil-moving equipment.

(iii) Any other products, articles, or means of conveyance of any character whatsoever, not covered by subdivisions (i) and (ii) of this subparagraph, when it is determined by an inspector that they present a hazard of spread of the Japanese beetle and the person in possession thereof has been so notified.

§ 301.48–1 Definitions.

Terms used in the singular form in this subpart shall be deemed to import the plural and vice versa, as the case may demand. The following terms, when used in this subpart shall be construed respectively to mean:

(a) *Certificate.* A document issued or authorized to be issued under this subpart by an inspector to allow the interstate movement of regulated articles to any destination.

(b) *Compliance agreement.* A written agreement between a person engaged in growing, handling, or moving regulated articles, and the Plant Protection and Quarantine Programs, wherein the former agrees to comply with the requirements of this subpart identified in the agreement by the inspector who executes the agreement on behalf of the Plant Protection and Quarantine Programs as applicable to the operations of such person.

(c) *Deputy Administrator.* The Deputy Administrator of the Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or any other officer or employee of said Service to whom authority to act in his stead has been or may hereafter be delegated.

(d) *Generally infested area.* Any part of a regulated area not designated as a suppressive area in accordance with § 301.48–2.

(e) *Infestation.* The presence of the Japanese beetle or the existence of circumstances that make it reasonable to believe that the Japanese beetle is present.

(f) *Inspector.* Any employee of the Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or other person, authorized by the Deputy Administrator to enforce the provisions of the quarantine and regulations in this subpart.

(g) *Interstate.* From any State into or through any other State.

(h) *Japanese beetle.* The live insect known as the Japanese beetle (*Popillia japonica* Newm.) in any stage of development.

(i) *Limited permit.* A document issued or authorized to be issued by an inspector to allow the interstate movement of noncertifiable regulated articles to a specified destination for limited handling, utilization, or processing or for treatment.

(j) *Mechanized soil-moving equipment.* Mechanized equipment used to move or

[1] See definition of "State" in § 301.48–1(s).

transport soil—e.g., draglines, bulldozers, road scrapers, dumptrucks, etc.

(k) *Nursery stock.* Trees, shrubs, vines, cuttings, grafts, scions, buds, and other plants and parts of plants, for propagation.

(l) *Person.* Any individual, corporation, company, association, firm, partnership, society, joint stock company, or other legal entity.

(m) *Plant Protection and Quarantine Programs.* The Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture.

(n) *Quarantined State.* Any State quarantined under this subpart.

(o) *Regulated article.* Any article, product, or means of conveyance of any character whatsoever, not covered by subdivisions (i) through (vi) of this subparagraph, when it is determined by an inspector that they present a hazard of spread of the Japanese beetle and the person in possession thereof has been so notified.

(p) *Regulated area.* Any State, or any portion thereof, designated as such in accordance with § 301.48–2.

(q) *Specified destination.* The premises of a person who has a compliance agreement in effect and who desires to move interstate regulated articles which must be accompanied by a certificate or permit shall, as far in advance of the movement as practicable, notify the inspector assigned to the area in which the premises are located of the name and address of the person to whom the articles are to be delivered, the number of packages, and the kind of articles to be moved.

(r) *Suppressive area.* Any State, or any portion thereof, designated as such in accordance with § 301.48–2.

(s) *State.* Any State, the District of Columbia, Puerto Rico, or any territory or possession of the United States.

(t) *Treatment.* Any process, including fumigation, approved by the Deputy Administrator for the destruction or removal of the Japanese beetle.

(u) *Treatment manual.* The publication entitled "Treatments for Japanese Beetle and Other Insects Subject to Quarantine" which lists treatments for the Japanese beetle and other insects subject to quarantine.

(v) *Uncertificable article.* Any article which cannot be certified for interstate movement pursuant to this subpart or any other Federal quarantine and regulations.

(w) *Uncertificable area.* Any area quarantined by the Federal Government for the Japanese beetle or other insect which is not a regulated area under this subpart.

(x) *Uncertificable person.* Any person who is not entitled to receive a certificate or permit for the interstate movement of regulated articles because of failure to comply with the provisions of this subpart or any other Federal quarantine and regulations.

§ 301.48–2 Authorization to designate, and terminate designation of, regulated areas and suppressive or generally infested areas; and to exempt articles from certification, permit or other requirements.

(a) The Deputy Administrator shall list as regulated areas, in a supplemental regulation designated as a quarantine, each State, or each portion thereof, that is infested with the Japanese beetle or that must be regulated because of its proximity to infestation or its interstate relationship, and he shall list as suppressive areas or generally infested areas those regulated areas or portions thereof which meet the respective criteria for such areas set forth in this paragraph. The Deputy Administrator may designate any civil subdivision of a State as a regulated area or as a suppressive area or generally infested area, or may designate any portion of a civil subdivision as a regulated area or as a suppressive area, if less than the entire civil subdivision meets the criteria set forth in this paragraph for such designation. The Deputy Administrator may designate any noncontiguous land area as a regulated area or as a suppressive area or generally infested area, if the noncontiguous land area meets the criteria set forth in this paragraph for such designation. The Deputy Administrator may designate any land area as a regulated area or as a suppressive area or generally infested area, regardless of political boundaries, if the land area meets the criteria set forth in this paragraph for such designation. The Deputy Administrator may terminate the designation of any regulated area or any suppressive area or generally infested area, or any portion thereof, if he determines that the area or portion thereof no longer meets the criteria set forth in this paragraph for such designation. The Deputy Administrator may exempt any article from certification, permit or other requirements, if he determines that the article does not present a hazard of spread of the Japanese beetle.

(1) *Generally infested areas.* Each regulated area, or portion thereof, where the Deputy Administrator has determined that the Japanese beetle is established and generally distributed within the area, and that the Japanese beetle is not subject to applicable suppressive or control measures, shall be designated as a generally infested area.

(2) *Suppressive areas.* Each regulated area, or portion thereof, where the Deputy Administrator has determined that the Japanese beetle is established but not generally distributed within the area, and that the Japanese beetle is subject to applicable suppressive or control measures, shall be designated as a suppressive area.

(b) The Deputy Administrator shall list as regulated articles, in a supplemental regulation designated as a quarantine, each article, product, or means of conveyance, or group thereof, that he determines must be regulated because of its interstate relationship to the Japanese beetle, and he shall list as exempt articles those articles which he determines do not present a hazard of spread of the Japanese beetle. The Deputy Administrator may exempt any article from certification, permit or other requirements, if he determines that the article does not present a hazard of spread of the Japanese beetle. The Deputy Administrator may terminate the exemption of any article, product, or means of conveyance, or group thereof, if he determines that the article, product, or means of conveyance, or group thereof, no longer meets the criteria set forth in this paragraph for such exemption.

(c) The Deputy Administrator shall list as regulated articles, in a supplemental regulation designated as a quarantine, each article, product, or means of conveyance, or group thereof, that he determines must be regulated because of its interstate relationship to the Japanese beetle, and he shall list as exempt articles those articles which he determines do not present a hazard of spread of the Japanese beetle. The Deputy Administrator may exempt any article from certification, permit or other requirements, if he determines that the article does not present a hazard of spread of the Japanese beetle. The Deputy Administrator may terminate the exemption of any article, product, or means of conveyance, or group thereof, if he determines that the article, product, or means of conveyance, or group thereof, no longer meets the criteria set forth in this paragraph for such exemption.

laboratories approved [2] by the Deputy Administrator and so listed by him in a supplemental regulation.[3] A certificate or permit may be issued for the interstate movement of regulated articles to any destination when the Deputy Administrator determines that the articles are to be moved to a specified destination for treatment and the articles are to be moved in accordance with such additional conditions as will be necessary to prevent the spread of the Japanese beetle, and a compliance agreement has been entered into with the consignee. Each certificate or permit issued for the interstate movement of regulated articles to a specified destination for treatment shall state that the articles are to be moved to the specified destination for treatment, and shall state any other conditions governing the movement of such regulated articles which make it safe to so relieve such requirement as described in each specific case by the Deputy Administrator to prevent the spread of the Japanese beetle.

[2] See definition of "State" in § 301.48–1(s).

[3] See definition of "Treatment manual" in § 301.48–1(u).

transport soil—e.g., draglines, bulldozers, road scrapers, dumptrucks, etc.

(k) *Moved (movement, move)*. Shipped, offered for shipment to a common carrier, received for transportation or transported by a common carrier, or carried, transported, moved, or allowed to be moved by any means. "Movement" and "move" shall be construed accordingly.

(l) *Person*. Any individual, corporation, company, society, or association, or other organized group of any of the foregoing.

(m) *Plant protection and quarantine programs*. The organizational unit within the Animal and Plant Health Inspection Service delegated responsibility for enforcing provisions of the Plant Quarantine Act and Federal Plant Pest Act, and regulations promulgated thereunder.

(n) *Regulated area*. Any quarantined State, or any portion thereof, listed as a regulated area in § 301.48–2a or otherwise designated as a regulated area in accordance with § 301.48–2(b).

(o) *Regulated articles*. Any articles as described in § 301.48–2(b).

(p) *Restricted destination permit*. A document issued or authorized to be issued by an inspector to allow the interstate movement of regulated articles not certifiable under all applicable Federal domestic plant quarantines to a specified destination for other than scientific purposes.

(q) *Scientific permit*. A document issued by the Deputy Administrator to allow the interstate movement to a specified destination of regulated articles for scientific purposes.

(r) *Soil*. That part of the upper layer of earth in which plants can grow.

(s) *State*. Any State, territory, or district of the United States, including Puerto Rico.

(t) *Suppressive area*. That part of a regulated area where all establishments handling regulated articles, except products being produced on the farm, have been treated for eradication of the Japanese beetle and where eradication of the entire infestation in that part of the regulated area is undertaken as the objective, as designated by the Deputy Administrator under § 301.48–2(a).

(u) *Treatment manual*. The provisions currently contained in the "Manual of Administratively Authorized Procedures to be Used Under the Japanese Beetle Quarantine," the manual of "Procedures for Applying Soil Surface and Foliage Treatments for Regulatory Purposes," and the "Fumigation Procedures Manual." [1]

§ 301.48–2 Authorization to designate, and terminate designation of, regulated areas and suppressive or generally infested areas; and to exempt articles from certification, permit, or other requirements.

(a) *Regulated areas and suppressive or generally infested areas*. The Deputy Administrator shall list as regulated areas, in a supplemental regulation designated as § 301.48–2(a), each quarantined State; or each portion thereof in which Japanese beetle has been found or in which there is reason to believe that Japanese beetle is present or which it is deemed necessary to regulate because of their proximity to infestation or their inseparability for quarantine enforcement purposes from infested localities. The Deputy Administrator, in the supplemental regulation, may divide any regulated area into a suppressive area or a generally infested area in accordance with the definitions thereof in § 301.48–1. Less than an entire quarantined State will be designated as a regulated area only if the Deputy Administrator is of the opinion that:

(1) The State has adopted and is enforcing a quarantine or regulation which imposes restrictions on the intrastate movement of the regulated articles which are substantially the same as those which are imposed with respect to the interstate movement of such articles under this subpart; and

(2) The designation of less than the entire State as a regulated area will otherwise be adequate to prevent the interstate spread of the Japanese beetle.

(b) *Temporary designation of regulated areas and suppressive or generally infested areas*. The Deputy Administrator or an authorized inspector may temporarily designate any other premises in a quarantined State as a regulated area and a suppressive or generally infested area, in accordance with the criteria specified in paragraph (a) of this section for listing such area, by serving written notice thereof on the owner or person in possession of such premises, and thereafter the interstate movement of regulated articles from such premises by any person having notice of the designation shall be subject to the applicable provisions of this subpart. As soon as practicable, such premises shall be added to the list in § 301.48–2a if a basis then exists for their designation; otherwise the designation shall be terminated by the Deputy Administrator or an authorized inspector, and notice thereof shall be given to the owner or person in possession of the premises.

(c) *Termination of designation as a regulated area and a suppressive or generally infested area*. The Deputy Administrator shall terminate the designation provided for under paragraph (a) of this section of any area listed as a regulated area or suppressive or generally infested area when he determines that such designation is no longer required under the criteria specified in paragraph (a) of this section.

(d) *Exemption of articles from certification, permit, or other requirements*. The Deputy Administrator may, in a supplemental regulation designated as § 301.48–2b, list regulated articles or movements of regulated articles which shall be exempt from the certification, permit, or other requirements of this subpart under such conditions as he may prescribe, if he finds that facts exist as to the pest risk involved in the movement of such regulated articles which make it safe to so relieve such requirements.

§ 301.48–3 Conditions governing the interstate movement of regulated articles from quarantined States.[2]

(a) Any regulated articles except soil samples for processing, testing, or analysis may be moved interstate from any quarantined State under the following conditions:

(1) With certificate or permit issued and attached in accordance with §§ 301.48–4 and 301.48–7 if moved:

(i) From any generally infested area or any suppressive area into or through any point outside of the regulated areas; or

(ii) From any generally infested area into or through any suppressive area; or

(iii) Between any noncontiguous suppressive areas; or

(iv) Between contiguous suppressive areas when it is determined by an inspector that the regulated articles present a hazard of the spread of the Japanese beetle and the person in possession thereof has been so notified; or

(v) Through or reshipped from any regulated area when such movement is not authorized under subparagraph (2)(v) of this paragraph; or

(2) From any regulated area, without certificate or permit if moved:

(i) Under the provisions of § 301.48–2b which exempts certain articles from certificate and permit requirements; or

(ii) From a generally infested area to a contiguous generally infested area; or

(iii) From a suppressive area to a contiguous generally infested area; or

(iv) Between contiguous suppressive areas unless the person in possession of the articles has been notified by an inspector that a hazard of spread of the Japanese beetle exists; or

(v) Through or reshipped from any regulated area if the articles originated outside of any regulated area and if the point of origin of the articles is clearly indicated, their identity has been maintained, and they have been safeguarded against infestation while in the regulated area in a manner satisfactory to the inspector; or

(3) From any area outside the regulated areas, if moved:

(i) With a certificate or permit attached; or

(ii) Without a certificate or permit, if:

(a) The regulated articles are exempt from certification and permit requirements under the provisions of § 301.48–2b; or

(b) The point of origin of such movement is clearly indicated on the articles or shipping document which accompanies the articles and if the movement is not made through any regulated area.

(b) Unless specifically authorized by the Deputy Administrator in emergency situations, soil samples for processing, testing, or analysis may be moved interstate from any regulated area only to laboratories approved [3] by the Deputy Administrator and so listed by him in a supplemental regulation.[4] A certificate or permit will not be required to be attached to such soil samples except in those situations where the Deputy Administrator has authorized such movement only with a certificate or permit issued and attached in accordance with §§ 301.48–4 and 301.48–7. A certificate or permit will not be required to be attached to soil samples originating in areas outside of the regulated areas if the point of origin of such movement is clearly indicated on the articles or shipping document which accompanies the articles and if the movement is not made through any regulated area.

§ 301.48–4 Issuance and cancellation of certificates and permits.

(a) Certificates may be issued for any regulated articles by an inspector if he determines that they are eligible for certification for movement to any destination under all Federal domestic plant quarantines applicable to such articles and:

(1) Have originated in noninfested premises in a regulated area and have not been exposed to infestation while within the regulated areas; or

(2) Upon examination, have been found to be free of infestation; or

(3) Have been treated to destroy infestation in accordance with the treatment manual; or

(4) Have been grown, produced, manufactured, stored, or handled in such a manner that no infestation would be transmitted thereby.

(b) Limited permits may be issued by an inspector to allow interstate movement of regulated articles not eligible for certification under this subpart to specified destinations for limited handling, utilization, or processing, or for treatment in accordance with the treatment manual, when, upon evaluation of the circumstances involved in each specific case, he determines that such movement will not result in the spread of the Japanese beetle and requirements of other applicable Federal domestic plant quarantines have been met.

(c) Restricted destination permits may be issued by an inspector to allow the interstate movement (for other than scientific purposes) of regulated articles to any destination permitted under all applicable Federal domestic plant quarantines if such articles are not eligible for certification under all such quarantines but would otherwise qualify for certification under this subpart.

(d) Scientific permits to allow the interstate movement of regulated articles may be issued by the Deputy Administrator under such conditions as may be prescribed in each specific case by the Deputy Administrator to prevent the spread of the Japanese beetle.

(e) Certificate, limited permit, and restricted destination permit forms may be issued by an inspector to any person for use for subsequent shipments of regulated articles, provided such person is operating under a compliance agreement; and any such person may be authorized by an inspector to reproduce such forms on shipping containers or otherwise. Any such person may execute and issue the certificate forms, or reproductions of such forms, for the interstate movement of regulated articles from the premises of such person identified in the compliance agreement if such person has treated such regulated articles to destroy infestation in accordance with the treatment manual, and if such regulated articles are eligible for certification for movement to any destination under all Federal domestic plant quarantines applicable to such articles. Any such person may execute and issue the limited permit forms, or reproductions of such forms, for interstate movement of regulated articles to specified destinations when the inspector has made the determinations specified in paragraph (b) of this section. Any such person may execute and issue the restricted destination permit forms, or reproductions of such forms, for the interstate movement of regulated articles not eligible for certification under all Federal domestic plant quarantines applicable to such articles, under the condtions specified in paragraph (c) of this section.

(f) Any certificate or permit which has been issued or authorized may be withdrawn by the inspector or the Deputy Administrator if he determines that the holder thereof has not complied with any condition for the use of such document imposed by this subpart. Prior to such withdrawal, the holder of the certificate or permit shall be notified of the proposed action and the reason therefor and afforded reasonable opportunity to present his views thereon.

§ 301.48–5 Compliance agreement, and cancellation thereof.

(a) Any person engaged in the business of growing, handling, or moving regulated articles may enter into a compliance agreement to facilitate the movement of such articles under this subpart. Compliance agreement forms may be obtained from the Deputy Administrator or an inspector.

(b) Any compliance agreement may be canceled by the inspector who is supervising its enforcement whenever he finds, after notice and reasonable opportunity to present views has been accorded to the other party thereto, that such other party has failed to comply with the conditions of the agreement.

§ 301.48–6 Assembly and inspection of regulated articles.

Persons (other than those authorized to use certificates, limited permits, or restricted destination permits, or reproductions thereof, under § 301.48–4(e)) who desire to move interstate regulated articles which must be accompanied by a certificate or permit shall, as far in advance as possible, request an inspector to examine the articles prior to movement. Such articles shall be assembled at such points and in such manner as the inspector designates to facilitate inspection.

§ 301.48–7 Attachment and disposition of certificates and permits.

(a) If a certificate or permit is required for the interstate movement of regulated articles, the certificate or permit shall be securely attached to the outside of the container in which such articles are moved, except that, where the certificate or permit is attached to the waybill or other shipping document, and the regulated articles are adequately described on the certificate, permit, or shipping document, the attachment of the certificate or permit to each container of the articles is not required.

(b) In all cases, certificates or permits shall be furnished by the carrier to the consignee at the destination of the shipment.

§ 301.48–8 Inspection and disposal of regulated articles and pests.

Any properly identified inspector is authorized to stop and inspect, and to seize, destroy, or otherwise dispose of or require disposal of regulated articles and Japanese beetles as provided in section 10 of the Plant Quarantine Act (7 U.S.C. 164a) and section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd) in accordance with instructions issued by the Deputy Administrator.

§ 301.48–9 Movement of live Japanese beetles.

Regulations requiring a permit for and otherwise governing the movement of live Japanese beetles in interstate or foreign commerce are contained in the Federal Plant Pest Regulations in Part 330 of this chapter. Applications for permits for the movement of the pest may be made to the Deputy Administrator.

§ 301.48–10 Nonliability of the Department.

The U.S. Department of Agriculture disclaims liability for any costs incident to inspections or compliance with the provisions of the quarantine and regulations in this subpart other than for the services of the inspector.

Pursuant to a notice of hearing and proposed rule making published in the FEDERAL REGISTER on January 7, 1972 (37 F.R. 218), a public hearing was held in Memphis, Tenn., on February 15, 1972, regarding the proposed quarantining of the States of Alabama and Missouri on account of the Japanese beetle. After due consideration of all relevant information presented at the hearing or otherwise available in the Department, it has been decided to add Alabama and Missouri to the list of States quarantined because of Japanese beetle.

The foregoing revision differs from the notice of proposed rule making in some

[1] Pamphlets containing such provisions are available upon request to the Deputy Administrator, Plant Protection and Quarantine Programs, APHIS, U.S. Department of Agriculture, Washington, D.C. 20250, or from an inspector.

[2] Requirements under all other applicable Federal domestic plant quarantines must also be met.

[3] Pamphlets containing provisions for laboratory approval may be obtained from the Deputy Administrator, Plant Protection and Quarantine Program, APHIS, U.S. Department of Agriculture, Washington, D.C. 20250.

[4] For list of approved laboratories, see PP 639 (37 F.R. 7813, 15525, and amendments thereof).

respects. Appropriate changes are made to reflect the reorganization of the Ani-

V37-222-NOV16-72 XUM

respects. Appropriate changes are made to reflect the reorganization of the Animal and Plant Health Inspection Service. The responsibility for enforcement of Federal domestic plant quarantines has been transferred from Animal and Plant Health Service to Animal and Plant Health Inspection Service. In addition § 301.48–4 was amended to restrict the issuance of certificates by a holder of a compliance agreement to the issuance of certificates based on compliance with treatment and other requirements. Various other changes are also made.

The revision of the quarantine makes more stringent Japanese beetle requirements than presently applied and it should be made effective promptly in order to prevent the spread of the Japanese beetle and to be of maximum benefit to the noninfested States.

Therefore, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that further notice of rule making and other public procedures with respect to the revision are impracticable and unnecessary, and good cause is found for making the revision effective less than 30 days after publication in the FEDERAL REGISTER. This revision will become effective upon publication in the FEDERAL REGISTER and shall supersede the quarantine and regulations contained in §§ 301.48, 301.48–1, 301.48–2, and §§ 301.48–3 through 301.48–10. The provisions in § 301.48–2b remain in effect. The provisions of § 301.48–2a are being revised by a separate document.

(Secs. 8 and 9, 37 Stat. 318, as amended, sec. 106, 71 Stat. 33; 7 U.S.C. 161, 152, 150ee; 29 F.R. 16210, as amended, 37 F.R. 6505)

Done at Washington, D.C., this 10th day of November 1972.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

[FR Doc.72–19762 Filed 11–15–72;8:52 am]

PART 301—DOMESTIC QUARANTINE NOTICES

Subpart—Golden Nematode

Pursuant to sections 8 and 9 of the Plant Quarantine Act, as amended, and section 106 of the Federal Plant Pest Act (7 U.S.C. 161, 162, 150ee), Notice of Quarantine No. 85 relating to the golden nematode and regulations supplemental to said Quarantine (7 CFR 301.85, 301.85–1, 301.85–2, 301.85–3 et seq.), are hereby revised to read as follows:

QUARANTINE AND REGULATIONS

Sec.

301.85 Quarantine; restriction on interstate movement of specified regulated articles.
301.85–1 Definitions.
301.85–2 Authorization to designate, and terminate designation of, regulated areas and suporessive or generally infested areas; and to exempt articles from certification, permit, or other requirements.
301.85–3 Conditions governing the interstate movement of regulated articles from quarantined States.
301.85–4 Issuance and cancellation of certificates and permits.
301.85–5 Compliance agreement, and cancellation thereof.
301.85–6 Assembly and inspection of regulated articles.
301.85–7 Attachment and disposition of certificates or permits.
301.85–8 Inspection and disposal of regulated articles and nests.
301.85–9 Movement of live golden nematodes.
301.85–10 Nonliability of the Department.

§ 301.85 Quarantine; restriction on interstate movement of specified regulated articles.

(a) *Notice of quarantine.* Pursuant to the provisions of sections 8 and 9 of the Plant Quarantine Act of August 20, 1912, as amended, and section 106 of the Federal Plant Pest Act (7 U.S.C. 161, 162, 150ee), the Secretary of Agriculture heretofore determined after public hearing that it was necessary to quarantine the State of New York in order to prevent the spread of the golden nematode (*Heterodera rostochiensis*), which causes a dangerous disease of potatoes and certain other plants, and not theretofore widely prevalent or distributed within and throughout the United States. Therefore, under the authority of said provisions, the Secretary hereby continues to quarantine the State of New York, with respect to the interstate movement from the quarantined State of the articles described in paragraph (b) of this section, issues the regulations in this subpart governing such movement, and gives notice of said quarantine and regulations.

(b) *Quarantine restrictions on interstate movement of specified regulated articles.* No common carrier or other person shall move interstate from any quarantined State any of the following articles (defined in § 301.85–1(q) as regulated articles), except in accordance with the conditions prescribed in this subpart:

(1) Soil, compost, humus, muck, peat, and decomposed manure, separately or with other things.

(2) Plants with roots, except soil-free aquatic plants.

(3) Grass sod.

(4) Plant crowns and roats for propagation.

(5) True bulbs, corms, rhizomes, and tubers of ornamental plants.

(6) Irish potatoes and other root crops.

(7) Small grains and soybeans.

(8) Hay, straw, fodder, and plant litter, of any kind.

(9) Ear corn, except shucked ear corn.

(10) Used crates, boxes, and burlap bags, and other used farm products containers.

(11) Used farm tools.

(12) Used mechanized cultivating equipment and used harvesting equipment.

(13) Used mechanized soil-moving equipment.

(14) Any other products, articles, or means of conveyance of any character whatsoever, not covered by subparagraphs (1) through (13) of this paragraph, when it is determined by an inspector that they present a hazard of spread of golden nematode, and the person in possession thereof has been so notified.

§ 301.85–1 Definitions.

Terms used in the singular form in this subpart shall be deemed to import the plural and vice versa, as the case may demand. The following terms, when used in this subpart shall be construed respectively to mean:

(a) *Certificate.* A document issued or authorized to be issued under this subpart by an inspector to allow the interstate movement of regulated articles to any destination.

(b) *Compliance agreement.* A written agreement between a person engaged in growing, handling, or moving regulated articles, and the Plant Protection and Quarantine Programs, wherein the former agrees to comply with the requirements of this subpart identified in the agreement by the inspector who executes the agreement on behalf of the Plant Protection and Quarantine Programs as applicable to the operations of such person.

(c) *Deputy Administrator.* The Deputy Administrator of the Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or any other officer or employee of said service to whom authority to act in his stead has been or may hereafter be delegated.

(d) *Farm tools.* An instrument worked or used by hand, e.g., hoes, rakes, shovels, axes, hammers, and saws.

(e) *Generally infested area.* Any part of a regulated area not designated as a suppressive area in accordance with § 301.85–2.

(f) *Golden nematode.* The nematode known as the golden nematode (*Heterodera rostochiensis*), in any stage of development.

(g) *Infestation.* The presence of the golden nematode or the existence of circumstances that make it reasonable to believe that the golden nematode is present.

(h) *Inspector.* Any employee of the Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, or other person, authorized by the Deputy Administrator to enforce the provisions of the Quarantine and regulations in this subpart.

(i) *Interstate.* From any State into or through any other State.

(j) *Limited permit.* A document issued or authorized to be issued by an inspector to allow the interstate movement of noncertifiable regulated articles to a specified destination for limited handling, utilization or processing or for treatment.

(k) *Mechanized cultivating equipment; and mechanized harvesting equipment.* Mechanized equipment used for soil tillage, including tillage attachments for farm tractors, e.g., tractors, disks, plows, harrows, planters, and subsoilers; mechanized equipment used for harvesting purposes, e.g., combines, potato conveyors, and harvesters and hay balers.

(l) *Mechanized soil-moving equipment.* Equipment used for moving or transporting soil, e.g., draglines, bulldozers, dump trucks, road scrapers, etc.

(m) *Moved (movement, move).* Shipped, offered for shipment to a common carrier, received for transportation or transpoted by a common carrier, or carried, transported, moved, or allowed to be moved by all means. "Movement" and "move" shall be constructed accordingly.

(n) *Person.* Any individual, corporation, company, society, or association, or other organized group of any of the foregoing.

(o) *Plant protection and quarantine programs.* The organizational unit within the Animal and Plant Health Inspection Service delegated responsibility for enforcing provisions of the Plant Quarantine Act and Federal Plant Pest Act, and regulations promulgated thereunder.

(p) *Regulated area.* Any quarantined State, or any portion thereof, listed as a regulated areas in § 301–85–2a, or otherwise designated as a regulated area in accordance with § 301.85–2(b).

(q) *Regulated article.* Any articles as described in § 301.85(b).

(r) *Restricted destination permit.* A document issued or authorized to be issued by an inspector to allow the interstate movement of regulated articles not certifiable under all applicable Federal domestic plant quarantines to a specified destination for other than scientific purposes.

(s) *Scientific permit.* A document issued by the Deputy Administrator to allow the interstate movement to a specified destination of regulated articles for scientific purposes.

(t) *Soil.* That part of the upper layer of earth in which plants can grow.

(u) *State.* Any State, territory, or district of the United States, including Puerto Rico.

(v) *Suppressive area.* That portion of a regulated area where eradication of infestation is undertaken as an objective, as designated under § 301.85–2(a).

(w) *Treatment manual.* The provisions currently contained in the "Manual of Administratively Authorized Procedures to be Used Under the Golden Nematode Quarantine" and the "Fumigation Procedures Manual."[1]

§ 301.85–2 Authorization to designate, and terminate designation of, regulated areas and suppressive or generally infested areas; and to exempt articles from certification, permit, or other requirements.

(a) *Regulated areas and suppressive or generally infested areas.* The Deputy Administrator shall list as regulated areas, in a supplemental regulation designated as § 301.85–2a, each quarantined State; or each portion thereof in which golden nematode has been found or in which there is reason to believe that golden nematode is present, or which it is deemed necessary to regulate because of their proximity to infestation or their inseparability for quarantine enforcement purposes from infested localities. The Deputy Administrator, in the supplemental regulation, may divide any regulated area into a suppressive area or a generally infested area in accordance with the definitions thereof in § 301.85–1. Less than an entire quarantined State will be designated as a regulated area only if the Deputy Administrator is of the opinion that:

(1) The State has adopted and is enforcing a quarantine or regulation which imposes restrictions on the intrastate movement of the regulated articles which are substantially the same as those which are imposed with respect to the interstate movement of such articles under this subpart; and

(2) The designation of less than the entire State as a regulated area will otherwise be adequate to prevent the interstate spread of the golden nematode.

(b) *Temporary designation of regulated areas and suppressive or generally infested areas.* The Deputy Administrator or an authorized inspector may temporarily designate any other premises in a quarantined State as a regulated area and a suppressive or generally infested area, in accordance with the criteria specified in paragraph (a) of this section for listing such area, by serving written notice thereof on the owner or person in possession of such premises, and thereafter the interstate movement of regulated articles from such premises by any person having notice of the designation shall be subject to the applicable provisions of this subpart. As soon as practicable, such premises shall be added to the list in § 301.85–2a if a basis then exists for their designation; otherwise the designation shall be terminated by the Deputy Administrator or an authorized inspector and notice thereof shall be given to the owner or person in possession of the premises.

(c) *Termination of designation as a regulated area and a suppressive or generally infested area.* The Deputy Administrator shall terminate the designation provided for under paragraph (a) of this section of any area listed as a regulated area and suppressive or generally infested area when he determines that such designation is no longer required under the criteria specified in paragraph (a) of this section.

(d) *Exemption of articles from certification, permit, or other requirements.* The Deputy Administrator may, in a supplemental regulation designated as § 301.85–2b, list regulated articles or movements of regulated articles which shall be exempt from the certification, permit, or other requirements of this subpart under such conditions as he may prescribe, if he finds that facts exist as to the pest risk involved in the movement of such regulated articles which make it safe to so relieve such requirements.

§ 301.85–3 Conditions governing the interstate movement of regulated articles from quarantined States.[2]

(a) Any regulated articles except soil samples for processing, testing, or analysis may be moved interstate from any quarantined State under the following conditions:

(1) With certificate or permit issued and attached in accordance with §§ 301.85–4 and 301.85–7 if moved:

(i) From any generally infested area or any suppressive area into or through any point outside of the regulated areas; or

(ii) From any generally infested area into or through any suppressive area; or

(iii) Between any noncontiguous suppressive areas; or

(iv) Between contiguous suppressive areas when it is determined by an inspector that the regulated articles present a hazard of the spread of the golden nematode and the person in possession thereof has been so notified; or

(v) Through or reshipped from any regulated area when such movement is not authorized under subparagraph (2) (v) of this paragraph; or

(2) From any regulated area, without certificate or permit if moved:

(i) Under the provisions of § 301.85–2b which exempts certain articles from certificate and permit requirements; or

(ii) From a generally infested area to a contiguous generally infested area; or

(iii) From a suppressive area to a contiguous generally infested area; or

(iv) Between contiguous suppressive areas unless the person in possession of the articles has been notified by an inspector that a hazard of spread of the golden nematode exists; or

(v) Through or reshipped from any regulated area if the articles originated outside of any regulated area and if the point of origin of the articles is clearly indicated, their identity has been maintained, and they have been safeguarded against infestation while in the regulated area in a manner satisfactory to the inspector; or

(3) From any area outside the regulated areas, if moved:

(i) With a certificate or permit attached; or

(ii) Without a certificate or permit, if:

(*a*) The regulated articles are exempt from certification and permit requirements under the provisions of § 301.85–2b; or

(*b*) The point of origin of such movement is clearly indicated on the articles or shipping document which accompanies the articles and if the movement is not made through any regulated area.

(b) Unless specifically authorized by the Deputy Administrator in emergency situations, soil samples for processing, testing or analysis may be moved interstate from any regulated area only to

[1] Pamphlets containing such provisions are available upon request to the Deputy Administrator, Plant Protection and Quarantine Programs Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250, or from an inspector.

[2] Requirements under all other applicable Federal domestic plant quarantines must also be met.

laboratories approved[3] by the Deputy Administrator and so listed by him in a supplemental regulation.[4] A certificate or permit is not required to be attached to such soil samples except in those situations where the Deputy Administrator has authorized such movement only with a certificate or permit issued and attached in accordance with §§ 301.85–4 and 301.85–7. A certificate or permit is not required to be attached to soil samples originating in areas outside of the regulated areas if the point of origin of such movement is clearly indicated on the articles or shipping document which accompanies the articles and if the movement is not made through any regulated area.

§ 301.85–4 Issuance and cancellation of certificates and permits.

(a) Certificates may be issued for any regulated articles (except soil samples for processing, testing, or analysis) by an inspector if he determines that they are eligible for certification for movement to any destination under all Federal domestic plant quarantines applicable to such articles and:

(1) Have originated in noninfested premises in a regulated area and have not been exposed to infestation while within the regulated areas; or

(2) Have been treated to destroy infestation in accordance with the treatment manual; or

(3) Have been grown, produced, manufactured, stored, or handled in such a manner that no infestation would be transmitted thereby.

(b) Limited permits may be issued by an inspector to allow interstate movement of regulated articles (except soil samples for processing, testing or analysis) not eligible for certification under this subpart, to specified destinations for limited handling, utilization, or processing, or for treatment in accordance with the treatment manual, when, upon evaluation of the circumstances involved in each specific case he determines that such movement will not result in the spread of the golden nematode and requirements of other applicable Federal domestic plant quarantines have been met.

(c) Restricted destination permits may be issued by an inspector to allow the interstate movement (for other than scientific purposes) of regulated articles (except soil samples for processing, testing, or analysis) to any destination permitted under all applicable Federal domestic plant quarantines if such articles are not eligible for certification under all such quarantines but would otherwise qualify for certification under this subpart.

(d) Scientific permits to allow the interstate movement of regulated articles and certificates or permits to allow the movement of soil samples for processing, testing, or analysis in emergency situations may be issued by the Deputy Administrator under such conditions as may be prescribed in each specific case by the Deputy Administrator to prevent the spread of the golden nematode.

(e) Certificate, limited permit, and restricted destination permit forms may be issued by an inspector to any person for use for subsequent shipments of regulated articles (except for soil samples for processing, testing, or analysis) provided such person is operating under a compliance agreement; and any such person may be authorized by an inspector to reproduce such forms on shipping containers or otherwise. Any such person may execute and issue the certificate forms, or reproductions of such forms, for the interstate movement of regulated articles from the premises of such person identified in the compliance agreement if such person has treated such regulated articles to destroy infestation in accordance with the treatment manual, and if such regulated articles are eligible for certification for movement to any destination under all Federal domestic plant quarantines applicable to such articles. Any such person may execute and issue the limited permit forms, or reproductions of such forms, for interstate movement of regulated articles to specified destinations when the inspector has made the determinations specified in paragraph (b) of this section. Any such person may execute and issue the restricted destination permit forms, or reproductions of such forms, for the interstate movement of regulated articles not eligible for certification under all Federal domestic plant quarantines applicable to such articles, under the conditions specified in paragraph (c) of this section.

(f) Any certificate or permit which has been issued or authorized may be withdrawn by the inspector or the Deputy Administrator if he determines that the holder thereof has not complied with any condition for the use of such document imposed by this subpart. Prior to such withdrawal, the holder of the certificate of permit shall be notified of the proposed action and the reason therefor and afforded reasonable opportunity to present his views thereon.

§ 301.85–5 Compliance agreement, and cancellation thereof.

(a) Any person engaged in the business of growing, handling, or moving regulated articles may enter into a compliance agreement to facilitate the movement of such articles under this subpart. Compliance agreement forms may be obtained from the Deputy Administrator or an inspector.

(b) Any compliance agreement may be canceled by the inspector who is superior to present views has been accorded to vising its enforcement whenever he finds, after notice and reasonable opportunity the other party thereto, that such other party has failed to comply with the conditions of the agreement.

§ 301.85–6 Assembly and inspection of regulated articles.

Persons (other than those authorized to use certificates, limited permits, or restricted destination permits, or reproductions thereof, under § 301.85–4(e)) who desire to move interstate regulated articles which must be accompanied by a certificate or permit shall, as far in advance as possible, request an inspector to examine the articles prior to movement. Such articles shall be assembled at such points and in such manner as the inspector designates to facilitate inspection.

§ 301.85–7 Attachment and disposition of certificates and permits.

(a) If a certificate or permit is required for the interstate movement of regulated articles, the certificate or permit shall be securely attached to the outside of the container in which such articles are moved, except that, where the certificate or permit is attached to the waybill or other shipping document, and the regulated articles are adequately described on the certificate, permit, or shipping document, the attachment of the certificate or permit to each container of the articles is not required.

(b) In all cases, certificates or permits shall be furnished by the carrier to the consignee at the destination of the shipment.

§ 301.85–8 Inspection and disposal of regulated articles and pests.

Any properly identified inspector is authorized to stop and inspect, and to seize, destroy, or otherwise dispose of, or require disposal of regulated articles and golden nematodes as provided in section 10 of the Plant Quarantine Act (7 U.S.C. 164a) and section 105 of the Federal Plant Pest Act (7 U.S.C. 150dd) in accordance with instructions issued by the Deputy Administrator.

§ 301.85–9 Movement of live golden nematodes.

Regulations requiring a permit for and otherwise governing the movement of live golden nematodes in interstate or foreign commerce are contained in the Federal Plant Pest Regulations in Part 330 of this chapter. Applications for permits for the movement of the pest may be made to the Deputy Administrator.

§ 301.85–10 Nonliability of the Department.

The U.S. Department of Agriculture disclaims liability for any costs incident to inspections or compliance with the provisions of the Quarantine and regulations in this subpart, other than for the services of the inspector.

The regulations have been revised to permit the Deputy Administrator or an inspector to designate generally infested and suppressive areas, and further,

[3] Pamphlets containing provisions for laboratory approval may be obtained from the Deputy Administrator, Plant Protection and Quarantine Programs, APHIS, U.S. Department of Agriculture, Washington, D.C. 20250.

[4] For list of approved laboratories, see PP 639 (37 F.R. 7813, 15525, and amendments thereof).

specifically authorize the Deputy Administrator to terminate the designation of regulated areas under specified criteria. Section 301.85–4 was amended to restrict the issuance of certificates by a holder of a compliance agreement to the issuance of certificates based on compliance with treatment and other requirements. Various other changes were also made.

Insofar as the revision of the quarantine makes more stringent requirements than presently applied it should be made effective promptly in order to prevent the spread of the golden nematode and to be of maximum benefit to the noninfested States. The other changes do not impose additional obligations on any person.

Therefore, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that further notice of rule making and other public procedures with respect to the revision are impracticable and unnecessary, and good cause is found for making the revision effective less than 30 days after publication in the FEDERAL REGISTER. This revision will become effective upon publication in the FEDERAL REGISTER (11–16–72) and shall supersede the quarantine and regulations contained in §§ 301.85, 301.85–1, 301.85–2, and §§ 301.85–3 through 301.85–10. The provisions in § 301.85–2b remain in effect. The provisions of § 301.85–2a as issued on September 27, 1972 (37 F.R. 20158) are hereby ratified and shall continue in effect as if issued under this revision.

(Secs. 8, 9, 37 Stat. 318, as amended, sec. 105, 71 Stat. 33; 7 U.S.C. 161, 162, 150ee, 29 F.R. 16210, as amended, 37 F.R. 6327, 6505)

Done at Washington, D.C., this 10th day of November 1972.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Navel Orange Reg. 275]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

§ 907.575 Navel Orange Regulation 275.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on November 14, 1972.

(b) *Order.* (1) The respective quantities of Navel oranges grown in Arizona and designated part of California which may be handled during the period November 17 through November 23, 1972, are hereby fixed as follows:

(i) District 1: 837,000 cartons;

(ii) District 2: unlimited;

(iii) District 3: 63,000 cartons.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: November 14, 1972.

PAUL A. NICHOLSON,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 6—ECONOMIC STABILIZATION

Chapter III—Price Commission

PART 301—RENT STABILIZATION

Rent Adjustment: Annual Increment

This amendment makes more explicit the Price Commission's policy that (1) the 2½-percent annual increment by which lessors may raise residential rents above base rent, provided by § 301.101(a)(1), may be accumulated, and (2) the rent of any residence may be raised by the use of the 2½-percent annual increment only once in any 12-month period, regardless of whether all or only part of the total allowable increment is used in the increase.

Section 301.102(a)(1) of regulations published in the FEDERAL REGISTER on December 30, 1971 (36 F.R. 25389), prohibited the accumulation of the annual increment by which lessors may raise rents. This policy was later changed by the Commission in an amendment issued on March 31, 1972 (37 F.R. 6565), which deleted the parenthetical phrase in that section prohibiting such an accumulation of the increment.

When the rent stabilization regulations were republished on July 4, 1972 (37 F.R. 13226), § 301.102 was redesignated as § 301.101 with minor editorial changes.

Although no substantive change was intended, it appears that the republished provisions of that section have been misunderstood by some persons as a change in policy. To correct this misunderstanding, this amendment reaffirms the Commission's policy that all or any part of the annual increment may be accumulated, but that the annual increment can be used, in whole or in part, only once in any 12-month period (over which it must be prorated), to increase the rent of a residence.

Since this amendment provides immediate guidance and information for the effective implementation of the rent stabilization program, further notice and public procedure thereon is impracticable and good cause exists for making it effective less than 30 days after publication.

(Economic Stabilization Act of 1970, as amended, Public Law 91–379, 84 Stat. 799; Public Law 91–558, 84 Stat. 1468; Public Law 92–8, 85 Stat. 13; Public Law 92–15, 85 Stat. 38; Economic Stabilization Act Amendments of 1971, Public Law 92–210; Executive Order No. 11640, 37 F.R. 1213, Jan. 27, 1972; Cost of Living Council Order No. 4, 36 F.R. 20202, Oct. 16, 1971)

In consideration of the foregoing, § 301.101(a)(1) of Part 301 of Title 6 of the Code of Federal Regulations is amended as set forth below, effective November 13, 1972.

Issued in Washington, D.C., on November 13, 1972.

§ 301.101 Rent adjustments.

(a) • • •

(1) *Two and one-half percent annual increment.* A sum of no more than 2½ percent of the base rent, plus a sum of no more than 2½ percent of the base rent for each consecutive 12-month period which has elapsed since the effective date of the first rent increase based on the 2½-percent annual increment. Or, if the rent has not been increased based on the 2½-percent annual increment since December 28, 1971, a sum of no more than 2½ percent of the base rent, plus a sum of no more than 2½ percent of the base rent for each consecutive 12-month period which has elapsed since the effective date of the first lease entered into after December 28, 1971. Any increase in rent authorized under this subparagraph may be deferred in whole or in part by a lessor and the rent thereafter may be increased by any part of the deferred amount. However, the rent may not be increased based on the annual increment or any part thereof more than once in any 12-month period.

Chapter IV—Internal Revenue Service, Department of the Treasury

PART 401—PROCEDURAL RULES RELATING TO ECONOMIC STABILIZATION MATTERS

Notice of Apparent Liability for Rent Violations

In order to establish procedures relating to the issuance of notices of apparent liability by the Internal Revenue Service, the Internal Revenue Service procedural rules relating to economic stabilization (6 CFR Part 401) are amended as follows:

PARAGRAPH 1. Section 401.2 is amended by adding alphabetically a definition of "Notice of apparent liability" and "Final notice of apparent liability" to read as follows:

§ 401.2 Definitions and terms.

• • • • • •

"Notice of apparent liability" and "Final notice of apparent liability" mean a written statement issued in lieu of a notice of violation to a landlord by the Internal Revenue Service setting forth one or more charges of alleged violation of the President's Economic Stabilization Program, which may direct the landlord to:

(a) Make restitution to overcharged tenants,

(b) Roll back rents to the legal limits,

(c) Pay a penalty, and

(d) Sign a statement that no retaliatory action will be taken against any tenants who exercise their right under the program.

• • • • • •

PAR. 2. Section 401.502 is amended by revising paragraph (b) and by deleting paragraph (c), to read as follows:

§ 401.502 Violations.

• • • • • •

(b) *Civil and criminal action.* The Internal Revenue Service may recommend, to the full extent of sanctions available under the President's Economic Stabilization Program, with respect to the alleged violations, the institution of appropriate actions against a principal referred to in Subpart M of this part or a landlord referred to in Subpart N of this part.

(c) [Deleted]

PAR. 3. Section 401.601 is revised to read as follows:

§ 401.601 Right to appeal.

Any person who is—

(a) A person aggrieved (as defined in § 401.2), except a person aggrieved by a ruling, or

(b) Subject to any provision of an interpretation,

may appeal in the manner set forth in this subpart. A person is, for the purposes of paragraph (b) of this section, subject to such a provision only if the interpretation was issued to him, the action is adverse to him, and he has a substantial pecuniary interest. A principal referred to in Subpart M of this part or a landlord referred to in Subpart N of this part may not make an appeal pursuant to the provisions of this subpart with respect to the subject matter of the notice of violation or apparent liability, respectively, served upon him. Any appeal not in accordance with this subpart, may be rejected by the Office of the Chief Counsel (Stabilization Division).

PAR. 5. 6 CFR Part 401 is amended by adding new Subparts M and N after Subpart L, to read as follows:

Subpart M—Notice of Violation

§ 401.1021 Notice of violation.

A person served with a notice of violation will be given an opportunity to explain his position with respect to the alleged violation prior to the submission of the case by the district director to the U.S. Attorney unless compelling reasons exist to the contrary. (See § 401.5 for rules relating to service.) The principal (the person upon whom the notice was served) will be granted an interview if he makes a request to the appropriate district director within 2 ways after the date of receipt of the notice of violation. The interview will be held within a reasonable time after the receipt by the district director of the request for an interview, but in no event more than 5 days after the receipt of such request. At this interview, the principal may have counsel present and will be informed, by a general oral statement, of the features of his case which are alleged to show a violation of economic stabilization regulations and guidelines and, at the same time, there will be made available to the principal sufficient facts, figures, and legal analysis to acquaint him with the nature, basis, and other essential elements of the alleged violation. In his discretion, the district director, with the consent of the principal, may invite such other persons as are affected to participate in the conference. The principal may not file an appeal pursuant to the provisions of Subpart G of this part nor may he make a request for an interpretation or ruling with respect to the subject matter of the notice of violation.

Subpart N—Notice of Apparent Liability

§ 401.1031 Notice of apparent liability.

(a) *In general.* A notice of apparent liability informs the landlord that he has been charged with one or more violations of the President's Economic Stabilization Program and requests his compliance with the remedies (including the payment of any penalty) directed by the Internal Revenue Service. The final notice of apparent liability informs the landlord that unless he complies with remedies directed by the Internal Revenue Service in the final notice of apparent liability wihin 30 days (except that any penalty must be paid within 10 days), the case may subject the landlord to prosecution with respect to the charges alleged in the final notice of liability and the full amount of the civil or criminal penalties applicable thereto. The prosecution may be begun without the issuance of a notice of violation, since both the notice of apparent liability and the final notice of apparent liability are issued in lieu of a notice of violation. A person served with notice of apparent liability will be given an opportunity to explain his position by means of an appeal prior to the issuance of a final notice of apparent liability. (See § 401.5 for rules relating to service.)

(b) *Procedure if no appeal is taken.* If no appeal of a notice of apparent liability is taken, the district director shall issue a final notice of apparent liability.

(c) *Appeal procedure.* The landlord may appeal a notice of apparent liability to an Internal Revenue Service appeals representative if he makes a request to the appropriate district director within 10 days, or any extensions thereof, after the date of receipt of the notice of apparent liability. The appeal must be in writing and shall include:

(1) The landlord's name, address, and identifying number,

(2) A copy of the notice of apparent liability being appealed,

(3) A statement of the landlord's objections to the notice,

(4) A statement of the landlord's views as to the effect of the Economic Stabilization regulations and guidelines as they relate to the subject matter of the notice of apparent liability and the relevant authorities that support his views, and

(5) Whether a conference is desired.

(d) *Conference.* If a conference is requested, the landlord will be notified by the appeals representative of the time and place for such conference within 3 days of the receipt of the appeal in the district office. At such conference, the landlord may have counsel present and will have the opportunity to present evidence for the purpose of changing the findings of fact. Where substantial uncertainties exist either in law or in fact, or both, as to the correct application of the law to the whole record of controversy, the appeals representative will give serious consideration to an offer of settlement of the dispute on a basis which fairly reflects the relative merits of the opposing views in the light of the hazards which would prevail if the case were litigated.

(e) *Decision on appeal.* After the written appeal is received by the district director or after a conference has been requested and held by the appeals representative and the findings made as a result of such review are—

(1) Adverse in whole or in part to the landlord, the landlord will be served with a final notice of liability, or

(2) Not adverse to the landlord or settled, the landlord will be advised that no further action shall be taken.

(f) *Other participants at the conference.* With the consent of the landlord, such other persons as are affected may be invited to participate in the conference described in paragraph (d) of this section.

(g) *No further appeals.* The landlord may not make an appeal pursuant to the provisions of Subpart G of this part nor may he make a request for a determination with respect to the subject matter of the notice of apparent liability.

Because of the need for immediate guidance from the Internal Revenue Service with respect to the subject matter of this regulation, it is found impracticable to issue such regulation with notice and public procedure thereon under section 553(b) of Title 5 of the United States Code or subject to the effective date limitation of section 553(d) of such title.

(Economic Stabilization Act of 1970 as amended, Public Law 91-379; 84 Stat. 799; Public Law 91-558, 84 Stat. 1468; Public Law 92-8, 85 Stat. 13; Public Law 92-15, 85 Stat. 38; Public Law 92-210, 85 Stat. 743; Executive Order 11640 (37 F.R. 1213 (1972)); Cost of Living Council Order No. 8 (37 F.R. 2727 (1972)); Price Commission Order No. 2 (37 F.R. 3212 (1972))

This regulation has been approved by the Cost of Living Council.

JOHNNIE M. WALTERS,
Commissioner of Internal Revenue.
LEE H. HENKEL, JR.,
Chief Counsel for the Internal Revenue Service.

of Cumberland, Sampson, and Johnston Counties in North Carolina from the areas quarantined because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded areas, but will continue to apply to the quarantined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded areas.

The amendments relieve restrictions presently imposed but no longer deemed necessary to prevent the spread of hog cholera and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to this Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and unnecessary, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 10th day of November 1972.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. 72-579]

PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

Release of Areas Quarantined

Pursuant to provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f), Part 76, Title 9, Code of Federal Regulations, restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases, is hereby amended in the following respects:

1. In § 76.2, in paragraph (e)(7) relating to the State of Ohio, subdivision (iii) relating to Madison County is deleted.

2. In § 76.2, paragraph (f) is amended by adding thereto the name of the State of Nebraska.

(Secs. 4–7, 23 Stat. 32, as amended; secs 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 29 F.R. 16210, as amended; 36 F.R. 20707, 21529, 21530, 37 F.R. 6327, 6505)

Effective date. The foregoing amendments shall become effective upon issuance.

The amendments exclude a portion of Madison County in Ohio from the areas quarantined because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded area, but will continue to apply to the quarantined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded area.

The amendments add Nebraska to the list of hog cholera Eradication States in § 76.2(f), and the special provisions pertaining to the interstate movement of swine and swine products from Eradication States are applicable to Nebraska.

The amendments relieve restrictions presently imposed but no longer deemed necessary to prevent the spread of hog cholera and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rule making proceeding would make additional relevant information available to this Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and unnecessary, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 10th day of November 1972.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

PART 90—EXTRAORDINARY EMERGENCY REGULATIONS

Certain Intrastate Activities Concerning Poultry and Other Birds in California

Pursuant to sections 2, 3, 5, and 11 of the act of July 2, 1962 (21 U.S.C. 134a, 134b, 134d, and 134f), and the Talmadge-Aiken Act of September 28, 1962 (7 U.S.C. 450), the heading for subchapter C is amended to read as set forth above, and a new part 90 is issued to read as follows:

Sec.
90.1 Determination of extraordinary emergency; related determinations.
90.2 Definitions.
90.3 Requirement of sentinel birds.
90.4 Inspections and seizures.
90.5 Disposal of birds, products and articles.
90.6 Cleaning and disinfecting requirements.

AUTHORITY: The provisions of this Part 90 issued under secs. 2, 3, 5 and 11, 76 Stat. 129, 130, 132; 76 Stat. 663; 21 U.S.C. 134a, 134b, 134d, and 134f; 7 U.S.C. 450, 29 F.R. 16210, as amended, 36 F.R. 20707, 21529, 21530, 37 F.R. 6327, 6505.

§ 90.1 Determination of extraordinary emergency; related determinations.

Exotic Newcastle disease is a dangerous, communicable disease of poultry and other birds and it is hereby determined that an extraordinary emergency exists because of outbreaks of the disease in California and that such outbreaks threaten the poultry of the United States and seriously burden interstate and foreign commerce. It is further determined that adequate measures to control such outbreaks are not being taken by the State of California and that the regulations in this part are necessary to enable the identification of poultry and other birds that are or have been affected with or exposed to such disease, and otherwise to carry out the provisions and purposes of the act of July 2, 1962 (21 U.S.C. 134–134h). The Governor of the State of California has been informed of these facts.

§ 90.2 Definitions.

As used in this part, the following terms shall have the meanings ascribed to them in this section.

(a) *The act.* The act of July 2, 1962 (21 U.S.C. 134–134h).

(b) *Administrator.* The Administrator, Animal and Plant Health Inspection Service of the Department, or any other official of said service to whom authority to act in his stead has been or may hereafter be delegated.

(c) *Commercial flock.* Any flock of poultry maintained for the purpose of commercial production of meat or eggs (whether the eggs are used for food or for hatching purposes), or for the purpose of exhibition.

(d) *Department.* The U.S. Department of Agriculture.

(e) *Exotic Newcastle disease.* The exotic, viscerotropic type of Newcastle disease, a contagious, infectious, and communicable disease of poultry and other birds.

(f) *Federal inspector.* An inspector employed in the Veterinary Services unit, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, and designated by the Administrator to perform specific functions under the regulations in this part.

(g) *Flock.* Any group of two or more poultry or other birds maintained in confinement, segregated from any other group for any purpose.

(h) *Other birds.* Psittacine and mynah birds and birds of all other species (except poultry), of all ages, which are under any form of confinement.

(i) *Poultry.* Chickens, ducks, geese, swans, turkeys, pigeons, doves, guinea fowl, and pea fowl, of all ages.

(j) *Sentinel bird.* A specific pathogen-free chicken which has not been infected with, exposed to, or immunized with any strain of Newcastle disease virus and is therefore susceptible to exotic Newcastle disease.

(k) *State inspector.* An inspector employed in livestock or poultry health work of the State of California, or a political subdivision thereof, who is authorized by such State or political subdivision and designated by the Administrator as a collaborator, to perform specific functions under the regulations in this part.

§ 90.3 Requirement of sentinel birds.

The owner of each commercial flock of poultry kept on any premises within any area quarantined in § 82.3 of this chapter shall accept into and maintain in such flock, such sentinel bird or birds as shall be provided by a Federal or State inspector to enable identification of any poultry and other birds on such premises that are or have been affected with or exposed to exotic Newcastle disease. This requirement shall also apply to any flock of poultry other than a commercial flock and to any flock of other birds, when the inspector has specific reason to believe that poultry or other birds that are or have been affected with or exposed to said disease may exist in such flock, and so notifies the owner of such flock. The owner of any such flock shall provide feed, water, and shelter adequate for the maintenance of such birds and allow them to associate freely with all other poultry in the flock in which they are placed by such inspector.

Sentinel birds shall not be moved, without authorization of a Federal or State inspector, from the premises or flock where they are placed by such an inspector, and no person shall vaccinate or otherwise administer any immunizing agent to, or kill any sentinel bird or do any other act which would have an adverse effect upon any such bird, or prevent the examination, or removal from the flock or premises, of any such bird, by such an inspector.

§ 90.4 Inspections and seizures.

(a) Federal or State inspectors designated by the Administrator, and identified by an official identification card shall have authority to enter, with a warrant obtained under section 5 of the act (21 U.S.C. 134d), upon any premises in any area quarantined in § 82.3 of this chapter or elsewhere in California, for the purpose of making inspections and seizures necessary under the act or the regulations in this part. Such inspectors may enter upon any premises without a warrant if the person in possession of the premises voluntarily consents to their entry.

§ 90.5 Disposal of birds, products and articles.

(a) Whenever the Administrator finds that any poultry or other birds upon any premises in any area quarantined in § 82.3 of this chapter or elsewhere in California are, or have been affected with, or exposed to, exotic Newcastle disease, or that any eggs, carcasses, or other products or articles were so related to such poultry or other birds as to be likely to be a means of disseminating the disease, he will order the owner thereof, or his agent in possession thereof, to maintain them in quarantine for such period and dispose of them within such time, and in such manner, as he shall prescribe in accordance with section 2 of the act (21 U.S.C. 134a). The order shall be served upon the owner of the birds, products or articles, or his agent, in person by a Federal or State inspector. If the owner or his agent does not comply with such order, after such notice thereof, the Administrator may seize, quarantine, and dispose of the birds, products, or articles as provided in said section 2.

(b) When any poultry, other birds, or products or articles are ordered to be quarantined on any premises under paragraph (a), they shall not be moved from such premises unless authorized by the Administrator.

§ 90.6 Cleaning and disinfecting requirements.

All pens, coops, and other facilities found by a Federal inspector to have been used in the handling of any poultry or other birds, or related products or articles, subject to an order under § 90.5, shall be cleaned and disinfected in accordance with the provisions in §§ 71.7(c), 71.10, and 71.11 of this subchapter, unless other disposal is ordered under § 90.5.

Effective date. The foregoing determinations and regulations shall become effective upon issuance. They do not affect in any way the interstate regulations in 9 CFR, Part 82.

The foregoing determinations and regulations impose certain restrictions necessary to prevent the spread of exotic Newcastle disease, a dangerous, communicable disease of poultry, and must be made effective immediately to accomplish their purpose in the public interest.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to these actions are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 10th day of November 1972.

RICHARD E. LYNG,
Acting Secretary of Agriculture.

Title 12—BANKS AND BANKING

Chapter II—Federal Reserve System

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Z]

PART 226—TRUTH IN LENDING

Open End Credit; Credit Cards; Issuance and Liability

1. Effective June 1, 1973, §§ 226.5(a)(3), 226.7(a)(4), 226.7(b) (5) and (6), and 226.7(c) of Regulation Z are amended to read as set forth below, and §§ 226.702 and 226.704 are revoked; and

2. Effective December 15, 1972, §§ 206.-13(a)(4), (b), and (c) are amended to read as set forth below:

§ 226.5 Determination of annual percentage rate.

(a) *General rule—open end credit accounts.* * * *

(3) Where the finance charge imposed during the billing cycle is or includes:

(i) Any minimum, fixed, or other charge not due to the application of a periodic rate, other than a charge with respect to any specific transaction during the billing cycle, by dividing the total finance charge for the billing cycle by the amount of the balance(s) to which applicable and multiplying the quotient (expressed as a percentage) by the number of billing cycles in a year; or

(ii) Any charge with respect to any specific transaction during the billing cycle (even if the total finance charge also includes any other minimum, fixed or other charge not due to the application of a periodic rate), by dividing the total finance charge imposed during the billing cycle by the total of all balances and other amounts on which any finance charge was imposed during the billing cycle without duplication and multiplying the quotient (expressed as a percentage) by the number of billing

V 37-222 NOV 16 72 XUM

cycles in a year,[5a] except that the annual percentage rate shall not be less than the largest rate determined by multiplying each periodic rate imposed during the billing cycle by the number of periods in a year; or

(iii) Any minimum, fixed, or other charge not due to the application of a periodic rate and the total finance charge imposed during the billing cycle does not exceed 50 cents for a monthly or longer billing cycle, or the pro rata part of 50 cents for a billing cycle shorter than monthly, at the creditor's option, by multiplying each applicable periodic rate by the number of periods in a year,

[5a] In determining the denominator of the fraction under § 226.5(a)(3)(ii) no amount will be used more than once when adding the sum of the balances to which periodic rates apply to the sum of the amounts financed to which specific transaction charges apply. In every case the full amount of transactions to which specific transaction charges apply shall be included in the denominator. Other balances or parts of balances shall be included according to the manner of determining the balance to which a periodic rate is applied, as illustrated in the following examples of accounts on monthly billing cycles:

1. Previous balance—none.

A specific transaction of $100 occurs on first day of the billing cycle. The average daily balance is $100. A specific transaction of 3 percent is applicable to the specific transactions. The periodic rate is 1½ percent applicable to the average daily balance. The numerator is the amount of the finance charge, which is $4.50. The denominator is the amount of the transaction (which is $100), plus the amount by which the balance to which the periodic rate applies exceeds the amount of specific transactions (such excess in this case is 0), totaling $100.

The annual percentage rate is the quotient (which is 4.5 percent) multiplied by 12 (the number of months in a year), i.e., 54 percent.

2. Previous balance—$100.

A specific transaction of $100 occurs at midpoint of the billing cycle. The average daily balance is $150. A specific transaction charge of 3 percent is applicable to the specific transaction. The periodic rate is 1½ percent applicable to the average daily balance. The numerator is the amount of finance charge which is $5.25. The denominator is the amount of the transaction (which is $100), plus the amount by which the balance to which the periodic rate applies exceeds the amounts of specific transactions (such excess in this case is $50), totaling $150.

As explained in example 1, the annual percentage rate is 3.5 percent × 12=42 percent.

3. If, in example 2, the periodic rate applies only to the previous balance, the numerator is $4.50 and the denominator is $200 (the amount of the transaction, $100, plus the balance to which only the periodic rate is applicable, the $100 previous balance). As explained in example 1, the annual percentage rate is 2.25 percent × 12=27 percent.

4. If, in example 2, the periodic rate applies only to an adjusted balance (previous balance less payments and credits) and the customer made a payment of $50 at midpoint of billing cycle, the numerator is $3.75 and the denominator is $150 (the amount of the transaction, $100, plus the balance to which only the periodic rate is applicable, the $50 adjusted balance). As explained in example 1, the annual percentage rate is 2.5 percent × 12=30 percent.

5. Previous balance—$100.

A specific transaction (check) of $100 occurs at the midpoint of the billing cycle. The average daily balance is $150. The specific transaction charge is 25 cents per check. The periodic rate is 1½ percent applied to the average daily balance. The numerator is the amount of the finance charge, which is $2.50 and includes the 25-cents check charge and the $2.25 resulting from the application of the periodic rate. The denominator is the full amount of the specific transaction (which is $100) plus the amount by which the average daily balance exceeds the amount of the specific transaction (which in this case is $50), totaling $150. As explained in example 1, the annual percentage rate would be 1⅔ percent × 12=20 percent.

[5b] A creditor imposing minimum charges is not required to adjust the disclosure of the range of balances to which each periodic rate would apply in order to reflect the range of the balances below which the minimum charge applies. If a creditor does not impose a finance charge when the outstanding balance is less than a certain amount, the creditor is not required to disclose that fact or the balance below which no such charge will be imposed.

notwithstanding the provisions of subdivisions (i) and (ii) of this subparagraph.

§ 226.7 Open end credit accounts—specific disclosures.

(a) *Opening new account.* * * *

(4) Where one or more periodic rates may be used to compute the finance charge, each such rate, the range of balances to which it is applicable, and the corresponding annual percentage rate determined by multiplying the periodic rate by the number of periods in a year.[5a]

* * * * * *

(b) *Periodic statements required.* * * *

(5) Each periodic rate, using the term "periodic rate" (or "rates"), that may be used to compute the finance charge (whether or not applied during the billing cycle), the range of balances to which it is applicable, and the corresponding annual percentage rate determined by multiplying the periodic rate by the number of periods in a year. The words "corresponding annual percentage rate," "corresponding nominal annual percentage rate," "nominal annual percentage rate" or "annual percentage rate" (or "rates") may be used to describe the corresponding annual percentage rate. The requirements of § 226.6(a) with respect to disclosing the term "annual percentage rate" more conspicuously than other required terminology shall not be applicable to the disclosure made under this subparagraph, although such term (or words incorporating such term) may, at the creditor's option, be shown as conspicuously as the terminology required under subparagraph 6 of this paragraph. Where a minimum charge may be applicable to the account, the amount of such minimum charge shall be disclosed.[5b]

(6) When a finance charge is imposed during the billing cycle, the annual percentage rate or rates determined under § 226.5(a) using the term "annual percentage rate" (or "rates").

* * * * * *

(c) *Location of disclosures.* The disclosures required by paragraph (b) of this section shall be made on the face of the periodic statement, except that, at the creditor's option:

(1) Itemization of the amount and date of each extension of credit (or the date such extension of credit was debited to the account) required to be disclosed under paragraph (b)(2) of this section and itemization of the amount of the "credits" disclosed under paragraph (b)(3) of this section, and of the amount of any finance charge required to be disclosed under paragraph (b)(4) of this section, may be made on the reverse side of the periodic statement or on a separate accompanying statement(s), provided that the totals of such respective amounts are disclosed on the face of the periodic statement; and

(2) The disclosures required under paragraph (b)(5) and (8) of this section, except the balance on which the finance charge was computed, may be made on the reverse side of the periodic statement or on the face of a single supplemental statement which shall accompany the periodic statement.

(3) If the creditor exercises any of the options provided under this paragraph, the face of the periodic statement shall contain one of the following notices, as applicable: "NOTICE: See reverse side for important information" or "NOTICE: See accompanying statement(s) for important information" or "NOTICE: See reverse side and accompanying statement(s) for important information," and the disclosures shall not be separated so as to confuse or mislead the customer or obscure or detract attention from the information required to be disclosed.

§ 226.13 Credit cards—issuance and liability.

(a) *Supplemental definitions applicable to this section.* * * *

(4) *"Cardholder"* means any person to whom a credit card is issued for personal, family, household, agricultural, business, or commercial purposes, or any person who has agreed with the card issuer to pay obligations arising from the issuance

[5a] A creditor imposing minimum charges is not required to adjust the disclosure of the range of balances to which each periodic rate would apply in order to reflect the range of the balances below which the minimum charge applies. If a creditor does not impose a finance charge when the outstanding balance is less than a certain amount, the creditor is not required to disclose that fact or the balance below which no such charge will be imposed.

of a credit card to another person for such purposes.

* * * * * *

(b) *Issuance of credit cards.* Regardless of whether a credit card is to be used for personal, family, household, agricultural, business, or commercial purposes, no credit card shall be issued to any person except:

(1) In response to a request or application therefor, or

(2) As a renewal of, or in substitution for, an accepted credit card whether such card is issued by the same or a successor card issuer.

(c) *Conditions of liability of cardholder.* A cardholder shall be liable for unauthorized use of each credit card issued only if, * * *

§ 226.702 [Revoked]

§ 226.704 [Revoked]

3. These amendments are promulgated pursuant to section 105 of the Truth in Lending Act (15 U.S.C. 1604). Notice of proposed rule making was published on July 6, 1972 (37 F.R. 13270) and August 12, 1972 (37 F.R. 16407). After consideration of all relevant matter submitted by interested parties, technical changes were made to §§ 226.5(a)(3)(ii), 226.5(a)(3)(iii), 226.7(c)(1), 226.13(a)(4), 226.13(b) and 226.13(c). Footnote 6a was added to § 226.7(a)(4).

4. The amendment to § 226.5(a)(3) relocates the formula for computing annual percentage rates in the case of finance charges imposed with respect to specific transactions during the billing cycle—for example, one-time fees on cash advances—to the section dealing with annual percentage rate computation. The formula was previously contained in § 226.7(b)(6) and Board interpretation § 226.704. The interpretation is hereby revoked as of the effective date of the amendment. This amendment also clarifies the fact that the regulation does not require computation of the annual percentage rate by the quotient method when the total finance charge, including charges with respect to specific transactions, does not exceed $0.50.

5. The amendment adds a requirement to § 226.7(b)(5) that the corresponding annual percentage rate for each periodic rate applicable to the account be shown on each periodic statement, whether or not a finance charge is imposed during the billing cycle. Many creditors have previously made this disclosure, which was permissible, although not required, under Regulation Z. A variety of specified wording may be used to describe these rates. The permitted use of optional wording is to allow creditors maximum freedom to choose wording to distinguish between rates which were actually applied during the billing cycle (required to be disclosed under § 226.7(b)(6)) and the prospective nominal rates required to be disclosed by this subparagraph, where those rates differ. The optional wording will also minimize the need for reprinting periodic statements where nominal rate disclosures have previously been made by the creditor. Whatever wording is chosen may, though need not be, used to satisfy the terminology requirements for the initial disclosures under § 226.7(a)(4) and advertising under § 226.10(c)(4). Although the "more conspicuous" requirement of § 226.6(a) for the term "annual percentage rate" will not be applicable to disclosures under § 226.7(b)(5), it will continue to apply to the term annual percentage rate in opening disclosures under § 226.7(a) and in advertising under § 226.10(c), even if the creditor chooses to make disclosures under § 226.7(a)(4) and § 226.10(c)(4) using optional wording which simply incorporates this term—e.g., "corresponding ANNUAL PERCENTAGE RATE."

Many open end creditors will not be affected by the amendment. In many open end credit plans, the annual percentage rate under § 226.7(b)(6) and the prospective nominal rate under § 226.7(b)(5) will always be identical. This situation will occur when a creditor imposes finance charges simply by the application of one or more periodic rates and does not use the "quotient" method of calculating an annual percentage rate under § 226.5(a)(1)(ii). In such cases, the requirements of both § 226.7(b)(5) and § 226.7(b)(6) could be satisfied by a single disclosure of such rates on the face of all billing statements using the term, which could be preprinted, "ANNUAL PERCENTAGE RATE" or "RATES."

The new provision also will require disclosure of minimum charges which may be imposed on accounts with balances below a certain amount. This new disclosure requirement does not compel creditors to disclose the range of balances to which the minimum charge may be applicable; creditors may continue to disclose ranges of balances to which periodic rates apply under § 226.7(a)(4) and § 226.7(b)(5) without specifically designating the portion of any such range to which the minimum charge, instead of the periodic rate, is applicable. For example, disclosure could be made that "a periodic rate of 1½ percent per month which is an annual percentage rate of 18 percent will be applied to balances from $0 to $500, with a minimum charge of $0.50."

6. The amendment to § 226.7(b)(6) consists of the addition of the opening phrase "when a finance charge is imposed during the billing cycle." In addition, the words "and, where there is more than one rate, the amount of the balance to which each rate is applicable" have been deleted since the applicable requirement is already contained in § 226.7(b)(5) which requires disclosure of the range of balances to which each rate is applicable. The amendment is primarily designed to clarify the fact that the annual percentage rate disclosures under this paragraph (as determined by § 226.5(a)) are only required when finance charges are imposed during the billing cycle. Material relating to computation of the annual percentage rate where transaction charges are imposed during the billing cycle has been removed from the provision and incorporated into the new § 226.5(a)(3)(ii).

7. The amendment of § 226.7(c), which deals with the location of required disclosures on periodic statements, will simplify placement of the disclosures in a way which is expected to be more meaningful and useful to the customer and minimize confusion. The amendment incorporates Board interpretation § 226.702, which is hereby revoked as of the effective date of the amendment.

8. The purpose of the amendments to §§ 226.13(a), 226.13(b), and 226.13(c) is to make clear that each credit card, regardless of whether issued or used for personal, family, household, agricultural, business or commercial purposes, and regardless of whether issued to a natural person, corporation, or other business entity, is covered by the act's maximum liability limit on unauthorized use and, by the same token, may not be distributed without an initial request. The amendment to § 226.13(c) is to make it clear that the maximum liability limit applies to each credit card issued to a cardholder; for example, a corporation with many cards from the same issuer would have a maximum liability limit for each card. A technical change has been made in the language of §§ 226.13(a)(4) and 226.13(b) published for comment. In view of the § 226.2(r) definition of "person," which includes both natural persons and organizations, §§ 226.13(a)(4) and 226.13(b) were changed to refer to "person" instead of "natural person or organization." No substantive change was intended. The amendments to § 226.13 would not affect the application of the business exemption in § 226.3 to the disclosure, rescission, and advertising requirements of Regulation Z for which it was intended.

9. Although the amendments to §§ 226.5(a), 226.7(a), 226.7(b), and 226.7(c) shall not become effective until June 1, 1973, any creditor may comply with the amended provisions prior to the effective date.

By order of the Board of Governors, November 2, 1972.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary of the Board.

[FR Doc.72-19669 Filed 11-15-72;8:46 am]

[Reg. Z]

PART 226—TRUTH IN LENDING

Open End Credit—Variable Periodic Rates

§ 226.707 Disclosures—Variable Periodic Rates.

(a) Under the terms of some open end credit plans the periodic rates of finance charges and corresponding annual percentage rates are tied to a fluctuating base rate, for example, the "prime rate." Consequently, both the periodic rates and annual percentage rates may change from time to time with changes in the base rate. The question arises as to the proper disclosure, if any, which should

be made under § 226.7(a)(4), § 226.7(b)(5), § 226.7(b)(6), § 226.7(e), and § 226.10(c)(4) in connection with such plans.

(b) Where any creditor's open end credit plan provides that the account is subject to variations in any periodic rate of finance charge, the creditor need not comply with § 226.7(e) with respect to any prospective change in any periodic rate or corresponding annual percentage rate applicable to the account: *Provided*, That in connection with the disclosures made pursuant to paragraph 226.7(a)(4) the creditor has disclosed that such rates are subject to change, the conditions under which such rates may be changed, and, if applicable, the maximum and minimum limits of such rates. The requirements of § 226.7(b)(5) and § 226.10(c)(4) may be complied with by similarly disclosing the method of computing the periodic or annual percentage rates which are subject to variation. In disclosing an annual percentage rate or rates under § 226.7(b)(6) where there have been variations during the billing cycle, the computations as specified in § 226.5(a)(1)(ii), § 226.5(a)(2), § 226.5(a)(3)(i), or § 226.5(a)(3)(ii), as applicable, should be used.

(Interprets and applies 15 U.S.C. 1637)

By order of the Board of Governors, November 2, 1972.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary to the Board.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airspace Docket No. 72-SO-114]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

The purpose of this amendment to part 71 of the Federal Aviation Regulations is to alter the Bay St. Louis, Miss., transition area.

The Bay St. Louis transition area is described in § 71.181 (37 F.R. 2143). In the description, reference is made to "Gulf Central-Stennis Field" and the transition area is effective from sunrise to sunset to accommodate daylight IFR operations only because of nonexisting runway lights. The name of the airport has been changed to "Stennis International Airport" and appropriate lighting equipment is now operational. It is necessary to alter the description to reflect the name change and delete the part-time proviso to redesignate the transition area on a continuous basis. Since these amendments are editorial and minor in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, part 71 of the Federal Aviation Regulations is amended, effective immediately, as hereinafter set forth.

In § 71.181 (37 F.R. 2143), the Bay St. Louis, Miss., transition area is amended as follows:

"* * * Gulf Central-Stennis Field * * *" is deleted and "* * * Stennis International Airport * * *" is substituted therefor, and "* * * This transition area is effective from sunrise to sunset daily." is deleted from the description.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on November 7, 1972.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.72-19655 Filed 11-15-72;8:45 am]

[Docket No. 12342; Amdt. 838]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the standard instrument approach procedures (SIAP's) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAP's for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in amendment No. 97-696 (35 F.R. 5609).

SIAP's are available for examination at the rules docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591. Copies of SIAP's adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAP's may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue SW., Washington, DC 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by establishing, revising, or canceling the following VOR-VOR/DME SIAP, effective November 8, 1972.

Hickory, N.C.—Hickory Municipal Airport, VOR Runway 24, Amdt. 14; Canceled; (Amdt. 13, effective 15 April 1971, remains in effect).

2. Section 97.27 is amended by establishing, revising, or canceling the following NDB/ADF SIAP's, effective December 28, 1972.

Walterboro, S.C.—Walterboro Municipal Airport, NDB Runway 23, Amdt. 2; Revised.
Wolf Point, Mont.—Wolf Point International Airport, NDB-A, Original; Established.

3. Section 97.27 is amended by establishing, revising, or canceling the following NDB/ADF SIAP, effective November 23, 1972.

Detroit, Mich.—Detroit Metropolitan Wayne County Airport, NDB Runway 27, Amdt. 3; Revised.

4. Section 97.29 is amended by establishing, revising, or canceling the following ILS SIAP's, effective November 3, 1972.

Dayton, Ohio—James M. Cox-Dayton Municipal Airport, ILS Runway 18, Amdt. 1; Revised.
Oakland, Calif.—Metropolitan Oakland International Airport, ILS Runway 29, Amdt. 16; Revised.

(Secs. 307, 313, 601, 1110, Federal Aviation Act of 1958; 49 U.S.C. 1438, 1354, 1421, 1510, sec. 6(c) Department of Transportation Act, 49 U.S.C. 1655(c) and 5 U.S.C. 552(a)(1))

Issued in Washington, D.C., on November 9, 1972.

NOTE: Incorporation by reference provisions in §§ 97.10 and 97.20 approved by the Director of the Federal Register on May 12, 1969 (35 F.R. 5610).

C. R. MELUGIN, Jr.,
Acting Director,
Flight Standards Service.

Chapter V—National Aeronautics and Space Administration

PART 1201—STATEMENT OF ORGANIZATION AND GENERAL INFORMATION

1. Part 1201 revised in its entirety as follows:

Subpart 1—Introduction

Sec.
1201.100 Creation and Authority.
1201.101 Purpose.
1201.102 Functions.
1201.103 Administration.

Subpart 2—Organization

1201.200 General.

Subpart 3—Boards and Committees

Sec.
1201.300 Boards and Committees.

Subpart 4—General Information

1201.400 NASA Procurement Program.
1201.401 Special Document Depositories.

AUTHORITY: The provisions of this Part 1201 issued pursuant to 5 U.S.C. 552, as amended.

Subpart 1—Introduction

§ 1201.100 Creation and Authority.

The National Aeronautics and Space Administration was established by the National Aeronautics and Space Act of 1958 (72 Stat. 426, 42 U.S.C. 2451 et seq.), as amended (hereafter called the "Act").

§ 1201.101 Purpose.

It is the purpose of the National Aeronautics and Space Administration under the Act to carry out the declared policy of the United States that aeronautical and space activities sponsored by the United States shall be the responsibility of, shall be directed by, and shall be under the control of a civilian agency, except to the extent that aeronautical and space activities are determined by the President to be peculiar to or primarily associated with the development of weapons systems, military operations, or the defense of the United States, which activities shall be the responsibility of the Department of Defense.

§ 1201.102 Functions.

In order to carry out the purposes of the Act, NASA is authorized to conduct research into the problems of flight within and outside the earth's atmosphere; to develop, construct, test, and operate aeronautical and space vehicles for research purposes; and to perform such other activities as may be required for the exploration of space. The term "aeronautical and space vehicles" means aircraft, missiles, satellites, and other space vehicles, manned and unmanned, together with related equipment, devices, components, and parts.

§ 1201.103 Administration.

(a) NASA is headed by an Administrator, who is appointed from civilian life by the President by and with the consent of the Senate. The Administrator is responsible, under the supervision and direction of the President, for exercising all powers and discharging all duties of NASA and has authority and control over all personnel and activities of the agency.

(b) The Deputy Administrator of NASA is also appointed by the President from civilian life by and with the consent of the Senate. The Deputy Administrator serves on a day-to-day basis as the agency's general manager, under delegations of authority and responsibility from the Administrator, and, in his absence, the Deputy Administrator serves as Acting Administrator.

Subpart 2—Organization

§ 1201.200 General.

Responsibility for overall planning, coordination, and control of NASA programs is vested in NASA Headquarters, located in Washington, D.C. Directors of NASA field installations and other component installations are responsible for execution of NASA's programs, largely through contracts with research, development, and manufacturing enterprises. Certain types of research and development activities are conducted at NASA field installations and other component installations by Government-employed scientists, engineers, and technicians. NASA's basic organization consists of the headquarters, nine field installations, the Jet Propulsion Laboratory (a Government-owned, contractor-operated facility), and several component installations which report to heads of field installations or headquarters offices. The NASA field installations are as follows:

(1) Ames Research Center, Moffett Field, Calif. 94035.
(2) Flight Research Center, Edwards, Calif. 93523.
(3) Goddard Space Flight Center, Greenbelt, Md. 20771.
(4) John F. Kennedy Space Center, Kennedy Space Center, Fla. 32899.
(5) Langley Research Center, Langley Station, Hampton, Va. 23365.
(6) Lewis Research Center, Cleveland, Ohio 44135.
(7) Manned Spacecraft Center, Houston, Tex. 77058.
(8) George C. Marshall Space Flight Center, Huntsville, Ala. 35812.
(9) Wallops Station, Wallops Island, Va. 23337.

For more detailed description of the organization and functions of the headquarters and field installations, see the "U.S. Government Organization Manual."

Subpart 3—Boards and Committees

§ 1201.300 Boards and Committees.

Various boards and committees have been established as part of the permanent organization structure of NASA. These include:

(a) *Board of Contract Appeals.* (1) The function of the Board is to adjudicate appeals arising from final decision by NASA contracting officers pursuant to the Disputes Clause of NASA contracts.

(2) The charter of the Board is set forth in subpart 1 of Part 1209 of this chapter. The Board's rules of procedure are set forth in 14 CFR Part 1241.

(3) The texts of decisions of the Board are published by Commerce Clearing House, Inc., in Board of Contract Appeals Decisions, and are hereby incorporated by reference. All decisions and orders are available for inspection and for purchase from the Recorder of the Board at NASA Headquarters, Washington, D.C. Decisions and orders issued after July 4, 1967, are available for inspection and for purchase at NASA information centers. An Index/Digest of Decisions is issued periodically with supplements published annually. These are available for inspection or purchase at the Office of the Chairman of the Board of Contract Appeals.

(b) *Contract Adjustment Board.* (1) The function of the Board is to consider and dispose of requests by NASA contractors for extraordinary contractual adjustments pursuant to Public Law 85-804 (50 U.S.C. 1431-35) and Executive Order 10789 dated November 14, 1958 (23 F.R. 8897).

(2) The charter of the Board is set forth at subpart 3 of Part 1209 of this chapter. The Board's rules of procedure are set forth at 41 CFR Part 18-17.

(3) The texts of decisions of the Board are available for inspection and for purchase from the Chairman of the Board, National Aeronautics and Space Administration, Washington, D.C. 20546.

(c) *Inventions and Contributions Board.* (1) The function of the Board is to consider and recommend to the Administrator the action to be taken with respect to: (i) Requests for waiver of rights to any invention or class of inventions made during the performance of NASA contracts, and (ii) applications for award for scientific and technical contributions determined to have significant value in the conduct of aeronautical and space activities pursuant to the National Aeronautics and Space Act, as amended (42 U.S.C. 2457(f), 2458), and the Government Employees Incentive Awards Act (5 U.S.C. 2121-23), respectively.

(2) The charter of the Board is set forth at Subpart 4 of Part 1209 of this chapter. The Board's rules of procedure are set forth at 14 CFR Parts 1209 and 1240.

(3) The texts of key decisions and an index of all decisions of the Board on requests for waiver are published in Petitions for Patent Waiver (NASA Handbook, NHB 5500.1A) and are hereby incorporated by reference. They are available for purchase from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Subpart 4—General Information

§ 1201.400 NASA Procurement Program.

(a) The Office of Procurement, headed by the Director of Procurement, serves as a central point of control and contact for NASA procurements. Although the procurements may be made by the field installations, selected contracts and contracts of special types are required to be approved by the Director of Procurement prior to their execution. The Office of Procurement is also responsible for formulation of NASA procurement policies and provides overall assistance and guidance to NASA field installations to achieve uniformity in NASA procurement processes.

(b) The NASA procurement program is carried out principally at the NASA

field installations listed in the "U.S. Government Organization Manual." The Headquarters Contracts Division is re-

for reporting new gas reserves in the Texas Gulf Coast and Southern Louisiana Areas by the purchaser upon request

review of reserve estimates by making it easier to identify questionable reserve estimates requiring field review.

deficiency) for each purchaser, (5) application of the total excess provided in section 8.2.2 (a) and (d) of the UDC

pertinent excerpts from that proposal as an appendix to this order.

The Commission finds:

in the FEDERAL REGISTER of February 26, 1972 (37 F.R. 4095). The Commissioner of Food and Drugs proposed that the le-

NOV 16 1972 V37-222 NEWSPAPER XUM

field installations listed in the "U.S. Government Organization Manual." The Headquarters Contracts Division is responsible for contracts with foreign governments and foreign commercial organizations, and the procurement of materials and services required by headquarters offices except for minor office supplies and services procured locally.

(c) All procurements are made in accordance with the NASA Procurement Regulations (41 CFR Ch. 18). With minor exceptions, every proposed procurement in excess of $10,000 is publicized promptly in the Commerce Business Daily "Synopsis of U.S. Government Proposed Procurement, Sales and Contract Awards." Copies of this publication are available from the U.S. Department of Commerce on an annual subscription basis.

§ 1201.401 Special Document Depositories.

NASA deposits its technical documents and bibliographic tools in 10 special regional libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

California: University of California Library, Berkeley.
Colorado: University of Colorado Libraries, Boulder.
District of Columbia: Library of Congress.
Georgia: Georgia Institute of Technology, Atlanta.
Illinois: The John Crerar Library, Chicago.
Massachusetts: Massachusetts Institute of Technology, Cambridge.
Missouri: Linda Hall Library, Kansas City.
New York: Columbia University, New York.
Pennsylvania: Carnegie Library of Pittsburgh.
Washington: University of Washington Library, Seattle.

Effective date. The provisions of this Part 1201 were effective June 30, 1972.

JAMES C. FLETCHER,
Administrator.

[FR Doc.72-19709 Filed 11-15-72;8:49 am]

Title 18—CONSERVATION OF POWER AND WATER RESOURCES

Chapter I—Federal Power Commission

SUBCHAPTER G—APPROVED FORMS, NATURAL GAS ACT

[Docket No. R-433; Order 459]

PART 250—FORMS

Producers; Form for Reporting Reserves Dedication

NOVEMBER 10, 1972.

The Commission, on December 1, 1971, issued a notice of proposed rulemaking in this proceeding (36 F.R. 23635, December 11, 1971) proposing to establish a form for reporting new gas reserves in the Texas Gulf Coast and Southern Louisiana Areas by the purchaser upon request by the producer-seller for the purpose of implementing the refund credit and contingent rate escalation provisions of Opinion No. 595 issued May 6, 1971, in Docket No. AR64-2 and Opinion No. 598 issued July 16, 1971, in Dockets Nos. AR61-2 et al., respectively.[1] The form will enable the Commission to maintain adequate records pertaining to the reduction of each producer's refund obligation in each area, and to the date at which area rates in each area for sales under contracts dated prior to October 1, 1968, will be increased.

Responses to the notice, 14 in all, were filed by the Independent Natural Gas Association of America, Associated Gas Distributors (AGD), the Public Service Commission of the State of New York (New York) and certain producers[2] and pipelines. A conference was also held in this case on April 11, 1971.

In the form proposed in the December 1st notice, the American Petroleum Institute's definition of proved reserves of natural gas was used to define the term "new gas reserves." Amoco Production Co. (Amoco) and Humble, however, argue that use of the API definition is inconsistent with section 1.4 of the UDC settlement proposal which defines new gas reserves as "the estimated original recoverable reserves in place, less any prior production therefrom, * * *."[3] They contend that the UDC definition would permit the inclusion of reserves not allowed under the API definition.

Upon further consideration we have decided to revise the form so that, while it still provides for the reporting of reserves pursuant to the API definition (Item No. 14), it now also provides for the reporting of reserves (Item No. 15) that are outside the limits of the API definition but are in conformity with the UDC definition. The reporting of reserves in two segments will not only satisfy the requirements of the UDC settlement proposal,[4] but it will facilitate staff review of reserve estimates by making it easier to identify questionable reserve estimates requiring field review.

In accordance with the UDC settlement proposal, we have also revised the form to eliminate the provision for revision of previously reported new-gas reserves. In addition, we have changed the form so as to provide for a separate report by the reporting pipeline for each working interest owner, and have added instructions to the form which will clarify various matters.[5]

New York suggests a number of additional procedures which it believes will assure that the reserves reported are realistic. However, we do not believe it is necessary for producers to submit workpapers, except where otherwise specified in the form, when a report is filed. Nor do we think it necessary to have a petroleum consultant or geologist certify to the validity of the reserve estimate. We do agree, however, that producers should be required to maintain on file in their own offices the workpapers relating to the reserve estimates contained in each report, and they are so required. Producers shall make these working papers available to our staff for purposes of review if, and when the Commission should so require.

Some reports may contain new gas reserves in excess of the volume needed to discharge the producer's refund obligation to the purchaser filing the report. Under the procedure established in section 8.2.2(d) of the UDC settlement proposal, a producer may be permitted to allocate excess reserves to other purchasers in the area to whom refunds are owed by that producer. While these allocations normally would be shown on each report, we believe that initially, in view of the large number of expected filings, it is desirable to obviate the necessity of repeating such allocations with each filing. Accordingly, each report filed on or before April 2, 1973, involving an allocation of excess reserves need contain only a statement as to the new gas reserves in excess of the amount required to discharge the refund obligation to the purchaser filing the report,[6] but thereafter each producer involved in any such report shall submit, on or before May 7, 1973, a summary statement showing (1) the amount owed to each purchaser, (2) the volume of reserves needed to discharge each refund obligation, (3) the volume dedicated as of a specific time, (4) the balance (excess or

[1] The form will, of course, be filed whether the new reserves are certificated under the Optional Procedure provided for in Order No. 455, or not. The form will also be used to implement the refund credit provisions of Opinion No. 607-A which was issued Jan. 17, 1972, in Docket Nos. AR67-1 et al. (Other Southwest Area), subsequent to the issuance of the notice herein. That opinion, however, does not provide for any contingent rate escalations.

[2] The response of Humble Oil Co. (Humble) was joined in by 24 other producers.

[3] The UDC settlement proposal is the United Distribution Companies' Settlement Proposal for the Southern Louisiana Area contained in Appendix A to the Commission's Opinion No. 598.

[4] While the Commission is not obligated in areas outside Southern Louisiana to follow the provisions of the UDC settlement proposal, it is desirable from an administrative viewpoint, as well as otherwise, to utilize the same form for all areas, inasmuch as Southern Louisiana is the most important area involved.

[5] Where a producer has a refund obligation to a plant and the plant, in turn, has a refund obligation to a pipeline purchaser, if the producer desires to discharge its obligation (as well as the plant's obligation with respect to the resale of gas purchased from that producer) through the dedication of new reserves directly to the pipeline, it may seek to do so by the filing of a petition for special relief.

[6] Any report filed subsequent to Apr. 2, 1973, shall show the allocation of the excess reserves, if there are any, to other purchasers in the area.

deficiency) for each purchaser, (5) application of the total excess provided in section 8.2.2 (a) and (d) of the UDC settlement proposal, and (6) application of the remaining excess toward the contingent rate escalations.

In accordance with Exhibit H to the Office of Management and Budget Circular No. A-46, the form proposed in the December 1st notice provided for reporting the new gas reserve volumes at a 14.73 p.s.i.a. pressure base. However, as Humble points out in its comments:

> There is no apparent reason why reporting of new gas reserve commitments for purpose of refund discharge or contingent price escalations should be at a different pressure base than the related price levels. Stated differently, it appears anomalous to commit a "14.73" Mcf to discharge 1 cent of "15.025" Mcf refund in Southern Louisiana.

We agree with Humble's observations and shall therefore require, in addition to the use of the 14.73 p.s.i.a. base, that the volumes also be reported at the applicable area pressure base.[7] The volumes reported at the area pressure base will control for the purpose of determining the discharge of refund obligations and contingent escalation of area rates.

The instructions to the form provide that where reserves have previously been rejected by a prospective purchaser, the purchaser filing the report shall submit a statement, signed by both the producer and the rejecting purchaser, setting forth the estimated reserves and the reason for rejection. While it has been claimed that there is no need for the rejecting purchaser to supply a reserve estimate, we think it appropriate to require such an estimate in view of the fact that under section 8.2.2(c) of the UDC settlement proposal the reserves in certain situations may be used as a refund credit against the rejecting purchaser.

United Gas Pipe Line Co. seeks clarification as to whether oil well gas is includible within the term "new gas reserves" if such gas otherwise comports with the standards applicable thereto. Any distinction between oil well gas and gas well gas was eliminated in Opinions Nos. 595, 598, and 607. As a result, oil well gas properly may be included in reserve reports as "new gas reserves."

AGD requests that it be made clear that the form does not apply to reserves sold pursuant to short-term emergency contracts. In view of the special nature of these transactions, and since reports providing adequate information are already required the form shall not apply to such sales.

Copies of reserve reports submitted to this Commission will be available to the public in the Office of Public Information. Records, updated monthly, pertaining to reserves used to discharge producer refund obligations and those applied toward contingent area rate escalations will also be available in that office.

Finally, because the instructions to the form refer to portions of the UDC settlement proposal, we have attached pertinent excerpts from that proposal as an appendix[8] to this order.

The Commission finds:

(1) The notice and opportunity to participate in this rulemaking proceeding through the submission, in writing, of data, views, comments, and suggestions are in accordance with all procedural requirements therefor as prescribed in section 553, title 5 of the United States Code.

(2) The action taken herein is necessary and appropriate for the administration of the Natural Gas Act.

(3) Since the modifications adopted herein to the form proposed in the notice of this proceeding are consistent with the prime purpose of the proposed rulemaking herein, further notice thereof is unnecessary.

(4) Good cause exists that the form adopted herein become effective as of the date of issuance of this order.

The Commission, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly sections 4, 5, 7, and 16 thereof (52 Stat. 822, 823, 824, 825, and 830; 56 Stat. 83, 84; 61 Stat. 459; 76 Stat. 72; 15 U.S.C. 717c, 717d, 717f, and 717o) *orders:*

(A) Part 250, Forms, in Subchapter G—Approved Forms, Natural Gas Act, Chapter I, Title 18 of the Code of Federal Regulations, is amended by adding a new § 250.13, prescribing a new form, Form No. 334, entitled "Reserves Dedication Report", as Follows:

§ 250.13 Reserves Dedication Report (Form No. 334).[9]

Form 334 provides a method of reporting dedications of new gas reserves in order to obtain credit toward the discharge of refund obligations of producers and toward the contingent escalation of area rates, as provided for in various area rate opinions and orders.

(B) The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

(C) The form adopted herein shall be effective as of the date of issuance of this order.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.72-19694 Filed 11-15-72;8:55 am]

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER C—DRUGS

PART 135—NEW ANIMAL DRUGS

SUBPART B—STATEMENTS OF POLICY AND INTERPRETATION REGARDING ANIMAL DRUGS AND MEDICATED FEEDS

Corticosteroid Drugs

A notice of a proposed amendment to § 135.101 (21 CFR 135.101) was published in the FEDERAL REGISTER of February 26, 1972 (37 F.R. 4095). The Commissioner of Food and Drugs proposed that the labeling requirements for corticosteroid drugs provided for in § 135.101 (21 CFR 135.101) should be revised to include warnings regarding potentially serious side effects from the use of intramammary infusion products containing corticosteroid drugs.

Two firms responded to the proposal. Masti-Kure Products Co., Inc., Post Office Box 1188, 166 Yantic Street, Norwich, CT 06360, commented that the dosage level of the particular steroid (dexamethasone) included in the formulation administered in the study which prompted the proposed rule, is not comparable to the dosage level of the steroid (hydrocortisone) included in the formulations commonly administered by intramammary infusion in this country. Therefore, the proposed rule requiring a warning statement for all corticosteroids, including hydrocortisone, is not based on valid, comparable data. They also commented that there is a variation among corticosteroids with respect to their ability to induce abortion and premature birth at therapeutic dosage levels. So the proposed rule requiring a warning statement for all corticosteroids should be revised to limit the warning requirement specifically to those corticosteroids demonstrating a capability to induce abortion or premature birth at commonly used dosage levels. They also indicated that requiring the proposed warning to appear on the syringe label will create mechanical and space difficulties necessitating use of a type size so small as to preclude readability.

The Commissioner concludes that, although the data on which the proposal was based were generated using only one member of the corticosteroid group, namely dexamethasone, the entire group is suspect. In addition, conclusions by the firm drawn from a study of comparative potencies are not valid since there is no information on any correlation between the potency of the corticosteroid or anti-inflammatory activity of a particular steroid and its abortifacient effect. The Commissioner is aware of data which documents the teratogenic effect of corticoids, including hydrocortisone, when administered to pregnant rabbits via the ophthalmic route. The Commissioner concludes that the location of the warning statement should be prominent and included in the package label or labeling as defined by the Federal Food, Drug, and Cosmetic Act.

The Upjohn Co., 7000 Portage Road, Kalamazoo, MI 49001, also noted in their response that the corticosteroid used in the study which prompted the proposal was dexamethasone, and whereas this corticosteroid has been shown by other data to induce premature parturition, dexamethasone has not been employed in intramammary products in the United States. They also commented that the dose of dexamethasone employed per treated quarter (10 milligrams) was within the normally recommended dose for systemic therapeutic use, while the

total intramammary dose of hydrocortisone, when all four quarters are

Warning: Clinical and experimental data have demonstrated that corticosteroids administered orally or by injection to animals

357, 360b(n)) and under authority delegated to the Commissioner (21 CFR 2.120), part 149b is amended as follows:

Title 24—HOUSING AND

even though there may be more than one grant. The grant shall be made to the Governor's office or designee, who shall

831; 31 U.S.C. 200(c)), § 0.147 of Subpart X of Part 0 of Chapter I of Title

XUM
V37-1972 NOV 16 72 XUM

total intramammary dose of hydrocortisone, when all four quarters are treated, is only 8.6 percent to 13 percent of the recommended parenteral therapeutic dose. The firm also contended that inclusion of the warning statement would in effect remove their product from the market in that labeling already restricts use of the drug to dry cows only and to administration prior to day 250 of the gestation period.

The Commissioner concludes that his response to the comments of Masti-Kure Products regarding the study upon which the proposal was based have equal applicability to the comments of the Upjohn Co.

Upjohn also stated that in spite of widespread use of corticosteroids, they have received no complaints related to abortion, premature parturition, retained placenta, or other adverse reproduction sequelae, and they conclude that such products are safe. Information on the cause-effect relationship between corticosteroid therapy and pregnancy problems in animals was not available until recently; the Commissioner concludes that when such pregnancy problems have been encountered in the field, they were often attributed to some other cause.

The Commissioner concludes that no adequate data were submitted to show that the corticosteroid warning is not needed, and it is concluded that the proposal should be adopted based on the information set forth in the proposal.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–351; 21 U.S.C. 360b) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135 is amended by revising § 135.101 to read as follows:

§ 135.101 Corticosteroids for oral, injectable, and intramammary use in animals; warnings; labeling requirements.

(a) The Food and Drug Administration has received reports concerning side effects associated with the oral, injectable, and intramammary use of corticosteroid drugs in animals. The use of these drugs has resulted in premature parturition when administered during the last trimester of pregnancy. Premature parturition may be followed by dystocia, fetal death, retained placenta, and metritis. These drugs, unless they are intended for intramammary use are required to carry the veterinary prescription legend and are subject to the labeling requirements of § 1.106(c) of this chapter.

(b) In view of these potentially serious side effects, the Commissioner of Food and Drugs has concluded that the labeling on or within the package from which the product is to be dispensed, and any other labeling furnishing or purporting to furnish information for the use of these preparations, should bear conspicuously;

(1) If subject to the labeling requirements of § 1.106(c) of this chapter the following warning statement:

Warning: Clinical and experimental data have demonstrated that corticosteroids administered orally or by injection to animals may induce the first stage of parturition when administered during the last trimester of pregnancy and may precipitate premature parturition followed by dystocia, fetal death, retained placenta, and metritis.

(2) If intended for intramammary use, the following warning statement:

Warning: Studies have demonstrated that corticosteroids may cause abortion or premature birth when given during the last third of pregnancy and also may lead to difficulty in giving birth, death of fetus, retained afterbirth and infection of the uterus. Therefore, to prevent these side effects, this preparation should not be administered during the last third of pregnancy.

The label revisions described above should be placed into effect at the earliest possible time and may be implemented without prior approval as provided for in § 135.13a (d) and (e).

(c) Approved new animal drug applications which have not been supplemented in accordance with paragraph (b) of this section within 60 days following the date of publication of this statement of policy in the FEDERAL REGISTER will be subject to provisions of section 512(e) of the Federal Food, Drug, and Cosmetic Act.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (11–16–72).

(Sec. 512, 82 Stat. 343–351; 21 U.S.C. 360b)

Dated: November 10, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72–19661 Filed 11–15–72;8:45 am]

PART 149b—AMPICILLIN

Sterility Test Method Procedure for Ampicillin

In a notice of proposed rule making published in the FEDERAL REGISTER of June 13, 1972 (37 F.R. 11729), the Commissioner of Food and Drugs proposed that the antibiotic drug regulations be amended by revising paragraph (b)(2) of § 149b.2 and paragraph (b)(2) of § 149b.19. Interested persons were invited to submit their comments in response to the proposal within 60 days. No comments were received. However, a minor change has been made in the direct method of sterility testing by adding penicillinase to the medium used in that test. Our laboratories found that the addition of penicillinase improved the direct method and our findings were confirmed by the manufacturer of the drug. Accordingly, the Commissioner concludes that the antibiotic drug regulations should be amended, as set forth below.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 507, 512(n), 59 Stat. 463, as amended, 82 Stat. 350–351; 21 U.S.C. 357, 360b(n)) and under authority delegated to the Commissioner (21 CFR 2.120), part 149b is amended as follows:

1. In § 149b.2 by revising paragraph (b)(2) to read as follows:

§ 149b.2 Sterile ampicillin trihydrate.

* * * * * *

(b) * * *

(2) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section, except in lieu of paragraph (e)(1)(i)(*a*) of that section, prepare the sample for test as follows: From each of 10 immediate containers, aseptically transfer approximately 300 milligrams of sample into a sterile 500-milliliter Erlenmeyer flask containing approximately 400 milliliters of diluting fluid D. Add at least 200,000 Levy units[1] of penicillinase. Repeat the process using 10 additional containers. Swirl both of the stoppered flasks to completely solubilize the suspension prior to filtration and proceed as directed in paragraph (e)(1)(ii) of that section.

2. In § 149b.19 by revising paragraph (b)(2) to read as follows:

§ 149b.19 Sterile ampicillin trihydrate for suspension, veterinary.

* * * * * *

(b) * * *

(2) *Sterility.* Proceed as directed in § 141.2 of this chapter, using the method described in paragraph (e)(1) of that section, except in lieu of paragraph (e)(1)(i)(*a*), of that section, prepare the sample for test as follows: From each of 10 immediate containers, aseptically transfer approximately 300 milligrams of sample into a sterile 500-milliliter Erlenmeyer flask containing approximately 400 milliliters of diluting fluid D. Add at least 200,000 Levy units[1] of penicillinase.

Repeat the process using 10 additional containers. Swirl both of the stoppered flasks to completely solubilize the suspension prior to filtration and proceed as directed in paragraph (e)(1)(ii) of that section. If the formulation cannot be filtered, proceed as directed in § 141.2(e)(2) of this chapter, except use medium B in lieu of medium A and add at least 40,000 Levy units of penicillinase to both medium B and medium E.

* * * * * *

Effective date. This order shall become effective 30 days after date of publication in the FEDERAL REGISTER.

(Sec. 507, 512(n), 59 Stat. 463, as amended, 82 Stat. 350–351; 21 U.S.C. 357, 360(n).)

Dated: November 10, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72–19662 Filed 11–15–72;8:45 am]

[1] One Levy unit of penicillinase inactivates 59.3 units of penicillin G in 1 hour at 25° C. and at a pH of 7.0 in a phosphate buffered solution of a pure alkali salt of penicillin G when the substrate is in sufficient concentration to maintain a zero order reaction.

Title 24—HOUSING AND URBAN DEVELOPMENT

Chapter VI—Office of Assistant Secretary for Community Planning and Management, Department of Housing and Urban Development

[Docket No. R–72–164]

PART 600—COMPREHENSIVE PLANNING ASSISTANCE

Miscellaneous Amendment

Part 600 of Title 24 of the Code of Federal Regulations was published on February 4, 1972 (37 F.R. 2665), to provide requirements and guidelines for filing a Comprehensive Planning Assistance grant application. Although effective upon publication, the rule invited interested persons to submit written comments or suggestions with respect to its provisions. Subsequently, certain technical changes were published April 1, 1972, in 37 F.R. 6667.

Section 600.10 is now being amended so that grant assistance will ordinarily cover a 12-month work period, but may cover a different period in appropriate cases.

Sections 600.95 and 600.105 are being changed to reflect departmental policy permitting the submission of application without an Overall Program Design (OPD) where the applicant is applying for the first time and the proposal includes the preparation of an OPD.

Since this amendment relaxes previous requirements with respect to the period for which Comprehensive Planning Assistance can be approved and also clarifies the requirements concerning the preparation of the OPD, we find that it is unnecessary to engage in public rule making procedures. Therefore, the revised regulations will become effective immediately upon publication in the FEDERAL REGISTER.

Subpart A—General Information

Section 600.10 is amended by adding a new subsection (c). As amended, section 600.10 reads as follows:

§ 600.10 Financial support.

* * * * * *

(c) Grant assistance will ordinarily cover a 12-month work period but may cover a different period in appropriate cases.

Subpart C—Procedural Requirements

Section 600.95 is amended to read as follows:

§ 600.95 Applications by States.

States are required to submit a single application (Overall Program Design) including statewide planning, nonmetropolitan assistance, and local planning and management services. States may request separate grants based upon one Overall Program Design, but there must be only one grant recipient per State even though there may be more than one grant. The grant shall be made to the Governor's office or designee, who shall be the single responsible party to HUD for the total grant.

Section 600.105 is amended to read as follows:

§ 600.105 Overall program design.

Each applicant shall prepare a concise Overall Program Design (OPD), which shall be the major part of its application, except for an applicant applying for the first time whose proposal includes the preparation of an OPD. The Overall Program Design is a multiyear work program statement which focuses on specific objectives to be achieved by the applicant. The OPD covers a minimum of 3 years and must be annually updated. The OPD includes all major planning and management objectives to be undertaken by the applicant, not merely those assisted by HUD and provides the applicant and HUD with a base line for evaluation of performance.

* * * * * *

AUTHORITY: The provisions of this Part 600 issued under sec. 701, Housing Act of 1954, 68 Stat. 640; 40 U.S.C. 461; Secretary's delegation of authority published at 36 F.R. 5004, effective March 8, 1971.

Effective date. This regulation is effective upon publication in the FEDERAL REGISTER (11–16–72).

CLIFFORD W. GRAVES,
Deputy Assistant Secretary for Community Planning and Management.

[FR Doc.72–19730 Filed 11–15–72;8:53 am]

Title 28—JUDICIAL ADMINISTRATION

Chapter I—Department of Justice

[Order 496–72]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart X—Authorizations With Respect to Personnel and Certain Administrative Matters

CERTIFICATION OF OBLIGATIONS

Under 31 U.S.C. 200(b), each agency head must report the amount of each appropriation remaining obligated but unexpended at the end of each fiscal year. Paragraph (c) of section 200 provides that the reports be supported by certifications of officials designated by the agency head. This order changes the official in the Bureau of Prisons authorized to certify obligations, to reflect changes in duties of positions in that Bureau.

§ 0.147 [Amended]

By virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, and section 1311(c) of the Supplemental Appropriation Act, 1955 (68 Stat. 831; 31 U.S.C. 200(c)), § 0.147 of Subpart X of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended by deleting "for the Bureau of Prisons, the Deputy Assistant Director, Administrative Services" and substituting the following: "for the Bureau of Prisons, the Assistant Director, Administrative Services Division."

Dated: November 9, 1972.

RICHARD G. KLEINDIENST,
Attorney General.

[FR Doc.72–19667 Filed 11–15–72;8:46 am]

Title 29—LABOR

Chapter XVII—Occupational Safety and Health Administration, Department of Labor

PART 1926—SAFETY AND HEALTH REGULATIONS FOR CONSTRUCTION

Miscellaneous Amendments

On pages 15317 and 15318 of the FEDERAL REGISTER of July 29, 1972, there was published a notice of proposed rule making regarding amendments to Part 1926 of Title 29, Code of Federal Regulations, dealing with construction safety and health. Interested persons were given 30 days in which to submit written objections, data, views, and arguments concerning the proposed amendments. No objections have been received, and the proposed amendments are hereby adopted, for the reasons set forth in the July 29 notice, without change and are set forth below.

Effective date. These regulations shall be effective 30 days after publication in the FEDERAL REGISTER.

Signed at Washington, D.C., this 13th day of November 1972.

G. C. GUENTHER,
Assistant Secretary of Labor.

Part 1926 is amended as follows:

1. Section 1926.500(c)(2) is amended to read as follows:

§ 1926.500 Guardrails, handrails, and covers.

* * * * * *

(c) * * *

(2) An extension platform outside a wall opening onto which materials can be hoisted for handling shall have side rails or equivalent guards of standard specifications. One side of an extension platform may have removable railings in order to facilitate handling materials.

* * * * * *

2. Section 1926.652(h) is amended to read as follows:

§ 1926.652 Specific trenching requirements.

* * * * * *

(h) When employees are required to be in trenches 4 feet deep or more, an adequate means of exit such as a ladder

or steps, shall be provided and located so as to require no more than 25 feet of

Title 39—POSTAL SERVICE

Chapter I—U.S. Postal Service

MISCELLANEOUS AMENDMENTS

Regulations codified under Title 39, Code of Federal Regulations, are amended as hereinafter stated.

PART 155—CITY DELIVERY

Section 155.6(d) is amended to make reference to Postal Service Publication 17, which contains information and instructions relating to apartment house mail receptacles.

In § 155.6 *Apartment house receptacles*, amend paragraph (d) to read as follows:

§ 155.6 Apartment house receptacles.

• • • • • •

(d) *Installation, specifications, and approvals.* The conditions requiring installation, specifications for construction, installation procedures, and approval procedures for manufacturers are covered in Publication 17, "Apartment House Mail Receptacles, Regulations and Instructions."

PART 262—OPINIONS, ORDERS, ADMINISTRATIVE MANUALS, AND INSTRUCTIONS TO STAFF

Section 262.7(b) is amended to authorize reproduction of records by hand where reproduction equipment is not available in post offices.

In § 262.7 *Schedule of fees*, under paragraph (b), redesignate subparagraphs (2) and (3) as subparagraphs (3) and (4), respectively; and insert new subparagraph (2) to read as follows:

§ 262.7 Schedule of fees.

• • • • • •

(b) • • •

(2) Where reproduction equipment is not available at the post office, information or data which is sought may be reproduced on blank forms or paper as appropriate, by means of typewriting or handwriting. The reproduced document must carry the legend, "This is a copy," and be signed and dated by the employee who prepared the reproduction. The stated fees apply to such reproductions.

• • • • • •

PART 946—RULES OF PROCEDURE RELATING TO THE DISPOSITION OF MONEY OR OTHER PROPERTY RECOVERED BY POSTAL INSPECTORS

Section 946.1(h) is amended to establish a new procedure for the disposition of moneys lost or stolen from the mails and recovered by postal inspectors.

In § 946.1 *Disposition of money or other property recovered by postal inspectors*, amend paragraph (h) to read as follows:

§ 946.1 Disposition of money or other property recovered by postal inspectors.

• • • • • •

(h) Moneys lost or stolen from the mails and recovered by postal inspectors are disbursed by them to the postal customers suffering losses. If the postal customer cannot be identified or the postal inspector is unable to determine whether the recovered funds are to be paid to the sender or addressee, the funds are sent to the Director, New York Postal Data Center for deposit, unless other action may be in order.

• • • • • •

(39 U.S.C. 401, 404).

ROGER P. CRAIG,
Deputy General Counsel.

NOVEMBER 10, 1972.

[FR Doc.72-19696 Filed 11-15-72;8:48 am]

PART 232—POSTAL LOSSES AND OFFENSES

PART 243—CONDUCT OF OFFICES

Conduct on Postal Property

Regulations codified in Title 39, Code of Federal Regulations, are amended to include regulations governing conduct on postal property. These regulations, as set out below, shall apply without limitation to all buildings and areas owned or occupied by the Postal Service regardless of the jurisdictional status of the property.

Accordingly, Title 39, Code of Federal Regulations, is amended as follows:

I. In Part 232 new § 232.6 is added, reading as follows:

§ 232.6 Conduct on postal property.

(a) *Applicability.* This section applies to all real property under the charge and control of the Postal Service, to all tenant agencies, and to all persons entering in or on such property. This section shall be posted and kept posted at a conspicuous place on all such property.

(b) *Recording presence.* Except as otherwise ordered, properties shall be closed to the public after normal working hours. Properties shall also be closed to the public in emergency situations and at such other times as may be necessary for the orderly conduct of business. Admission to properties during periods when such properties are closed to the public will be limited to authorized individuals who may be required to sign the register and display identification documents when requested by security force personnel or other authorized individuals.

(c) *Preservation of property.* Improperly disposing of rubbish, spitting, creating any hazard to persons or things, throwing articles of any kind from a building, climbing upon the roof or any part of a building, or willfully destroying, damaging, or removing any property or any part thereof, is prohibited.

(d) *Conformity with signs and directions.* All persons in and on property shall comply with official signs of a prohibitory or directory nature, and with the directions of security force personnel or other authorized individuals.

(e) *Disturbances.* Disorderly conduct, or conduct which creates loud and unusual noise, or which obstructs the usual use of entrances, foyers, corridors, offices, elevators, stairways, and parking lots, or which otherwise tends to impede or disturb the public employees in the performance of their duties, or which otherwise impedes or disturbs the general

public in transacting business or obtaining the services provided on property, is prohibited.

(f) *Gambling.* Participating in games for money or other personal property, or the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of lottery tickets, is prohibited on postal premises.

(g) *Alcoholic beverages and drugs.* The entering on property, or the operating of a motor vehicle on property, by a person under the influence of alcoholic beverage or any drug which has been defined as a "controlled substance" is prohibited. The sale or use of any "controlled substance" (except as medically approved) or alcoholic beverage on postal premises is prohibited. The term "controlled substance" is defined in section 802 of title 21, United States Code.

(h) *Soliciting, vending, and debt collection.* (1) Soliciting alms and contributions or collecting private debts on postal premises is prohibited. Except for commercial activities performed under contract with the Postal Service or those authorized by § 243.2(g) of this chapter, commercial soliciting and vending and the display or distribution of commercial advertising on postal premises is prohibited. This rule does not apply to suitable union notices or to personal notices posted by employees on authorized bulletin boards.

(2) The American Red Cross may have stands in lobbies during its annual rollcalls or special fundraising campaigns, providing they do not interfere with the transaction of postal business or require the expenditure of time or equipment by the Postal Service or its employees. Other similar national organizations also solicit funds at the local community level for worthy humanitarian purposes. Such organizations may solicit funds at designated locations on postal premises only if their names appear on a list approved by the regional postmaster general for solicitation activities. Before any organization may solicit funds, the local postmaster or installation head shall enter into an agreement with the local representative of the organization to specify locations, number of solicitors, and any other necessary limitations. The local postmaster or installation head will rely on his reasoned business judgment to restrict any activities which may prevent, unduly impair, or interfere with the transaction of business or the provision of postal services to the public.

(i) *Photographs for news, advertising, or commercial purposes.* Except as prohibited by official signs or the directions of security force personnel or other authorized personnel, or a Federal court order or rule, photographs for news purposes may be taken in entrances, lobbies, foyers, corridors, or auditoriums when used for public meetings. Other photographs may be taken only with the permission of the local postmaster or installation head.

(j) *Dogs and other animals.* Dogs, except seeing-eye dogs, and other animals, shall not be brought upon property for other than official purposes.

(k) *Vehicular and pedestrian traffic.* (1) Drivers of all vehicles in or on property shall drive in a careful and safe manner at all times and shall comply with the signals and directions of security force personnel, other authorized individuals, and all posted traffic signs.

(2) The blocking of entrances, driveways, walks, loading platforms, or fire hydrants in or on property is prohibited.

(3) Parking without authority, parking in unauthorized locations or in locations reserved for other persons, or continuously in excess of 18 hours without permission, or contrary to the direction of posted signs is prohibited. This section may be supplemented by the postmaster or installation head from time to time by the issuance and posting of specific traffic directives as may be required. When so issued and posted such directives shall have the same force and effect as if made a part hereof.

(l) *Weapons and explosives.* No person while on property shall carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, except for official purposes.

(m) *Nondiscrimination.* There shall be no discrimination by segregation or otherwise against any person or persons because of race, creed, color, sex, or national origin, in furnishing, or by refusing to furnish to such person or persons the use of any facility of a public nature, including all services, privileges, accommodations, and activities provided thereby on property.

(n) *Penalties and other law.* (1) Alleged violations of these rules and regulations are heard, and the penalties prescribed herein are imposed, either in a Federal district court or by a Federal magistrate in accordance with applicable court rules. Questions regarding such rules should be directed to the regional counsel for the region involved.

(2) Whoever shall be found guilty of violating the rules and regulations in this section while on property under the charge and control of the Postal Service is subject to fine of not more than $50 or imprisonment of not more than 30 days, or both. Nothing contained in these rules and regulations shall be construed to abrogate any other Federal laws or regulations of any State and local laws and regulations applicable to any area in which the property is situated.

(o) *Enforcement.* (1) Members of the U.S. Postal Service security force shall exercise the powers of special policemen provided by 40 U.S.C. 318 and shall be responsible for enforcing the regulations in this section in a manner that will protect Postal Service property.

(2) Local postmasters and installation heads may, pursuant to 40 U.S.C. 318b and with the approval of the chief postal inspector or his designee, enter into agreements with State and local enforcement agencies to insure that these rules and regulations are enforced in a manner that will protect Postal Service property.

§ 243.3 [Revoked]

II. In Part 243 § 243.3, *Solicitation of funds*, is revoked.

Title 45—PUBLIC WELFARE

Subtitle A—Department of Health, Education, and Welfare, General Administration

PART 73a—STANDARDS OF CONDUCT: FOOD AND DRUG ADMINISTRATION SUPPLEMENT

A new Part 73a is added to the regulations of the Department of Health, Education, and Welfare to set forth the Food and Drug Administration's supplement to the Department's Standards of Conduct published in Part 73. Authorization for such supplementation is contained in § 73.735-105 of Part 73. The sections of this Part 73a are not numbered in sequence, but in order to provide easy reference between Parts 73 and 73a, they bear numerical designations corresponding to the various sections in Part 73 to which they are related.

Subpart A—General Provisions

Sec.

73a.735-101 Principles and purpose.

Subpart B—Miscellaneous Provisions

73a.735-201 Control activity employees formerly associated with organiaztions subject to FDA regulation voluntary compliance.

Subpart D—Outside Employment

73a.735-401 General provisions.

Subpart E—Financial Interests

73a.735-501 General provisions.

73a.735-502 Employees in regulatory activities.

AUTHORITY: The provisions of this Part 73a are issued under 45 CFR 73.735-105.

Subpart A—General Provisions

§ 73a.735-101 Principles and purpose.

(a) To assure that the business of the Food and Drug Administration is conducted effectively, objectively, and without improper influence or appearance thereof, all employees must be persons of integrity and observe the highest standards of conduct. Because of FDA's special regulatory responsibilities to the consumer and industry, its employees must be especially alert to avoid any real or appearance of conflict of their private interests with their public duties. Their actions must be unquestionable and free from suspicion of partiality, favoritism, or any hint of conflicting interests. This supplement recognizes

FDA's public obligation to set reasonable

lic service, civic, or similar nonbusiness

(iii) The employee will avoid unrelated

for the Government in any particular matter relating to that financial interest.

Board to govern the operating-differential subsidy program with respect to bulk

(Act), governing the payment of operating-differential subsidy for U.S.-

FDA's public obligation to set reasonable and fair safeguards for the prevention of employee conflicts of interest. It is necessary to meet FDA's regulatory responsibilities and to otherwise assure full protection of the public confidence in the integrity of its employees.

(b) Since FDA is a unique consumer protection and regulatory agency within the Department, the DHEW Standards of Conduct need further supplementation to reflect this role. Therefore, for purposes of implementing the DHEW Standards of Conduct regulations within the Food and Drug Administration, this supplement provides interpretive definitions and additional requirements. As further guidance to its employees and supervisory officials, FDA will issue internal procedural instructions in accordance with this supplement.

Subpart B—Miscellaneous Provisions

§ 73a.735–201 Control activity employees formerly associated with organizations subject to FDA regulation/voluntary compliance.

(a) Within 1 year after employment has ceased with a regulated organization, a control activity employee may not participate in any regulatory action before FDA which involves the former employer organization.

(b) Any time after employment has ceased with a regulated organization, a control activity employee may not participate in a regulatory action before FDA in which he had participated personally and substantially directly for his former employer, e.g., drug investigations/applications, food additive petitions, and matters dealing with voluntary/mandatory compliance in the area of electronic products.

(c) Within 30 days after assignment to a control activity position, an employee shall submit to his supervisor detailed information concerning former industry employers, dates, and substance of involvements in such regulatory matters as shown in paragraph (b) of this section.

(d) The director of the regulatory program involved may grant individual exceptions or group waivers, whenever he determines that the strict application of this section would not be in the best interests of the United States or would cause an unreasonable and undue personal hardship. All such exceptions/waivers shall be documented with copies for each employee affected and the Director, Division of Personnel Management.

Subpart D—Outside Employment

§ 73a.735–401 General provisions.

(a) Employees of the Food and Drug Administration shall obtain advance approval for all outside employment, whether paid or unpaid. Employment, as used in this section, does not include:

(1) Memberships in charitable, religious, social, fraternal, recreational, public service, civic, or similar nonbusiness organizations.

(2) Memberships in professional organizations. (Officeholding, however, requires advance approval.)

(3) Performance of duties in the Armed Forces Reserve or National Guard.

(b) Control activity employees (defined in § 73a.735–502) will not generally be granted approval to:

(1) Manage or direct an organization whose activities are subject to FDA regulation, or

(2) Be employed in an organization whose business activities are subject to FDA regulation unless:

(i) The regulated activities of the organization are an insignificant part of its total operations, i.e., the regulated products of the organization constitute no more than 10 percent of its annual gross sales, and

(ii) The outside employment is in nonregulated activities of the organization.

(c) All other employees will generally be granted approval to engage in outside employment which is compatible with the full performance of their FDA duties and responsibilities and which will not give rise to a real or apparent conflict of interest. Such approval may be given even though the organization is one which is a significantly regulated organization provided the employment will have only a remote or inconsequential effect on FDA operations. Permissible employment includes but is not limited to:

(1) Employment where the sale of FDA-regulated products is incidental to the purpose of the establishment, e.g., hotels, theaters, bowling alleys, and sports arenas.

(2) Sales and clerical occupations relating to regulated products, e.g., supermarkets, drugstores, department stores, liquor stores.

(3) Trade, industrial, and service occupations relating to regulated products, e.g., gasoline service station attendant, line production or assembly work, cook, waiter, waitress, hospital attendant, snack bar vendor, warehouseman.

(d) All employees will generally be granted approval to engage in paid or unpaid outside employment which contributes to their technical or professional development, e.g.,

(1) Medical, dental, and veterinary practices.

(2) Pharmacy practice after meeting the following conditions which will serve to protect against possible conflicts or apparent conflicts of interest and to avoid other problems resulting in embarrassment to the employee or FDA:

(i) The primary purpose of the part-time employment is to contribute to the overall professional development of the employee and generally enhance his capability to better perform his current FDA duties.

(ii) The part-time duties will be confined generally to dispensing RX drugs and related professional pharmacy duties.

(iii) The employee will avoid unrelated nonprofessional duties such as supervision or management of store operations, contractual or purchasing responsibilities (except normal "out-of-stock" requisitioning) and repacking or relabeling of bulk items.

(iv) The employee will demonstrate a high degree of discretion and judgment in his contacts with customers and representatives of regulated industry and competitor firms so as to avoid giving the impression that:

(*a*) His part-time actions, recommendations, opinions, or remarks are official points of view;

(*b*) He is using his FDA position for private gain by oral misrepresentations and false claims of the company's products;

(*c*) He is making a Government decision outside official channels, e.g., to customers, prescribing physicians, buyers, distributors;

(*d*) He or other FDA representatives will give preferential treatment to any regulated organization or representatives of such organizations, or that FDA employees have not exercised complete independence or impartiality in carrying out their regulatory and consumer protection responsibilities; or

(*e*) His part-time work is creating an adverse effect on the image of FDA or discrediting the integrity of official FDA regulatory decisions.

Subpart E—Financial Interests

§ 73a.735–501 General provisions.

(a) There are no restrictions placed on ownership of diversified mutual funds.

(b) An FDA employee, other than a control activity employee (defined in § 73a.735–502), may have financial interests:

(1) In an organization whose FDA-regulated activities are an insignificant part of its total operations, i.e., no more than 10 percent of the organization's annual gross sales are in products regulated by FDA; or

(2) In an organization whose FDA-regulated business activities are a significant part of its total business operations: *Provided*,

(i) The holding is less than $5,000 (value or cost at time of initial reporting), and

(ii) The holding represents less than 1 percent of the total outstanding stock shares of that organization, and

(iii) No more than 50 percent of the employee's total investment value is concentrated in significantly regulated industries; or

(3) Of a type otherwise prohibited by this subparagraph if he makes a full disclosure thereof to his supervisor and receives an advance written determination from the supervisor that in the light of the duties and responsibilities of the employee, the interest is not likely to affect the integrity of his services to the Government. Such a disclosure does not constitute a waiver under 18 U.S.C. 208(b)(1) and the employee may not participate

for the Government in any particular matter relating to that financial interest.

§ 73a.735–502 Employees in regulatory activities.

(a) Employees in regulatory activities (control activities in FDA) shall not have financial interests in any organization whose business activities are subject to FDA regulations, unless the regulated activities of the organization are an insignificant part of its total business operations. To administer this provision within FDA, the following interpretations apply:

(1) A "control activity" employee means one who:

(i) Occupies a position classified at GS–16 and above (or equivalent), or

(ii) Occupies a professional or technical position with duties of a nature that the employee could cause an economic advantage for or handicap against a non-Federal enterprise in the discharge of his official duties and responsibilities (all inspectors and regulatory analysts are included), or

(iii) Occupies a management, administrative, or investigative position, in either regulatory or management echelons, where his actions are likely to have a significant impact on non-Federal enterprises.

(2) "Insignificant" (part of an organization's total business operations) means that the FDA-regulated products constitute no more than 10 percent of the organization's annual gross sales. As authorized by exemption provisions of 18 U.S.C. 208(b)(2), it is determined that such permissible financial interests (i.e., 10 percent or less regulated) are too remote and too inconsequential to affect the integrity of employees' services to the Government.

This supplement was approved by the Civil Service Commission on September 12, 1972 and it becomes effective 60 days after publication in the FEDERAL REGISTER.

Approved: November 10, 1972.

ELLIOT L. RICHARDSON,
Secretary.

Title 46—SHIPPING

Chapter II—Maritime Administration, Department of Commerce

SUBCHAPTER C—REGULATIONS AFFECTING SUBSIDIZED VESSELS AND OPERATORS

[General Order 116]

PART 294—OPERATING-DIFFERENTIAL SUBSIDY FOR BULK CARGO VESSELS ENGAGED IN CARRYING BULK RAW AND PROCESSED AGRICULTURAL COMMODITIES FROM THE UNITED STATES TO THE UNION OF SOVIET SOCIALIST REPUBLICS

The following revised regulations have been adopted by the Maritime Subsidy Board to govern the operating-differential subsidy program with respect to bulk cargo vessels engaged in carrying export bulk raw and processed agricultural commodities from the United States to the Union of Soviet Socialist Republics. They supersede the regulations originally appearing in the FEDERAL REGISTER on October 21, 1972 (37 F.R. 22747), as corrected on October 27, 1972 (37 F.R. 22986).

These regulations are issued pursuant to the Merchant Marine Act, 1936, as amended (46 U.S.C. 1101–1294). The Secretary of Commerce is authorized under section 601(a) of the Act,

> • • • [T]o consider the application of any citizen of the United States for financial aid in the operation of a vessel or vessels, which are to be used in an essential service in the foreign commerce of the United States • • •

The meaning of the term "essential service" is described in section 211 of the Act as including:

> The bulk cargo carrying services that should, for the promotion, development, expansion, and maintenance of the foreign commerce of the United States and for the national defense or other national requirements be provided by United States-flag vessels • • •

The operating-differential subsidy provided in these regulations is deemed appropriate in light of the national requirements for participation by U.S. vessels in the carriage of export bulk raw and processed agricultural commodities during the period to July 1, 1973.

The authority for the operating-differential subsidy procedures covered by these regulations is set forth in section 603(b) of the Act which provides:

> • • • [T]he Secretary of Commerce may, with respect to any vessel in an essential bulk cargo carrying service as described in section 211(b) pay, in lieu of the operating-differential subsidy provided by this subsection (b), such sums as he shall determine to be necessary to make the cost of operating such vessel competitive with the cost of operating similar vessels under the registry of a foreign country.

Rule making involving the operating-differential subsidy program is exempt from the requirements of section 553 of title 5, United States Code. A new Part 294 is hereby added to Title 46, Chapter II, Code of Federal Regulation as follows:

Sec.
294.1 Purpose.
294.2 Applications.
294.3 Subsidy contract.
294.4 Voyage approval procedures.
294.5 Definitions.
294.6 Determinations of subsidy.
294.7 Sources of required data.
294.8 Payment of subsidy.
294.9 Chartered vessels.
294.10 Effective period.

AUTHORITY: The provisions of this Part 294 issued under section 204, Merchant Marine Act, 1936, as amended (46 U.S.C. 1114).

§ 294.1 Purpose.

The regulations in this part prescribe rules in accordance with title VI of the Merchant Marine Act, 1936, as amended (Act), governing the payment of operating-differential subsidy for U.S.-flag bulk cargo vessels engaged in carrying export bulk raw and processed agricultural commodities from ports in the United States to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge.

§ 294.2 Applications.

Applications for operating-differential subsidy contracts under this part may be obtained from the Secretary, Maritime Subsidy Board, Maritime Administration, U.S. Department of Commerce, Washington, D.C. 20235.

§ 294.3 Subsidy contract.

(a) *Expiration.* Contracts executed in accordance with the rules and regulations of this part shall expire on June 30, 1973, except that subsidized voyages in progress as of midnight of that date may continue to their termination as defined in § 294.5(c)(2) for purposes of the payment of operating-differential subsidy.

(b) *Renegotiation of contracts.* The operating-differential subsidy contract shall provide that amounts otherwise payable thereunder shall be subject to renegotiation if the Maritime Subsidy Board (Board) determines that the operator is earning excessive profits. In the determination of what constitutes excessive profits the Board shall consider the provisions of section 103 of the Renegotiation Act of 1951, as amended (50 U.S.C. App. 1213), and may take into consideration such other matters that the Board deems appropriate, including any other provision of said Renegotiation Act. The elimination of excessive profits shall be accomplished through the renegotiation of the operating-differential subsidy contract including withholding or recovering amounts paid or accrued with respect to any subsidized voyage. Payments received or accrued under other contracts between the operator and the Government shall not be taken into account for purposes of such renegotiation.

(c) *Subsidized voyage approval.* The operating-differential subsidy contract shall provide that each subsidized voyage must have the prior written approval of the Board. In acting upon a request for such approval, the Board will consider all pertinent facts, including the availability of appropriated funds, the most productive utilization of such funds, whether the charter rate is the maximum then obtainable, and the purposes and policies of the Act. The Board shall not approve retroactively the subsidization of a voyage which has already commenced.

§ 294.4 Voyage approval procedures.

(a) *Requests.* All requests for the approval of a subsidized voyage must be in writing. Telegrams are acceptable. The request must contain the following data:

(1) Name of operator;

(2) Operating-differential subsidy contract number;

(3) Vessel name;

(4) Charterer;
(5) Load and discharge ports;

port of loading at the time of such certification;

(ii) U.S. preference cargo, including that covered by 10 U.S.C. 2631, 46 U.S.C.

(ii) The fair and reasonable cost per operating day of maintenance and repair expenses for the subsidized vessel

est expense directly attributable to indebtedness incurred in connection with the construction, reconstruction or pur-

bulk raw and processed agricultural commodities from the United States to the U.S.S.R. will be made on U.S.-flag

(4) Charterer;
(5) Load and discharge ports;
(6) Lay days;
(7) Commodities and estimated tonnage;
(8) Charter rate and terms;
(9) The operator's certification to the best of its knowledge and belief of: The current charter market rate for third-flag vessels under a charter having the same terms and conditions, or, if it certifies that it knows of no such currently fixed third-flag vessel rates, then its best estimate of the current market charter rate based upon other charter fixtures appropriately adjusted to give effect to differences between such charters and the proposed fixture of the subsidized vessel together with a concise explanation of the basis on which the estimate was made;
(10) Expected date of commencing the voyage;
(11) Estimated duration of voyage;
(12) Similar data concerning U.S. import cargo if such carriage is contemplated; and
(13) Any other data as may be deemed necessary by the Board.

(b) *Finality.* Approvals and denials of requests for subsidized voyages are final and not subject to review or appeal, except that approvals may be canceled if the operator has knowingly or negligently provided incorrect or misleading data or information to the Board. Commencement of an approved subsidized voyage shall constitute the acceptance by the operator of all terms and conditions expressed in the approval.

§ 291.5 Definitions.

(a) *Bulk cargo vessels.* All vessels meeting the criteria in sections 601 and 610 of the act, whether dry-bulk, tanker, or break-bulk by design, shall be bulk cargo vessels for purposes of this part and, as such, eligible for participation in this operating-differential subsidy program.

(b) *Foreign-flag competition.* For purposes of establishing such sums as the Board determines are necessary to make the cost of operating U.S.-flag vessels competitive with the cost of operating similar vessels under the registry of a foreign country, the Board shall select a typical foreign-flag vessel which has actually participated in the carriage of export bulk raw and processed agricultural commodities from the United States to U.S.S.R. In the event that it is not possible to obtain actual cost data for a selected typical vessel which has engaged in that trade, the Board will establish such costs based upon the costs of a foreign-flag vessel which, in the opinion of the Board, has equivalent costs of operation.

(c) *Subsidized voyage.* (1) *Commencement.* A subsidized voyage shall commence at 0001 local time in the U.S. port of loading on the day the subsidized bulk cargo vessel:

(i) Is certified by the National Cargo Bureau, Inc., as being clean and ready to commence loading if it is at the port of loading at the time of such certification;

(ii) Arrives at the U.S. port of loading if the vessel has obtained such certification prior to its arrival at the port of loading; or

(iii) Commences loading if certification is subsequently obtained.

(2) *Termination.* A subsidized voyage shall terminate at 2400 local time on the day the subsidized bulk cargo vessel:

(i) Arrives at a U.S. port of call if it returns in ballast: *Provided*, If the vessel returns to a U.S. port of call different from that at which it loaded cargo, the subsidized voyage shall terminate at the time the vessel would normally have returned to the port of loading, if that time is earlier;

(ii) Completes discharge of inbound cargo in a U.S. port if it has engaged in the bulk carriage of U.S. import commerce and has not engaged in foreign-to-foreign commerce; or

(iii) Commerce deviation by deviating from the general track of the normal ballast return voyage if it engages in foreign-to-foreign commerce.

(3) *Limitation on subsidized voyage commencement and termination.* A subsidized vessel shall not commence and terminate a subsidized voyage on the same day.

(4) *Deviations to engage in U.S. import commerce.* A subsidized bulk cargo vessel shall be allowed only the following time in excess of the normal total steaming time for the ballast return voyage when the vessel engages in the bulk carriage of U.S. import commerce:

(i) A maximum of 3½ days steaming time; and (ii) loading and unloading time. For the purpose of determining the permissible deviation under this paragraph, the total steaming time of the inbound voyage shall be compared to the normal steaming time required for the ballast return voyage from the last port of discharge of the U.S. export cargo to the first port of discharge of the U.S. import cargo. This paragraph shall not apply to vessels which engage in foreign-to-foreign commerce during a subsidized voyage.

(5) *Idleness or delay.* The operator shall report promptly to the Board all facts and explanations thereof relating to periods of idleness or delay sustained on a subsidized voyage. The Board shall determine whether such idleness or delay could have been avoided through efficient and economical operation and whether subsidy shall be payable, in whole or in part, for such periods. If the delay was not caused by inefficient operation but it results in a reduction of operating costs, the Board shall determine the fair and reasonable amount of subsidy, if any, applicable to such period, taking into consideration the costs involved.

(6) *Ineligible voyages.* No voyage shall be eligible for subsidy during which the subsidized bulk cargo vessel carries:

(i) Cargo in the domestic commerce of the United States;

(ii) U.S. preference cargo, including that covered by 10 U.S.C. 2631, 46 U.S.C. 1241, and 15 U.S.C. 616a; or

(iii) Any other commercial cargo simultaneously with the export bulk raw and processed agricultural commodities being carried to the U.S.S.R., except equipment which may be needed to facilitate unloading of such agricultural commodities.

§ 294.6 Determination of subsidy.

(a) *In general.* For purposes of this part, the amount of operating-differential subsidy, as determined by the Board, shall not exceed the excess costs of U.S. wages of officers and crew; subsistence of officers and crew; maintenance and repairs; vessel insurance; stores, supplies, and expendable equipment; fuel; and other vessel expenses over the estimated costs of the same items of expense of the typical foreign-flag vessel. An additional operating-differential subsidy amount, as determined by the Board, shall be paid for the fair and reasonable depreciation and interest costs directly attributable to the subsidized vessel, such amount not to exceed the excess of the same costs of operating a similar foreign-flag vessel. The operating-differential subsidy comprised of such excess costs will be determined as a per diem amount and shall be subject to the limitations imposed by § 294.3(b) and by paragraph (e) of this section.

(b) *U.S. costs.* The following items shall be used to establish operating costs for each subsidized vessel:

(1) *Wages of officers and crew.* Actual wage costs, including voyage and port relief crew payrolls, contributions to pension and welfare plans, social security and other taxes, and other employment costs directly attributable to the subsidized voyage;

(2) *Subsistence of officers and crew.* The net costs of food and other edibles consumed by officers and crew, including port relief crews, during the subsidized voyage, including sales taxes, Government inspection fees and shipside delivery and loading costs incurred for the use of other than the crew and relief complements;

(3) *Maintenance and repairs.* The cost of maintenance and repairs attributable to the subsidized voyage shall be:

(i) The average cost per operating day of maintenance and repair expenses for the subsidized vessel, including costs of drydocking and special surveys, but excluding costs which are reimbursed and costs ineligible for subsidy pursuant to Part 272 of this subchapter (except for the costs identified in § 272.11(c) of this subchapter), for the 5-year period preceding the current year adjusted to the current cost level by the application of survey reports of the U.S. Salvage Association, Inc. and the U.S. Monthly Index Wages (hourly earnings in manufacturing) published by the U.S. Bureau of Labor Statistics, for vessels that have been owned by the operator, or a holding company, affiliate, subsidiary, or associate, for 5 years preceding the current year, or

(ii) The fair and reasonable cost per operating day of maintenance and repair expenses for the subsidized vessel as determined by the Board, for vessels that have not been under such ownership for the 5-year period;

(4) *Vessel insurance.* Vessel insurance including the following costs:

(i) The fair and reasonable insurance and associated net premium costs, after brokerage and owner's adjustments and including foreign stamp taxes, in effect for the subsidized voyage after taking into consideration the deductibles included in the policies in effect during the 3 years preceding the current year (or such lesser period as the vessel has been in operation) for protection and indemnity insurance, and the 5 years preceding the current year (or such lesser period as the vessel has been in operation) for hull and machinery insurance, and

(ii) The fair and reasonable cost of claims for death, injury, and illness of officers and crews absorbed by the operator under the deductible provision of protection and indemnity insurance policies attributable to the subsidized voyage as determined on the basis of the average cost per operating day for the subsidized vessel of such expenses paid during the 3-year period preceding the current year (or such lesser period as the vessel has been in operation);

(5) *Stores, supplies, and expendable equipment.* The fair and reasonable cost of stores, supplies, and expendable equipment attributable to the subsidized voyage as determined on the basis of the average cost per operating day of such expenses for the subsidized vessel over the 3-year period preceding the current year (or such lesser period as the vessel has been in operation) adjusted to the current cost level by application of U.S. Wholesale Price Index of Total Manufactures;

(6) *Fuel.* The actual cost of fuel consumed at sea and in port during the subsidized voyage, including taxes and delivery costs, after giving effect to bunkers on board upon commencement and termination of the subsidized voyage;

(7) *Other vessel expenses.* The actual cost of miscellaneous expenses directly attributable to the subsidized voyage and incident to the management and maintenance of the subsidized vessel, as exemplified in the partial list at § 282.764 of this subchapter;

(8) *Vessel depreciation.* The depreciation expense of the subsidized vessel for the period of the subsidized voyage shall be the actual unsubsidized construction cost, reconstruction cost, or purchase cost of the subsidized vessel depreciated on a straight-line basis over the economic life of the vessel actually used by the operator to depreciate such construction, reconstruction, or purchase cost, after giving effect to the actual residual value of the vessel, used by the operator for financial accounting purposes; and

(9) *Interest expense attributable to vessel indebtedness.* The current interest expense directly attributable to indebtedness incurred in connection with the construction, reconstruction, or purchase of the subsidized vessel for the period of the subsidized voyage determined in part by an analysis of the date and principal amount of the debt, the principal amortization schedule, the interest rate, and the scheduled payments of principal and interest during the period of the subsidy contract.

(c) The Board shall review the costs of each voyage for which subsidy is being sought and shall disallow for subsidy any costs resulting from inefficient or uneconomical operation.

(d) *Foreign costs.* The following items shall be used to establish operating costs of the typical foreign-flag vessel:

(1) *Actual cost items.* The following operating costs of the selected typical vessel shall be taken at current actual figures, and, if such data are not current, then they shall be adjusted to the current cost level by appropriate indices contained in the International Financial Statistics published by the International Monetary Fund or the Monthly Bulletin of Statistics published by the United Nations—

(i) Wages of officers and crew;
(ii) Subsistence of officers and crew;
(iii) Maintenance and repairs;
(iv) Vessel insurance;
(v) Stores, supplies, and expendable equipment;
(vi) Fuel; and
(vii) Other vessel expenses.

(2) *Vessel depreciation.* Depreciation expense shall be based on the cost of constructing or reconstructing the U.S. subsidized vessel in a representative foreign shipbuilding center or purchasing the vessel at world market price, which cost shall be depreciated on a straight-line basis over the same economic life actually used by the operator for the subsidized vessel in order to determine the foreign depreciation of such construction, reconstruction, or purchase cost, after giving effect to the residual value used by the operator; and

(3) *Interest expense attributable to vessel indebtedness.* Interest expense shall be determined by assuming the same interest rate, repayment term, and method of principal amortization as those that actually exist for the subsidized vessel, and applying those terms to obtain the interest which would be payable had the original principal of the debt been the same percentage of the foreign cost of construction, reconstruction, or purchase as the original construction, reconstruction, or purchase debt of the subsidized vessel was of its construction, reconstruction, or purchase cost.

(e) *Abatement of subsidy resulting from the rate of carriage.*—(1) *In general.* Under the terms of the Agreement Between the Government of the United States of America and the Government of the Union of Soviet Socialist Republics Regarding Certain Maritime Matters signed October 14, 1972, fixtures made prior to July 1, 1973, for shipments of bulk raw and processed agricultural commodities from the United States to the U.S.S.R. will be made on U.S.-flag vessels at the higher of:

(i) A rate for the cargo and route involved based upon the average of market charter rates for the years 1969, 1970, and 1971, as established under that Agreement and related letters; or

(ii) The current market charter rate for the cargo and route involved (where such market charter rates do not exist, a rate will be determined by adjusting current market charter rates for the most comparable cargo and route) plus a rate premium of 10 percent of such rate.

(2) *Abatement determination.* The operating-differential subsidy otherwise payable under this part shall be subject to abatement on a voyage basis when fixtures are made and carriage occurs at the rate referred to in subparagraph (1)(ii) of this paragraph. The abatement shall be comprised of two portions, one associated with the 10-percent rate premium and the second associated with the current market charter rate.

(i) To the extent that the freight rate exceeds the 3-year average rate for the cargo and route involved as established under that Agreement and related letters, the amount of the rate premium abatement shall be equal to 100 percent of the freight revenue per ton attributable to the 10-percent rate premium. The commission attributable to the amount subject to abatement will be deducted from the abatement. For example, if the current market charter rate is $7.80 per ton, the minimum rate under the Agreement is 110 percent of that amount or $8.58 per ton. The amount subject to abatement in this case would be $0.53 per ton, which is the amount by which the premium causes the freight rate to exceed the 3-year average rate of $8.05 per ton. The abatment would be reduced by the amount of commission paid by the operator which is attributable to the $0.53 per ton.

(ii) The amount of the current market charter rate abatement per ton shall be determined by multiplying the freight rate increments in the left hand column of the table below by the percentages in the right hand column. The commission attributable to the amount subject to abatement will be deducted from such abatement.

Freight rate increment	*Percentage*
For the first $0.95 per ton that the rate in subparagraph (1)(ii), exclusive of the rate premium, exceeds the rate in (1)(i), the percentage is	0
For the amount that such excess is between $0.95 per ton and $1.95 per ton, the percentage is	50
For the amount that such excess is over $1.95 per ton, the percentage is	75

(3) *Example.* The provisions of this paragraph are illustrated by the following example.

A vessel is fixed and carriage of U.S. export grain to the U.S.S.R. occurs at a charter rate of $12.10 per ton, F.I.O.T. consisting of $11 representing the current market charter rate

of $11 plus a rate premium of $1.10. The commission rate per the charter party is

§ 294.8 Payment of subsidy.

of officers and crew, subsistence of officers and crew, vessel insurance, fuel,

Title 47—TELECOMMUNICATION

additional service and should have an opportunity to cure the deficiency in com-

391 (1967). It contends that, if FM service in Adrian, Mich., is to remain any-

XUM
V37-222 NOV 16 72
XUM

of $11 plus a rate premium of $1.10. The commission rate per the charter party is 3¾ percent of freight revenue. The average market charter rate for such cargo and route for the years 1969, 1970, and 1971 as established under the Agreement and related letters is $8.05 per ton.

Subsidy abatement is determined as follows:

	Per ton f.i.o.t.
Current market charter rate	$11.00
Add 10% prelum	1.10
Fixture rate	12.10
Less average of market charter rates for the years 1969, 1970, and 1971	8.05
Difference	4.05
Abatement of subsidy per ton of cargo carried:	
Abatement attributable to the premium:	
Gross premium	$1.10
Less commissions at 3¾ percent	.04125
Net revenue	1.05875
Abatement percentage	100
Abatement per ton	$1.05875
Abatement attributable to the excess of the current market charter rate over the average of market charter rates for 1969, 1970, and 1971:	
Excess of $0.95 or less	$0.95
Less commissions at 3¾ percent	.035625
Net revenue	.914375
Abatement percentage	0
Abatement per ton	—0—
Excess between $0.95 and $1.95	$1.00
Less commissions at 3¾ percent	.0375
Net revenue	.9625
Abatement percentage	50
Abatement per ton	$0.48125
Excess over $1.95	1.00
Less commissions at 3¾ percent	.0375
Net revenue	.9625
Abatement percentage	75
Abatement per ton	$0.721875
Total abatement of subsidy per ton of cargo carried	2.261875

§ 294.7 **Sources of required data.**

(a) *U.S. costs.* The Board will establish the operating costs of the subsidized vessel based on statements, payrolls, invoices, and other data, certified as correct by an officer of the operator, and any other sources the Board considers appropriate.

(b) *Foreign costs.* The Board will establish the operating costs of the typical foreign-flag vessel from data obtained from the Maritime Administration's foreign representatives and any other sources the Board considers appropriate.

§ 294.8 **Payment of subsidy.**

(a) *Tentative per diem subsidy*—(1) *In general.* A tentative per diem subsidy amount (rounded to the nearest dollar) for each subsidized vessel will be incorporated in the operating-differential subsidy contract for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation, interest expense attributable to vessel indebtedness, maintenance and repairs and stores, supplies and expendable equipment. Such tentative subsidy amounts for maintenance and repairs and stores, supplies and expendable equipment also will be stated as differential percentages (rounded to two decimal places).

(2) *Partial payment.* After termination of an approved voyage, the operator shall be paid the following subsidy which first shall be abated by an amount determined pursuant to § 294.6(e):

(i) Ninety percent of the algebraic sum of the per diem amounts for wages of officers and crew, subsistance of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation and interest expense attributable to vessel indebtedness, less any negative per diem amounts for maintenance and repairs and stores, supplies and expandable equipment, for each approved voyage day, and

(ii) An amount determined by multiplying any positive differential percentages for maintenance and repairs or stores, supplies and expandable equipment by the costs incurred for such items by the operator in any of the United States or the Commonwealth of Puerto Rico subsequent to commencement of the approved voyage but not to exceed 90 percent of the tentative per diem amounts for such items for each approved voyage day.

(b) *Final per diem subsidy*—(1) *In general.* As soon as practicable after termination of an approved voyage, and after verification of historical cost data and expenses attributable to the approved voyage, a final per diem subsidy amount (rounded to the nearest dollar) for the vessel will be incorporated in the operating-differential subsidy contract for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation interest expense attributable to vessel indebtedness, maintenance and repairs and stores, supplies and expandable equipment. Such final subsidy amounts for maintenance and repairs and stores, supplies and expandable equipment also will be stated as differential percentages (rounded to two decimal places).

(2) *Final payment.* After final per diem amounts and differential percentages for the subsidized vessel on the approved voyage are incorporated in the operating-differential subsidy contract, the operator shall be paid subsidy as follows:

(i) The balance due of the algebraic sum of the per diem amounts for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation, and interest expense attributable to vessel indebtedness, less any negative per diem amounts for maintenance and repairs and stores, supplies and expandable equipment, for each approved voyage day, and

(ii) The balance due of an amount determined by multiplying any positive differential percentages for maintenance and repairs or stores, supplies and expendable equipment by the costs incurred for such items by the operator in any of the United States or the Commonwealth of Puerto Rico during the 5-year period following commencement of the approved voyage but not to exceed the total per diem amounts for such items for each approved voyage day. If the operator sells, transfers, or otherwise disposes of its interest in the subsidized vessel within such 5-year period, no outstanding accruals of such total per diem amounts shall be paid unless the Board executes a separate agreement governing such payments.

§ 294.9 **Chartered vessels.**

(a) *In general.* Section 601 of the Act provides that an applicant for operating-differential subsidy must own or lease the subsidized vessel. For purposes of this part of the term "leased vessels" includes only vessels leased under a bareboat charter party.

(b) *Calculation of vessel depreciation and interest expense attributable to vessel indebtedness*—(1) *In general.* For purposes of determining the U.S. costs of vessel depreciation and interest depreciation and interest expense attributable to vessel indebtedness in § 294.6(b)(8) and (9) for leased vessels, the appropriate data of the owner shall be used. In the event that the charterer cannot obtain such data from the owner, no subsidy will be paid in respect to those items.

(2) *Limitation.* In calculating the subsidy payable with respect to vessel depreciation and interest expense attributable to vessel indebtedness for leased vessels, U.S. costs for such items of expense in excess of the bareboat charter hire shall not be taken into account.

§ 294.10 **Effective period.**

The provisions of this part shall be effective on October 21, 1972, and shall terminate on June 30, 1973, except that they shall continue in effect for (a) the subsidized voyages in progress on the latter date and (b) the purposes of § 294.8(b).

Dated: November 13, 1972.

By order of the Assistant Secretary of Commerce for Maritime Affairs and the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 19512; FCC 72-997]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Adrian, Mich.

First report and order. In the matter of amendment of § 73.202, Table of Assignments, FM Broadcast Stations (Adrian, Michigan, and West Lafayette, Ind.), RM-1820, RM-1822.

1. The Commission has before it the notice of proposed rule making, released May 23, 1972 (FCC 72-430), proposing an amendment of § 73.202(b) of the rules, the Table of FM Assignments, by assigning FM channels to three communities. By order, FCC 72-604, the petition filed by Gardner Broadcasting Co., Inc., for assignment of Channel 249A to Winchendon, Mass. (RM-1791) was severed from this proceeding and consolidated into Docket No. 19540. This report and order concerns only the petition filed for assignment of an FM channel to Adrian, Mich. At a later date, a report and order will be issued with respect to West Lafayette, Ind.

2. The rule making was instituted on a petition filed by Gerity Broadcasting Co. (Gerity) (RM-1820) for assignment of Channel 237A to Adrian, Mich. Adrian with a population of 20,382 is the seat of Lenawee County (population 81,609). It has a Class IV AM station, licensed to the petitioner, and an FM station (WLEN), licensed to Lenawee Broadcasting Co. (Lenawee). The notice pointed out that the channel could be assigned there without affecting other assignments. It would be the second Class A channel for Adrian. However, due to the requirements of the minimum mileage separation rules, the transmitter site would have to be located in an area approximately 7 miles southwest of Adrian. Although Lenawee had contended that there was no location from which Adrian can be served in its entirety with the minimum field strength of 70 dbu, a tentative finding was made that there were parcels of property available from which a station could serve the community in compliance with the technical regulations. It also pointed out that a Class A FM station operating with maximum facility would provide a first service to an area of 57.4 square miles and a second service to an area of 169 square miles within the 1 mv./m. contour.

3. As to Lenawee's objection that the assignment of a second FM channel to Adrian would do severe economic harm to its station, the notice stated that it has been the long-established Commission policy to make ultimate decisions with respect to Carroll issues at the time of an application for a specific station rather than in rule making proceedings. However, it agreed with Lenawee that Gerity had made no appropriate showing as to the need of the community for an additional service and should have an opportunity to cure the deficiency in comments responding to the notice of proposed rule making.

4. In its comments, Gerity sets forth the demographic, economic, political, and sociological characteristics of Adrian and Lenawee County. Gerity contends that 1,949 or 9.5 percent of Adrian's population and 3,515 or 4.3 percent of Lenawee County population are Spanish-surnamed Americans, and that, although the population of Adrian did not increase in the decade from 1960 to 1970, six other townships, which lie wholly or partially within the service area of Class A FM station, grew 5 percent or more during the decade. It asserts that Adrian is served by three railroads and 10 motor carriers; that, of more than 90 manufacturing and processing firms in the county, 53 are based in Adrian; that agriculture is also a major economic activity in the county; and that the retail sales for 1972 are estimated as $75 million for Adrian and $178 million for the county. Gerity states that Adrian is governed by six commissioners and a mayor with the affairs of the city managed by an administrator, and the county is governed by the Board of Commissioners consisting of 15 elected members, and that there are a number of public and private schools as well as special schools and two colleges, and a number of cultural resources for arts, dramatics, and music. As to possible transmitter site, Gerity contends that it has obtained an agreement to use a parcel of land 0.35 mile closer to Adrian than previously illustrated in its petition, and insists that the 70 dBu contour would include the city's entire populated area. Lenawee in its reply alleges that there is no showing of unmet needs and interests; that Station WLEN already provides the early morning service of farm programing and school closing and road condition bulletins; and that Lenawee County is already dominated by big city stations and has two local outlets.

5. Lenawee in its comments asserts that the examination of the Gerity proposal reveals, in addition to a coverage problem, a potential problem of shadowing, i.e., on a radial chosen by Gerity, approximately one-third of the city would be beneath the line of sight. In reply, Gerity states that no significant shadowing would occur in connection with the operation of an FM station from the site identified by Gerity in its comments as meeting all of the Commission's technical requirements and that any shadowing which might occur could be alleviated by raising the radiation center of the station's antenna.

6. Additionally, Lenawee asserts that it does not concur in the dismissal of the economic issue as being one more appropriate for consideration at time of an application rather than in rule making, and that such a position is contrary to precedent and the public interest, citing FM Channel Assignments, Gainesville, Fla., 11 RR 2d 1699 (1968); FM Channel Assignments, Phoenix, Ariz., 8 FCC 2d 391 (1967). It contends that, if FM service in Adrian, Mich., is to remain anything other than a satellite of the AM monopoly, then the Commission must give consideration and credence to the economics involved; that an additional FM channel in the county cannot be realistically justified on the basis of a separately owned and independently operated service; and that any reduction of advertising income caused by the addition of another FM channel in Adrian would force WLEN to effect severe and extensive cutbacks, affecting the station's present level of services to the community.

7. In reply to the Lenawee arguments on the economic issue, Gerity avers, citing Sanders Brothers Radio Station v. FCC, 309 U.S. 470 (1940), and Carroll Broadcasting Co. v. FCC, 258 F. 2d 440 (D.C. Cir. 1958), that if there is evidence indicating that a community may not be able to support another station, the ultimate question to be answered is whether the public will lose service as a result of the construction of a new station. This question, it urges, can only be decided when there are applicants for a station; and although Lenawee believes that Gerity is the only potential applican for Channel 237A at Adrian, this is not certain, and only when an application with specific programing proposals is filed can the Commission make a determination as to whether the public interest would suffer a net loss because of a cutback of service by WLEN.

8. We agree with these contentions of Gerity. The cases cited by Lenawee do not stand for the proposition that economic issues are to be resolved in rule making proceedings. In those cases the decisions concerning FM channel assignment were based on a consideration of public interest factors. Only in passing, and in the very broadest terms, did they advert to the economic question. Here, Gerity has shown that a Class A FM station, operating from an assumed site southwest of Adrian, would provide first and second FM services to the areas located within the projected 1 mv./m. contour now deprived of or limited to one FM service. Further, the preclusion study indicates that only Channel 237A would be affected by its assignment to Adrian, and the area where the channel can be utilized is limited to a small area near Adrian. It also appears that, although the siting of the station here would be critical, an FM station could be established conforming to all technical requirements of the rules. Thus, we are of the opinion that the assignment of Channel 237A to Adrian, Mich., would result in the efficient use of FM frequencies and would be in the public interest. In view of the foregoing, we will make this assignment.

9. Authority for the action taken herein is contained in sections 4(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended.

10. *Accordingly, it is ordered.* That effective December 22, 1972, the Table of

FM Assignments (§ 73.202(b) of the rules) as amended as follows:

more relaxed rules on this subject are needed.

of the rule would be inconsistent with competent installation, servicing, or

[Docket No. 19253; FCC 72-989]

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Servicing of Ship Radar Stations

Report and order. In the matter of amendment of § 83.164 of the rules to clarify and improve requirements concerning servicing of ship radar stations.

1. A notice of proposed rule making in the above-captioned matter was released on May 28, 1971. The dates for filing comments or replies thereto have passed.

2. Comments were filed by: The American Radio Association, AFL–CIO and the Radio Officer's Union, AFL–CIO (ARA/ROU); The American Institute of Merchant Shipping (AIMS); Sun Transport, Inc. (SUN); ITT Decca Marine, Inc. (ITT); the National Marine Electronics Association, Inc. (NMEA); The American Petroleum Institute (API); Kelvin Hughes; and the Radiomarine Corp. Reply comments were filed by ARA/ROU and NMEA.

3. ARA/ROU and NMEA supported the proposed rule amendments. ARA/ROU suggested that the rule be even further amended to prohibit fuse replacement except by a holder of a radio operator license with radar endorsement. AIMS addressed itself only to that portion of the proposed amendment which would prohibit replacement of "receiving-type" tubes except by a licensed radio operator with radar endorsement, which AIMS opposed. SUN opposed the proposed amendments on the grounds that they were inconsistent with progress being made in the state-of-the-art of radar maintenance, specifically regarding "plug-in modules." ITT opposed the proposed amendments, citing a shortage of qualified radio operators with radar endorsements. API opposed the proposed amendments on operational and technical grounds. Specifically, API also cited progress in the state-of-the-art and suggested that Intergovernmental Marine Consultative Organization (IMCO) design and operational standards for mandatory radar be considered in conjunction with any amendment of the rules regarding radar maintenance. Kelvin Hughes also opposed the proposed amendments and cited progress in the state-of-the-art and plug-in modules as developments warranting amendment of the rules. Radiomarine Corp. opposed the proposed amendments on the grounds that they would be unduly restrictive and suggested that new and more relaxed rules on this subject are needed.

4. Many of the comments went considerably beyond the intended scope of this proceeding. In releasing the notice of proposed rule making in this proceeding, it was not the intention of the Commission to examine the entire subject of radar maintenance requirements, standards, and procedures. Rather, this proceeding was primarily intended to clarify the intent of an existing policy, incorporated in § 83.164 of the rules, which requires that "adjustments or tests during or coincident with the installation, servicing, or maintenance" of a ship station radar be performed by, or under the immediate supervision of, a person properly licensed with the radar endorsement. In addition, many of the comments addressed areas which involve normal rendition of service rather than adjustments or tests during installation, servicing, or maintenance. Section 83.164 distinguishes between "normal rendition of service" and "installation, servicing, or maintenance" of the equipment. Normal rendition of service does not require a radio operator's license with radar endorsement and this area was not a subject of this notice of proposed rule making. Accordingly, to the extent that the comments submitted addressed the entire subject of radar maintenance or areas which involve normal rendition of service, they are not germane to the instant proceeding and will not be considered. The Commission is aware of developments in the state-of-the-art in the field of marine radars and intends to consider them, as well as the proceedings and findings of organizations such as IMCO and the Radio Technical Commission for Marine Services (RTCM) in any future amendments of its rules concerning radar maintenance.

5. We agree with those comments which opposed deletion of the proviso which permits unlicensed persons to replace receiving-type tubes. We know of no instances, nor have any been cited to us; where replacement of receiving-type tubes by unlicensed persons has resulted in improper operation of ship station radar equipment. Accordingly, we do not adopt the proposed rule amendment which would delete the words "or of receiving-type tubes" from the proviso clause of § 83.164(a)(2) of the rules.

6. We do adopt the proposed rule amendment to delete the words "while it is radiating energy" from § 83.164(a)(2) of the rules. In doing so, the Commission does not intend to make any substantial change in its requirements that only properly licensed persons with the radar endorsement, or persons under the immediate supervision of a person so licensed, be permitted to perform adjustments or tests during or coincident with the installation, servicing, or maintenance of radar equipment. The purpose of this deletion is to preclude a construction of the rule which would permit any such adjustments or tests to be made in any manner by any person merely because the equipment was not radiating energy at the time the tests or adjustments were made. Such a construction of the rule would be inconsistent with competent installation, servicing, or maintenance of radar equipment and with ongoing Commission policy relating thereto. An examination of broader matters relating to ship station radar requirements, standards and procedures is not appropriate in the context of this limited proceeding.

7. In view of the foregoing: *It is ordered*, That pursuant to the authority contained in sections 4(i) and 303 (f) and (r) of the Communications Act of 1934, as amended, Part 83 of the rules and regulations of the Commission is amended, effective December 22, 1972, as set forth below.

8. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: November 8, 1972.

Released: November 13, 1972.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

Section 83.164(a)(2) of the rules is amended as follows:

§ 83.164 Waivers of operator requirements.

(a) • • •

(2) All adjustments or tests during or coincident with the installation, servicing, or maintenance of the equipment must be performed by or under the immediate supervision and responsibility of a person holding a temporary limited radiotelegraph operator license or a first- or second-class commercial radio operator license, radiotelephone or radiotelegraph, containing a ship-radar endorsement, who shall be responsible for the proper functioning of the equipment in accordance with the radio law and the Commission's rules and regulations and for the avoidance and prevention of harmful interference from improper transmitter external effects: *Provided, however*, That nothing in this subparagraph shall be construed to prevent persons not holding such licenses, or not holding such licenses so endorsed, from making replacement of fuses or of receiving-type tubes.

Title 49—TRANSPORTATION

Subtitle A—Office of the Secretary of Transportation

[OST Docket No. 1, Amdt. 1-63]

PART 1—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES

Urban Mass Transportation Administrator

The purpose of this amendment is to delegate to the Urban Mass Transportation Administrator certain authority vested in the Secretary by the National Capital Area Transit Act of 1972 (Public Law 92-517), which approved amendments to the Washington Metropolitan Area Transit Regulation Compact (D.C. Code section 1-1431 note) authorizing the Washington Metropolitan Area Transit Authority (WMATA) to acquire, improve, and operate the four privately owned bus companies providing mass transportation service in the National Capital Area, authorizing Federal financial assistance to WMATA therefor under the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), and authorizing Federal financing of an additional Metro station at Arlington National Cemetery and an additional entrance from the Mall to the Smithsonian Station of the Metro system.

Since this amendment relates to departmental management, procedures, and practices, notice and public procedure thereon is unnecessary and it may be made effective in less than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, effective October 31, 1972, § 1.50 of Title 49, Code of Federal Regulations, is amended by adding thereto a new paragraph (e) as follows:

§ 1.50 Delegations to Urban Mass Transportation Administrator.

• • • • • •

(e) The National Capital Area Transit Act of 1972 (Public Law 92-517).

(Sec. 9(e), Department of Transportation Act, 49 U.S.C. 1657(e))

Issued in Washington, D.C., on October 31, 1972.

JOHN A. VOLPE,
Secretary of Transportation.

Chapter X—Interstate Commerce Commission

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. MC-43]

PART 1003—LIST OF FORMS

Lease and Interchange of Vehicles by Motor Carriers

Order. At a session of the Interstate Commerce Commission, Motor Carrier Leasing Board, held at its office in Washington, D.C., on the 3d day of August 1972.

Pursuant to section 204 of the Interstate Commerce Act, and good cause appearing thereof, the use of a new form for application for approval of contract carrier rental contract, under Part II of the act, being under consideration:

It is ordered, That Application Form B.M.C. 79, be, and it is hereby, vacated and revoked.

It is further ordered, That Application for Approval ofContract Carrier Rental Contract, Form BOp-79 (49 CFR 1003.1), which is attached hereto and incorporated into this order,[1] be, and it is hereby, prescribed and approved.

It is further ordered, That 49 CFR 1003.1, be, and it is hereby amended by deleting all references to Form B.M.C. 79 and replacing said matters with the following:

BOp-79. Application for approval of contract carrier rental contract under authority of § 1057.6(b) of Ex Parte No. MC-43.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission, Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Motor Carrier Leasing Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Kenai National Moose Range, Alaska

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (11-16-72).

[1] Filed as part of the original document.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

ALASKA

KENAI NATIONAL MOOSE RANGE

The operation of off-road vehicles commonly referred to as all-terrain vehicles (ATV's) is prohibited on the Kenai National Moose Range except the use of lightweight, motorized vehicles commonly identified by the general term "snowmobile" is authorized on certain designated areas of the Kenai National Moose Range and subject to the following special conditions:

1. Only "snowmobiles" with an overall width of 40 inches or less will be permitted.

2. The use of "snowmobiles" will be authorized during the period of December 1, 1972, through April 30, 1973, and only when snow depth is sufficient to protect underlying vegetation and terrain along the route of travel and when determined and announced by the refuge manager.

3. The use of "snowmobiles" is prohibited in those game management units of the Kenai National Moose Range, during any established moose hunting season. The use of "snowmobiles" as an aid in big game hunting or for transporting big game is not authorized.

4. The use of "snowmobiles" on maintained public roads within the moose range is prohibited.

5. That area above timberline located between Skilak Lake and Tustumena Lake is not authorized for "snowmobile" use.

6. The area within T. 4 N., R. 10 W., Secs. 5, 6, and 7 including the Soldotna Ski Hill, the cross-country ski trails, Headquarters Lake, and Nordic Lake is not a designated "snowmobile" area.

7. The use of "snowmobiles" for racing purposes is prohibited.

8. The Swanson River canoe route lakes and portages are closed to "snowmobile" use.

9. An area including the Swan Lake canoe route and several public recreational lakes is not a designated "snowmobile" area. That area closed to such use is bounded on the west by the Swanson River Road, bounded on the north by the Swan Lake Road, bounded on the east by the section line immediately west of Arrow Lake (which is located at the eastern terminus of Swan Lake Road open to the public) and proceeds south 5.8 miles to its intersection with the headwaters of Moose River (one-half mile southeast of the easternmost shore of Swan Lake), thence downstream along the west bank of Moose River, and bounded on the south by the Moose Range boundary.

The provisions of this special regulation supplement the regulations which govern public access, use, and recreation on wildlife refuge areas generally and which are set forth in Title 50, CFR Part

28, and are effective through November 30, 1973.

PART 33—SPORT FISHING

Crescent Lake National Wildlife Refuge, Nebr.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (11-16-72).

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

NEBRASKA

CRESCENT LAKE NATIONAL WILDLIFE REFUGE

Sport fishing on the Crescent Lake National Wildlife Refuge, Nebr., is permitted on Crane and Island Lakes only on the areas designated by signs as open to fishing. These open areas comprising about 800 acres, are delineated on maps available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from January 1 through September 30, 1972, inclusive.

(2) Boats propelled with poles, oars, or paddles only may be used for fishing.

(3) No person shall use minnows, fish, or parts thereof, for bait, nor have in possession any minnows or seine or net for capturing minnows.

(4) Overnight camping is not permitted.

(5) Open fires are not permitted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through September 30, 1973.

NORTH PLATTE NATIONAL WILDLIFE REFUGE

Sport fishing on the North Platte National Wildlife Refuge, Nebr., is permitted only on the areas designated by signs as open to fishing. This open area, comprising 3,300 acres, is delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from January 15 through September 30, 1973, inclusive.

(2) Boats, motorboats, and other floating craft may be used.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through September 30, 1973.

RONALD L. PERRY,
Refuge Manager.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1002]

[Docket No. AO-71-A65]

MILK IN NEW YORK-NEW JERSEY MARKETING AREA

Supplemental Notice of Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

This notice is supplemental to the notice of hearing which was issued on October 12, 1972 (37 F.R. 22000). Notice is hereby given that a second session of the aforesaid hearing will be held at Valle's Steak House, 2803 Erie Boulevard, East, Syracuse, NY, on November 20, 1972, beginning at 9:30 a.m. with respect to the proposed amendments previously announced to the tentative marketing agreement and to the order, regulating the handling of milk in the New York-New Jersey marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the previously announced proposed amendments, and any appropriate modificaions thereof, to the tentative marketing agreement and to the order.

Copies of this supplemental notice of hearing and the order may be procured from the Market Administrator, 205 East 42d Street, New York, NY 10017, or from the Hearing Clerk, Room 112-A, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250, or may be there inspected.

Signed at Washington, D.C., on November 14, 1972.

JOHN C. BLUM,
Deputy Administrator, Regulatory Programs.

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

Notice of Proposed Rule Making

Pursuant to the authority contained in 5 U.S.C. 301, and section 213 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 84 Stat. 1894, 1900; 42 U.S.C. 4601, 4633 it is proposed to issue final regulations implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, in Part 21 of Title 7 of the Code of Federal Regulations.

The Department of Agriculture published interim regulations implementing Public Law 91-646 by notice in the FEDERAL REGISTER on May 6, 1971 (36 F.R. 8433). Comments and suggestions for refinements of the interim regulations were invited at that time.

These proposed final regulations revise and replace the interim regulations and incorporate the changes promulgated in the Office of Management and Budget Circular No. A-103 dated May 1, 1972.

It is the policy of the Department of Agriculture whenever practicable to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections to the Office of Plant and Operations, Department of Agriculture, Washington, D.C. 20250, within 45 days after the date of publication of this notice in the FEDERAL REGISTER.

Dated: November 9, 1972.

FRANK B. ELLIOTT,
Assistant Secretary for Administration.

PART 21—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES

Subpart A—Policies

Sec.
21.101 Purpose.
21.102 Effective date.
21.103 Application for relocation assistance payment.

21.1008 Buildings, structures and improvements.
21.1009 Lease to former owner or occupant.

Subpart K—Report

21.1101 Annual report.

AUTHORITY: The provisions of this Part 21 issued under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91-646, 84 Stat. 1894.

Subpart A—Policies

§ 21.101 Purpose.

The regulations in this part prescribe policies and procedures for the U.S. Department of Agriculture in implementing the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Public Law 91-646 (84 Stat. 1894), herein called the Act, effective January 2, 1971. The Act provides for uniform and equitable treatment of persons displaced from their homes, businesses, or farms by Federal and Federal financially assisted programs and establishes uniform and equitable land acquisition policies for Federal and Federal financially assisted programs.

§ 21.102 Effective date.

(a) The regulations in this part shall be effective on date of publication.

(b) Any claims made under the Act shall be adjudicated on the basis of the regulations in effect when the claim was filed.

§ 21.103 Application for relocation assistance payment.

A displaced person, business, or farm operation must make proper application to the displacing agency for relocation assistance payments within 18 months from the date on which the move was made from the real property acquired or to be acquired, or the date on which the acquiring agency makes final payment of all costs of acquiring that real property, whichever is the later date. The displacing agency may extend this period upon showing of good cause. Prompt payment will be made after a move and submittal of proper application. Advanced payment may be made if the displacing agency determines that delaying payment until after the move will create a hardship.

§ 21.104 Appeal rights.

Any person aggrieved by a determination as to eligibility for a relocation payment, or the amount of a payment in a Federal project may have his application reviewed by the Secretary of Agriculture or his designee, or in the case of a project receiving Federal financial assistance, by the head of the displacing agency.

§ 21.105 Leasing to former owner or tenant.

The head of a displacing agency may permit use of or lease realty back to former owners or tenants for a period of not more than 1 year, and may also extend or renew such permits or leases for successive periods of not more than 1 year.

§ 21.106 Displacement prerequisites.

A displacing agency shall take no action that will result in a displacement until the following conditions are met.

(a) Assurance of comparable replacement dwelling. No phase of any project will be initiated or continued if that phase will cause the displacement of any individual or family from a dwelling until the displacing agency has determined on the basis of a current survey and analysis of available comparable replacement dwellings that prior to displacement a comparable replacement dwelling will be available for each such displaced individual or family.

(b) Displacement notice. Each individual, family, business, or farm operation to be displaced must be given a written notice of displacement. The notice shall be served personally or by certified or registered first-class mail not later than initiation of negotiations.

(c) Payment for real property. An owner will not be required to surrender possession of the real property acquired until the acquiring agency has paid the agreed purchase price, or deposited with the court for the benefit of the owner, an amount not less than the approved appraisal of the real property being acquired.

(d) Notice to vacate. The construction or development or a project will be so scheduled that to the greatest extent practicable, no person lawfully occupying real property shall be required to move from a dwelling (assuming a comparable replacement dwelling will be available), or to move his business or farm operation without at least 90 days' written notice prior to the date on which such move is required. The notice shall be served personally or by certified or registered first-class mail. A notice of less than 90 days may be given only in an emergency or other extraordinary situations, or when the personal property to be moved is not associated with a displacement from a dwelling, business, or farm operation. When it is proposed to give an advance notice of less than 90 days, the prior approval of the agency head will be obtained.

§ 21.107 Adjustments.

The agency head may make adjustments in the requirements for decent, safe, and sanitary dwellings only in cases involving unusual circumstances or in unique geographic areas.

§ 21.108 Waiver.

The agency head may waive the requirements of § 21.106(a) in emergencies or other extraordinary situations where immediate possession of real property is crucial. Each waiver shall be supported by appropriate findings and a determination of the necessity for the waiver. These determinations shall be included in the annual report required by § 21.1101.

§ 21.109 Criteria for new construction and loans.

(a) If the agency head determines that adequate comparable replacement dwellings are not available, action may be taken by the agency head or he may approve action by a State agency to develop replacement dwellings. Any action taken or approved shall be in accordance with the guidelines issued by the Secretary of Housing and Urban Development (24 CFR Part 43).

(b) The agency head shall be guided by the criteria and procedures developed by the Secretary of Housing and Urban Development (24 CFR Part 43) when providing loans to eligible borrowers for planning and other preliminary expenses for additional housing for displaced persons.

§ 21.110 Coordination among agencies.

(a) When more than one Federal, departmental, or State agency, is causing the displacement in a community or an area, the displacing agency shall seek the cooperation of the other agency or agencies on the method for computing the replacement housing payment and on the use of uniform schedules of sale and rental housing in the community or area.

(b) When more than one agency is administering a relocation assistance advisory program which may be of assistance in the community or area to displaced persons all agencies shall cooperate so as to eliminate duplication while combining forces in assuring uniform application of the Act so that all displaced persons receive the maximum assistance available to them.

(c) An agency causing displacements from dwellings will provide the Housing and Urban Development regional or area office with information regarding the project which will cause displacement, and consult with such offices concerning the availability of housing.

Subpart B—Definitions

§ 21.201 Agency head.

The head of the agency of the department responsible for the project which requires land acquisition or displacement, or any individual authorized to act for him in implementing these regulations.

§ 21.202 Business.

(a) Any unlawful activity, excepting a farm operation, conducted primarily:

(1) For the purchase, sale, lease, and rental of personal and real property, and for the manufacture, processing, or marketing of products, commodities, or any other personal property;

(2) For the sale of services to the public;

(3) By a nonprofit organization; or

(4) Solely for the purposes of section 21.303, outdoor advertising signs erected and maintained for assisting in the purchase, sale, resale, manufacture, processing or marketing of products, commodities, personal property, or services whether or not located on the premises of the foregoing businesses.

(b) Part-time occupations must contribute at least:

(1) $2,500 net income or

(2) One-third of the net income of the displaced person or family to qualify as a business under these regulations.

(c) A warehouse or other facility acquired, which is operated in conjunction with a business not acquired, is not a business.

§ 21.203 Comparable replacement dwelling.

A comparable replacement dwelling is one which is decent, safe, and sanitary and is:

(a) Functionally equivalent and substantially the same as the acquired dwelling, but not excluding newly constructed housing.

(b) Open to all persons regardless of race, color, religion, sex, or national origin and consistent with the requirements of title VIII of the Civil Rights Act of 1968.

(c) In areas not generally less desirable than the dwelling to be acquired in regard to neighborhood conditions, including, but not limited to, municipal services and other environmental factors, and public, commercial, and community facilities.

(d) Reasonably accessible to the displaced person's place of employment.

(e) Available on the market to the displaced person at rents or prices within the financial means of the displaced person.

(f) Adequate in size to meet the needs of the displaced family or individual. At the option of the displaced person, a replacement dwelling may exceed his need when the replacement dwelling has the approximate square footage as the dwelling from which he was displaced.

§ 21.204 Decent, safe, and sanitary dwelling.

A dwelling which is clean, in good repair, and in sound and weather tight condition, which meets local housing codes, if any, and also meets the following requirements:

(a) *Housekeeping unit.* A housekeeping unit must include a kitchen with fully usable sink; a cooking stove, or connections for same; a separate complete bathroom; hot and cold running water in both the bathroom and the kitchen; an adequate and safe wiring system for lighting and other electrical services; and heating as required by climatic conditions and local codes. In the absence of local codes see § 21.107.

(b) *Nonhousekeeping unit.* A nonhousekeeping unit is one which meets local code standards for boarding houses, hotels, or other congregate living. In the absence of local code standards see § 21.107.

§ 21.205 Department.

The U.S. Department of Agriculture.

§ 21.206 Displacing agency.

The Department agency for a Federal project, and the State agency for a Federal financially assisted project, which acquires real property.

§ 21.207 Displaced person.

Any person who, on or after January 2, 1971, moves from real property, or moves his personal property from real property, as a result of the actual acquisition of such real property, in whole or in part, or as a result of a written order of the acquiring agency to vacate real property for a program or project undertaken by the Department or with Federal financial assistance provided by the Department. If a person moves as the result of such a notice, it makes no difference whether or not the real property actually is acquired.

§ 21.208 Displacement notice.

A displacement notice is a written notice given to persons that may be displaced as a result of a proposed acquisition. This notice shall state the acquiring agency's desire to acquire the property and notify the persons of their rights under the Act and these regulations if they are displaced. The notice shall be given to such persons not later than the initiation of negotiations for the property to be acquired.

§ 21.209 Dwelling.

Dwelling includes a single family building; a one family unit in a multifamily building; a unit of a condominum or cooperative housing project; any other residential unit, including a mobile home which is either considered to be real property under State law, or cannot be moved without substantial damage or unreasonable cost. For purposes of Subparts E, F, and G of this part the term "dwelling" shall mean the place of permanent abode of a person and does not include seasonal or parttime dwelling units such as beach houses, mountain or other vacation cabins.

§ 21.210 Economic rent.

Economic rent is the amount of rent the displaced person would have had to pay for a similar dwelling unit located in an area not generally less desirable than the location of the dwelling to be acquired.

§ 21.211 Family.

Two or more individuals living together in the same dwelling as a single family unit and who are related to each other by blood, marriage, adoption, or legal guardianship. Others who live together as a family unit will be treated as a family.

§ 21.212 Farm operation.

Any activity conducted solely or primarily for the production of one or more agricultural products or commodities, including timber, for sale or home use, and customarily producing such products or commodities in sufficient quantity to contribute materially to the operators support. The activity contributes materially if the value of the net sales and market value of home use contributes at least (a) $2,500 or (b) one-third of the total net income of the operator. (See § 21.308)

§ 21.213 Federal financially assisted program or project.

Any program or project administered by the Department or by a State agency in which a grant, loan, or contribution is provided to the State agency by the Department. Federal contracts of guaranty or insurance are excluded.

§ 21.214 Federal program or project.

Any program or project administered by the Department in which real property interest is acquired by, remains in, or is transferred to Federal ownership or control.

§ 21.215 Financial means.

Financial means is the ability of a displaced family or individual to afford a replacement dwelling without jeopardizing the other needs of the displaced family or individual such as food, clothing, child care, and medical expenses. For purposes of this regulation the average housing cost (monthly mortgage or rental payments, insurance for the dwelling unit, property taxes, utilities, and other reasonable recurring related expenses) which the displaced family or individual will be required to pay should generally be less than 25 percent of the monthly gross income or the present ratio of housing payment to income including supplemental payments made by public agencies.

§ 21.216 Initiation of negotiations.

The date the acquiring agency furnishes the property owner or his representative a written offer to purchase the real property.

§ 21.217 Mortgage.

Such classes of liens as are commonly given to secure advances on, or the unpaid purchase price of, real property under the law of the State in which the real property is located, together with the credit instruments, if any, secured thereby.

§ 21.218 Notice to vacate.

A notice to vacate is a written notice

Commonwealth of Puerto Rico, any territory or possession of the United States,

both his dwelling and business or farm property is eligible for payments for

(2) The business cannot be relocated without a substantial loss of its existing patronage. The displacing agency will

(6) Removal, reinstallation, and reestablishment, including such modification as deemed necessary by the displac-

at the new location with a comparable item available on the market.

XUM
V37-222 NOV 16 72 XUM

§ 21.218 Notice to vacate.

A notice to vacate is a written notice to the persons to be displaced of the date on which they must have moved from the property being acquired.

§ 21.219 Owner.

A person who holds fee title, a life estate, a 99-year lease, or an interest in a cooperative housing project which includes the right of occupancy of a dwelling unit, or is the contract purchaser of any such estates or interest, or who is possessed of such other proprietary interest in the property acquired as, in the judgment of the displacing agency, warrants consideration as ownership. In the case of one who has succeeded to any of the foregoing interest by devise, bequest, inheritance or operation of law, the tenure of ownership, not occupancy, of the succeeding owner shall include the tenure of the preceding owner.

§ 21.220 Person.

Any individual, family, partnership, corporation, or association.

§ 21.221 Purchase of a replacement dwelling.

Purchase of a replacement dwelling shall mean (a) acquisition of an existing dwelling, (b) acquisition and rehabilitation of a substandard dwelling, (c) relocation, or relocation and rehabilitation of an existing dwelling, (d) construction of a new dwelling, (e) ocntract to purchase a dwelling to be constructed on a site provided by a builder or developer, or (f) contract for the construction of a dwelling on a site which the displaced person owns or acquires for this purpose. If construction or rehabilitation is required in the instances cited herein and completion of the construction or rehabilitation is delayed beyond the end of the 1-year period, the displacing agency may establish the date of occupancy as the date that the displaced person enters into a contract for such construction or rehabilitation or for the purchase upon completion of a dwelling to be constructed or rehabilitated on a site provided by a builder or developer: *Provided*, The displacing agency determines that the delay was for reasons not within the reasonable control of the displaced person, and the displaced person occupies the replacement dwelling when the construction or rehabilitation is completed. Payment by the displacing agency will not be made until the displaced person has occupied the replacement dwelling.

§ 21.222 Rental rate.

The amount paid or determined to be appropriate for the bare premises exclusive of such items as utilities and other services.

§ 21.223 Replacement dwelling.

A replacement dwelling is one which is at least decent, safe, and sanitary.

§ 21.224 State.

Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, the Trust Territory of the Pacific Islands, and any political subdivision thereof.

§ 21.225 State agency.

Any department, agency, or instrumentality of a State or of a political subdivision of a State, or any department, agency, or instrumentality of two or more States or of two or more political subdivisions of a State or States.

§ 21.226 Tenant.

A person who leases, rents, lawfully occupies or temporarily possesses real property, or a mobile home classified as personal property, of another by any kind of right.

Subpart C—Moving and Related Expenses

§ 21.301 Recipient eligibility.

A displaced person, business, or farm operation is eligible to receive payments for moving and related expenses described in § 21.303 or a fixed relocation payment described in § 21.304.

§ 21.302 Extent of eligibility.

(a) Each owner-occupant, tenant-occupant, or family, who is displaced from a dwelling may elect to receive either the payment described in § 21.303 (a) or the fixed payment described in § 21.304(a) except:

(1) Two or more persons, not a family, living together in a single-family dwelling who are displaced from the dwelling will be regarded as one displaced person insofar as their eligibility for receiving the fixed payment for moving expenses described in § 21.304(a). Each individual in such group is eligible to receive actual moving and related expenses described in § 21.303(a) if the group does not elect to receive the fixed payment.

(2) No member of a displaced person's family living in the same dwelling unit is eligible for separate payment for moving expenses.

(3) Any person, other than a member of the family, who is renting a room within the dwelling is eligible for moving expenses under § 21.303(a), but is not eligible to elect to receive the fixed payment in § 21.304(a).

(b) Any displaced business or farm operation may elect to receive either the payment described in § 21.303 or the payment described in § 21.304.

(c) Any displaced owner-occupant of a multifamily dwelling who earns income from such dwelling and qualifies as a business, is eligible for payments for actual moving and related expenses described in § 21.303, for both dwelling and business, or may elect to receive the fixed payments described in § 21.304, for both dwelling and business, or he may elect to receive payment for the dwelling under one alternate and payment for the business under the other alternate.

(d) A person who lives on his business or farm property and is displaced from both his dwelling and business or farm property is eligible for payments for actual moving and related expenses described in § 21.303 for both dwelling and business or farm operation, or may elect to receive the fixed payment described in § 21.304 for both dwelling and business, or farm operation, or he may elect to receive payment for the dwelling under one alternate and payment for business or farm operation under the other alternate.

(e) A person displaced from a business or farm operation which causes such person to move from other real property used for his dwelling may elect to receive either the actual expense payment described in § 21.303(a) or the fixed payment described in § 21.304(a). If the displacement causes such person to move other personal property associated with the displaced business or farm operation from real property not acquired, he is eligible for the moving cost of such personal property as a part of the cost of moving the displaced business or farm operation.

(f) Outdoor advertising signs as defined in § 21.202(a)(4) when not a part of a displaced business are only eligible for actual expense payments described in § 21.303.

§ 21.303 Actual expenses payment.

(a) Actual reasonable expenses specified in § 21.305 in moving himself, his family, business, farm operation, or other personal property;

(b) Actual direct losses specified in § 21.306 of tangible personal property as a result of moving or discontinuing a business or farm operation, but not to exceed an amount determined by the displacing agency to be equal to the reasonable expenses that would have been required to relocate such property; and

(c) Actual reasonable expense specified in § 21.307 in searching for a replacement site for the business or farm operation.

§ 21.304 Fixed payment.

(a) A displaced person who must vacate a dwelling may elect to receive in lieu of reimbursement for actual expenses described in § 21.303(a), a moving expense allowance not to exceed $300 based on schedules for the area in which the displacement occurs maintained by State highway departments and approved by the Federal Highway Administration, plus a dislocation payment of $200.

(b) A person who is displaced from his place of business, whether he discontinues or reestablishes the business, may elect to receive, in lieu of reimbursement for actual expense specified in § 21.303, a fixed relocation payment equal to the average annual net earnings of the business as determined in accordance with § 21.308 provided:

(1) The business is not a part of a commercial enterprise having at least one other establishment that is not being acquired which is engaged in the same or similar business; and

(2) The business cannot be relocated without a substantial loss of its existing patronage. The displacing agency will consider all pertinent circumstances in determining whether the business meets this requirement, including the type of business, the nature of the clientele, the relative importance of the present and proposed locations to the displaced business, and the availability of a suitable replacement location for the displaced person.

(c) A person who is displaced from his farm operation, whether he discontinues or reestablishes such operation, may elect to receive, in lieu of reimbursement for actual expenses specified in § 21.303, a fixed relocation payment equal to the average annual net earnings of the farm operation as determined in accordance with § 21.308. Where a displaced person is displaced from only a part of his farm operation, the fixed payment shall be made only if the displacing agency determines that the property remaining after the acquisition can no longer meet the definition of a farm operation.

(d) A displaced nonprofit organization whether it discontinues or reestablishes its operation, may elect to receive, in lieu of reimbursement for actual expenses specified in § 21.303, a fixed relocation payment equal to the average annual net earnings of the nonprofit organization as determined in accordance with § 21.308 if the displacing agency determines that: (1) The nonprofit organization cannot be relocated without a substantial loss of its existing patronage which includes the persons, community, or clientele served or affected by its activities; and (2) the nonprofit organization is not a part of a commercial enterprise having at least one other establishment not being acquired which is engaged in the same or similar activity.

(e) The payment provided in paragraphs (b), (c), and (d) of this section shall be not less than $2,500 nor more than $10,000.

§ 21.305 Actual reasonable expenses in moving.

(a) Items to be included in determining reasonable expenses are:

(1) Transportation of individuals, families, and personal property from acquired site to the replacement site, not to exceed an airline distance of 50 miles, except where the displacing agency determines that relocation cannot be accomplished within such area.

(2) Packing, unpacking, crating, and uncrating of personal property.

(3) Advertising for packing, unpacking, crating, uncrating, and transportation when the displacing agency determines that advertising for any of these services is necessary.

(4) Storage of personal property for a period generally not to exceed 12 months when determined by the displacing agency to be necessary.

(5) Insurance premiums covering loss and damage of personal property while in transit or approved storage.

(6) Removal, reinstallation, and reestablishment, including such modification as deemed necessary by the displacing agency, of machinery, equipment, appliances, and other items not acquired as real property, and reconnection of utilities for such items. Prior to payment for any expenses for removal and reinstallation of such property, the displaced person shall be required to agree in writing that the property is personalty and the displacing agency is released from any payment for the property.

(7) Property lost, stolen, or damaged (not caused by the fault or neligence of the displaced person, his agents, or employees) in the process of moving, where insurance to cover such loss or damage is not obtainable.

(8) Such other reasonable expenses determined to be allowable by the agency head:

(b) Items to be excluded in determining reasonable expenses are:

(1) Additional expenses incurred because of living in a new location.

(2) Cost of moving structures and other improvements classed as real property in which the displaced person reserved ownership, except as otherwise provided by law.

(3) Improvements to the replacement site except when required by law.

(4) Interest on loans to cover moving expenses.

(5) Loss of goodwill.

(6) Loss of profits or income.

(7) Loss of trained employees.

(8) Personal injury.

(9) Cost of preparing the application for moving and related expenses.

(10) Payment for search cost in connection with locating a replacement dwelling.

(11) Such other items as the agency head determines should be excluded.

(c) Limitations are:

(1) If the displaced person moves himself, his family, business, farm operation, or other personal property by other than commercial means, the reimbursement allowance will not exceed the estimated cost of moving commercially based on the prevailing local rates for moving, unless the agency head determines that a greater amount is justified.

(2) If an item of personal property used in connection with a business or farm operation is not moved, but sold and replaced at the new location with a comparable item, reimbursement will not exceed the replacement cost minus the proceeds from the sale, or the estimated cost of moving whichever is less.

(3) If personal property used in connection with a displaced business or farm operation is of low value and high bulk, and the cost of removing, reinstalling, and reestablishing such property would be, in the judgment of the displacing agency, disproportionate in relation to its value, the allowable reimbursement for the expense of moving the personal property will not exceed the difference between the amount that would have been received for such item on liquidation and the cost of replacing the same at the new location with a comparable item available on the market.

§ 21.306 Actual direct losses—businesses or farm operations.

(a) Payments for actual direct losses of tangible personal property are allowable where a person displaced from his place of business or farm operation is entitled to relocate his property, but does not do so. These property losses may include such items as equipment, machinery, or fixtures which are no longer required, where the business or farm operation is to be discontinued or the property is not suitable for use at the new location.

(b) If the displaced person does not move personal property and he makes a bona fide effort to sell it he may be reimbursed for the reasonable costs incurred in his efforts to sell the property, but not to exceed the estimated cost to move the property to the new location but not to exceed 50 airline miles except that the amount allowed for this purpose shall not exceed the difference between the cumulative amount allowed under the following items and the estimated cost of moving such items.

(1) If the business or farm operation is discontinued, the actual direct loss is the difference between the fair market value of the personal property for continued use at its location prior to displacement and the sale proceeds but not to exceed the estimated cost of moving 50 miles.

(2) If personal property is abandoned, the actual direct loss is the lesser of the fair market value of the property for continued use at its location prior to displacement, or the estimated cost of moving to the new location, not to exceed 50 airline miles.

(c) The cost to the displacing agency of removing abandoned personal property shall not be offset against other payments to the displaced person.

§ 21.307 Actual reasonable expense in searching—business and farm operations.

A displaced person whose business or farm is acquired may be reimbursed for his actual reasonable expense of searching for a replacement business or farm location. The maximum amount allowable for searching expense is $500 for each displaced business or farm unless the agency head determines that a greater amount is justified based on the circumstances involved. Payment for these expenses are further limited to:

(a) Travel.

(1) Actual cost of common carrier.

(2) Eleven cents per mile for use of privately owned vehicle.

(b) Meals and lodging.

(1) Three dollars per meal but not to exceed $9 per day per individual.

(2) Actual cost of lodging, but not to exceed $20 per day per individual.

(c) Time. Time spent in searching at a flat rate of $3 per hour, or at the rate of the displaced person's salary or earnings, but not to exceed $10 per hour. The

maximum time allowed shall be 8 hours a day.

(d) Realtor assistance. Broker or real-

dwelling or has reviewed and approved the plans and specifications for construction or rehabilitation.

price or condemnation award for the acquired dwelling, or on the date on which he moves from the acquired dwell-

(4) Certification of structural soundness when required by lender, FHA, or VA.

(5) Credit report.

quired dwelling. If the displacing agency deems it advisable, more than 3 months may be used as a base for determining the average rental rate.

(iv) Certification of structural soundness when required by lender, FHA, or VA.

(v) Credit report.

XUM V37-222 NOV 16 72 XUM

XUM

V37■222 NOV 16 72

maximum time allowed shall be 8 hours a day.

(d) Realtor assistance. Broker or realtor fees to locate a replacement site for a displaced business or farm operation only when the displacing agency determines in advance that it is necessary.

§ 21.308 Determination of average annual net earnings.

The average annual net earnings will be one-half of any net earnings of the business or farm operation, before Federal, State, and local income taxes for the 2 taxable years immediately preceding the taxable year in which such business or farm operation moves from the real property acquired, and includes any compensation paid by the business or farm operation to the owner, his spouse, or his dependents during such period. Another period may be approved by the agency head if the business or farm operation was not in operation for the full 2-year period or if an unusually long time lag between public announcement of a project and the displacement results in a material reduction in the earnings of the business or farm operations for such 2-year period, or under other conditions clearly warranting a different period. The business or farm operation will be required to furnish pertinent portions of returns filed with the Internal Revenue Service for the applicable period, or other acceptable evidence of earnings if not required to file returns.

§ 21.309 Mobile home.

When a mobile home deemed personal property is moved from an acquired site the following reasonable costs as determined by the displacing agency are allowable:

(a) Moving the mobile home to a replacement site but not to exceed the cost of moving to a site 50 airline miles from the acquired site.

(b) Detaching and reattaching fixtures and appurtenances, where applicable.

Subpart D—Replacement Housing—General

§ 21.401 Certificate of eligibility.

Whenever a displaced person is eligible for a replacement housing payment except that he has not yet purchased a replacement dwelling, the displacing agency shall, at the request of the displaced person, provide a written statement to any interested person, financial institution or lending agency as to:

(a) The eligibility of the displaced person for a payment.

(b) The requirements that must be satisfied before such payment can be made.

(c) The amount of the payment to be made by the displacing agency, provided the proposed replacement dwelling has been selected, or plans and specifications for the construction or rehabilitation of a proposed replacement dwelling are available, and the displacing agency has inspected and approved the selected dwelling or has reviewed and approved the plans and specifications for construction or rehabilitation.

§ 21.402 Selecting a method for determining purchase price or rental rate for a comparable replacement dwelling.

(a) The displacing agency may determine the amount necessary to purchase or rent, as appropriate, a comparable replacement dwelling by:

(1) A schedule method in which the displacing agency establishes a schedule of reasonable acquisition costs or rental rates of comparable replacement dwellings. The schedule should be based on current analysis of the market; or by

(2) The comparative method in which the displacing agency determines the reasonable acquisition cost or rental rate by selecting one or more comparable replacement dwellings that are most representative of the dwelling acquired. A single dwelling shall be used only when additional comparable replacement dwellings are not available.

(b) When neither the schedule method nor the comparative method is feasible, the agency head may develop other methods for computing replacement housing payments, or approve in advance other methods proposed by the displacing agency.

§ 21.403 Other.

(a) Payment for replacement housing to a displaced owner-occupant who moves from a one-family unit of a multifamily building owned by such person will be based on the cost of a comparable one-family unit in a multifamily building or if not available, a single-family structure, without regard to the number of units in the acquired multifamily building.

(b) Payment for replacement housing will not affect the eligibility of the displaced person to receive a payment for business earnings attributable to rental ities conducted in portions of the units or other legitimate business activities conducted in portions of the building.

(c) Two or more individuals, living together in a single-family dwelling, displaced from the dwelling will be regarded as one displaced person for the purpose of replacement housing.

Subpart E—Replacement Housing for Homeowners (Over 180 Days) Displaced From Conventional Dwellings

§ 21.501 Eligibility.

This subpart is applicable to a displaced person who:

(a) Actually owned and occupied the acquired dwelling for not less than 180 days immediately prior to initiation of negotiations for the property, and

(b) Purchases and occupies a replacement dwelling not later than the end of the 1-year period beginning on the date on which he receives from the displacing agency final payment of the purchase price or condemnation award for the acquired dwelling, or on the date on which he moves from the acquired dwelling, whichever is the later date.

§ 21.502 Maximum payment.

The maximum payment which may be made by the displacing agency under this subpart is $15,000.

§ 21.503 Cost eligible for payment by displacing agency.

Costs eligible for payment by the displacing agency under this subpart are:

(a) The amount, if any, which when added to the acquisition cost of the dwelling acquired by the displacing agency, equals the reasonable cost of a comparable replacement dwelling.

(1) If the displaced person voluntarily purchases and occupies a replacement dwelling at a price less than the reasonable cost determined by the displacing agency for a comparable replacement dwelling, the displacing agency shall pay not more under this item than the difference between the acquisition price of the acquired dwelling and the actual purchase price of the replacement dwelling.

(2) If the displaced person voluntarily purchases and occupies a replacement dwelling at a price less than the acquisition price of the acquired dwelling, no payment is allowable under this paragraph (a).

(b) The amount, if any, which will compensate the displaced person for any increased interest cost and points which such person is required to pay for financing the acquisition of the replacement dwelling, provided that the acquired dwelling was encumbered by a bona fide mortgage which was a valid lien on such dwelling for not less than 180 days prior to the initiation of negotiations for the acquisition of such dwelling. This amount shall be computed on the basis of and limited to:

(1) The amount of the unpaid debt at the time of acquisition of the real property;

(2) The length of the remaining term of the mortgage at the time of acquisition;

(3) The prevailing interest rate and points currently charged by mortgage lending institutions in the vicinity; and

(4) The present worth of the future payments of increased interest, computed at the prevailing interest rate paid on savings deposits by commercial banks in the general area in which the replacement dwelling is located.

(c) Reasonable expenses incurred by the displaced person for the following purposes except that no fee, cost, charge, or expense is reimbursable which is determined by the displacing agency to be prepaid expenses:

(1) Legal, closing, and related costs including title search, preparing conveyance instruments, notary fees, surveys, preparing plats, and charges incident to recordation.

(2) Lenders, FHA, or VA appraisal fee.

(3) FHA application fee.

(4) Certification of structural soundness when required by lender, FHA, or VA.

(5) Credit report.

(6) Title policy, certificate of title, or abstract of title.

(7) Escrow agent's fee.

(8) State revenue stamps, or sale or transfer taxes.

Subpart F—Replacement Housing for Tenants and Certain Others (Displaced From Conventional Dwellings)

§ 21.601 Eligibility.

(a) This subpart is applicable to a displaced person who:

(1) Is a tenant, or

(2) Is an owner-occupant who elects to lease or rent rather than purchase a replacement dwelling, or

(3) Is an owner-occupant who elects to purchase a replacement dwelling but has occupied the acquired dwelling for less than 180 days required by § 21.501 (a).

(b) A displaced person is eligible for a replacement housing payment under this subpart if he:

(1) Actually and lawfully occupied the acquired dwelling for not less than 90 days immediately prior to the initiation of negotiations for acquisition of the property.

(2) Purchases or rents and occupies a replacement dwelling not later than the end of the 1-year period beginning on the date on which he:

(i) If a tenant, moves from the acquired dwelling.

(ii) If an owner-occupant, receives from the displacing agency final payment of the purchase price or condemnation award for the acquired dwelling, or the date on which he moves from the acquired dwelling, whichever is the later date.

§ 21.602 Maximum payment.

The maximum payment which may be made by the displacing agency under this subpart is $4,000 except that when the payment is made in connection with the purchase of a replacement dwelling the amount of the payment by the displacing agency in excess of $2,000 must be matched by the displaced person.

§ 21.603 Computing rental payments for displaced tenants renting replacement housing.

(a) The displacing agency shall compute the amount of the payment to the tenant as follows:

(1) Multiply the monthly rental rate of the replacement dwelling or a comparable replacement dwelling, whichever is the lesser rate, by 48.

(2) Determine the average monthly rental rate paid by the displaced tenant for the acquired dwelling in the last 3 months prior to initiation of negotiations, provided such rent was reasonable. If such average rent paid was not reasonable, the displacing agency may use an economic rent amount for the acquired dwelling. If the displacing agency deems it advisable, more than 3 months may be used as a base for determining the average rental rate.

(3) Multiply the average monthly rental rate for the acquired dwelling as determined in subparagraph (2) of this paragraph, by 48.

(4) Subtract from the amount determined in subparagraph (1) of this paragraph, the amount determined in subparagraph (3) of this paragraph.

(b) If the displaced tenant is paying rent for the acquired dwelling to the displacing agency, economic rent shall be used in making the determination required by paragraph (a)(2) of this section.

§ 21.604 Computing rental payments for displaced owner-occupants renting replacement housing.

The displacing agency shall compute the amount of the rental payment to the displaced owner-occupant in the same manner as prescribed in § 21.603, except that economic rent shall be used in making the determination required by § 21.603(a)(2).

§ 21.605 Making payment to a displaced person who rents replacement housing.

(a) If the total rental payment to be made to the displaced person is in excess of $1,000, payment will be made in four equal annual installments at the beginning of each annual period, provided that the displacing agency determines that the displaced person is continuing to occupy decent, safe, and sanitary housing at the beginning of each annual period.

(b) If the total rental payment to be made to the displaced person is $1,000 or less, the payment shall be made in one lump sum at the beginning of occupancy of the replacement dwelling. The displacing agency need not thereafter determine whether occupancy of decent, safe and sanitary housing is continued.

§ 21.606 Purchase of a replacement dwelling.

(a) The amount of the payment shall be computed by determining the amount necessary to enable the displaced person to make a down payment and to cover expenses on the purchase of the replacement housing.

(1) The amount necessary for the down payment shall be based on the amount required for a conventional loan.

(2) Reasonable expenses incurred by the displaced person for the following purposes except that no fee, cost, charge, or expense is reimbursable which is determined by the displacing agency to be prepaid expenses;

(i) Legal, closing, and related costs including title search, preparing conveyance instruments, notary fees, surveys, preparing plats, and charges incident to recordation.

(ii) Lenders, FHA, or VA appraisal fee.

(iii) FHA application fee.

(iv) Certification of structural soundness when required by lender, FHA, or VA.

(v) Credit report.

(vi) Title policy, certificate of title, or abstract of title.

(vii) Escrow agent's fee.

(viii) State revenue stamps, or sale or transfer taxes.

(b) The full amount of the payment must be applied to the purchase price and incidental costs shown on the closing statement.

Subpart G—Replacement Housing for Mobile Home Occupants

§ 21.701 Eligibility.

(a) The occupant of a mobile home located on an acquired site is eligible for a replacement housing differential payment to the extent stated in § 21.702 if he meets the following requirements:

(1) The mobile home is acquired by the displacing agency, or the site of the mobile home is acquired which results in the mobile home being removed.

(2) The person actually occupied the mobile home on the acquired site for not less than 90 days immediately prior to initiation of negotiations or date of receipt of displacement notice whichever is later.

(3) The person vacated the mobile home or mobile homesite as a result of the acquisition of the property or receipt of a notice to vacate.

§ 21.702 Extent of eligibility.

(a) A person displaced from a mobile home who is eligible for replacement housing payments may elect a mobile home or a conventional dwelling to serve as a replacement dwelling.

(1) Such displaced occupant of a mobile home will be eligible for replacement housing benefits to the same extent and subject to the same conditions as provided in Subpart E or Subpart F of this part depending on the period of occupancy of the mobile home on the acquired site and the degree of interest held in the acquired mobile home.

(i) Period of occupancy shall be determined on the basis of the date of initiation of negotiations or the date of receipt of a displacement notice, whichever is later.

(ii) Degree of interest, i.e., owner or tenant, will be that of the displaced occupant in the mobile home, exclusive of the interest held in the homesite.

(2) When either type of replacement dwelling is elected, the maximum allowable under § 21.503(a) or § 21.603 shall be computed on the basis of the lesser of:

(i) The amount the displaced person pays for a replacement dwelling; or

(ii) The amount determined by the displacing agency as necessary to provide a comparable replacement mobile home.

(b) The occupant of a mobile home not acquired but moved from the acquired homesite is eligible for a replacement homesite.

(1) Such occupant will be eligible for replacement homesite benefits to the

same extent and subject to the same conditions as provided in Subpart E or Subpart F of this part depending on the period of occupancy of the mobile home on the acquired site and the degree of interest held in the acquired homesite.

(i) Period of occupancy shall be determined on the basis of the date of initiation of negotiations or the date of receipt of a displacement notice, whichever is the later.

(ii) Degree of interest, i.e., owner or tenant, will be that of the occupant in the homesite, exclusive of the interest held in the mobile home.

(2) The maximum allowable under § 21.503(a) or § 21.603 shall be computed on the basis of the lesser of:

(i) The amount the occupant of the mobile home pays for a replacement homesite; or

(ii) The amount determined by the displacing agency as necessary to provide a comparable replacement homesite.

Subpart H—Relocation Assistance Advisory Services

§ 21.801 Policy.

Whenever the acquisition of real property for a Federal or Federal financially assisted program or project will result in the displacement of any person, the displacing agency shall provide a relocation assistance advisory program for displaced persons. If such agency determines that any person occupying property immediately adjacent to the real property acquired is caused substantial economic injury because of the acquisition, that agency shall offer such person relocation assistance advisory services.

§ 21.802 Advisory services.

Each relocation assistance advisory program shall include such measures, facilities, or services as may be necessary or appropriate in order to:

(a) Determine the need, if any, of displaced persons for relocation assistance.

(b) Provide current and continuing information on the availability, prices and rentals of comparable sale and rental replacement housing, and of comparable commercial properties and locations for displaced businesses and farm operations.

(c) Assure that, within a reasonable period of time prior to displacement, comparable replacement dwellings will be available for those to be displaced from dwellings.

(d) Assist a person displaced from his business or farm operation in obtaining and becoming established in a suitable replacement location.

(e) Supply information concerning housing programs, disaster loan programs, and other Federal or State programs offering assistance to displaced persons.

(f) Provide other advisory services to displaced persons in order to minimize hardships to such persons in adjusting to relocation.

(g) Advise displaced persons that they should notify the displacing agency before they move; and

(h) Inform affected persons of the benefits to which they may be entitled under the Act and these regulations.

§ 21.803 Contracting for advisory services.

The displacing agency may, by contract or otherwise, secure relocation assistance advisory services from any Federal, State, or local governmental agency or from any person or organization providing such service.

Subpart I—Federal Financially Assisted Projects

§ 21.901 Assurances by State agency.

(a) The agency head shall not approve a grant to or contract or agreement with a State agency unless he receives satisfactory assurances from such State agency that:

(1) Relocation payments, relocation assistance, and relocation assistance advisory services will be provided and comparable replacement dwellings will be available as provided in these regulations;

(2) In acquiring real property it will comply with the land acquisition policies provided in §§ 21.1001 through 21.1009 if compliance is legally possible under State law and in any event will reimburse owners for necessary expenses as specified in §§ 21.1006 and 21.1007; and

(3) It will furnish data for annual report required in § 21.1101.

(b) If a State agency maintains that it is legally unable to comply with the real property acquisition policies in §§ 21.1001 through 21.1006(b), and §§ 21.1008 through 21.1009, its statement to that effect shall be supported by an opinion of the chief legal officer of the State containing a full discussion of the facts and law involved. The agency head may accept this statement or the assurances so qualified as constituting compliance with this section.

(c) A grant to or contract or agreement with a State agency shall contain provisions requiring the State agency to comply with these regulations to the extent determined under this section.

§ 21.902 Execution and amendment of agreements.

Any grant to, or contract or agreement with a State agency under which Federal financial assistance is made available to pay all or part of the cost of any program or project which will result in the displacement of any person on or after January 2, 1971, shall include or be amended to include the cost of providing payments and services set forth in these regulations.

§ 21.903 Project cost.

The cost to a State agency of providing payments and assistance pursuant to these regulations shall be included as part of the cost of a program or project for which the Department furnishes financial assistance. The State agency will be eligible for Federal financial assistance with respect to such payments and assistance in the same manner and to the same extent as other program or project costs.

§ 21.904 Exception.

No payment or assistance under these regulations will be required of a State agency, or include as a program or project cost if the displaced person receives a payment required by the State law of eminent domain which is determined by the agency head to have substantially the same purpose and effect as the payment and assistance required by these regulations.

§ 21.905 Advances by Department.

If the agency head determines that it is necessary for the expeditious completion of a project, he may advance to the State agency the Federal share of the cost of any payments or assistance required by these regulations.

§ 21.906 Housing standards.

The State agency will determine whether the replacement dwelling meets the standards prescribed under these regulations.

§ 21.907 Organization and facilities.

It will be the responsibility of the agency head to determine that the State agency provides adequate personnel and facilities to enable it to provide the payments and services required by these regulations.

§ 21.908 Compliance.

The Department will provide for the making of periodic inspections to ascertain whether payments and services are being provided and whether there is compliance otherwise with the assurances furnished.

§ 21.909 Records.

The grant to, or contract or agreement with the State agency shall provide that it will maintain such records as may be specified by the agency head for a period of 3 years and make them available to the agency head for inspection and audit at reasonable times.

§ 21.910 Performance by contract.

(a) The displacing agency may contract for the services specified in § 21.802 with any person or organization if it finds that such contract will prevent unnecessary expense, avoid duplication of functions, and promote uniform administration of relocation assistance programs.

(b) The solicitation of proposals, contract provisions, and administration shall be in accordance with State laws and with procedures prescribed by the agency head, but shall as a minimum include provisions:

(1) Required by Federal regulations implementing Title VI of the Civil Rights Act of 1964 (Public Law 82-352), and

(2) Requiring records relating to the contract to be maintained for a period

of not less than 3 years and be available for inspection by representatives of the State agency and the agency head.

(c) In furnishing housing to the extent authorized under criteria and procedures set forth in § 21.109, the State agency shall, whenever practicable, utilize the services of State or local housing agencies, or other agencies having experience in the administration and conduct of similiar housing assistance activities.

§ 21.911 Furnishing real property.

Whenever real property is acquired by a State agency and furnished as a required contribution to a Federal project, the agency head may not accept such property unless such State agency has made all payments and provided all assistance and assurances as are required of a State agency by these regulations. The cost of such requirements will be paid by the State agency, except the agency head will pay the full amount of the first $25,000 of the cost of providing such payments and assistance in connection with each displacement occurring prior to July 1, 1972.

§ 21.912 State agency acting as agent for federal project.

Whenever real property is acquired by a State agency at the request of the agency head for a Federal project, such acquisition shall be deemed for the purposes of these regulations as an acquisition by the agency head.

Subpart J—Real Property Acquisition

§ 21.1001 General.

(a) Application of this subpart to State agencies carrying out Federal financially assisted programs is mandatory where compliance is legally possible under State law and in any event State agencies will reimburse owners for necessary expenses as specified in §§ 21.1006(c) and 21.1007.

(b) The provisions of this subpart do not apply to donations of land or land exchanges.

§ 21.1002 Acquisition by agreement.

Every reasonable effort will be made to (a) acquire real property by agreements with owners based on negotiations, (b) assure consistent treatment for owners, and (c) accomplish negotiations expeditiously. In no event shall negotiations be deferred nor any other action coercive in nature taken in order to compel an agreement.

§ 21.1003 Appraisal.

(a) Prior to initiation of negotiations, an appraisal of the fair market value of the real property interest to be acquired will be made by a qualified land appraiser.

(b) The owner or his designated representative will be given a reasonable opportunity to accompany the appraiser during his inspection of the property.

(c) Any decrease or increase in the fair market value of the property prior to the date of the appraisal which is caused by the public improvement for which the property is acquired or by the likelihood that the property would be acquired for such improvement, other than due to physical deterioration within the reasonable control of the owner, will be disregarded in appraising the property.

(d) Where appropriate the estimate of the fair market value of the property to be acquired and the estimate of damages or offsetting benefits to the remaining property will be separately stated.

(e) Appraisers shall not give consideration to or include in their real property appraisals any allowances for the relocation benefits provided by these regulations.

(f) Each agency Head shall establish for all Federal or Federal financially assisted programs under his jurisdiction, criteria for determining the qualifications of appraisers and a system of review of appraisals by qualified appraisers. Standards for appraisals used in such programs shall be consistent with the Uniform Appraisal Standards for Federal Land Acquisitions published in 1972 by the Interagency Land Acquisition Conference.

§ 21.1004 Establishing just compensation.

(a) Prior to negotiations the displacing agency shall establish an amount it believes to be just compensation which in no event shall be less than the amount in the appraisal approved by the displacing agency.

(b) If the acquisition of only part of a property would leave its owner with an uneconomic remnant, the displacing agency shall offer to acquire the entire property.

§ 21.1005 Initiation of negotiations.

(a) When the just compensation has been established, a prompt offer will be made to acquire the real property for the full amount of the just compensation so established.

(b) When the offer is made, the owner of the real property will be provided with a written statement of (1) identification of the real property and the estate or interest therein to be acquired including the buildings, structures, and other improvements considered to be a part of the real property, (2) the amount of the estimated just compensation as determined by the acquiring agency and a summary statement of the basis therefore, and (3) if only a portion of the property is to be acquired, a separate statement of the estimated just compensation for the real property interest to be acquired and damages and benefits to the remaining real property, if any.

(c) The offer of just compensation does not preclude further negotiations with respect to the purchase price.

(d) Tenants occupying the property shall be given a displacement notice not later than when negotiations for the property are initiated with the owner.

(e) Contracts or options to purchase real property shall not provide for any payments for relocation costs or reference to such payments.

§ 21.1006 Condemnation.

(a) The time of condemnation will neither be advanced, nor negotiations, condemnation and the deposit of funds in court be deferred, nor any other action coercive in nature taken in order to compel an agreement on price.

(b) If the real property is to be acquired by condemnation, proceedings will be instituted promptly. No action will be taken intentionally which will make it necessary for an owner to institute legal proceedings to prove the taking of his real property.

(c) If the final judgment of the court in a condemnation case is that the acquiring agency cannot acquire the real property by condemnation, or if the proceeding in condemnation is abandoned by the acquiring agency, the acquiring agency must pay the owner of the property such sum as will reimburse the owner for his reasonable costs, disbursements, and expenses, including reasonable attorney, appraisal and engineering fees actually incurred because of the condemnation proceedings. If this cost is not covered by a court order, nevertheless the acquiring agency shall pay to the owner such costs.

(d) When the declaration of taking is filed in a Federal condemnation proceeding, the estimated compensation shall be determined solely on the basis of the appraised value of the real property with no consideration being given to other payments provided for by these regulations.

§ 21.1007 Expenses incidental to transfer of title.

As soon as practicable after the date of payment of the purchase price or the date of deposit in court of funds to satisfy the award in a condemnation proceeding to acquire real property, the owner will be reimbursed to the extent the head of the displacing agency determines fair and reasonable, for expenses the owner necessarily incurred for:

(a) Recording fees, transfer taxes, and similar expenses incident to conveying the real property to the acquiring agency,

(b) Penalty costs for prepayment of any preexisting recorded mortgage entered into in good faith encumbering such real property, and

(c) The pro rata portion of real property taxes paid which are allocable to a period subsequent to the date of vesting title in the acquiring agency, or the effective date of possession of such real property by the acquiring agency, whichever is earlier.

§ 21.1008 Buildings, structures and improvements.

(a) Whenever any interest in real property is acquired, the acquiring agency shall acquire at least an equal interest in all buildings, structures, or other improvements located upon the real property which such acquiring agency requires to be removed from the real property, or which the acquiring agency determines will be adversely affected by

V37-222-NOV16-72 XUM

the use to which such real property will be put.

(b) The following will apply in determining the just compensation for any such buildings, structures, or other improvements: (1) They will be deemed to be part of the real property to be acquired, notwithstanding the right or obligation of the tenant as against the owner of any other interest in the real property to remove them at the expiration of his term, and (2) the fair market value which such structures, buildings, or other improvements contribute to the fair market value of the real property to be acquired, or the fair market value of such buildings, structures, or other improvements for removal from the real property, whichever is greater, will be paid the tenant therefor, provided the tenant shall assign, transfer and release to the acquiring agency all his rights, title and interest in and to such improvements.

(c) Payments under this § 21.1008 will not be made: (1) Which result in duplication of any payments otherwise authorized by law, (2) unless the owner of the land involved disclaims all interest in such buildings, structures or other improvements of the tenant.

(d) A tenant may reject payment under this § 21.1008 and obtain payment for the buildings, structures, or other improvements in accordance with any other applicable law.

§ 21.1009 Lease to former owner or occupant.

If an owner or tenant is permitted to occupy the real property acquired on a rental basis for a short term, or for a period subject to termination by the acquiring agency on short notice, the amount of rent required will not exceed the fair rental value of the property to a short term occupier.

Subpart K—Report

§ 21.1101 Annual report.

Each agency head shall prepare and submit an annual report, on a fiscal year basis, to the Secretary of Agriculture. The first report will cover the period January 2, 1971 through June 30, 1971, with the final report covering the period July 1, 1973 through June 30, 1974.

(a) Each such report will include narrative comments regarding:

(1) The effectiveness of the provisions of the Act assuring the availability of comparable replacement housing for displaced persons:

(2) Actions taken to achieve the objectives of the policies of Congress to provide uniform and equal treatment, to the greatest extent practicable, for all persons displaced by or having real property taken for Federal or Federal financially assisted programs;

(3) Views on the progress made to achieve the objectives stated in subparagraph (2) of this paragraph;

(4) Any indicated effects of such programs and policies on the public; and

(5) Recommendations for further improvements in relocation assistance and land acquisition programs, policies, and implementing laws, and regulations.

(b) Each such report will also include statistical data as prescribed by the Department.

(c) Summary statement on the waiver of assurances.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[46 CFR Part 10]

[CGD 72-151P]

SECOND AND THIRD MATE; SECOND AND THIRD ASSISTANT ENGINEER

Licensing and Registration; Update of Examination Requirements

The Coast Guard is considering amendments to its licensing regulations consisting in a number of additions to examination subjects.

Interested persons are invited to submit written views, data, arguments, objections or comments to U.S. Coast Guard (CMC/82), Room 8234, 400 Seventh Street SW., Washington, DC 20590. All communications received within 45 days after the date of publication of this notice in the FEDERAL REGISTER will be fully considered before final action is taken on this notice. Each submission should identify the notice (CGD 72-151P) and the section, give reasons for any recommendations, and include proponent's name and address.

The proposed amendments may be changed in the light of comments received. No hearing is contemplated but will be held at a time and place set in a later notice in the FEDERAL REGISTER, if requested by any interested person desiring an opportunity to comment orally at a public hearing, and raising a genuine issue.

Copies of all written communications will be available for examination at U.S. Coast Guard Headquarters, in Room 8234, 400 Seventh Street SW., Washington, DC.

The purpose of the proposed amendments is to make changes in the examination requirements for second and third mate and second and third assistant engineer.

A few years ago, the USCG undertook a long-range project to modernize its licensing and certification program. A report, emanating from a contract let to an outside testing firm, resulted in some hard conclusions about the present testing program and specific suggestions on how to improve it.

Specifically, the present testing program was criticized for (1) containing obsolete material and (2) being too subjective in nature. Obsolescence, of course, is a common occurrence in testing programs which are not continually monitored to insure that the material which they cover is still part of the specifications of those jobs which they are evaluating. The subjectivity in the program resulted primarily from the fact that the present test contains essay questions which can be differentially interpreted by individuals grading the examination. Consequently, persons recording identical answers to essay questions can receive different grades if they are graded by different people. It was suggested, naturally, that the obsolete material and the subjectivity be removed from the examination program and be replaced by more current and objective material.

Consequently, beginning 1 July 1973, candidates for second and third mate licenses and second and third assistant engineer licenses should be prepared to pass an up-to-date and objective multiple choice examination before they become eligible to receive their licenses. (The upper level examinations will be completed later; possibly by July 1974.) This will be a closed-book examination except for that section covering rules and regulations. Publications covering these will be available in all offices concerned. The examination will be timed and will take approximately 3 days to complete. It should be stated here that the Coast Guard has been reviewing licensing statistics to determine if some offices can be eliminated from that group examining applicants for the major ocean licenses. Present information available indicates that such examinations may be discontinued at Albany, New York, Providence, R.I., Wilmington, N.C., Savannah, Ga., and Corpus Christi, Tex. Because of the very small number of applicants, the continuance of examinations for such major licenses at these offices may not be justified. However, all other licensing functions such as renewals, pilotage, operator's licenses, etc., would still be available at these offices.

More specific information concerning the new examinations, e.g., the type and format of the questions to be utilized, will be summarized in modified versions of CG-101 (Specimen Examinations for Merchant Marine Deck Officers) and CG-182 (Specimen Examinations for Merchant Marine Engineer Licenses) which should be available to the public by or before March 1973.

Input from all aspects of the maritime industry has been an essential, contributing factor in the development of the new standardized examinations. Unions, maritime schools, and maritime industries have provided examination item writers and have contributed personnel to review panels evaluating the validity of the items in terms of their relationship to job requirements. This process of writing and reviewing items has resulted in certain modifications to the examination specifications and requirements due to changes in job specifications and requirements.

The primary modifications concern the following:

(a) Basic questions on pollution have been phased into all the examinations

and these will be continued and expanded as more definitive regulations and reference books become available.

(b) Both third and second mates should possess a basic knowledge of the use of trim tables, ship construction, stability, and damage control. Coverage of these subjects will be very basic and not cover theory, etc., in any great depth.

(c) The second mate is now recognized as the navigator and as such will be responsible for all aspects of this subject, including Great Circle sailing (initial course, distance and vertex) as well as basic principles of compass compensation.

(d) Changing technology in engineering has made it necessary to examine both third and second assistant engineers, steam and motor, in the following additional subjects: air conditioning, ventilation, sanitary/sewage disposal and piping systems, hydraulics, engineering prints and tables, and basic electronics. Third and second assistant engineers of motor vessels will, in addition to the above, be examined in waste heat boilers.

In consideration of the foregoing, it is proposed to amend Title 46 of the Code of Federal Regulations as follows:

§ 10.05-45 [Amended]

1. In table 10.05-45(b), column headed "Third Mate, Ocean," by adding footnote "4" in lines 8 and 33; adding an X and footnote 4 in lines 9 and 23; in the column headed "Second Mate, Ocean," by adding an X and footnote 5 in line 10, line 16, and line 23, and adding footnote 5 in line 33; adding footnote 4 to read: "Effective 1 July 1973 the examination for licenses as third mate of ocean steam or motor vessels will include the following additional subjects: parallel sailing, mercator sailing, basic knowledge of the use of trim tables, stability, ship's construction, damage control, and pollution prevention"; and footnote 5 to read: "Effective 1 July 1973 the examination for licenses as second mate of ocean steam or motor vessels will include the following additional subjects: Great Circle sailing, basic magnetism, deviation and compass compensation, basic knowledge of stability, ship's construction, damage control, basic use of trim and stability booklet, and pollution prevention."

§ 10.10-4 [Amended]

2. In table 10.10-4(b), by adding footnote 3 preceding X on lines 4, 53, and 76, in the four columns headed "Assistant Engineer," "Steam," and "Motor"; by adding footnote 3 preceding X on line 61 in the two columns headed "Assistant Engineer," "Steam," and "Motor," "over 2,000 hp."; and by adding footnote 4 preceding X on line 41 in the column headed "Assistant Engineer," "Motor," "over 2,000 hp."; and adding footnote 3 to read: "Effective 1 July 1973 the examination for license as third and second assistant engineer of steam and/or motor vessels will include the following additional subjects; air conditioning, ventilation, sanitary/sewage disposal and piping systems, pollution prevention, hydraulics, engineering prints and tables, and basic electronics"; and footnote 4: Effective 1 July 1973, in addition to the above, the examination for licenses as third and second assistant engineer of motor vessels will include questions on waste heat boilers."

The amendments are proposed under the authority of 46 U.S.C. 224, 224a(a), 228, 229, 391a (3) and (4); 49 U.S.C. 1655(b); 49 CFR 1.4(b) and 1.46(b).

Dated: November 10, 1972.

G. H. READ,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 72-RM-29]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would establish a transition area at Mohall, N. Dak.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station Post Office Box 7213, Denver, CO 80207. All communications received within 30 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, CO 80010.

A new runway 31 instrument approach procedure is being developed for the Mohall Municipal Airport, Mohall, N. Dak. Accordingly, it is necessary to establish a 700-foot transition area to provide controlled airspace protection for aircraft executing this procedure.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.181 (F.R. 37, 2143) the description of the Mohall, N. Dak., transition area is designated to read:

MOHALL, N. DAK.

That airspace extending upward from 700 feet above the surface within a 7½-mile radius of Mohall Municipal Airport (latitude 48°46'01" N., longitude 101°32'04" W.).

(Sec. 307(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Aurora, Colo., on November 7, 1972.

M. M. MARTIN,
Director, Rocky Mountain Region.

[14 CFR Part 71]

[Airspace Docket No. 72-RM-28]

CONTROL ZONE AND TRANSITION AREA

Proposed Establishment and Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would establish a control zone at Glasgow AFB, Glasgow, Mont., and alter the description of the transition area at Glasgow, Mont.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station Post Office Box 7213, Denver, CO 80207. All communications received within 30 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, CO 80010.

The Department of the Air Force is reactivating the Glasgow AFB and installing a TACAN and instrument landing system (ILS) to support the flying mission at Glasgow. Instrument approach procedures have been developed for the air base.

To protect these procedures, additional controlled airspace must be designated. Accordingly, it is necessary to designate

a control zone and alter the Glasgow, Mont., transition area to adequately pro-

Broadcast Stations. (Stone Harbor-Avalon-Cape May Court House, New Jersey),

to sufficiently respond to Salt-Tee's contention to the extent that we should no-

12. Pursuant to applicable procedures set out in § 1.415 of the Commission's

3. In support of its request, petitioner states that the economic fiber of Union Springs and Bullock County consists of

proposing to assign Channel 240A to Tallassee and Channel 265A to Union Springs, provided that the transmitter

V37-222 NOV 16 72 XUM

a control zone and alter the Glasgow, Mont., transition area to adequately protect the aircraft executing the new approach and departure procedures.

The control zone will provide controlled airspace for aircraft executing ILS and TACAN approaches and for departing aircraft utilizing standard instrument departure procedures. The additional 700- and 1,200-foot transition areas are required for aircraft holding and transitioning from outer fixes and for aircraft executing approach/departure procedures.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.171 (37 F.R. 2056) the following control zone is added:

GLASGOW, MONT. (GLASGOW AFB)

Within a 5-mile radius of Glasgow AFB (latitude 48°25'21" N., longitude 106°31'55" W.); within 2 miles each side of the Glasgow AFB TACAN 292° radial extending from the 5-mile radius zone to 7 miles northwest of the TACAN; and within 2½ miles north and 2 miles south of the Glasgow AFB TACAN 125° radial extending from the 5-mile radius zone to 7 miles southeast of the TACAN.

In § 71.181 (37 F.R. 2143) the description of the Glasgow, Mont. transition area is amended to read:

GLASGOW, MONT.

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Glasgow International Airport (latitude 48°12'50" N., longitude 106°37'10" W.); within a 9-mile radius of Glasgow AFB (latitude 48°25'21" N., longitude 106°31'55" W.); and that airspace extending upward from 1,200 feet above the surface within 4½ miles southwest and 9½ miles northeast of the Glasgow VOR 127° radial, extending from the VOR to 19½ miles southeast of the VOR; within a 25-mile radius of the Glasgow AFB TACAN; within 9½ miles north and 5½ miles south of the Glasgow AFB TACAN 125° radial extending from the 25-mile radius area to 33½ miles southeast of the TACAN; within 9½ miles south and 5½ miles north of the Glasgow AFB TACAN 292° radial extending from the 25-mile radius area to 33½ miles northwest of the TACAN.

This amendment is proposed under authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Aurora, Colo., on November 7, 1972.

M. M. MARTIN,
Director, Rocky Mountain Region.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 19629; FCC 72-996]

FM BROADCAST STATIONS

Proposed Table of Assignments, Certain Cities in New Jersey

In the matter of amendment of § 73.202 (b), Table of Assignments, FM Broadcast Stations. (Stone Harbor- Avalon-Cape May Court House, New Jersey), Docket No. 19629, RM-1903.

1. Notice of proposed rule making is hereby given with respect to amendment of the FM Table of Assignments (§ 73.202(b) of the Commission's rules) as concerns Stone Harbor-Avalon-Cape May Court House, New Jersey. This action is based on the petition of Ronald L. Oberholtzer proposing assignment of Channel 232A to Stone Harbor-Avalon-Cape May Court House. The petition is opposed by Salt-Tee Radio, Inc., the holder of a CP for Channel 292A at Ocean City, N.J. (WSLT-FM), based on economic grounds. The petitioner filed a reply to the opposition and a supplement to the petition for rule making.

2. The pertinent population of the communities involved, each of which is located in Cape May County, population 59,554, is as follows:

Community	*Population*
Stone Harbor	1,089
Avalon	1,283
Cape May Court House	2,062

All population figures are from the 1970 census, unless otherwise specified.

3. Petitioner, in effect, proposes a drop-in assignment of Channel 232A in the Stone Harbor-Avalon-Cape May Court House area. The named communities are located on the seashore of the southern part of the State of New Jersey and are 4 to 6 miles from each other. Cape May Court House, it might be noted, although the seat of Cape May County, is an unincorporated community.

4. Petitioner relies on the fact that none of these communities have any means of local expression either in terms of a daily or weekly newspaper or broadcast facility. The petitioner further relies on the fact that the total 1970 census population for the three communities does not properly reflect population because of the large number of tourists during the summer months in this well-known resort area.

5. As already noted, Salt-Tee Radio, Inc. (Salt-Tee) opposed the petition. This opposition was based on Salt-Tee being a licensee of AM Station WSLT, Ocean City-Somers Point, N.J., and the holder of a CP for Station WSLT-FM, Channel 292A, Ocean City, N.J. The latter contends that it would undergo economic injury and that petitioner has failed to make a requisite showing of need or that anyone would build on Channel 232A if allocated as petitioned for.

6. Oberholtzer in reply takes issue with Salt-Tee's standing to make allegations as to nominal and speculative economic injury flowing from mere assignment of a channel. This more or less accords with our view as to the meaning of FCC v. Sanders Bros. Radio Station, 309 U.S. 470 (1940), in allocation proceedings; see, e.g., the report and order in Docket No. 19074, 32 FCC 2d 937, 942 (1972). Petitioner's reply to Salt-Tee's opposition and supplement to the petition detailing how the public interest might be served by a station on Channel 232A, for which Oberholtzer says he would apply, appears to sufficiently respond to Salt-Tee's contention to the extent that we should notice the proposal (see par. 8).

7. The petition, the reply to the opposition, and the supplement to the petition clearly evidence that the petitioner feels that the three communities form a single area to which service should be furnished. However, it is not usual for the Commission to make an FM channel assignment to more than a single community, especially when an assignment of the channel to any one of the three would permit one to apply for use at either of the other two communities under the 10 mile provision set forth in § 73.203(b) of the Commission's rules. In these circumstances, it may not be appropriate to make the hyphenated assignment as proposed.

8. It appears that a sufficient basis has been made showing that the public interest, convenience, and necessity might be served at least to the extent of adopting a notice of proposed rule making. The petitioner and other parties to the proceeding should particularly address themselves to the question whether the assignment should be made to a single community or the three communities as originally proposed.

9. In the circumstances, the Commission will consider an amendment of the FM Table of Assignments (§ 73.202(b) of our rules) with respect to the communities listed below:

Community	*Channel proposed*
Stone Harbor-Avalon-Cape May Court House, New Jersey	232A
or	
Stone Harbor, New Jersey	232A
or	
Avalon, New Jersey	232A
or	
Cape May Court House, New Jersey	232A

Authority for this action is contained in sections 4(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended.

10. *Showings required.* All parties, including those who support the proposal, should file comments with respect to the need of the proposed assignment. They may do so, in large part, by incorporating in their formal pleadings reference and statements previously made in support of or in opposition to the petition. Failure of the petitioner or other party supporting the proposal(s) to file any further pleading may lead to a denial of the request.

11. *Cut-off procedure.* The following procedures will govern:

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered, if advanced in reply comments.

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in this proceeding, and public notice to that effect will be given, as long as filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision herein.

12. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before December 22, 1972, and reply comments on or before January 2, 1973. All submissions by parties to this proceeding or persons acting on behalf of such parties, shall be made in written comments, reply comments, or other appropriate pleadings.

13. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's public reference room at its headquarters, 1919 M Street NW., Washington, DC.

Adopted: November 8, 1972.

Released: November 13, 1972.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.72-19713 Filed 11-15-72;8:49 am]

[47 CFR Part 73]

[Docket No. 19828; FCC 72-995]

FM BROADCAST STATIONS IN UNION SPRINGS AND TALLASSEE, ALA.

Proposed Table of Assignments

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations (Union Springs and Tallassee, Ala.); Docket No. 19628, RM-1902, RM-2040.

1. The Commission has before it for consideration two petitions for rule making requesting amendment of the FM Table of Assignments. One requests the assignment of Channel 240A to Union Springs, Ala.; the other requests assignment of the same channel to neighboring Tallassee. Since the petitions are in conflict, they will be considered together. Each petitioner states that it will promptly file an application for the channel if it is assigned.

2. Union Springs, Ala. (RM-1902). Union Springs Broadcasting Co. (petitioner), filed a petition on January 4, 1972, proposing that Channel 240A be assigned to Union Springs, Ala. Union Springs (population 4,324) is the seat of Bullock County (population 11,824).[1] There are no aural broadcast stations in Union Springs or Bullock County. Petitioner states that Channel 240A could be assigned there in conformity with the Commission's minimum mileage separation rule and without affecting the FM Table of Assignments.

[1] Population figures are from the 1970 U.S. Census Reports.

3. In support of its request, petitioner states that the economic fiber of Union Springs and Bullock County consists of a mixture of light industry and agriculture. It says that representative industry includes a cotton mill, a communications equipment manufacturing plant, a carpet manufacturing plant, a poultry processing plant, a business forms plant, a lumber mill, and a toy factory. In addition, farming and forestry are major local industries. Petitioner also notes that Union Springs has two banks which have assets of $21 million, and approximately 80 varied retail businesses serving the city and county which have annual sales estimated to be $6 million. It further states that the economics of the area as well as its living standard may very well be advanced by the establishment of a first local FM station which would relay local news, entertainment, and other information of interest. In view of the above, we believe consideration of the proposal for the assignment of a first Class A FM channel to Union Springs, Ala., would be in the public interest.

4. Tallassee, Ala. (RM-2040). The NeLer Co., licensee of Station WTLS, Tallassee, Ala. (petitioner), filed a petition on August 17, 1972, proposing that Channel 240A be assigned to Tallassee, Ala. Tallassee (population 4,809), is located partly in Elmore County (population 33,535) and partly in Tallapoosa County (population 33,840). It has a daytime AM station licensed to the petitioner. Other broadcast stations in the two counties are located in Wetumpka, WETU(AM) (daytime), and Alexander City, WRFS (daytime), and WRFS-FM. Petitioner asserts that Channel 240A could be assigned to Tallassee in conformity with the Commission's minimum mileage separation rule and without affecting the FM Table of Assignments.

5. In support of its request, petitioner states that Tallassee is operated under the mayoral form of government with its own police and fire departments. The petitioner avers that the city has three elementary schools, two high schools and a public library, a community hospital, three banks with total assets in excess of $6,500,000, a Chamber of Commerce and a Junior Chamber of Commerce. It also states that the Lake Martin recreational area is located near Tallassee, that it is one of the largest manmade lakes in the world, and that it is a vacation spot. Petitioner asserts that in addition to providing the first local nighttime facility to Tallassee, the proposed FM assignment would provide a second local aural service at night to both Tallapoosa and Elmore Counties. In view of the foregoing, it appears that it would serve the public interest to consider the assignment of a Class A FM channel to Tallassee.

6. Since the distance between Tallassee and Union Springs is 28 miles, Channel 240A cannot be assigned to each of the two communities (required spacing is 65 miles). To resolve the conflict, we are proposing to assign Channel 240A to Tallassee and Channel 265A to Union Springs, provided that the transmitter site of a Union Springs station is located at least 4 miles southwest of the community in order to meet the spacing requirement with respect to Station WCJM at West Point, Ga., operating on Channel 265A.

7. In view of the foregoing and pursuant to authority found in sections 4(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as follows:

City	Channel No.	
	Present	Proposed
Union Springs, Ala.		265A
Tallassee, Ala.		240A

8. Showings required. Comments are invited on the proposals set forth and discussed above. Proponents will be expected to answer whatever questions, if any, are raised in the notice and other questions that may be presented by the initial comments. The proponents are expected to file comments even if nothing more than to incorporate by reference their petitions, and are expected to state their intentions to apply for their respective channels, if assigned, and, if authorized, to promptly build the station. Failure to make this showing may result in the denial of the petition.

9. Cutoff procedure. As in other recent FM rule making proceedings, the following procedures will govern:

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments.

(b) With respect to petitions for rule making which conflict with any of the proposals in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given, as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision herein.

10. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before December 22, 1972, and reply comments on or before January 2, 1973. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings.

11. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all comments, pleadings, briefs, or other documents shall be furnished the Commission.

12. All filings made in this proceeding will be available for examination by interested parties during regular business

hours in the Commission's Public Reference Room at its headquarters at 1919

the most likely supply was some 0.9 trillion cubic feet in 1971.[1]

the matters proposed herein. An original and 14 conformed copies should be filed

FEDERAL POWER COMMISSION

[18 CFR Part 2]

[Docket No. R-459]

NATURAL GAS PRESENTLY FLARED OR VENTED

Special Relief To Encourage Recovery

NOVEMBER 9, 1972.

1. Pursuant to 5 U.S.C. 551, et seq. and sections 4, 5, 7, 8, 15, and 16 of the Natural Gas Act (52 Stat. 822, 823, 824, 825, 829, 830; 56 Stat. 83, 48; 61 Stat. 459, 76 Stat. 72; 15 U.S.C. 717c, 717d, 717f, 717g, 717n, 717o), the Commission gives notice that it will consider adopting rules with respect to special pricing relief to encourage the recovery of natural gas, presently flared or vented, for sale in interstate commerce.

2. Producers at the present time may seek special relief with respect to existing producer sales for contractually authorized rate increases above the applicable area ceiling rate, Permian Basin Area Rate Proceeding, 34 F.P.C. 159 at 225 et seq. They may commence the sale of gas pursuant to the emergency provisions of Orders Nos. 402 and 402A (18 CFR 2.68; May 6, 1970, and June 3, 1970). They may seek either a limited term certificate with pregranted abandonment provision to Orders Nos. 431 and 431-A (18 CFR 2.70, April 15, 1971, and July 31, 1972), or a permanent certificate pursuant to the optional procedures provided in Orders Nos. 455 and 455-A (18 CFR 2.75, August 3, 1972, and September 8, 1972).

3. The Future Requirements Committee (FRC) estimates that the gap between the potential demand for gas and the most likely supply was some 0.9 trillion cubic feet in 1971.[1]

4. The volume of gas vented or flared in 1971 represents approximately one-third of the FRC estimate of supply-demand gap for 1972.[2]

5. Based on careful and comprehensive evaluation of all facts and information available, the Commission proposes to issue a rule providing that the forms of special relief previously mentioned are available to producers who undertake to recover natural gas, presently flared or vented, for sale in the interstate market.

6. We are hereby proposing to amend our General Rules of Practice and Procedure to insert § 2.77, Policy relating to special relief to encourage the recovery of natural gas presently flared or vented, for sale in interstate commerce, in Part 2, General Policy and Interpretations, Subchapter A, Chapter 1, Title 18 of the Code of Federal Regulations.

7. The new § 2.77 reads as follows:

§ 2.77 Policy relating to the availability of special relief to encourage the recovery of natural gas presently flared or vented for sale in interstate commerce.

To induce the recovery of natural gas, presently flared or vented, for sale in interstate commerce we propose that producers may apply for special relief from area rates or may seek to sell such gas pursuant to the provisions of Orders Nos. 418, 431, and 455, as amended.

8. In addition to the above, we solicit comment on any other methods which would encourage the recovery of gas presently flared or vented.

9. Any interested person may submit to the Federal Power Commission, Washington, D.C. 20426, not later than December 26, 1972, views, comments, or suggestions in writing concerning all or part of the procedures proposed herein. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Washington, D.C. 20426, during regular business hours. The Commission will consider all such written submittals before action on the matters proposed herein. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submittals to the Commission should indicate the name, title, mailing address, and telephone number of the person to whom communications concerning the proposal should be addressed and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the matters involved herein. The staff, in its discretion, may grant or deny requests for conference.

10. The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Group 468]

ARIZONA

Notice of Filing of Plat of Survey and Order Providing for Opening of Public Lands

NOVEMBER 10, 1972.

1. Plat of survey of the lands described below will be officially filed in the Arizona State Office, Phoenix, Ariz., effective at 10 a.m. on December 15, 1972:

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 34 N., R. 11 W.,
Sec. 1, lots 1, 2, 3, 4, S½N½, S½;
Sec. 2, lots 1, 2, 3, 4, S½N½, S½;
Sec. 3, lots 1, 2, 3, 4, S½N½, S½;
Sec. 4, lots 1, 2, 3, 4, S½N½, S½;
Sec. 5, lots 1, 2, 3, 4, S½N½, S½;
Sec. 6, lots 1, 2, 3, 4, 5, 6, 7, S½NE¼, SE¼NW¼, E½SW¼, SE¼;
Sec. 7, lots 1, 2, 3, 4, E½W½, E½;
Secs. 8, 9, 10, 11, 12, 13, 14, 15, 16, 17;
Sec. 18, lots 1, 2, 3, 4, E½W½, E½;
Sec. 19, lots 1, 2, 3, 4, E½W½, E½;
Secs. 20, 21, 22, 23, 24, 25, 26, 27, 28, 29;
Sec. 30, lots 1, 2, 3, 4, E½W½, E½;
Sec. 31, lots 1, 2, 3, 4, E½W½, E½;
Secs. 33, 34, 35, 36.

The area described aggregates 22,329.81 acres of public lands.

2. The area surveyed varies from gently rolling in the southern portion becoming progressively rougher and broken to the north. The soil varies from shallow clay loam to sandy clay loam. Scattered to dense cedar and piñon covers most of the township. Vegetation consists of sagebrush, cacti and grama grass.

3. All rights of the State of Arizona to sections 2, 16, and 36 have been conveyed to the United States.

4. The lands are classified for multiple-use management and will be opened only to such forms of disposition as are allowed under the provision of the multiple-use classification on the effective date of the filing of this plat.

5. The lands are closed to the operation of the mining laws but have been and still are subject to the mineral leasing laws. Inquiries concerning the lands should be addressed to the Arizona State Office, Bureau of Land Management, 3022 Federal Building, Phoenix, Ariz. 85025.

CHARLES G. BAZAN, Jr.,
Chief, Branch of Records and Data Management.

[FR Doc.72-19678 Filed 11-15-72;8:47 am]

CALIFORNIA

Notice of Filing of Plat of Survey

NOVEMBER 8, 1972.

1. A plat of survey of the lands described below accepted on July 20, 1972, will be officially filed in the California State Office, Bureau of Land Management, Sacramento, Calif., effective at 10 a.m. on December 20, 1972:

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 33 N., R. 12 E.

A dependent resurvey of the north boundary and portions of the south and east boundaries and subdivisional lines and the survey of relicted lands along the east shore of Eagle Lake and survey of Tracts 37 through 42. The relicted lands are described as follows:
Sec. 19, lots 14, 15, and 16;
Sec. 30, lots 6, 7, and 9;
Sec. 31, lots 5, 6, 7, and 8.
Containing 59.05 acres not previously surveyed.

2. These surveys were executed to meet certain administrative needs of the Bureau. For the most part, the lands are mountainous in character suitable for grazing, wildlife, recreation, and timber production.

3. Subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law, the relicted lands listed above are hereby opened to such applications and petitions as may be permitted. All such valid applications received at or prior to 10 a.m. on December 20, 1972, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing.

4. Inquiries concerning the lands should be addressed to the California State Office, Bureau of Land Management, Federal Office Building, Room E-2841, 2800 Cottage Way, Sacramento, CA 95825.

ELEANOR K. WILKINSON,
Chief, Branch of Records and Data Management.

Bureau of Mines

MINE WALL COATING (MIN-1943)

Notice of Availability of License for Invention

The Bureau of Mines of the U.S. Department of the Interior announces that the following invention is available for licensing pursuant to the Department's patent regulations, 43 CFR Part 6, Subpart B:

Mine Wall Coating (MIN-1943). A mine wall coating composition, for imparting increased strength, imperviousness, and fire resistance, is compounded from elemental sulfur, dicyclopentadiene, glass fiber, and talc. This composition is applied to mine walls by spraying a molten mixture of the composition.

Written inquiries should be addressed to:

Assistant Solicitor, Branch of Patents, U.S. Department of the Interior, Washington, DC. 20240.

G. A. MELVILLE,
Chief, Division of Procurement and Property Management.

National Park Service

WESTERN REGIONAL ADVISORY COMMITTEE

Notice of Meeting

Notice is hereby given in accordance with Executive Order 11671 that a meeting of the Western Regional Advisory Committee of the National Park Service will be held between 9:30 a.m. and 4 p.m., on Tuesday, November 21, 1972. The meeting will be held in the National Park Service Conference Room, Room 14401, 450 Golden Gate Avenue, San Francisco, CA.

The Committee was established by the Secretary of the Interior pursuant to the authority contained in Public Law 91-383. The purpose of the Committee is to meet and consult with the Director, Western Region, National Park Service, on general policies and specific matters related to National Park Service activities in the western region. This region consists of the States of California, Nevada, Arizona, and Hawaii.

The members of the Committee are the following:

Ben F. Avery, Phoenix, Ariz.; David W. Baille, Jr., Lihue, Hawaii; Lewis S. Eaton, Fresno, Calif.; Frederick B. Eiseman, Jr., Scottsdale, Ariz.; Ed Fike, Las Vegas, Nev.; James R. Hooper, Crescent City, Calif.; Jack H. Walston, La Canada, Calif.; Todd Watkins, Bishop, Calif.; and C. Clifton Young, Reno, Nev.

This meeting is the first for the Committee, and will be devoted to organizational matters. There will be a general orientation, and consideration of matters relating to Committee procedures, including adoption of bylaws and election of officers.

Though space available for observation of the meeting is limited, members of the public will be accommodated on a first-come, first-served basis.

Further information may be obtained from the Office of the Director, Western

Office of Hearings and Appeals

[Docket No. M 73-1]

WASHINGTON IRRIGATION & DEVELOPMENT CO.

Notice Regarding Modification of Mandatory Safety Standard

In regard petition of Washington Irrigation and Development Co., for modification of Mandatory Safety Standard (30 CFR 77.1605(k)).

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. § 861(c) (1970)), notice is given that the Washington Irrigation and Development Co., has filed a petition to modify the application of 30 CFR 77.1605(k) to The Centralia Coal Mine.

30 CFR 77.1605(k) provides as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

Petitioner asserts that the application of this standard to The Centralia Mine would create a greater hazard to its operators than that currently existing. Petitioner states that the main geological formation in the area is clay, which becomes very unstable when wet, and that berms along the haulage roads would retain water causing the road surface to deteriorate. Berms would prevent clearing the roads of mud which is now graded over the shoulder. The average rainfall is 47 inches. Berms holding mud and water on the roads would contribute to brake failures on haulage trucks. In addition, the berms required, 4- to 5-feet high, would flip over trucks striking them.

Parties interested in this petition should file their answers or comments within 30 days from the date of publication of this notice in the FEDERAL REGISTER with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 2800 Cottage Way, Room W-2426, Sacramento, CA 95825. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director,
Office of Hearings and Appeals.

[FR Doc 72-19734 Filed 11-15-72;8:53 am]

DEPARTMENT OF AGRICULTURE

Office of the Secretary

GEORGIA

Designation of Areas for Emergency Loans

It has been determined that property loss or damage or injury in certain counties in Georgia has resulted from natural disasters caused by prolonged drought from May until September 1972. Some counties had an unusually cold spring. The only general rainfall was during June from Hurricane Agnes which did additional damage to crops. The following counties of Georgia are affected by such natural disasters:

Baker.	Miller.
Baldwin.	Mitchell.
Effingham.	Montgomery
Emanuel	Screven.
Jefferson.	Telfair.
Jenkins.	Treutlen.
Johnson.	Washington.
Laurens.	Wheeler.

It has been further determined that in the above counties of Georgia a need for credit exists. Therefore, these counties are declared eligible for low-interest-rate disaster loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Laws 91-606 and 92-385. Applications for such loans must be received by this Department prior to July 1, 1973, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans.

The urgency of the need for loans in the designated areas makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 10th days of November, 1972.

EARL L. BUTZ,
Secretary.

DEPARTMENT OF COMMERCE

Office of Import Programs

BROOKLYN COLLEGE AND MEDICAL COLLEGE OF GEORGIA

Notice of Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 F.R. 3892 et seq.). (See especially § 701.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, DC.

Docket No. 73-00009-99-46040. Applicant: Brooklyn College, Department of Biology, Bedford Avenue and Avenue "H," Brooklyn, NY 11210. Article: Electron microscope, Model EM 9S-2. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used in the courses: Biological electron microscopy (Biology U772G), and advanced study (Biology U791.1G, U792.2G), respectively, to familiarize graduate students with preparation of biological materials for electron microscopy and with operation of the electron microscope to examine such prepared material; and to study particle research problems as, for example, the development of chloroplasts in colorless Euglena. Application received by Commissioner of Customs: July 3, 1972. Advice submitted by Department of Health, Education, and Welfare on: October 27, 1972.

Docket No. 73-00017-33-46040. Applicant: Medical College of Georgia, Department of Anatomy, Augusta, Ga. 30902. Article: Electron miscroscope, Model EM 9S-2. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for various research projects. The principal research project will be a study of cultured liver cells treated with various carcinogenic agents. Other research projects will include studies of skin biopsies from patients with dermatological diseases as well as quantitative studies on the changes in zymogen granules in pancreatic cells in rats treated with pilocarpine. The article will also be used in the course designated Anatomy 814, Electron miscroscopy and cell ultrastructure for instruction in the techniques involved in preparing biological materials for electron microscopy and operation of the electron microscope. Application received by Commissioner of Customs: July 5, 1972. Advice submitted by Department of Health, Education, and Welfare on: October 27, 1972.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for such purposes as these articles are intended to be used, is being manufactured in the United States.

Reasons: Each applicant requires an electron microscope which is suitable for instruction in the basic principles of electron microscopy. Each of the foreign articles to which the foregoing applications relate is a relatively simple, medium resolution electron microscope designed for confident use by beginning students with a minimum of detailed programing. The most closely comparable domestic instrument is the Model EMU-4C electron microscope which is a relatively complex instrument designed primarily for research, which requires a skilled electron microscopist for its operation. We are advised by the Department of Health, Education, and Welfare in its respectively cited memoranda, that the relative simplicity of design and ease of operation of the foreign articles described above are pertinent to the applicants' educational purposes. We, therefore, find that the Forgflo Model EMU-4C electron microscope is not of equivalent scientific value to any of the foreign articles described above for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

B. BLANKENHEIMER,
Acting Director,
Office of Import Programs.

[FR Doc.72-19703 Filed 11-15-72;8:49 am]

DEPARTMENT OF CHIEF MEDICAL EXAMINER-CORONER

Notice of Consolidated Decision on Applications for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 F.R. 3892 et seq.). (See especially § 701.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 73-00019-33-46500. Applicant: Department of Chief Medical Examiner-Coroner, 104 North Mission Road, Los Angeles, CA 90033. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used in studies of biological, mainly human tissues, derived from actual coroner's cases, to determine at the fine structural levels the structural bases of transport of macromolecules into and across cells under physiological and pathological conditions. Application received by Commissioner of Customs: July 12, 1972. Advice submitted by Department of Health, Education, and Welfare on: October 27, 1972.

Docket No. 73-00021-33-46500. Applicant: Mayo Foundation, 200 First Street SW., Rochester, MN. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the study of the fine structural alterations which occur in the early stages of experimental and human arteriosclerosis. As part of the education for advanced degrees in pathology, candidates for the master's and Ph. D. degrees will be taught to operate the article. Application received by Commissioner of Customs: July 12, 1972. Advice submitted by Department of Health, Education, and Welfare on: October 27, 1972.

Docket No. 73-00022-33-46500. Applicant: Dartmouth Medical School, Hanover, N.H. 03755. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used in investigations of biological materials, primarily normal and pathological tissues to shed further light on the cellular and subcellular derangements leading to the expression of developmental malformations in mammalian species, including man. The article will also be used for the instruction of medical and graduate students taking courses in microscopic anatomy, cytology, and experimental embryology. Application received by Commissioner of Customs: July 12, 1972. Advice submitted by Department of Health, Education, and Welfare on: October 27, 1972.

Docket No. 73-00024-33-46500. Applicant: Ambassador College, 300 West Green Street, Pasadena, CA 91105. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used in experiments conducted on cellular structures of healthy organ cells, various mesophile and thermophile flagella, normal and altered structures of DNA and its complexes to reveal the changes at the ultrastructural level of the cell due to controlled physiological and pathological conditions based on a normal nutritional standpoint. In addition, experiments will be conducted to study molecular structures of various biological polymers such as amylose and amylopectin in starch granules and studies on DNA, and flagella structures. The article will also be used as a teaching tool in a course on physical chemical techniques offered for advanced chemistry and biology students. Application received by Commissioner of Customs: July 12, 1972. Advice submitted by Department of Health, Education, and Welfare on: October 27, 1972.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, is being manufactured in the United States.

Reasons: Each of the foreign articles provides a range of cutting speeds from 0.1 to 20 millimeters per second. The most closely comparable domestic instrument is the Model MT-2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT-2B has a range of cutting speeds from 0.09 to 3.2 millimeters per second. The conditions for obtaining high-quality sections that are uniform in thickness, depend to a large extent on the hardness, consistency, toughness, and other properties of the specimen materials, the properties of the embedding materials, and geometry of the block. In connection with a prior application (Docket No. 69-006665-33-46500), which relates to the duty-free entry of an article that is identical to those to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting (among such [other] factors as knife edge condition and angle) is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior application (Docket No. 70-00077-33-46500) which also relates to an article that is identical to those described above, HEW advises in its respectively cited of a variety of tissues having a wide range in density, hardness, etc." requires a maximum range in cutting speed and, further, that the "production of ultrathin serial sections of specimens that have a great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 millimeters per second are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments.

For these reasons, we find that the Sorvall Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

B. BLANKENHEIMER,
Acting Director,
Office of Import Programs.

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of

XUM
V37-222 NOV16 72
XUM

the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub-

tific article pursuant to section 6(c) of the Educational, Scientific, and Cultural

regulations issued thereunder as amended (37 F.R. 3892 et seq.).

his conclusions pursuant to the evaluation of a report received from the Na-

Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written appear-

(address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to pro-

the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 F.R. 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 72-00649-33-46040. Applicant: Stanford University, 820 Quarry Road, Palo Alto, CA 94304. Article: Electron microscope, Model EM 300. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used to elucidate the molecular structure of viruses, membranes, and complex protein and nucleic acid molecules in carrying out the following research projects:

(1) Studies of the synthesis of DNA,

(2) Studies of the structure of multiplication of viruses and the structure of their DNA,

(3) Investigation of the structure of chromosomes,

(4) Investigation of the mechanism of genetic recombination in viruses, and

(5) Studies of the structure of cell membranes.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article has a specified resolving capability of 3.5 angstroms. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Forgflo Corp. The Model EMU-4C has a specified resolving capability of 5 angstroms. (The lower the numerical rating in terms of angstrom units, the better the resolving capability.) We are advised by the Department of Health, Education, and Welfare in its memorandum dated October 27, 1972 that the additional resolving capability of the foreign article is pertinent to the purposes for which the foreign article is intended to be used. We, therefore, find that the Model EMU-4C is not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 F.R. 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, DC.

Docket No. 72-00645-58-72500. Applicant: University of Washington, Department of Oceanography, Seattle, Wash. 98195. Article: Cartesian Diver Microrespirometer and accessories. Manufacturer: Ole Dich Instrumentmakers, Denmark. Intended use of the article: The article is intended to be used to measure respiration rates of very small marine organisms, some of them single-celled animals. Respiration rates of animals kept in culture and taken from the waters of Puget Sound will be measured. The article will also be used in Benthos Ecology to teach graduate students the various techniques in respirometry.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article is an integrated system capable of measuring gas volume changes within the range of 0.001 —10 microliters with temperature regulation accurate to ±0.02° C. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated October 27, 1972, that the characteristics of the article described above are pertinent to the applicant's research studies. HEW further advises that it knows of no domestic system matching the pertinent features of the article.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. FDC-D-526; NDA 13-217; DESI 9947]

A. H. ROBINS CO., INC.

Metaxalone Tablets; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In an announcement (DESI 9947), published in the FEDERAL REGISTER of February 6, 1970 (35 F.R. 2697), the Commissioner of Food and Drugs announced

his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Skelaxin Tablets containing metaxalone; A. H. Robins Co., Inc., 1407 Cummings Drive, Richmond, Va. 23220, (NDA 13-217).

The announcement stated that there is a lack of substantial evidence that this drug is effective for the initial phase of acute skeletal-muscle spasm related to sprains and strains, fractures, dislocations, and trauma to tendons and ligaments and that the Commissioner of Food and Drugs intended to initiate proceedings to withdraw approval of the new drug application. Interested persons were invited to submit any pertinent data bearing on the proposal within 30 days following publication of the announcement. No data providing substantial evidence of effectiveness have been received pursuant to the announcement.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 F.R. 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

Within 30 days after publication hereof in the FEDERAL REGISTER the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for hearing, warrants the conclusions that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: November 9, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

Office of the Secretary

HEALTH SERVICES AND MENTAL HEALTH ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part 3 (Health Services and Mental Health Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare (33 F.R. 15953, October 30, 1968), as amended, is hereby amended with regard to section 3-20, *Organization and Functions*, as follows:

Within the chapter alphabetically coded 3A-00—Office of the Administrator (3A00)—the functional statement for the Office of the Associate Administrator for Program Planning and Evaluation (3A31) is being amended to reflect the addition of the following functions:

(a) Oversees the Coordinating Committee for Health Data Systems, which exercises control over HSMHA statistical activities and makes recommendations to the Administrator for effectively responding to OMB and Secretary's requests; (b) provides economic expertise for all phases of HSMHA's health activities; and (c) operates the National Health Manpower Shortage Clearinghouse.

Functional statements for the three new staffs, Administrative Management Staff (3A3119), Planning Staff (3A3131), and Evaluation Staff (3A3133), are included.

Added to the present statement for the Office of the Assistant Administrator for Operations Analysis (3A3104) are the following functions:

(a) Directs and maintains the Administrator's Health data standardization program; (b) initiates, directs, and maintains the National Health Manpower Shortage Clearinghouse; (c) plans and coordinates HSMHA-wide programs for the development of the technological resources needed to improve the delivery of health care by identifying and evaluating technological and social changes as they impact on the health care system, by examining potential for increased automation and mechanization in public health programs and health care delivery, and by developing plans for and coordinating the implementation of improved techniques in technical resource utilization.

The paragraph entitled "Office of the Assistant Administrator for Resource De-

and outside HSMHA; (5) coordinates, and provides staff support for, the vari-

priorities and strategies; and (5) augments HSMHA's evaluation capabilities

the adoption of Administration goals necessary to fulfillment of its role; and

SECRETARY'S ADVISORY COMMITTEE ON POPULATION AFFAIRS

B. In the absence of the Assistant Secretary, the Deputy Assistant Secre-

XUM V37-1972-NOV16 XUM

The paragraph entitled "Office of the Assistant Administrator for Resource Development" (3A3106) is hereby deleted.

The changes indicated above result in deleting from chapter 3A-00 the paragraph coded 3A31, 3A3104, 3A3106, 3A3108 and replacing them with the following text:

Office of the Associate Administrator for Program Planning and Evaluation (3A31). Under the direction of the Associate Administrator for Program Planning and Evaluation who is a member of the Administrator's immediate staff: (1) Serves as the Administrator's principal staff arm for program planning, coordination, and evaluation, including the development of program alternatives and policy positions; (2) oversees planning, reporting, and analytical and evaluation functions in support of policy formulation and program implementation; (3) advises the Administrator and his immediate staff on program policy and operational implications arising from activities of the office; (4) collaborates with the Office of the Associate Administrator for Management in the development and implementation of the 5-year program and financial plan for HSMHA's program planning and budgeting system; (5) maintains liaison with other Federal and non-Federal health agencies; (6) coordinates and provides service to the Administrator's Office regarding HSMHA-wide programs of operations analysis (methods and applications), goal-oriented planning and program structure control, and related data management; (7) coordinates a continuing evaluation of HSMHA goals for improving health services to include analysis of trends and developments in this area and derivation of long-term projections for HSMHA activities; (8) plans and coordinates HSMHA-wide programs for the development of human and technological resources necessary to carry out the objectives and programs of HSMHA; (9) oversees the Coordinating Committee for Health Data Systems, which exercises control over HSMHA statistical activities and makes recommendations to the Administrator for effectively responding to requests from the Office of Management and Budget and from the Secretary; (10) provides economic expertise at all stages of HSMHA's health activities; (11) reviews and assesses HSMHA-wide ongoing programs dealing with health care of children; (12) operates the National Health Manpower Shortage Clearinghouse, and (13) assures program coordination and liaison in these areas between the Administrator and the operating program offices.

Immediate Office of the Associate Administrator for Program Planning and Evaluation (3A3101). (1) Administers the Office of Program Planning and Evaluation; (2) advises the Administrator on program planning and evaluation and related matters; (3) facilitates program coordination within HSMHA as well as between HSMHA programs and those administered elsewhere; (4) maintains program and staff liaison within and outside HSMHA; (5) coordinates, and provides staff support for, the various advisory groups within the Office of the Administrator; (6) plans and coordinates HSMHA-wide health manpower programs and the development of health manpower resources and directs the career development program in global community health; (7) monitors HSMHA's economic activities and functions in a liaison capacity with the Department in coordinating economic studies and analyses; (8) reviews and assesses HSMHA-wide ongoing programs dealing with health care of children and mothers and functions in a liaison capacity with the Department on these matters; and (9) directs the Administrator's health data standardization program.

Administrative management staff (3A3119). (1) Serves as principal adviser to the Associate Administrator for Program Planning and Evaluation in the development and implementation of administrative management plans, policies, and guidelines in support of the OPPE mission; (2) performs analyses of administrative resources of the Office of Program Planning and Evaluation to achieve maximum utilization; (3) assesses and identifies personnel management requirements and develops alternative actions for effective implementation; (4) provides technical guidance and information to key staff for budget formulation and execution; and (5) maintains close working relationships with the Office of the Associate Administrator for Management in the conduct of day-to-day administrative functions.

Planning staff (3A3131). (1) Develops and recommends administration program goals, objectives, and plans; (2) plans and directs studies to identify program needs and to develop innovative and alternative ways to achieve objectives; (3) develops general HSMHA planning strategy, and reviews, evaluates, and coordinates program plans in terms of effectiveness in achieving HSMHA's goals and for inclusion in the overall forward plan for departmental submission, (4) plans analyses of budgetary and other financial data to insure consistency with planning guidelines and to determine feasibility and efficacy of proposed programs; and (5) participates in developing and implementing the 5-year program and financial plan.

Evaluation staff (3A3133). (1) Facilitates development of an effective evaluation strategy; (2) coordinates evaluation activities with the Office of the Secretary and conceptualizes, implements, and coordinates HSMHA-wide evaluation strategy; (3) develops evaluation projects for OPPE, which include projects of a specific interest to the Administrator, projects that crosscut program lines, and projects involving HSMHA's interface with other inputs into the health care system; (4) provides advice and technical assistance to programs in developing their evaluation projects and strategies in relationship to HSMHA's priorities and strategies; and (5) augments HSMHA's evaluation capabilities with a training exchange program between HSMHA's personnel and university staff.

Office of the Assistant Administrator for Operations Analysis (3A3141). (1) Plans, develops, implements, and monitors the HSMHA operations analysis program, involving the coordinated application of scientific methods to the solution of planning, programing, and evaluation problems; (2) identifies for the Administrator the need for information and data for use in decisionmaking and administration of HSMHA programs; (3) directs and maintains the Administrator's health data standardization program; (4) fosters improved use of information and data, utilizing existing information sources or new information and data sources, and develops—in cooperation with the Office of Systems Management, other parts of the Office of the Administrator, the National Center for Health Statistics, or other HSMHA programs—such information and data sources required to encompass all HSMHA programs, related Federal activities, health services and resources, and health status; (5) initiates, directs, and maintains the National Health Manpower Shortage Clearinghouse; (6) plans and coordinates HSMHA-wide programs for the development of the technological resources needed to improve the delivery of health care by identifying and evaluating technological and social changes as they impact on the health care system, by examining potential for increased automation and mechanization in public health programs and health care delivery, and by developing plans for and coordinating the implementation of improved techniques in technical resource utilization; (7) directs priority projects in the data management area as requested by the Administrator; and (8) presents data and analyses for use in HSMHA decisionmaking at all organizational levels, Headquarters and field, in relationships with the Office of the Secretary, the Office of Management and Budget, other Federal agencies, the Congress, and State and local governments, and for use by the professional and general public in understanding and utilizing HSMHA program resources.

Office of the Assistant Administrator for Agency Goals (3A3145). Placing special emphasis upon direct participation by youth, directs a continuing evaluation and reevaluation of long-range objectives in terms of the health services needs and resources of the Nation; (1) Conducts long-range studies to identify national health services needs; (2) advises the Administrator on appropriate role of the Health Services and Mental Health Administration in meeting these needs, taking into account the proper functions and responsibilities of other Federal agencies, State and local governments, the views of medical and other student community organizations, and total available resources both public and private; (3) formulates and recommends

the adoption of Administration goals necessary to fulfillment of its role; and (4) continually evaluates the appropriateness of existing objectives and progress toward achieving broad goals.

Dated: October 30, 1972.

WAYNE M. WILSON,
Acting Deputy Assistant Secretary for Management.

AD HOC INTERAGENCY COMMITTEE ON THIRD PARTY PREPAID PRESCRIPTION DRUG PROGRAMS

Notice of Public Meeting

Name. Ad Hoc Interagency Committee on Third Party Prepaid Prescription Drug Programs.

Purpose. The Committee will advise the Secretary concerning third party prepaid prescription drug programs and problems that arise in the areas of administration, reimbursement and antitrust. Problems as they now exist will be defined, and alternative solutions will be presented.

Date. November 21, 1972.

Time. 9:30 a.m. to 4 p.m.

Place. Georgetown Room, Key Bridge Marriott Hotel, Rosslyn, Va.

Agenda. Meeting will deal with a brief introduction into antitrust implications of Third Party Drug Insurance Programs. In addition, extended discussions regarding methods for determining reimbursement policy by drug insurers will be held.

This meeting will be open for public observation.

VINCENT R. GARDNER,
Staff Director,
Ad Hoc Interagency Committee.

NOVEMBER 8, 1972.

ADVISORY COMMITTEE ON OLDER AMERICANS

Committee Meeting Announcement

The Advisory Committee on Older Americans was established by the Older Americans Act of 1965 for the purpose of advising the Secretary of Health, Education, and Welfare on matters bearing on his responsibilities under this Act and related activities of his Department.

The committee will hold a regular meeting on November 17, 9 a.m. to 4 p.m., HEW North Building, Room 4131, 330 Independence Avenue SW., Washington, DC. The committee will review final Congressional and Presidential actions on legislation affecting the elderly, consider a report on relationships between Government and voluntary aging sectors and develop recommendations for 1973 Federal legislation for older Americans. Meeting open to public observation.

CLEONICE TAVANI,
Staff Director.

NOVEMBER 9, 1972.

[FR Doc.72-19690 Filed 11-15-72;8:48 am]

SECRETARY'S ADVISORY COMMITTEE ON POPULATION AFFAIRS

Notice of Public Meeting

The Advisory Committee on Population Affairs, established to advise the Secretary regarding all significant aspects of family planning and population research activities coming under the purview of the Department of Health, Education, and Welfare, is scheduled to hold a meeting on November 21, 1972. The meeting will be held in the Department's North Building located at 330 Independence Avenue SW., Washington, DC, Room 5169. The meeting is scheduled to convene at 9 a.m. and adjourn at 5 p.m.

The Committee will discuss issues related to their first annual report to the Secretary on family planning and population research activities under the purview of the Department of Health, Education, and Welfare.

The meeting is open for public observation.

Dated: November 9, 1972.

LOUIS M. HELLMAN,
Chairman and Executive Secretary.

OFFICE OF THE ASSISTANT SECRETARY FOR HEALTH

Statement of Organization, Functions, and Delegations of Authority

In the statement of organization, functions, and delegations of authority of the Department, Chapter 2-110, entitled Office of Assistant Secretary for Health and Scientific Affairs (35 F.R. 1123 and 35 F.R. 3948) should be deleted and the following statement added:

SECTION 1N.00 MISSION.—The Assistant Secretary for Health is the principal advisor and assistant to the Secretary on health policy and all health-related activities in the Department. He is responsible for the direction of the health agencies of the Department, for providing leadership and policy guidance for health-related activities throughout the Department and for maintaining relationships with other governmental and private agencies concerned with health.

SEC. 1N.10 Organization.—A. Under the supervision of the Assistant Secretary, the Office of the Assistant Secretary for Health consists of the following principal operating components:

Deputy Assistant Secretary for Policy Implementation.
Deputy Assistant Secretary for Policy Development.
Deputy Assistant Secretary for Population Affairs.
The Surgeon General.
Special Assistant for Nursing Home Affairs.
Special Assistant for Science.
Special Assistant to the Secretary for Drug Abuse Activities.
Office of International Health.

B. In the absence of the Assistant Secretary, the Deputy Assistant Secretary for Policy Implementation functions as Acting Assistant Secretary.

SEC. 1N.20 Functions.—A. The Assistant Secretary for Health: (1) Directs the activities of the Public Health Service, which is composed of the Health Services and Mental Health Administration, the National Institutes of Health and the Food and Drug Administration; and (2) as the Secretary's principal advisor on health, provides leadership and guidance on all other health and health-related activities, including research and development, education and training, the organization, financing and delivery of health care services, and problems of public and environmental health. In addition, he is responsible for the direction of nursing home affairs throughout the Department directing coordination of drug abuse activities throughout the Department and providing the principal point of contact within the Department with the Special Action Office for Drug Abuse Prevention, and exercises specialized responsibilities in the areas of population affairs, international health and in the transportation and disposition of certain hazardous materials. He coordinates the health and health-related functions of the Department with those of other Federal agencies and provides advice and assistance on health matters to such agencies as requested.

B. The principal components of the Office of the Assistant Secretary for Health, operating under the general direction and supervision of the Assistant Secretary, have the following functions and responsibilities:

Deputy Assistant Secretary for Policy Implementation. Resolves, and advises on, day-to-day operating problems and is responsible for insuring that established health policy and objectives are effectively carried out through the budget, planning, and legislative processes and through program operations. Makes recommendations to the Assistant Secretary on budget, organizational, and management policies and problems.

Deputy Assistant Secretary for Policy Development. Advises on and conducts policy analysis and development and health policy planning; provides guidance for such activities within the health agencies and with respect to health and health-related issues throughout the Department. Coordinates health data activities, and assists in the evaluation of health and health-related programs. Maintains liasion with other public and nongovernmental health policy analysis and planning activities.

Deputy Assistant Secretary for Population Affairs. Advises on programs of national importance in the fields of population dynamics, fertility, sterility, and family planning. Directs population and family planning activities within the three health agencies of the Department.

Surgeon General. Advises and assists on professional medical matters, especially as they relate to personal, public,

and environmental health (including the transportation and disposition of certain hazardous materials), both nationally

struction Permit No. CPPR-71 and the proposed issuance of an operating license to the Power Authority of the

and environmental health (including the transportation and disposition of certain hazardous materials), both nationally and internationally. As the ranking officer of the Public Health Service Commissioned Corps, the Surgeon General functions as principal advisor on top Corps appointments and policies.

Special Assistant for Nursing Home Affairs. Serves as the departmental focal point for managing nursing home affairs. Directs and coordinates nursing home activities in both the health and nonhealth agencies.

Special Assistant for Science. Advises on matters pertaining to biomedical research and research training, drug research and development, environmental science, and related scientific problems. Serves as a focal point for liaison on matters of science with other Federal departments and agencies and with nongovernmental organizations.

Special Assistant to the Secretary for Drug Abuse. Serves as the principal departmental contact with the Special Action Office for Drug Abuse Prevention, receiving, referring and following-up on all major SAODAP requests, coordinates all intra-DHEW staff work on major drug abuse issues, leads and coordinates negotiation of all major policy issues with SAODAP, monitors the implementation of drug abuse legislation and progress toward achievement of defined objectives of drug abuse programs. With the Assistant Secretary for Health, brings directly to the attention of the Secretary major issues requiring Secretarial decision.

Office of International Health. Provides assistance and guidance on, and coordinates, the international health activities of the Department. Prepares analyses of selected international health policies and programs for the Department of State, maintains liaison with international institutions and organzations and other departments and agencies on international health matters and arranges international technical assistance in the health field at the request of other departments and agencies.

Date: November 9, 1972.

ELLIOT L. RICHARDSON,
Secretary.

ATOMIC ENERGY COMMISSION

[Docket No. 50-333]

POWER AUTHORITY OF THE STATE OF NEW YORK

Availability of AEC Draft Environmental Statement, Applicant's Environmental Report, and Supplemental Environmental Reports

Pursuant to the National Environmental Policy Act of 1969 and the Atomic Energy Commission's regulations in appendix D to 10 CFR Part 50, notice is hereby given that a draft environmental statement related to the continuation, modification, or termination of Construction Permit No. CPPR-71 and the proposed issuance of an operating license to the Power Authority of the State of New York for the James A. FitzPatrick Nuclear Power Plant, to be located in Oswego County, N.Y., has been prepared by the Commission's Directorate of Licensing. The draft statement is available for inspection by the public in the Commission's public document room at 1717 H Street NW., Washington, DC, and in the Oswego City Library, 120 East Second Street, Oswego, NY 13126. The draft statement is also being made available at the New York State Office of Planning Coordination, 488 Broadway, Albany, NY 12207 and at the Central New York Regional Planning and Development Board, 321 East Water Street, Syracuse, NY 13202. Copies of the Commission's draft environmental statement may be obtained upon request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

An environmental report and supplements thereto (environmental reports) submitted by the Power Authority of the State of New York are also available for public inspection at the above-designated locations. Notice of availability of the environmental reports was published in the FEDERAL REGISTER on January 18, 1972 (37 F.R. 747).

Pursuant to 10 CFR Part 50, Appendix D, interested persons may, within forty-five (45) days from date of publication of this notice in the FEDERAL REGISTER, submit comments on the proposed action, the environmental reports, and the draft environmental statement for the Commission's consideration. Federal and State agencies are being provided with copies of the environmental reports and the draft environmental statement (local agencies may obtain these documents upon request) and, when any comments thereon by Federal, State, and local officials are received, they will be made available for public inspection at the above-designated locations. Comments on the draft environmental statement from interested members of the public should be addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Md., this 10th day of November 1972.

For the Atomic Energy Commission.

DANIEL R. MULLER,
Assistant Director for Environmental Projects, Directorate of Licensing.

[Docket No. 50-16]

POWER REACTOR DEVELOPMENT CO.

Notice of Rescheduled Prehearing Conference

NOVEMBER 14, 1972

In the matter of Power Reactor Development Co. (Enrico Fermi Atomic Power Plant No. 1).

Notice is hereby given that a prehearing conference in the above entitled proceeding, previously scheduled for October 31, 1972 and subsequently postponed (37 F.R. 23198), will now be held at 10 a.m. on Monday, November 20, 1972 in room 111 of the Lafayette Building, 811 Vermont Avenue NW., Washington, DC.

It is so ordered.

Issued at Washington, D.C., this 14th day of November 1972.

For the Atomic Safety and Licensing Board.

CHARLES A. HASKINS,
Chairman.

SAFETY GUIDES

Notice of Issuance and Availability

The Atomic Energy Commission has issued a new safety guide which has been developed to provide guidance on acceptable methods of implementing the requirements of Commission regulations relating to water-cooled nuclear powerplants.

A total of 33 of these guides has been completed since the Commission, on November 13, 1970, announced development of a series of these guides.

The primary purpose of the safety guides is to make available to the industry positions that have been developed by the Regulatory Staff and the Commission's Advisory Committee on Reactor Safeguards on safety issues. Although the safety guides are not regulatory requirements, they do specifically identify safety issues that should be considered in the design and in the evaluation of water-cooled nuclear powerplants and describe a set of principles and specifications which will represent an acceptable solution to the Regulatory Staff and Advisory Committee on Reactor Safeguards on these issues. Their use by an applicant will expedite the licensing review process.

Title of the new guide is:

Safety Guide No. 33—Quality Assurance Program Requirements (Operation)

Comments and suggestions in connection with improvements in the guide are encouraged and should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff. Requests for copies of issued guides should be sent to the Director of Regulatory Standards, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Other safety guides currently being developed include the following:

(1) Control of Electroslag Welding.

(2) Design Phase Quality Assurance Requirements.

(3) Cleaning of Fluid Systems and Associated Components of Nuclear Powerplants.

(4) Monitoring and Reporting of Environmental Levels.

(5) Diesel Generator Protective Interlocks.

FEDERAL REGISTER, VOL. 37, NO. 222—THURSDAY, NOVEMBER 16, 1972

(6) Availability of Electric Power Sources.

(7) Physical Independence of Safety Related Electric Systems.

(8) Operating Status Indication for Safety Related Systems.

(9) Postaccident and Incident Monitoring.

(10) Flood Design Bases.

(11) Inservice Surveillance of Ungrouted Prestressing Tendons.

(12) Design Loading Combinations for Fluid System Components.

(13) Isolating Low-Pressure Systems Connected to the Reactor Coolant Pressure Boundary and That Penetrate Primary Reactor Containment.

(14) Stainless Steel Overlay Welding.

(15) Preoperational Testing of Redundant Onsite Power Sources to Verify Design Independence.

(16) Quality Assurance Requirements for Packaging, Shipping, Receiving, Storage, and Handling of Items for Nuclear Powerplants.

(17) Housekeeping Requirements for Nuclear Powerplants.

(18) Requirements for Collection, Storage, and Maintenance of Quality Assurance Records for Nuclear Powerplants.

(19) Reactor Coolant Pressure Boundary Leakage Detection.

(20) Design Loading Combination for Primary Metal Containment Systems.

(21) Control of Lifting Equipment at Nuclear Powerplant Sites.

(22) Control of the Use of Sensitized Stainless Steel.

(23) Qualification Tests of Continuous-Duty Motors Installed Inside Containment of Nuclear Powerplants.

(24) Protection Against Pipe Whip Inside Containment.

(25) Control Rod Ejection Accident Assumptions for Pressurized Water Reactors.

(26) Shared Emergency and Shutdown Power Systems at Multiunit Sites.

(27) Protective Coatings for Nuclear Reactor Containment Facilities.

(28) Nonmetallic Thermal Insulation for Austenitic Stainless Steel.

(29) Reactor Vessel Closure Studs.

(5 U.S.C. 552(a))

Dated at Bethesda, Md., this 8th day of November 1972.

For the Atomic Energy Commission.

LESTER ROGERS,
Director of Regulatory Standards.

[Dockets Nos. 50-361, 50-362]

SOUTHERN CALIFORNIA EDISON CO. AND SAN DIEGO GAS & ELECTRIC CO.

Further Notice and Order for Prehearing Conference

In the matter of Southern California Edison Co., San Diego Gas & Electric Co. (San Onofre Nuclear Generating Station, Units 2 and 3).

Please take further notice, that pursuant to the Prehearing Conference Order issued October 31, 1972, in this proceeding, and in accordance to § 2.752 of the rules of practice of the Atomic Energy Commission, and upon consideration of a motion to change the situs of prehearing conference, filed by Scenic Shoreline Preservation Conference, Inc., and Groups United Against Radiation Dangers, the proposed consolidated Intervenors, the further prehearing conference will be held in this proceeding on Tuesday, November 28, 1972, at 10 a.m., Room 520, U.S. Courthouse, 312 North Spring Street, Los Angeles, CA.

This further prehearing conference will consider:

(1) Further oral argument on the amended and consolidated Petition for Leave to Intervene filed by the proposed consolidated Intervenors, and consider amendments thereto;

(2) Simplification, clarification, and specification of the issues;

(3) The necessity or desirability of amending the pleadings;

(4) The obtaining of stipulations and admissions of fact and of the contents and authenticity of documents to avoid unnecessary proof;

(5) Identification of witnesses and the limitation of the number of expert witnesses, and other steps to expedite the presentation of evidence;

(6) The setting of a hearing schedule;

(7) Those matters included in paragraph J1 and J2 of the Prehearing Conference Order issued herein on October 31, 1972; and

(8) Such other matters as may aid in the orderly disposition of the proceeding.

Each party shall be represented at this prehearing conference by the attorney who expects to present the evidence at the formal hearing, except that, for good cause, parties may be represented by an attorney associated with the attorney who expects to appear at formal hearing. The attorneys who will appear at this prehearing conference are directed to be prepared to discuss the above-enumerated matters.

This Further Notice and Order for Prehearing Conference supersedes the Atomic Safety and Licensing Board's Notice and Order for Prehearing Conference issued in this proceeding on November 7, 1972.

By Order of the Atomic Safety and Licensing Board.

MICHAEL L. GLASER,
Chairman.

[FR Doc.72-19697 Filed 11-15-72;8:48 am]

CIVIL AERONAUTICS BOARD

[Docket No. 24248; Order 72-11-39]

AEROLINEAS ARGENTINAS

Order Regarding Schedules

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of November 1972.

On September 25, 1972, the Board, pursuant to Part 213 of the Board's Economic Regulations, adopted Order 72-10-19 disapproving certain of the schedules filed by Aerolineas Argentinas on March 2, 1972, and amended on April 10, 1972. The order stated that the Board would consider an application for approval of a proposed schedule pursuant to section 213.3(e) of the Board's Economic Regulations to enable Aerolineas Argentinas to provide turnaround service at Miami by changing the day of operation of existing Flights 390 and 361. On October 30, 1972, Aerolineas filed an application with the Board requesting reinstatement of its entire existing schedule, or alternatively, approval of a proposed schedule. The Board will grant Aerolineas' application only to the extent that it relates to the change of the day of operation of Flights 390 and 361.

The carrier asserts that the Board's order disapproving certain of Aerolineas' schedules is invalid because the order was not "approved" by the President of the United States in accordance with his letter of February 20, 1969, in Docket 18769 (Order 69-2-112). However, subsequent to the issuance of the President's letter in that case, the President on June 3, 1970, approved the Board's enactment of Part 213 of the Economic Regulations amending the permits of certain foreign air carriers, including the permit of Aerolineas Argentinas, enabling the Board to disapprove schedules of foreign air carriers subject only to Presidential "disapproval" (Foreign Air Carrier Permit Terms Investigation, Docket 12063, ER-624, effective June 4, 1970). We have also considered and find unpersuasive the additional arguments advanced by the Argentine carrier in support of withdrawal or modification of our order disapproving certain of the carrier's schedules. Except where disapproved by Order 72-10-19 and approved by the instant order, Aerolineas' schedules, as filed with the Board on March 2, 1972, and amended on April 10, 1972, are authorized.

Accordingly, it is ordered, That:

1. Effective November 13, 1972, Aerolineas Argentinas shall be authorized to operate Flight 390 on Friday and Flight 361 (without Lima as an intermediate stop) on Saturday.

2. Except to the extent granted herein, Aerolineas' application is denied.

3. This order shall remain in effect until December 31, 1972, unless otherwise ordered by the Board.

4. This order shall be served on Aerolineas Argentinas and the Ambassador of Argentina in Washington, D.C.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[Docket No. 22012; Order 72-11-34]

FRONTIER AIRLINES, INC.

Order To Show Cause Regarding Application for Temporary Suspension Authority at Great Bend and Hutchinson, Kans.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of November 1972.

By application filed on June 12, 1972, Frontier Airlines, Inc. (Frontier), requests that the Board renew for a 2-year period Frontier's temporary suspension at Great Bend and Hutchinson, Kans., authorized by Order 70-8-31, August 10, 1970.[1] Frontier's suspension authority was conditioned upon the provision by Air Midwest, Inc. (Air Midwest), an air taxi operator, of a specified minimum level of service.[2]

In support of its renewal request Frontier asserts, inter alia, that it has been suspended at Great Bend and Hutchinson for almost 2 years and that it would be a financial burden for it to reinstitute service at this time, especially in light of the continued level of traffic boardings at the two cities since Frontier was suspended.

Air Midwest filed an answer in support of Frontier's application.[3]

Upon consideration of the pleadings and all of the relevant facts, we have decided to issue an order to show cause proposing to authorize Frontier to suspend service at Great Bend and Hutchinson, Kans., until August 10, 1974, conditioned upon the provision of replacement services by Air Midwest. For the same reasons we stated in Order 70-8-31, we are of the view that the suspension/replacement arrangement at Great Bend and Hutchinson is in the public interest from an overall transportation standpoint.[4] See also, Orders 72-1-93 and 70-10-21.

We have also examined the facts presented by Frontier's application in light of the A.L.P.A. v. C.A.B.[5] case wherein the Court indicated that the Board should consider whether the statutory conditions set out in section 416 of the Act for exemptions from certification still apply to the air taxi replacement operator. We tentatively find that, with respect to Air Midwest, the statutory conditions for exemption from certification for air taxi operations continue to exist.

Air Midwest, which provides the commuter replacement service at Hutchinson and Great Bend, has conducted air taxi operations since 1967, and now provides short-haul commuter air service to eight cities in addition to Great Bend and Hutchinson.[6]

In providing replacement service at the two cities in issue, Air Midwest carried 2,989 Great Bend-Denver passengers, 1,677 Great Bend-Wichita passengers, 2,474 Great Bend-Kansas City passengers, 1,249 Hutchinson-Denver passengers, 664 Hutchinson-Wichita passengers, and 3,322 Hutchinson-Kansas City passengers, in 1971. Systemwide, the carrier provided scheduled service for 32,881 passengers in 36 short-haul markets.[7] The carrier's total RPM's in that year amounted to only 0.9 percent of the average RPM's for each of the certificated local service carriers.

Air Midwest currently provides the following services to Hutchinson and Great Bend utilizing Beech-99 aircraft:

Markets:	Round-trip frequencies
Great Bend-Hutchinson	4
Great Bend Hutchinson-Wichita	4
Great Bend Hutchinson-Kansas City	3
Great Bend Hutchinson-Denver	2
Great Bend Hutchinson-Dodge City	2
Great Bend Hutchinson-Garden City	2
Great Bend Hutchinson-Hays	2
Great Bend Hutchinson-Salina	1½

In addition, the carrier maintains aircraft liability insurance required by the Board under Part 298 of the Board's Economic Regulations.

On the basis of the foregoing, and on the basis of the findings and conclusions set forth in Order 72-9-39, September 12, 1972, that the certification process is generally inappropriate for replacement commuter carriers, we tentatively conclude that it would not be in the public interest to require Air Midwest to undergo a certification proceeding in order to provide replacement services for Frontier at Great Bend and Hutchinson. Air Midwest's replacement services are neither of sufficient magnitude nor hold such prospects of economic success as to warrant separate certification.

We further tentatively find that certification would be an undue burden on Air Midwest by reason of the limited extent of, and unusual circumstances affecting, its operations. As described above, the carrier's operations are of limited extent in terms of both the replacement services involved and the overall scope of its operations. Furthermore, the very nature of the small aircraft to which Air Midwest is restricted makes the operations limited in extent. The accommodations on these aircraft not only limit the competitive capabilities of Air Midwest but also limit the amount of traffic it can carry and the length of the markets it can serve, compared with a certificated carrier operating large aircraft. Thus, the cost of certification procedures would impose a severe financial burden on the carrier wholly disproportionate to its existing and proposed operations. Moreover, enforcement of section 401 requirements would be an undue burden not only because of the substantial cost of certification procedures, but also because certification would deprive Air Midwest of the necessary operating flexibility it must have to conduct nonsubsidized services with small aircraft in short-haul, low-density markets.

We are also satisfied that there are no safety considerations which would warrant a determination that the substitution arrangement is contrary to the public interest.[8] Not only must Air Midwest conduct its operations in strict conformity with the Federal Aviation Regulations promulgated by the Secretary of Transportation, who is charged by law with insuring the highest degree of safety in air transportation, but Air Midwest has had a successful operating history.

Consequently, for the reasons set forth above, we tentatively find and conclude that Frontier Airlines, Inc., should be authorized to suspend service temporarily at Great Bend and Hutchinson, Kans., until Aug. 10, 1974, subject to the condition that such suspension shall immediately terminate if at any time during the suspension period the air taxi service to Great Bend and/or Hutchinson should for any reason cease or fall below the levels of service described below:

Three daily round trips between Great Bend and Hutchinson, Kans., on the one hand, and Kansas City, Mo., and Wichita, Kans., on the other hand; and two daily round trips between Great Bend and Hutchinson, Kans., on the one hand, and Denver, Colo., on the other hand (except one round trip between Great Bend and Hutchinson, on the one hand, and Denver, Kansas City, or Wichita, on the other hand, on Saturday, Sunday, and holidays).

Interested persons will be given 21 days following the service date of this order to show cause why the tentative findings and conclusions set forth herein should not be made final. We expect such persons to direct their objections, if any, to the specific facts in issue, and to support such objections with detailed economic or legal analysis.

Accordingly, it is ordered, That:

1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein, and granting the requested suspension;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and suspension authorization set forth herein shall within 21 days after service of a copy of this order, file with the Board and serve upon all persons listed in Appendix A attached hereto, a statement of objections together with such statistical data, and other materials and evidence relied upon to support the stated objections, answers to such objections shall be filed within 14 days, thereafter;

3. Any interested persons requesting an evidentiary hearing shall state in detail why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing. General, vague, or unsupported objections will not be entertained;

4. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;

5. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action;

6. The motion for an evidentiary hearing of the Air Line Pilots Association in Docket 22012 be and it hereby is denied; and

7. A copy of this order shall be served upon all persons listed in Appendix A attached hereto.[1]

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK, *Secretary.*

[FR Doc.72-19741 Filed 11-15-72;8:53 am]

[1] Filed as part of the original.

[1] Frontier invoked the automatic extension provisions of 5 U.S.C. 558(c), formerly section 9(b) of the Administrative Procedure Act, and, consequently, the suspension authority remains in effect pending final decision by the Board.

[2] Order 70-8-31 specified the following minimum levels of service: Three daily round trips between Great Bend/Hutchinson and Denver, Kansas City, and Wichita. By Order 70-10-21, the Board approved a reduction in the minimum level of replacement service, permitting Air Midwest to provide only one round trip to Great Bend and Hutchinson on weekends and holidays. Order 72-1-93 further modified the suspension order so as to permit the replacement carrier to provide two, rather than three daily round trips between Great Bend and Hutchinson, on the one hand, and Denver, on the other hand.

[3] On Mar. 24, 1972, the Air Line Pilots Association, International, filed a motion in this docket, as well as in a number of other dockets, involving suspension/replacement arrangements, requesting that the matters be set down for evidentiary hearing. Frontier filed an answer opposing ALPA's motion. For the reasons stated herein and in Order 72-9-39, September 12, 1972, regarding the necessity of a hearing, we shall deny ALPA's request for an evidentiary hearing.

[4] Specifically, we found that suspension would reduce Frontier's subsidy need, and that neither Air Midwest's replacement service nor Frontier's suspension would result in any significant inconvenience to the traveling public.

[5] Air Line Pilots Association, International v. C.A.B., 458 F. 2d 848 (C.A.D.C. 1972).

[6] Denver, Dodge City, Garden City, Hays, Kansas City, Mo., Pueblo, Salina, Wichita.

[7] The traffic statistics submitted by commuter carriers are confidential for a period of 1 year. Accordingly, pursuant to sec. 298.66 of the Board's Economic Regulations, the Board, on its own motion, finds that it is in the public interest to disclose this information.

[8] We have informally checked with the FAA and they report that Air Midwest has excellent operations with good management, maintenance, and training and has had no safety or maintenance violations of FAA regulations during the last 12 months, with the exception of a $100 civil fine for operating a flight on Sept. 17, 1971, without the proper equipment.

[Docket No. 24909; Order 72-11-30]

DELTA AIR LINES, INC.

Order of Investigation and Suspension Regarding Reduced Coach Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of November 1972.

By tariff revisions[1] marked to become effective November 11, 1972, Delta Air Lines, Inc. (Delta) proposes to reduce by approximately 15 percent its day-coach fares in the Dallas-Los Angeles/San Francisco markets. The reduced fares are to apply on aircraft providing a seat pitch not to exceed 36 inches, with no lounge accommodations. The proposed fares may not be used to construct through fares or be combined with other fares, and do not apply to intermediate points. The proposed reductions would result in a fare of $74.07 (currently $87.04) between Dallas and Los Angeles and $86.11 for San Francisco (currently $100.93), and all the fares are marked to expire on March 31, 1973.

American Airlines, Inc. (American), and Continental Air Lines, Inc. (Continental), have filed defensive tariffs. However, in the latter case the filing goes beyond Delta's proposal. While American restricts the application of its reduced fares to loungeless aircraft, and to aircraft that do not have a seat pitch in excess of 36 inches, Continental's reduced fares would not be restricted in any way as to the cabin configuration and aircraft type to which they would apply.

In support of its proposal, Delta alleges that it is based on the same concept as its earlier proposal which was rejected by the Board,[2] that is, to meet the alleged adverse competitive impact of American's wide-bodied coach lounge. Delta alleges that the current justification has been meticulously designed to meet every deficiency which the Board found in the earlier proposal. The carrier alleges that the time is appropriate insofar as it has been 4 months since the Board decided Phase 6A,[3] that the Board has not yet acted on pending petitions for reconsideration, and that nearly 3 months have passed since Order 72-7-97 was issued. Furthermore, Delta contends that as soon as its earlier proposal had been rejected, American resumed its advertising campaign exploiting its competitive advantage over Delta in these two markets.

In support of its proposal, Delta alleges, inter alia, that when the productivity of lounge aircraft is compared with the productivity of aircraft without lounges, it is clear that the unit costs are automatically and materially higher on lounge equipment than on nonlounge equipment; and that the profit potential of the wide-bodied jet aircraft is reduced some 12 to 14 percent when configured with the uneconomic coach lounge. Delta estimates that the aggregate effect of the proposed fares upon Delta will be additional passenger revenues of approximately $1.6 million, constituting a recapture of at least some of the revenues Delta allegedly lost to American because of the latter's introduction of coach lounge services.

Delta further states that, in rejecting its earlier tariff filing, the Board said that Delta should compare total numbers of revenue passengers on comparably timed flights as a further showing of impact. Delta alleges, however, that such a comparison cannot be made by a loungeless operator; that the Board itself is in a position to make such a comparison internally by analyzing the segment-flow data which is reported to the Board by type of service, by flight, and by equipment type in these markets by both Delta and American; and that these data are not normally released to the carriers for 1 year by the Board.

American and Continental have filed complaints against the proposal requesting that it be suspended. The complainants allege that Delta has failed to establish that it has suffered "adverse economic impact" or has actually lost traffic as a result of American's lounge; that Delta's cost and revenue comparison between loungeless and lounge-equipped aircraft is meaningless as Delta's estimates were calculated on an available seat-mile basis which is valid only when aircraft are operated close to full capacity; and that this is not the proper forum for determining the Board's decision in Phase 6A.

American also alleges that Delta has failed to establish that Delta's proposed lower coach fares are reasonably related to cost; that Delta admits that the existing coach fare is the fare that is reasonably related to cost; that during the first 8 months of 1972, Delta has maintained a larger share of on-board passengers than American; and that advertising, per se, does not establish a case for competitive advantage without considering other factors such as frequency of service, identity in the markets, and service features.

Continental asserts that Delta has omitted any analysis of total schedules and their impact on market share; that out of a total of 27 one-way nonstop frequencies, there are only five wide-bodied departures, three of which are operated by Delta; that none of the wide-bodied jets compete head-to-head; and that American has an overwhelming edge

[1] Revisions to Airline Tariff Publishers, Inc., Agent, Tariff CAB No. 136.

[2] By Order 72-7-97, dated July 28, 1972, the Board rejected a similar tariff proposal by Delta due to the lack of adequate justification.

[3] Order 72-5-101.

with substantially greater identity at all three terminals.

In answer to the complaints,[1] Delta

ER-586[2] does not reveal a trend which supports Delta's claim of adverse competitive impact. During the time Amer-

determine and prescribe the lawful fares and provisions, and rules, regulations, or practices affecting such fares and

"Amendment Requirements for Pending Cable Television Applications and Pleadings," FCC 72-825, — FCC 2d —. In that

cants requesting immediate processing has been commenced. Such processing will proceed on an individual basis, apart

ion and Order issued in Docket No. 16495 on September 14, 1972 (FCC 72-807), the Commission has received some in-

XUM V37-I22 NOV 16 72 XUM

with substantially greater identity at all three terminals.

In answer to the complaints,[4] Delta alleges that its proposal is not premature, but long overdue; that Delta has demonstrated to the fullest extent possible the "adverse competitive impact" of American's lounges; that its justification meets every issue raised by American and Continental; and that neither complainant has shown the proposed 15-percent differential to be incorrect.

The Airline Passenger Association has filed an answer to American's complaint urging its dismissal and that the Board permit Delta's reduced fares to become effective.

Upon consideration of the tariff proposals, the complaints and answers thereto, and all other relevant matters the Board finds that the proposals may be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated. The Board further concludes that the proposals should be suspended pending investigation.

In our view, neither Delta's justification nor data otherwise available to the Board demonstrate that American's wide-bodied lounges have had a significant adverse competitive impact on Delta's operations in the Dallas-west coast markets. To begin with, the Board in Phase 6A (Seating Configurations) of the "Domestic Passenger-Fare Investigation," Order 72-5-101, determined on the basis of the then available facts of record that any adverse impact on non-lounge operators by competing carriers operating and promoting coach lounges had not been demonstrated. Any carrier seeking to take advantage of the protective measures discussed in that decision has the initial burden of showing that the negative finding of Order 72-5-101 is no longer correct, as applied to a particular market or markets.

Here, Delta alleges that American's vigorous advertising of the coach lounge must be said to suggest that American itself is of the opinion that the coach lounge is a major passenger preference factor, and hence has a substantial adverse competitive impact, else American would not spend so much of its resources on advertising the lounge. While this may be an arguable point, particularly from the standpoint of American's promoting its system operations, it does not show or enable the Board to identify the degree of impact, if any, in the particular markets here involved. The same can be said of Delta's reference to a survey taken by Continental for use in the "Domestic Passenger-Fare Investigation," Docket 21866-6A, which indicates that a substantial portion of the respondents surveyed considered a coach lounge an important criterion in their selection.

An evaluation of Delta's proposal on the basis of the traffic-flow data submitted by the carriers pursuant to ER-586[5] does not reveal a trend which supports Delta's claim of adverse competitive impact. During the time American was operating B-747's, the two carriers' day-coach load factors were quite comparable, indicating no clear advantage for American. When both carriers have been competing with wide-bodied equipment, Delta has carried more passengers per flight in day-coach service than has American. Neither does a comparison of relative market share suggest that American's lounge has been a significant factor in these markets.

If anything, the data suggests that passengers in this market are opting for the greater frequencies provided by American with B-727 aircraft rather than either carrier's wide-bodied aircraft (with or without a lounge) or Delta's DC-8's, which provide fewer frequencies than the B-727 for a given number of seats. Both carriers' load factors on wide-bodied aircraft have consistently been significantly lower than those on their narrow-bodied equipment. See appendix A attached.[6]

American's participation with wide-bodied aircraft at present is very limited. From Dallas to Los Angeles, for example, American offers one DC-10 frequency and various frequencies with conventional equipment, compared to Delta's operation of two B-747 and five DC-8 frequencies, including two stretched versions. It would seem doubtful, as our analysis suggests, that one DC-10 round trip with a 10-passenger coach lounge in a market having 14 daily round-trip frequencies would give American such a competitive advantage as to compel Delta to reduce by 15 percent the coach fares for all seven of its frequencies. This conclusion is buttressed by the low load factors being experienced on wide-bodied equipment, which would appear to indicate only limited attractiveness of a lounge in these markets. Thus, we conclude in these circumstances that the proposed 15-percent reduction in fares is not warranted.[7]

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the fares and provisions described in appendix B hereto,[8] and rules, regulations, or practices affecting such fares and provisions, including subsequent revisions and reissues thereof, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful fares and provisions, and rules, regulations, or practices affecting such fares and provisions;

2. Pending hearing and decision by the Board, the fares and provisions described in appendix B hereto are suspended and their use deferred to and including February 8, 1973, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the Board;

3. Except to the extent granted herein, the complaints in Dockets 24813, 24814, and 24861 are hereby dismissed;

4. The proceeding ordered herein be assigned for hearing before an administrative law judge of the Board at a time and place hereafter to be designated; and

5. Copies of this order will be filed in the aforesaid tariff and served upon American Airlines, Inc., Continental Air Lines, Inc., Delta Air Lines, Inc., and the Airline Passenger Association.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,[9]
Secretary.

[FR Doc.72-19742 Filed 11-15-72;8:53 am]

[4] Delta has also filed a complaint against American's proposal to match Delta's fares, which American has answered.

[5] These data summarize various traffic and capacity statistics by flight on a monthly basis.

[6] Filed as part of the original document.

[7] Moreover, although not pertinent to disposition of the matter, we have considerable concerns about the restrictions against the application of the fares, e.g., noncombinability, etc.

[8] Filed as part of the original document.

[9] Concurring statement of Murphy, member, filed as part of the original document.

MONTANA AND NORTH DAKOTA AERONAUTICS COMMISSIONS

Notice of Change in Meeting

Notice is hereby given that a meeting with the above Commissions will be held on November 28, 1972, at 2:30 p.m. (local time), in Room 10277, Universal Building, 1825 Connecticut Avenue NW., Washington, DC, to discuss air service needs in Montana and North Dakota. This notice supersedes the one of November 9, 1972 (37 F.R. 23867), which only listed the Montana Aeronautics Commission.

Dated at Washington, D.C., November 13, 1972.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.72-19739 Filed 11-15-72;8:53 am]

FEDERAL COMMUNICATIONS COMMISSION

[FCC 72-1012]

CABLE TELEVISION APPLICATIONS AND PLEADINGS

Revision of Amendment Requirements

NOVEMBER 9, 1972.

On September 14, 1972, the Commission issued a public notice entitled "Amendment Requirements for Pending Cable Television Applications and Pleadings," FCC 72-825, — FCC 2d —. In that notice, the Commission stated which of its amendments to the cable television rules adopted in its "Reconsideration of Cable Television Report and Order," FCC 72-530, 36 FCC 2d 326, would be applied retroactively to applications and pleadings filed before the effective date of the "Reconsideration," July 14, 1972, and which would not.

In that public notice, the Commission stated that § 76.13(b)(2) of the Commission's rules would not apply retroactively. In view of the need for the information contained in FCC Form 325, the Commission has now determined that § 76.13(b)(2) of the rules will be applied retroactively to March 31, 1972. Consequently, all applications filed on or after March 31, 1972, should be amended to supply the information required by § 76.13(b)(2) of the rules.

Action by the Commission November 9, 1972. Commissioners Burch (Chairman), Robert E. Lee, H. Rex Lee, Reid, and Wiley.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.72-19715 Filed 11-15-72;8:50 am]

[Docket No. 16495; FCC 72-992]

DOMESTIC SATELLITE SYSTEM FACILITIES

Procedures for Applications

NOVEMBER 9, 1972.

In response to paragraph 45(b) of the Second Report and Order (Second Report) issued in Docket No. 16495 (35 FCC 2d 844, 860) and the Memorandum Opinion and Order issued on September 14, 1972 (FCC 72-807), the Commission has received statements by the applicants for domestic satellite systems as to their present intentions with respect to pursuing pending applications.

Requests for immediate processing, prior to a resolution of issues raised by pending petitions for reconsideration of the Second Report and related pleadings of the parties, have been received from Western Union Telegraph Co. (Western Union); Hughes Aircraft Co., and GTE Satellite Corp. (Hughes/GTE); American Satellite Corp. (American Satellite), a newly formed corporation owned by Fairchild Industries, Inc. and Western Union International, Inc.; and RCA Global Communications, Inc. and RCA Alaska Communications, Inc. (the RCA applicants). Requests for deferral, pending a resolution of issues raised by pending pleadings or for other reasons, have been received from American Telephone & Telegraph Co. (A.T. & T.); Communications Satellite Corp. (Comsat); MCI Lockheed Satellite Corp. (MCIL); and Western Tele-Communications, Inc. (WTCI).

Immediate processing of system applicants. Processing of those system applicants requesting immediate processing has been commenced. Such processing will proceed on an individual basis, apart from the proceedings in Docket No. 16495, at a pace geared to the speed at which each applicant makes any additional showings or amendments (consistent with the Second Report) that may be required by the Commission or desired by the applicants, and may take account of the preference of the particular applicant as to the order in which various components of its proposed system are processed.[1] Basic findings, required by statute or as a result of the conditions of policy adopted in the Second Report, will be made in conjunction with Commission action on the first applications of each applicant that are considered, whether such applications constitute the entire system proposal of that applicant or only a portion thereof. Any grant will, of course, be fully subject to the outcome of Docket No. 16495 (see Memorandum Opinion and Order in Docket No. 16495 issued on September 14, 1972, FCC 72-807). However, it is not contemplated that parties to Docket No. 16495 will participate in the processing of applications for individual systems, except upon express invitation of the Commission and to the extent indicated in any such invitation.

Deferred processing of system applicants. Processing of those system applicants that have requested deferral will be held in abeyance pending a request by any such applicant for processing. Such request may be made at any time, according to the desires of the particular applicant in the light of evolving circumstances, and may encompass any modifications or amendments to the pending system applications that are consistent with the Second Report or any Commission action taken upon reconsideration. Upon receipt of any such request for processing, processing of the relevant applications will be commenced as promptly as possible, provided that the request is not contingent upon future events and the particular proposal involved is not determined by the Commission to be contrary to the policies adopted in the Second Report or any Commission action taken upon reconsideration.

Earth stations only. Applications for earth stations only, to be operated with space segment facilities owned by another entity subject to the Commission's jurisdiction, will be processed upon request filed after a construction permit for the relevant space segment has been issued. This procedure does not pertain to AT&T and GTE, whose applications for earth stations and other associated terrestrial facilities were filed as an integral part of the proposed system of the space segment applicant. As noted in paragraph 16 of the Memorandum Opinion and Order issued in Docket No. 16495 on September 14, 1972 (FCC 72-807), the Commission has received some informal expression of interest in the possibility of domestic earth stations to be operated on a temporary, experimental basis with the Canadian Telsat system. The statement of intent filed by American Satellite also contemplates this mode of operation for its proposed Phase I. In the event that the Canadian statute governing the Telsat system is amended to permit such use, applications for earth stations to operate in this manner may be submitted for the Commission's consideration. The Commission will resolve any broad policy issues associated with such proposals in conjunction with its action on the first application of this type that is ripe for Commisison consideration.

Orbital arc locations, frequency usage and polarization. The Second Report adopted paragraph 152a of the staff recommendation attached to the Memorandum Opinion and Order issued on March 17, 1972, in Docket No. 16495 which provided as follows (35 FCC 2d at 859; 34 FCC 2d 1, 72-73):

> The assignment of orbital arc locations will be made by subsequent order of the Commission. We will assign orbital locations for satellites authorized to serve Alaska and Hawaii in that portion of the orbital arc that is 5° or more west of the orbital locations that have been selected by Canada and is capable of illuminating those States as well as CONUS. Other authorized satellites will be assigned orbital locations in that portion of the orbital arc that is 5° or more east of the Canadian locations and is capable of illuminating CONUS. The orbital locations for satellites authorized to utilize 4 and 6 GHz frequencies, in whole or in part, will be separated by no more than 3° (or allow for intervening assignments separated by 3°) unless good cause is shown for a wider separation. In assigning orbital arc locations, the Commission would endeavor to make maximum allowance for the authorization of future satellites utilizing 4 and 6 GHz frequencies. The assignment of any orbital location for use by a particular satellite shall not grant the licensee any right to the use of that orbital location for another satellite.[2] Nor shall the initial assignments preclude the Commission from changing orbital location assignments during the life of the initially authorized satellites, as required by the public interest, convenience or necessity.[3]

[1] Applications for terrestrial interconnection facilities for earth stations will not be processed, in any event, until after the relevant earth station sites have been cleared from an interference standpoint.

[2] In determining whether a space segment licensee will be permitted to use the same orbital location for another satellite (such as an existing ground spare) to replace a satellite that has failed short of its design life, the Commission will be guided by the circumstances then prevailing (including the length of time, if any, the failed satellite was operational, the current state of the technology, and the then existing demands on that portion of the orbital arc available for assignment).

[3] In the event that changes in orbital location assignments are found necessary, the Commission will endeavor to make such reassignments in a manner which will be least prejudicial to the affected licensees, all relevant factors considered.

The assignment of orbital arc locations, including specification of frequency

quent applications are subject to the filing as well as the grant fees.

Action by the Commission November 8, 1972. Commissioners Burch (Chair-

Upon approval, the agreement is to remain in effect for a period of 1 year from the date of such approval, with the right

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,

The purpose of exchanging this information is to explore the possibility of establishing a rate agreement to be filed

V 37-222 NOV 16 72 XUM

The assignment of orbital arc locations, including specification of frequency usage and polarization, will be made by the Commission after it has been finally determined, inter alia, upon consideration of the petitions for reconsideration, what domestic system or systems will be initially designated to provide service to Alaska and Hawaii.

Section 214 authorization. In the 1970 Report and Order in Docket No. 16495 inviting the submission of concrete applications to assist the Commission in formulating policy in the domestic satellite field, the Commission stated that potential common carrier applicants should request certification pursuant to section 214 of the Communications Act as well as make application for construction permits under title III (22 FCC 2d 86, 99 at paragraph 32). The pending system applications submitted in response to that invitation are very voluminous and only a limited number of copies were filed pursuant to paragraph 38 of the 1970 Report (22 FCC 2d at 103). Before processing of such applications is completed and any section 214 authorization is issued, the Commission must be furnished with sufficient copies of the application for certification pursuant to section 214 to enable it to comply with the service requirements of section 214(b).

Common carrier applicants for domestic satellite facilities that have already requested processing, or that in the future request processing, should submit (or resubmit) applications for Section 214 certification, separately from the applications for construction permits, in the form and with the number of copies specified by §§ 63.52 and 63.53 of the Commission's rules and regulations. Such separate application need not be accompanied by additional copies of the applications for construction permits, but should include a descriptive summary of the proposed system and the facilities for which application has been made, as well as the information specified in § 63.01 of the rules to the extent practicable. In the event that it appears to any applicant that some of the information specified by § 63.01 is not relevant to applications for facilities of this nature or should be submitted at some later stage (e.g., § 63.01(h)), a statement to that effect with supporting reasons will be sufficient for initial processing. Further, for good cause shown, construction permits may be issued prior to section 214 authorization, subject to the usual conditions. All necessary section 214 authorization will be required prior to the grant of authority to commence operations.

Filing fees. Pursuant to paragraph 38 of the 1970 Report in Docket No. 16495 and § 1.1113 (footnote 7) of the Commission's rules and regulations, and filing fees specified in the schedule for satellite communications services do not apply to initial applications for domestic systems to be considered in conjunction with that of Western Union in Docket No. 16495. However, the grant fees are applicable to any grant, and all subsequent applications are subject to the filing as well as the grant fees.

In light of the Commission's conclusions in paragraphs 16 and 17 of the Second Report, which have not been challenged in the petitions for reconsideration, the applications accepted for filing for consideration in conjunction with that of Western Union in Docket No. 16495 will now be processed on an individual basis. In order to avoid, insofar as practicable, placing those pending applicants who have already filed amendments in a disparate position as compared to those who have deferred filing amendments, we will treat the question of filing fees as follows.

The applicable grant fees will be charged for the authorization of any and all domestic satellite facilities. There will be no filing fee for amendments to facilities that were timely filed and accepted for consideration in Docket No. 16495. This exception includes amendments filed by new corporations or other entities that are successors in interest to the position of pending applicants before the Commission. However, where any amendment proposes new facilities, e.g., an additional earth station or space station, the filing fees will apply. Further, where any amendment constitutes in essence a proposal for a new system, with basically different facilities from those proposed in the pending applications, the filing fees will apply. New applications, submitted by new or pending applicants, will be subject to the filing fees.

Further processing procedures. The foregoing comprises the public notice concerning processing procedures contemplated by footnote 11 to paragraph 43(b) of the Second Report. As recognized in paragraph 15 of the Second Report, the "initial implementation of domestic satellites does not confront us with a normal or routine situation" and some "departure from conventional standards may be required if the public is to realize the potential benefits of this high capacity technology" (35 FCC 2d at 849–850). Rather than attempting to delineate in advance the kind of showings that may be required on such questions as financial qualification or the absence of potential burden or detriment to customers for essential communications services now provided by common carrier applicants, we think it preferable to consider the case of each applicant individually on the basis of its particular circumstances. In the course of processing, each applicant will be advised of any further information that may be required and of any additional procedures that appear appropriate in its instance. Should any question of general applicability arise in course of processing which appears to warrant clarification for the benefit of pending and/or future applicants, the Commission may issue a further public notice concerning processing procedures or take such other appropriate measures as in its judgment would best serve the public interest.

Action by the Commission November 8, 1972. Commissioners Burch (Chairman), Robert E. Lee, Johnson, H. Rex Lee, Wiley and Hooks, with Commissioner Reid concurring.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

FEDERAL MARITIME COMMISSION

AMERICAN EXPORT LINES, INC., ET AL.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

D. G Aldridge, executive vice president, United States Lines, Inc., 1 Broadway, New York, NY 10004.

Agreement No. 10022, among the above-named carriers, establishes the United States/Europe Discussion Agreement for the development and interchange of information relating to cargo movements, shipper requirements, cost of service, tariff rates and rules, practices in connection with the receipt and delivery of cargo and interchange with connecting land carriers with respect to the trades between Europe and all coasts of the United States.

Upon approval, the agreement is to remain in effect for a period of 1 year from the date of such approval, with the right to seek approval for an additional 6 months. No substantive agreement deriving from the discussions conducted is to be implemented unless filed with and approved by the Federal Maritime Commission.

Dated: November 13, 1972.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

AMERICAN GREAT LAKES-MEDITERRANEAN EASTBOUND FREIGHT CONFERENCE

Notice of Petition Filed

Notice is hereby given that the following petition has been filed with the Commission for approval pursuant to section 14b of the Shipping Act, 1916, as amended (75 Stat. 762, 46 U.S.C. 814).

Interested parties may inspect a copy of the proposed contract form and of the petition at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015, or at the field offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to the proposed contract form and the petition including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, 1405 I Street NW., Washington, DC 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed contract system shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the proposed contract form and the petition (as indicated hereinafter), and the statement should indicate that this has been done.

Notice of agreement filed by:

Stanley O. Sher, Esq., Bebchick, Sher & Kushnick, 919 18th Street NW., Washington, DC 20006.

The American Great Lakes-Mediterranean Eastbound Conference, Agreement No. 9000, has filed an application for permission to institute an exclusive patronage (dual rate) contract system pursuant to section 14b of the Shipping Act, 1916.

Dated: November 13, 1972.

By order of the Federal Maritime Commission.

UNIVERSAL ALCO LTD. ET AL.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. Lebron Shields, Vice President, Universal Alco Ltd., 1001 North America Way, Dodge Island, Miami, FL 33132.

Agreement No. 10021, among Universal Alco Ltd., Tropical Shipping & Construction Co., Ltd., and Norwegian Caribbean Lines, common carriers by water operating in the trade between Florida ports and ports in the Bahama Islands provides for the establishment of a cooperative working agreement whereby the carriers agree to exchange information and to cooperate in developing information relating to:

1. Freight rates, handling charges, equipment demurrage charges and practices, warehousing and storage charges, and related data bearing on the rate structure of common carrier steamship services required by shippers;

2. Cost of service and tariff rules;

3. Practices in connection with the receipt and delivery of cargo and pickup and delivery charges including interchange with connecting land carriers and all other procedures outlined in their respective tariffs.

The purpose of exchanging this information is to explore the possibility of establishing a rate agreement to be filed with the Federal Maritime Commission for approval at a later date. Nothing in the agreement authorizes the parties thereto to carry out any substantive agreement which may be reached except upon the prior approval of the Commission. The agreement shall remain in effect for 1 year, however, its duration may be extended with the Commission's approval. It shall be canceled if a rate agreement is finally submitted and subsequently approved by the Commission.

Dated: November 13, 1972.

By order of the Federal Maritime Commission.

Order of Revocation

Certificate of financial responsibility for indemnification of passengers for nonperformance of transportation No. P-9 and certificate of financial responsibility to meet liability incurred for death or injury to passengers or other persons on voyages No. C-1,016.

Whereas, N.V. Nederlandsch-Amerikaansche Stoomvaart-Maatschappij "Holland-Amerika Lijn" (Holland-America Line) Pier 40, North River, New York, NY 10014, has ceased to operate the passenger vessel *Ryndam*; and

Whereas, N.V. Nederlandsch-Amerikaansche Stoomvaart-Maatschappij "Holland-Amerika Lijn" (Holland-America Line) has returned Certificate (Performance) No. P-9 and Certificate (Casualty) No. C-1,016 for revocation.

It is ordered, That Certificate (Performance) No. P-9 and Certificate (Casualty) No. C-1,016 covering the S.S. *Ryndam* be and are hereby revoked effective November 7, 1972.

It is further ordered, That a copy of this order be published in the FEDERAL REGISTER and served on the certificant.

By the Commission:

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Project 2205]

CENTRAL VERMONT PUBLIC SERVICE CORP.

Notice of Application for Change in Land Rights

NOVEMBER 9, 1972.

Public notice is hereby given that an application was filed September 1, 1972, under the Federal Power Act (16 U.S.C. 791a-825r) by the Central Vermont Public Service Corp. (Correspondence to: Mr. Donald L. Rushford, General Counsel, Central Vermont Public Service Corp., 77 Grove Street, Rutland, VT 05701) for the approval of change in land rights for the Lamoille River Project No. 2205, located on the Lamoille River, a navigable waterway of the United States, in Franklin County, Vt.

Commission approval is sought for the granting of an easement to the State of Vermont Highway Department by the Central Vermont Public Service Corporation, licensee. The easement would give the Highway Department drainage rights over a parcel of land 0.35 acre in size located between State Highway 104A and the north shore of Arrowhead Mountain Lake on the Lamoille River. The purpose of the easement is to widen a railroad underpass, which has been the scene of numerous accidents, from one to two lanes. At present, the road narrows at the underpass. Rockfill necessary to stabilize a sloped area after the widening would encroach 15 to 20 feet into Arrowhead Mountain Lake and would affect approximately 250 feet of a 10 mile shoreline.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 29, 1972, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.72-19722 Filed 11-15-72;8:50 am]

[Docket No. CI73-333]

DORCHESTER EXPLORATION, INC.

Notice of Application

NOVEMBER 13, 1972.

Take notice that on November 6, 1972, Dorchester Exploration, Inc. (Applicant), 1204 Vaughn Building, Midland, Tex. 79701, filed in Docket No. CI73-333 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Natural Gas Pipeline Co. of America in Eddy County, N. Mex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell up to 2,000 Mcf of natural gas per day at 35.0 cents per Mcf at 14.65 p.s.i.a. for 1 year within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before November 24, 1972, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any

person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CS71-828]

DOROTHEA B. PRENTISS

Notice of Redesignation

NOVEMBER 10, 1972.

By letter of September 11, 1972, Dorothea B. Prentiss has advised the Commission that as the sole beneficiary under the will of her deceased husband, W. P. Prentiss, she has been placed in possession of his estate by probate court orders and requests that the Commission redesignate the small producer certificate issued in Docket No. CS71-828 to the estate of W. P. Prentiss.

Accordingly, the small producer certificate of public convenience and necessity issued pursuant to section 7(c) of the Natural Gas Act in Docket No. CS71-828 to the estate of W. P. Prentiss is redesignated as that of Dorothea B. Prentiss.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RI73-81, etc.]

HUMBLE OIL & REFINING CO., ET AL.

Order Providing for Hearing on and Suspension of Proposed Changes in Rates, and Allowing Rate Changes to Become Effective Subject to Refund [1]

NOVEMBER 9, 1972.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR Ch. I), and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

The proposed increases of Humble under its FPC Gas Rate Schedule Nos. 132, 134, 345, 362, 403, 411, 443, and 447, and the proposed increase of Pubco Petroleum Corp., do not exceed the rate limits for a 1-day suspension and are suspended for 1 day from the expiration of the 60-day notice period. The other increases involved here exceed the rate limits for a 1-day suspension and are suspended for 5 months from the expiration of the statutory notice period or the contractual effective date, whichever is later.

The producers' proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR 2.56).

CERTIFICATION OF ABBREVIATED SUSPENSION

Pursuant to § 300.104(d)(3) of the Price Commission rules and regulations, 6 CFR Part 300 (1972), the Federal Power Commission certifies as to the abbreviated suspension period in this order as follows:

(1) This proceeding involves producer rates which are established on an area rather than company basis. This practice was established by Area Rate Proceeding, Docket No. AR61-1, et al., Opinion No. 468, 34 FPC 159 (1965), and affirmed by the Supreme Court in Permian Basin Area Rate Case, 390 U.S. 747 (1968). In such cases as this, producer rates are approved by this Commission if such rates are contractually authorized and are at or below the area ceiling.

(2) In the instant case, the requested increases do not exceed the ceiling rate for a 1-day suspension.

(3) By Order No. 423 (36 F.R. 3464) issued February 18, 1971, this Commission determined as a matter of general policy that it would suspend for only 1 day a change in rate filed by an independent producer under section 4(d) of the Natural Gas Act (15 U.S.C. 717c(d)) in a situation where the proposed rate exceeds the increased rate ceiling, but does not exceed the ceiling for a 1-day suspension.

(4) In the discharge of our responsibilities under the Natural Gas Act, this Commission has been confronted with conclusive evidence demonstrating a natural gas shortage. (See Opinion Nos. 595, 598, and 607, and Order No. 435). In these circumstances and for the reasons set forth in Order No. 423 the Commission is of the opinion in this case that the abbreviated suspension authorized herein will be consistent with the letter and intent of the Economic Stabilization Act of 1970, as amended, as well as the rules and regulations of the Price Commission, 6 CFR Part 300 (1972). Specifically, this Commission is of the opinion that the authorized suspension is required to assure continued, adequate, and safe service and will assist in providing for necessary expansion to meet present and future requirements of natural gas.

INDIANA & MICHIGAN ELECTRIC CO.

[Docket No. E-7740]

Notice of Extension of Time

NOVEMBER 10, 1972.

On November 8, 1972, Commission staff counsel filed a motion for a postponement of the procedural dates established by the order issued August 11, 1972, in the above-designated matter. The dates proposed by staff counsel are as follows:

Staff service date	Dec. 14, 1972
Prehearing conference	Jan. 3, 1973
Intervener service date	Jan. 11, 1973
I & M rebuttal service date	Jan. 25, 1973
Hearing date	Feb. 6, 1973

The motion states that all parties have been contacted and raise no objection to the proposed staff service date of December 14, 1972, and the proposed prehearing conference date of January 3, 1973, and all but one agree with the remaining proposed dates. The Indiana and Michigan Municipal Distributor Group (IMMDG) objects to the last three dates and requests a further extension of time as follows:

Intervener service date	Jan. 16, 1973
I & M rebuttal service date	Jan. 30, 1973
Hearing date	Feb. 13, 1973

The motion further requests the tentative adoption of the proposed dates and that action be deferred on the request by IMMDG until all parties have had an opportunity to answer.

Upon consideration, notice is hereby given that:

(1) The procedural dates fixed by the order issued August 11, 1972, are postponed as follows:

Staff service date	Dec. 14, 1972
Prehearing conference	Jan. 3, 1973

(2) Answers may be filed on or before November 17, 1972, to the requested modification of the date for the service of evidence by interveners, the date for the service of rebuttal evidence by Indiana and Michigan Electric Co., and the date for the commencement of the hearing. Action with respect to those dates is deferred until after November 17, 1972.

[Docket No. CS68-1]

KKA CORP.

Notice of Redesignation

NOVEMBER 10, 1972.

By letter dated September 1, 1972, KKA Corp. has advised the Commission that it has undergone a corporate name change from Aminl Oil Corp. to KKA Corp.

Accordingly the small producer certificate of public convenience and necessity issued pursuant to section 7(c) of the Natural Gas Act in Docket No. CS68-1 to Aminl Oil Corp. is redesignated as that of KKA Corp.

[Docket No. RP72-110]

McCULLOCH INTERSTATE GAS CORP.

Notice of Filing of Proposed Stipulation and Agreement

NOVEMBER 10, 1972.

Pursuant to § 1.36(a) of the Commission's rules of practice and procedure, notice is hereby given that on November 1, 1972, McCulloch Interstate Gas Corp. (McCulloch) filed a proposed stipulation and agreement setting forth settlement of the proceedings in the above-styled docket.

On May 1, 1972, McCulloch Interstate tendered for filing proposed changes in its Rate Schedule PL-1 and Second Revised Sheet No. 11 to its FPC Gas Tariff Original Volume No. 1 to become effective on June 1, 1972. The proposed rates applicable to deliveries to Colorado Interstate Gas. Co. (McCulloch Interstate's only gas customer reselling gas in interstate commerce) constituted an increase in revenues of 2.69 cents per Mcf, or approximately $589,000 annually, based upon average estimated sales of 60,000 Mcf per day for the twelve (12) months ending December 31, 1971, as adjusted. This increase in revenues reflected an increase in rate of return to 9.62 percent and an increase in depreciation rate to 8.33 percent. The proposed increased rates became effective November 1, 1972, subject to refund.

The settlement agreement provides, inter alia, for a rate of return of 9.1875 percent and a rate of depreciation of 5.75 percent. The revenues under the settlement agreement would be 1.70 cents per Mcf, or approximately $372,300 annually.

The settlement agreement is on file with the Commission and is available for public inspection. Comments with respect to the settlement agreement may be filed with the Commission on or before November 24, 1972.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-149]

MISSISSIPPI RIVER TRANSMISSION CORP.

Notice Postponing Prehearing Conference and Extending Time

NOVEMBER 10, 1972.

On October 24, 1972, the Missouri Public Service Commission filed a motion to postpone the prehearing conference from November 28, 1972, to December 5, 1972, for the reason that the date of November 28, 1972, conflicts with the NARUC Annual Convention. On November 6, 1972, Mississippi River Transmission Corp. filed an answer, stating that it does not oppose the motion but, that if the prehearing conference is to be postponed, it be postponed to at least December 12, 1972. On November 9, 1972, Laclede Gas Co. filed an answer stating that it has no objection to the December 12, 1972 date, but requests that the other scheduled dates be changed. The letter states that counsel for Mississippi River Transmission Corp., and Commission staff concur.

Upon consideration, notice is hereby given that the procedural dates fixed by the order of the Chief Administrative Law Judge on October 11, 1972, are changed as follows:

(1) The prehearing conference is postponed to December 12, 1972, at 10 a.m., e.s.t.

(2) Intervenors' evidence to be filed and served on or before December 28, 1972.

(3) Applicant's rebuttal evidence to be filed and served on or before January 12, 1973.

(4) The hearing is postponed to January 23, 1973, at 10 a.m., e.s.t.

KENNETH F. PLUMB,
Secretary.

[Docket No. CS72-739]

SOUTHERN HYDROCARBONS PRODUCTION CO., INC.

Notice of Redesignation

NOVEMBER 10, 1972.

By letter dated August 5, 1972, Southern Hydrocarbons Production Co., Inc., has informed the Commission that by amendment to the Articles of Incorporation, effective July 26, 1972, the corporate name of Sohyde Production Co., Inc., holder of a small producer certificate in Docket No. CS72-739, was changed to Southern Hydrocarbons Production Co., Inc.

Accordingly, the small producer certificate of public convenience and necessity issued pursuant to section 7(c) of the Natural Gas Act in Docket No. CS72-739 to Sohyde Production Co., Inc., is redesignated as that of Southern Hydrocarbons Production Co., Inc.

FEDERAL RESERVE SYSTEM

FIRST ARKANSAS BANKSTOCK CORP.

Notice of Amended Application

First Arkansas Bankstock Corp., Little Rock, Ark., has amended its application, filed pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of L. E. Lay & Co., Inc., Little Rock, Ark. Notice of the application was originally published in the FEDERAL REGISTER on September 12, 1972 (37 F.R. 18496).

The proposed subsidiary would engage in the activities of making or acquiring for its own account or for the account of others real estate mortgage loans and servicing such loans. Other activities would include acting as an insurance agent or broker with respect to insurance that is directly related to an extension of credit or the performance of other financial services by L. E. Lay & Co., Inc. Applicant states that substantially all of the insurance policies of L. E. Lay written to date have been accident and health or life insurance policies written in connection with the mortgages originated or brokered by L. E. Lay & Co., Inc. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

The effect of the amendment is to request separate Board consideration and authorization for the mortgage banking and insurance agency activities. Interested persons may express their views on the question whether consummation of the proposals can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis. Comments on the applications including any views or request for hearings should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than November 22, 1972.

Board of Governors of the Federal Reserve System, November 9, 1972.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary of the Board.

OAKLAND BANSHARES, INC.

Formation of Bank Holding Company and Proposed Retention of Insurance Agency

Oakland Banshares, Inc., Oakland, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 95.45 percent of the voting shares of Oakland Savings Bank, Oakland, Iowa. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Oakland Banshares, Inc., has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to retain the assets of Spencer Insurance Agency, Oakland, Iowa. Notice of the application was published on August 17, 1972, in The Oakland Acorn, a newspaper circulated in Oakland, Iowa.

Applicant states that it engages in the activities of a general insurance agency in a community of less than 5,000 people. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 224.4(b).

Interested persons may express their views on the question whether consummation of the proposal under section 4(c)(8) can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than December 6, 1972.

Board of Governors of the Federal Reserve System, November 9, 1972.

ORBANCO, INC.

Proposed Acquisition of Far West Securities Co.

Orbanco, Inc., Portland, Oreg., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Far West Securities Co., Spokane, Wash. Notices of the application were published on October 2, 1972, in the Spokane Daily Chronicle, a newspaper circulated in Spokane, Wash., and on October 5, 1972, in the Tri-City Herald, a newspaper circulated in Kennewick, Wash.

Applicant states that the proposed subsidiary would engage in the following activities: Making or acquiring for its own account or for the account of others, loans and other extensions of credit; and acting, directly or indirectly, as insurance agent or broker for insurance that is directly related to an extension of credit by any subsidiary of the Applicant. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than December 6, 1972.

Board of Governors of the Federal Reserve System November 9, 1972.

POSTAL SERVICE

BUILDINGS AND GROUNDS; SURPLUS REAL PROPERTY

Management and Disposal; Restatement of Interim Regulations

In the daily issue of February 1, 1972 (37 F.R. 2471), the Postal Service published a notice adopting certain regulations codified in Title 41, Code of Federal Regulations, including regulations relating to conduct on Federal property, as interim regulations of the U.S. Postal Service. This was amended by publication of a notice in the daily issue of March 21, 1972 (37 F.R. 5776). Notice is hereby given that the regulations, "Conduct on Postal Property" set out elsewhere in this issue, are adopted as permanent regulations of the Postal Service, effective upon publication.

Accordingly, the notice published February 1, 1972 is revised to read as follows:

1. Part 101-19—Management of Buildings and Grounds, of Title 41, Code of Federal Regulations, except Subpart 101-19.3—Conduct on Federal Property, and Subpart 101-19.4—Standard Practices for Financing, shall apply, as modified below, to the management of buildings and grounds owned and leased by the Postal Service. Financing of the operation and maintenance of buildings and grounds occupied jointly by the Postal Service and other agencies shall be provided for by agreements between the other occupying agencies, or the General Services Administration, and the Postal Service.

The authorities and responsibilities vested in the General Services Administration and the Administrator of General Services by Part 101-19 with regard to Government-owned and Government-leased buildings and grounds are vested hereby in the U.S. Postal Service with regard to Postal Service-owned and Postal Service-leased buildings and grounds. Any reference in Part 101-19 to "GSA," "General Services Administration," or "Administrator" shall be construed in a manner consistent with the preceeding sentence for the purpose of applying Part 101-19 to Postal Service-owned and Postal Service-leased buildings and grounds. Any reference in Part 101-19 to "Federal" building(s) or to "building(s)," shall be construed to mean "Postal Service" building(s).

2. The sections listed below contained in Subpart 101-47.3—Surplus Real Property Disposal, Subpart 101-47.49—Illustrations, of Title 41, Code of Federal Regulations, shall apply, except as noted, to the management and disposal of surplus real property by the Postal Service:

Sec.	
101-47.303-3	Studies.
101-47.303-4	Appraisal.
101-47.304-1	Publicity.
101-47.304-2	Soliciting cooperation of local groups.
101-47.304-3	Information to interested persons.
101-47.304-4	Invitation for offers.
101-47.304-5	Inspection.
101-47.304-6	Submission of offers.
101-47.304-7	Advertised disposals.
101-47.304-8	Report of identical bids.
101-47.304-9	Negotiated disposals; except that paragraph (a)(5) shall not apply.
101-47.304-10	Disposals by brokers.
101-47.304-11	Documenting determinations to negotiate.
101-47.304-12	Explanatory statements; except that subsections (d), (e), and (f) shall not apply.
101-47.305-1	General.
101-47.305-2	Equal offers.
101-47.305-3	Notice to unsuccessful bidders.
101-47.306-1	Negotiations.
101-47.307-1	Form of deed or instrument of conveyance.
101-47.307-2	Conditions in disposal instruments.
101-47.309	Disposal of leases, permits, licenses, and similar instruments.
101-47.310	Disposal of structures and improvements on Government-owned land.
101-47.312	Non-Federal interim use of property.
101-47.313-1	Disposal of easements to owner of servient estate.
101-47.313-2	Grants of easements in or over Government property.
101-47.400	Scope of subpart.
101-47.401-1	Policy.
101-47.401-2	Definitions.
101-47.401-5	Improvements or alterations.
101-47.4911	Outline for explanatory statements for negotiated sales.
101-47.4913	Outline for protection and maintenance of excess and surplus real property.

The authorities and responsibilities vested in the General Services Administration and the Administrator of General Services under the above-listed sections are vested in the U.S. Postal Service for the purpose of applying the sections to the management and disposal of surplus real property by the Postal Service. Any reference in the sections to "GSA," "General Services Administration," "Administrator," "disposal agency," "head of the disposal agency," or "holding agency," shall be construed, for the purpose of applying the sections to the management and disposal of surplus real property by the Postal Service, to refer to the U.S. Postal Service. Any reference in the sections to "surplus real property" shall be construed, for the purpose of applying the sections to the management and disposal of real property by the Postal Service, to include any property of the Postal Service which is determinded to be excess to the needs of the Postal Service.

(39 U.S.C. 401, 410, 2008(c))

ROGER P. CRAIG,
Deputy General Counsel.

NATIONAL ADVISORY COUNCIL ON SUPPLEMENTARY CENTERS AND SERVICES

NOTICE OF PUBLIC MEETING

Notice is hereby given, pursuant to Executive Order 11671, that the next meeting of the National Advisory Council on Supplementary Centers and Services will be held on December 8 and 9, 1972, at 9 a.m., in Room 800, 2100 Pennsylvania Avenue NW., Washington, DC.

The National Advisory Council on Supplementary Centers and Services is established under section 309 of Public Law 91-230. The Council is directed to:

(1) Review the administration of, general regulations for, and operation of this title, including its effectiveness in meeting the purposes set forth in section 303;

(2) Review, evaluate, and transmit to the Congress and the President the reports submitted pursuant to section 305(a)(2)(E);

(3) Evaluate programs and projects carried out under this title and disseminate the results thereof; and

(4) Make recommendations for the improvement of this title, and its administration and operation.

The meeting of the Committee shall be open to the public. The proposed agenda includes a discussion of the annual report of the Council. Records shall be kept of all Council proceedings (and shall be available for public inspection at the office of the Council's Executive Secretary, located in Room 818, 2100 Pennsylvania Avenue NW., Washington, DC).

Signed at Washington, D.C., on November 10th, 1972.

GERALD J. KLUEMPKE,
Executive Secretary.

[FR Doc.72-19738 Filed 11-15-72;8:51 am]

SECURITIES AND EXCHANGE COMMISSION

[70-5259]

MIDDLE SOUTH UTILITIES, INC., ET AL.

Proposed Issue and Sale of Notes

NOVEMBER 10, 1972.

In the matter of Middle South Utilities, Inc., 280 Park Avenue, New York, NY 10017; System Fuels, Inc., 225 Baronne Street, New Orleans, LA 70112; Arkansas Power & Light Co., Ninth and Louisiana Streets, Little Rock, AR 72203; Louisiana Power & Light Co., 142 Delaronde Street, New Orleans, LA 70174; Mississippi Power & Light Co., Electric Building, Jackson, Miss. 39205; New Orleans Public Service Inc., Post Office Box 60340, New Orleans, LA 70160.

Notice is hereby given that Middle South Utilities, Inc. (MSU), a registered holding company, its public utility subsidiary companies, Arkansas Power & Light Co. (AP&L), Louisiana Power & Light Co. (LP&L), Mississippi Power & Light Co. (MP&L) and New Orleans Public Service, Inc. (NOPSI) (collectively referred to as "Operating Companies"), and System Fuels, Inc. (SFI), a joint nonutility subsidiary company of Operating Companies, have filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating sections 6(a), (7), 12(b), and 12(f) and Rules 45 and 50(a)(2) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

By order dated December 17, 1971 (Holding Company Act Release No. 17400), the Commission authorized Operating Companies to organize a new jointly owned subsidiary company, SFI, to plan and implement programs for the procurement of fuel supplies for the generating units of Operating Companies.

SFI estimates that to assure the availability to Operating Companies of an adequate supply of fuel, SFI will be required to invest approximately $100 million in fuel supply programs during the next 5 years. SFI proposes to finance its investments in fuel supply programs by the issuance and sale of its notes to banks from time to time prior to December 31, 1973, in an aggregate principal amount not to exceed $100 million outstanding at any one time. The notes will be issued pursuant to a credit agreement between SFI and a group of banks to be selected by SFI. The notes will mature not more than 5 years after the date of issuance and will bear interest at the prime commercial rate in effect from time to time. The notes will be prepayable at any time without premium.

SFI proposes to enter into a fuel supply agreement with each Operating Company pursuant to which SFI will undertake to provide fuel supply programs for the Operating Company and the Operating Company will undertake to pay SFI amounts sufficient to enable SFI to meet its obligations under the credit agreement. Each fuel supply agreement will provide that the Operating Company will pay SFI a fee for its services in connection with the fuel supply program. The fee will be determined by the Operating Company's proportionate share of the total investment in fuel supply programs by all Operating Companies.

Fees and expenses in connection with the proposed transactions are estimated at $50,000, including $10,000 for counsel fees. The declaration states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than fifteen (15) days from the date of publication

or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the address specified above, a request for a hearing thereon, which request should state the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, said declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further action in this matter. Any such request will not be effective to grant such person a hearing upon the declaration unless specifically so ordered by the Commission. Any such person may be heard in person or by counsel at any such hearing.

It appears to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that the applicants-declarants be permitted to file an amendment to the declaration herein not later than December 31, 1972, and that the Commission's jurisdiction be reserved over the proposed transactions, and that the declaration shall not become effective except pursuant to a further order of the Commission.

Notice is further given that any interested person may, not later than December 31, 1972, request that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said amendment which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after December 31, 1972, said declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further action in this matter. Any such request will not be effective to grant such person a hearing upon the declaration unless specifically so ordered by the Commission. Any such person may be heard in person or by counsel at any such hearing.

It is ordered, That the Commission's jurisdiction be reserved over the proposed transactions, and that the declaration shall not become effective except pursuant to a further order of the Commission.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] NELLYE A. THORSEN,
Assistant Secretary.

[FR Doc.72-19676 Filed 11-15-72;8:47 am]

XUM
V37-222-NOV16-72
XUM

SFI estimates that to assure the availability to Operating Companies of an adequate supply of fuel oil, it will be necessary for SFI to maintain an inventory of fuel oil varying between 1 million barrels and 3 million barrels, depending upon the requirements of Operating Companies as estimated from time to time. The maximum cost of the inventory fuel oil to be held in storage by SFI is estimated at approximately $12 million.

To finance the maintenance of the requisite inventory of fuel oil through December 31, 1974, SFI proposes to issue and sell its unsecured promissory notes (Notes), in an aggregate amount not exceeding $12 million outstanding at any one time, to The Hibernia National Bank in New Orleans (Hibernia) from time to time for a period of 2 years from the date of an agreement (Loan Agreement) among Hibernia, SFI, Operating Companies, and MSU.

A group of nine banks (Participating Banks) will participate to the extent of 80 percent of borrowings made under the Loan Agreement. The participation of each Participating Bank in the maximum borrowings under the Loan Agreement will be as follows:

Participating Bank	Participation in total $12,000,000 borrowing	
	Percent	Amount
Whitney National Bank of New Orleans, La.	20	$2,400,000
First National Bank of Commerce of New Orleans, La.	15	1,800,000
National American Bank of New Orleans, La.	10	1,200,000
Deposit Guaranty National Bank, Jackson, Miss.	10	1,200,000
First National Bank of Jackson, Miss.	10	1,200,000
First National Bank in Little Rock, Ark.	6	720,000
Commercial National Bank, Little Rock, Ark.	4	480,000
Simmons First National Bank of Pine Bluff, Ark.	3	360,000
Mississippi Bank & Trust Co., Jackson, Miss.	2	240,000
Total	80	9,600,000

Hibernia's participation in the total borrowings will be the balance of 20 percent, or $2,400,000.

The Notes will be dated as of the date of borrowing, and will mature 2 years from the date of the Loan Agreement with acceleration upon the happening of certain specified acts of default. Each note will bear interest, payable quarterly, at a rate per annum of three-quarters of 1 percent plus the average rate in effect at the three commercial banks having the largest participations in the borrowings for prime commercial loans of 90-day maturities. Adjustments are to be made from time to time, to reflect any change in such average prime commercial loan rates, any such adjustment to become effective on the first day of the month following the month in which any such change in the average occurs. The Notes will be prepayable at any time without premium or penalty, and are to be guaranteed by MSU as to principal and interest. Operating Companies will covenant and agree that, unless otherwise consented to by Hibernia, any existing or future indebtedness of SFI to any or all of them will be made subordinate as to interest and principal with respect to any promissory notes issued by SFI under the Loan Agreement: *Provided, however,* That so long as SFI is not in default of any of its obligations under the Loan Agreement, it may duly pay interest on such subordinated indebtedness and repay principal of any such indebtedness incurred for purchase of capital assets, so long as no proceeds from the Notes are used for such repayments.

It is stated that on or before September 30, 1974, a program for the financing of the fuel oil inventory after expiration of the Loan Agreement will be formulated by SFI and, to the extent necessary, will be the subject of future filings with the Commission.

Pursuant to the aforementioned Commission order of December 17, 1971, SFI may borrow from Operating Companies, from time to time through 1973, an aggregate amount not to exceed $30 million outstanding at any one time, for terms of not more than 10 years. SFI has represented it will at all times, unless the Commission shall otherwise expressly authorize, maintain the aggregate of its capital stock, surplus, and principal amount of its indebtedness to Operating Companies, at an amount equal to at least 35 percent of SFI's total capitalization.

Fees and expenses to be paid in connection with the proposed transactions are estimated at $8,500, including counsel fees of $6,000 and $500 for administrative services, at cost, performed by the system service company, Middle South Services, Inc. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than December 5, 1972, request in writing that a hearing be held in respect of such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective in the manner provided by Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof, or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[811-1374]

SECOND FEDERAL STREET FUND, INC.

Application for Order Declaring That Company Has Ceased To Be an Investment Company

NOVEMBER 10, 1972.

Notice is hereby given that the Second Federal Street Fund, Inc. (Second Federal), 225 Franklin Street, Boston, Mass. 02110, a Massachusetts corporation registered under the Investment Company Act of 1940 (Act) as a diversified, open-end management investment company, has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that Second Federal has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein which are summarized below.

Second Federal asserts, among other things, that on September 13, 1972, it was merged with and into Federal Street Fund, Inc. (Federal), a Massachusetts corporation also registered under the Act as a diversified, open-end management investment company; that said merger was accomplished in accordance with Massachusetts law; that Federal remains as the surviving corporation; that Second Federal has not engaged in any business and has no securities outstanding; and that it has ceased to have a corporate existence through its merger with and into Federal.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than December 7, 1972, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally

or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Company Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area 954]

ARIZONA

Declaration of Disaster Loan Area

Whereas, it has been reported that during the month of October 1972, because of the effects of excessive rainfall and flooding, damage resulted to property located in the State of Arizona;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act, as amended.

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b) of the Small Business Act (15 U.S.C. 636(b)) as amended, may be received and considered by the office below indicated from persons or firms whose property situated in or adjacent to Graham and Greenlee Counties, Ariz., suffered damage or destruction resulting from excessive rainfall and flooding from October 18 through 22, 1972.

OFFICE

Small Business Administration District Office, 112 North Central Avenue, Phoenix, AZ 85004.

2. Temporary offices will be established at such areas as are necessary, addresses to be announced locally.

3. Applications for disaster loans under the authority of this declaration will not be accepted subsequent to January 31, 1973.

Dated: October 27, 1972.

THOMAS S. KLEPPE, *Administrator.*

[FR Doc.72-19682 Filed 11-15-72;8:47 am]

[License No. 09/09-0162]

BRENTWOOD ASSOCIATES, INC.

Notice of Application for a Licensee as a Small Business Investment Company

Notice is hereby given concerning the filing of an application with the Small Business Administration (SBA) pursuant to § 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1972)) under the name of Brentwood Associates, Inc., 11661 San Vicente Boulevard, Los Angeles, CA 90049, for a license to operate in the State of California as a small business investment company under the provisions of the Small Business Investment Act of 1958 (Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors, and principal stockholders are:

Frederick J. Warren, 12319 19th Helena Drive, Los Angeles, CA 90063, Chairman of the Board of Directors.

Berge K. Hagopian, 11048 Cashmere Street, Los Angeles, CA 90049, Vice President and Director.

Timothy M. Pennington III, 1101 North Bundy Drive, Los Angeles, CA 90049, President, Treasurer, and Director.

Susan S. Kaplan, 6402 Graves Avenue, Van Nuys, CA 91406, Secretary.

Brentwood Associates, 11661 San Vicente Boulevard, Los Angeles, CA 90049, 100 percent.

Brentwood Associates (the applicant's parent), is a California limited partnership engaged in the business of venture capital investment. The voting securities of Brentwood Associates are held by its two general partners who will be two of the three directors of the applicant and two of its three officers. An employee of Brentwood Associates will be the applicant's third director and president.

In addition to the two general partners noted above, Brentwood Associates has 12 limited partners none of whom takes or is permitted to take any part in the management or control of the affairs or business of Brentwood Associates.

The company will begin operations with an initial capitalization of $510,000. No concentration in any particular industry is planned. The applicant intends to make investments in small business concerns, with growth potential, located primarily within the State of California.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and regulations.

Notice is further given that any interested person may, not later than fifteen (15) days from the date of publication of this notice, submit to SBA, in writing, relevant comments on the proposed company. Any communication should be addressed to: Associate Administrator for Operations and Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of this notice shall be published in a newspaper of general circulation in Los Angeles, Calif.

Dated: November 8, 1972.

ANTHONY G. CHASE, *Deputy Administrator.*

KARR INVESTMENT CORP.

Application for Transfer of Control of Licensed Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.701 of the Regulations governing Small Business Investment Companies (13 CFR 107.701 (1972)) for transfer of control of Karr Investment Corp. (Karr), 1134 Corrugated Way, Columbus, OH 43201, a Federal licensee under the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.) (Act), License No. 05/06-0007.

Karr was licensed May 24, 1960, and its private capital is $151,800. The proposed transfer of control is subject to and contingent upon the approval of SBA.

Mr. William Karr, the sole stockholder, proposes to sell all of the issued and outstanding capital stock of Karr to Equity Resources Corp. (Equity), a bank holding company, 88 East Broad Street, Columbus, OH 43215. Simultaneously, Equity will resell 51 percent of the stock to Messrs. Simon Sokol and Richard H. Stowell in equal amounts.

At closing, Karr will have unencumbered cash in an amount equal to the debt which is outstanding to SBA. All other assets shall be retained by and all other liabilities shall be paid by Mr. William Karr as of the closing date at which time Equity, and Messrs. Sokol and Stowell will contribute $150,000 in the ratio of their equity interests.

The proposed officers and directors of Karr will be:

Richard H. Stowell, 314 South Drexel Avenue, Columbus, OH 43209, President and Director.

Simon Sokol, 2346 Fishinger Road, Columbus, OH 43221, Vice President, Secretary, Treasurer, and Director.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed new owners and management, and the probability of successful operations of the company under such management (including adequate profitability and financial soundness) in accordance with the Act and regulations.

Notice is hereby given that any interested person may, not later than 15 days from the publication of this notice, submit to SBA in writing, relevant comments on the proposed transfer of control. Any such communication should be addressed to the Acting Associate Administration for Operations and Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

Dated: November 8, 1972.

ANTHONY G. CHASE,
Deputy Administrator.

[License No. 01/02-0295]

NORTHERN BUSINESS CAPITAL CORP.

Notice of Filing of Application for Transfer of Control of Licensed Small Business Investment Company

Notice is hereby given that an application for transfer of control of Northern Business Capital Corp., 7-9 Isaac Street, South Norwalk, CT 06856, a Federal licensee under the Small Business Investment Act of 1958, as amended, has been filed with the Small Business Administration (SBA) pursuant to § 107.701 of the Regulations Governing Small Business Investment Companies (13 CFR 107.701 (1972)).

Northern Business Capital Corp. was licensed by SBA on August 14, 1963, and has 1,716 shares of capital stock issued and outstanding as follows:

	Shares	Percent
Mr. Joseph Kavanewsky	572	33⅓
Joseph Kavanewsky, Inc. (wholly owned by Joseph Kavanewsky)	572	33⅓
Kavanewsky & Kavanewsky, Inc. (wholly owned by Joseph Kavanewsky)	572	33⅓
Totals	1,716	100

Mr. Kavanewsky proposes to dissolve Joseph Kavanewsky, Inc. (a wholly owned corporate entity), in November 1972, and convey the stock of the licensee to himself.

There are no other changes involving SBA's consideration of the application for change of control.

Notice is further given that any interested person may submit their comments on the proposed transfer of control to the Associate Administrator for Operations and Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416, within 10 days after the date of publication of this notice.

A similar notice shall be published in a newspaper of general circulation in South Norwalk, Conn.

Dated: November 8, 1972.

ANTHONY G. CHASE,
Deputy Administrator.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

LABOR RESEARCH ADVISORY COUNCIL COMMITTEE

Notice of Meetings and Agenda

The regular fall meetings of committees of the Labor Research Advisory Council will be held on November 28 and 29 in Room 4454, General Accounting Office Building, 441 G Street NW, Washington, DC.

The Labor Research Advisory Council and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of union research directors and staff members.

The schedule and agenda of the meetings are as follows:

TUESDAY, NOVEMBER 28

9:30 a.m. Committee on Prices and Living Conditions:
1. Progress report on Consumer Price Index Revision—concepts, surveys, and operations.
2. Export and import price indexes.
3. Discussion of quality change.

1:30 p.m. Committee on Wages and Industrial Relations:
1. General review of on-going projects.
2. Report of Subcommittee on the General Wage Index.
3. Proposed work for Employment Standards Administration.
4. Wages and industrial relations studies in the public sector.
5. Publication and uses of new union-non-union information.

WEDNESDAY, NOVEMBER 29

9:30 a.m. Committee on Productivity and Technology:
1. Manpower impact of government expenditures and policies.
2. BLS role in the project of measuring productivity in the Federal Government.
3. Work on output per man-hour indexes adjusted for effects of shifts in industrial composition.
4. Construction labor requirement studies.
5. Measures of international comparisons of output per man-hour and unit labor cost.

1:30 p.m. Committee on Manpower and Employment:
1. Transfer of Manpower Administration Programs to BLS.
2. Budget.
3. Establishment statistics program.
4. State manpower projections.
5. Labor force topics.

It is suggested that persons planning to attend these meetings as observers

contact Joseph P. Goldberg, Executive Secretary, Labor Research Advisory Council on (area code 202) 961-2247.

Signed at Washington, D.C., this 8th day of November 1972.

GEOFFREY H. MOORE,
Commissioner of Labor Statistics.

Occupational Safety and Health Administration

DECISION OF THE REGIONAL ADMINISTRATOR, REGION II

Decision Concerning Inspection; Mobil Oil Refinery, Paulsboro, N.J.

Pursuant to section 8(f)(2) of the Occupational Safety and Health Act of 1970 (84 Stat. 1600; 29 U.S.C. 651 et seq.) and the regulations promulgated thereunder, 29 CFR § 1903.12(a) and 14(d), an informal conference was held at the Office of the Regional Administrator, OSHA, U.S. Department of Labor, 1515 Broadway, New York, NY, on April 17, 1972, to afford the Oil, Chemical, and Atomic Workers International Union, AFL-CIO, an opportunity to discuss its contention that the OSHA inspection of the Mobil Oil Refinery, Paulsboro, N.J., was deficient in that it failed to uncover and cite a number of alleged violations.

The inspection, which was the subject of the informal conference, occurred during October, November, and December 1971, and took 25 working days to complete. As a result three serious and 90 nonserious citations were issued against Mobil Oil Corp. There were 354 violations of 93 standards. Penalties totaling $7,350 were assessed against and paid by Mobil.

The inspection was well conducted. However, after a review of the testimony adduced at the informal hearing, it is my opinion that further investigation in the following areas is warranted, so as to insure that all violations were cited.

1. *Filter plant.* The original complaint mentioned reports of employee dizziness in the filter plant. Testing indicated no recordable gases or fumes. The obvious condition in this plant was the dust concentration. Air sample results indicated dust concentrations were within acceptable limits, that is, they did not exceed the standard. Although it was mutually agreed by employer and employee representatives that conditions were representative of normal operations in the plant during the test period, it is my opinion that retesting would be advisable so as to assure that no airborne contaminants exceed applicable standards.

2. *TCC No. 1.* Employee representatives have asserted that yellow fumes emanated from this unit. There is apparent agreement that these fumes occur only during the "turnaround" of this unit which occurs every several months. Inspection and testing of the fumes during this "turnaround" would be appropriate.

3. *Ammonia building.* Employee representatives have asserted that leakages of high concentrations of ammonia were creating a hazardous condition. Investigation indicated that there were high concentrations of ammonia present at the refinery, but only under emergency conditions, and that equipment was provided and satisfactorily used by employees when such emergency conditions existed. However, reinvestigation into excessive concentrations of ammonia is considered appropriate and the frequency of such emergencies and the adequacy of ventilation will be further considered.

4. *Maintenance asbestos operation.* Employee representatives have asserted that the conditions at the refinery at the time of inspection were not representative of normal operations. The asbestos cutting operation was evaluated and employee exposure to asbestos was well within acceptable limits; no retesting of this operation is appropriate. Intermittent operations in the plant where asbestos is applied to equipment will be evaluated.

5. *Conveyor system.* Employee representatives have asserted that not all buttons of the electrical system or the stoppage of the conveyor were tested. Although several buttons were tested and found satisfactory, additional tests will be performed on reinspection.

6. *Drum storage ramp area.* Employee representatives asserted that the ramp at the drum storage area was slippery and hazardous. Inspection had indicated that a nonslip aggregate material was applied to the ramp. However, so as to assure that in fact the condition of the ramp is not hazardous, reinspection of the maintenance of the ramp surface is considered appropriate.

The foregoing decision was issued at New York on the 27th day of July, 1972.

[Sec. 6(e), 84 Stat. 1597, 29 U.S.C. 655(e)]

ALFRED BARDEN,
Regional Administrator.

[Notice 161]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceeding within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-7379. By order of November 6, 1972, the Motor Carrier Board approved the transfer to Stone Transfer & Storage Co., a corporation, Oklahoma City, Okla., of certificates Nos. MC-74077 and MC-74077(Sub-No. 3), issued to George L. Stone, doing business as Stone Transfer & Storage Co., Oklahoma City, Okla., authorizing the transportation of: Household goods and uncrated new household furniture, between Oklahoma City, Okla., and points within 150 miles, on the one hand, and, on the other, points in Arkansas, Kansas, Missouri, Nebraska, New Mexico, and Texas. Ted Holshouser, attorney, 817 Barbour, Norman, OK 73069.

No. MC-FC-74014. By order entered November 1, 1972, the Motor Carrier Board approved the transfer to Phillip D. Bloch, doing business as Phill's Truck Service, Missoula, Mont., of the operating rights set forth in certificates Nos. MC-84759 and MC-84759 (Sub-No. 6), issued June 24, 1971 and December 13, 1971, respectively, to Wilbur E. Ast, Gene Ast, Donald R. Ast, and Gerald Halman, doing business as Miller Brothers Truck Line, Salmon, Idaho, authorizing the transportation of general commodities, with the usual exceptions, between specified points in Idaho and Montana. Larry D. Ripley, Post Office Box 1559, Boise, ID 83701, attorney for applicants.

No. MC-FC-74022. By order of November 8, 1972, the Motor Carrier Board approved the transfer to Southwest Equipment Rental, Inc., doing business as Southwest Motor Freight, Pico Rivera, Calif., of the operating rights in certificates No. MC-40915 (Sub-No. 19), MC-40915 (Sub-No. 21), MC-40915 (Sub-No. 23), MC-40915 (Sub-No. 28), MC-40915 (Sub-No. 31), MC-40915 (Sub-No. 32), MC-40915 (Sub-No. 33), and MC-40915 (Sub-No. 42) issued April 27, 1971, May 11, 1971, June 16, 1971, January 10, 1972, August 24, 1971, June 2, 1971, May 11, 1971, and January 14, 1972 respectively to Boat Transit, Inc., Newport Beach, Calif., authorizing the transportation of various commodities from and to specified points and areas in the United States, except Hawaii and Alaska. Ernest D. Salm, 3846 Evans Street, Los Angeles, CA 90027, representative for applicants.

PENN CENTRAL TRANSPORTATION CO.

Rerouting or Diversion of Traffic

In the opinion of Lewis R. Teeple, Agent, the Penn Central Transportation Co., George P. Baker, Richard C. Bond, Jervis Langdon, Jr., and Willard Wirtz, Trustees, is unable to transport traffic to and from the following stations on its lines because of track damage caused by flooding:

Wilkes-Barre, Pa.
Lebanon, Pa.
Frederick, Md.

It is ordered, That:

(a) *Rerouting traffic.* The Penn Central Transportation Co., George P. Baker, Richard C. Bond, Jervis Langdon, Jr., and Willard Wirtz, Trustees, being unable to transport traffic to and from Wilkes-Barre, Pa., Lebanon, Pa., or Frederick, Md., because of track damage caused by flooding, that carrier and its connections are hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 11:59 p.m., November 15, 1972.

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 31, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., November 10, 1972.

WESTERN MARYLAND RAILWAY CO.

[ICC Order No. 75; Rev. Service Order 994]

Rerouting Traffic

TO ALL RAILROADS: In the opinion of Lewis R. Teeple, agent, the Western Maryland Railway Co. is unable to transport certain traffic over its line between Westminster, Md., and Cedarhurst, Md., because of track damage caused by flooding.

It is ordered, That:

(a) The Western Maryland Railway Co., being unable to transport certain traffic over its line between Westminster, Md., and Cedarhurst, Md., because of track damage caused by flooding, that carrier is hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 11:59 p.m., November 15, 1972.

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 31, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., November 10, 1972.

[Notice No. 93]

MOTOR CARRIER, BROKER, WATER CARRIER, AND FREIGHT FORWARDER APPLICATIONS

NOVEMBER 10, 1972.

Important notice. The following applications (except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application), are governed by Special Rule 1100.247 [1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and within 60 days of the date of this publication, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

No. MC 808 (Sub-No. 46), filed August 29, 1972. Applicant: ANCHOR MOTOR

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FREIGHT, INC., 21111 Chagrin Boulevard, Cleveland, OH 44122. Applicant's representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, OH 44114. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Automobiles and automobile chassis*, from the plantsite of General Motors Corp. at Pontiac, Mich., to points in Ohio, Pennsylvania, New York, New Jersey, and West Virginia, under continuing contract or contracts with General Motors Corp. NOTE: Applicant states that no duplicating authority is being sought. Dual operations and common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 1263 (Sub-No. 17), filed October 17, 1972. Applicant: McCARTY TRUCK LINE, INC., 17th and Harris, Trenton, MO 64683. Applicant's representative: Frank W. Taylor, Jr., 1221 Baltimore Avenue, Kansas City, MO 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading) serving all points within 10 miles of St. Joseph, Mo., and 15 miles of Platte City, Mo., as off-route points in connection with McCarty's regular route operations between Kansas City and St. Joseph, Mo., for operating convenience only, serving no intermediate points. NOTE: If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 2202 (Sub-No. 420), filed October 10, 1972. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Post Office Box 471, Akron, OH 44309. Applicant's representative: James W. Connor (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment (1) between Davenport, Iowa, and the junction of U.S. Highways 54 and 40, serving the junction of U.S. Highways 54 and 40 for purposes of joinder only, from Davenport over U.S. Highway 61 to the junction of U.S. Highways 61 and 54, thence over U.S. Highway 54 to the junction of U.S. Highways 54 and 40, and return over the same route and (2) between Rock Island, Ill., and St. Louis, Mo., serving St. Louis, Mo., for purposes of joinder only, from Rock Island over U.S. Highway 67 to the junction of U.S. Highway 67 and Illinois Highway 125, thence over Illinois Highway 125 to the junction of Illinois Highways 125 and 78, thence over Illinois Highway 78 to the junction of Illinois Highway 78 and U.S. Highway 67, thence over U.S. Highway 67 to St. Louis and return over the same route. Restriction: Restricted against the transportation of traffic originating at or destined to points in Missouri, and points in the St. Louis, Mo., commercial zone. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 2202 (Sub-No. 421), filed October 19, 1972. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Post Office Box 471, Akron, OH 44309. Applicant's representative: James W. Conner, Post Office Box 471, Akron, OH 44309. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the plantsite and warehouse facilities of Hoffman Taff, Inc., located at or near Verona, Mo., as an off-route point in connection with applicant's presently authorized regular-route authority to and from Springfield, Mo. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Springfield, Mo., or Akron, Ohio.

No. MC 2202 (Sub.-No. 422), filed October 24, 1972. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Post Office Box 471, Akron, OH 44309. Applicant's representative: James W. Conner, Post Office Box 471, Akron, OH 44309. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the plantsite and warehouse facilities of Combustion Engineering, Inc., located in Forward Township, Allegheny County, Pa., in connection with applicant's presently authorized regular-route authority to and from Pittsburgh, Pa., serving no intermediate points. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa., or Washington, D.C.

No. MC 2202 (Sub-No. 423), filed October 24, 1972. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Post Office Box 471, Akron, OH 44309. Applicant's representative: James W. Conner, Post Office Box 471, Akron, OH 44309. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the plantsite and warehouse facilities of the Celotex Corp. located at Wayne County, N.C., to points in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, South Carolina, and Tennessee. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Tampa, Fla.

No. MC 17051 (Sub-No. 9), filed October 19, 1972. Applicant: BARNET'S EXPRESS, INC., 758 Lidgerwood Avenue, Elizabeth, NJ 07202. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, NJ 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wearing apparel, equipment materials and supplies* used or useful in the manufacture and sale of wearing apparel for account of Excelled Sportswear, between Somerset, N.J., New York, N.Y., and Athens, Tenn. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Newark, N.J.

No. MC 22301 (Sub-No. 14), filed October 9, 1972. Applicant: SIOUX TRANSPORTATION COMPANY, INC., 1230 Steuben Street, Sioux City IA 51105. Applicant's representative: Paul Beck (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in Practices of Motor Common Carriers of Household Goods, 17 MCC 467, commodities in bulk, and those requiring special equipment), serving the Western Electric Co., Material Management Center at or near Underwood, Iowa, as an off-route point in connection with carrier's otherwise authorized regular route operation to and from Omaha, Nebr. NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 30237 (Sub-No. 24), filed October 14, 1972. Applicant: YEATTS TRANSFER CO., a corporation, Box 666, Altavista, VA 24517. Applicant's representative: W. Barney Arthur, Box 551, Altavista, VA 24517. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, as defined in Appendix II to the report in *Descriptions in Motor Carrier Certificates*, 61 MCC 209, from points in Monroe County, Mich.; Harrison County, Ind.; and Mercer County, Ohio, to points in Virginia and West Virginia. NOTE: Applicant states that the requested authority can be tacked at Altavista, Va., with service to all points serviced by present authority. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Cincinnati, Ohio, or Washington, D.C.

No. MC 30605 (Sub-No. 151), filed October 10, 1972. Applicant: THE SANTA FE TRAIL TRANSPORTATION COMPANY, a corporation, 433 East Waterman Street, Wichita, KS 67202. Applicant's representative: F. J. Steinbrecher, 80 East Jackson Boulevard, Chicago, IL 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except livestock, sand, coal, rock, hay, explosives, commodities exceeding capacity of equipment, and those prohibited by law from transportation in motor vehicles), serving the warehouse site of Western Electric Co., Inc., located at or near Underwood, Iowa, as an off-route point in connection with applicant's regular route operations to and from Omaha, Nebr. From Council Bluffs over Iowa Highway 191 approximately 12 miles northeast of Council Bluffs, Iowa, to the warehouse site of Western Electric Co., Inc., and return over the same route, serving no intermediate points and for operating convenience only. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr., or Council Bluffs, Iowa.

No. MC 30887 (Sub-No. 183), filed October 13, 1972. Applicant: SHIPLEY TRANSFER, INC., 49 Main Street, Post Office Box 55, Reisterstown, MD 21136. Applicant's representative: Theodore Polydoroff, 1250 Connecticut Avenue NW., Washington, DC 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Natural latex*, in bulk, in tank vehicles, from Baltimore, Md., to Fulton, Ky. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 33426 (Sub-No. 2), filed October 11, 1972. Applicant: FULLER TRANSPORTATION, INC., Post Office Box 198, West Columbia, SC 29169. Applicant's representative: Frank A. Graham, Jr., 707 Security Federal Building, Columbia, S.C. 29201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Empty containers*, from points in Charleston County, S.C., to points in Chatham County, Ga. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbia, S.C., Charleston, S.C., or Charlotte, N.C.

No. MC 42487 (Sub-No. 796), filed October 10, 1972. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Drive, Menlo Park, CA 94025. Applicant's representative: Robert M. Bowden, Western Traffic Service, Post Office Box 3062, Portland, OR 97208. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except household goods as defined by the Commission, classes A and B explosives, commodities in bulk, motor vehicles, commodities of unusual value, commodities requiring special equipment, and commodities in vehicles equipped with mechanical refrigeration), between Flagstaff, Ariz., and Liberal, Kans., from Flagstaff over Interstate Highway 40 to Albuquerque, N. Mex., thence over Interstate Highway 25 to Raton, N. Mex., thence over U.S. Highway 64 to Hooker, Okla., thence over U.S. Highway 54 to Liberal, and return over the same route, as an alternate route for operating convenience only, in connection with applicant's presently authorized regular-route authority, serving no intermediate points. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif., or Phoenix, Ariz.

No. MC 42487 (Sub-No. 797), filed October 11, 1972. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Drive, Menlo Park, CA 94025. Applicant's representative: E. T. Liipfert, Suite 1100, 1660 L Street NW., Washington, DC 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), between Kingsport, and Bristol, Tenn.-Va., over U.S. Highway 11–W, restricted to the transportation of traffic received from or delivered to connecting carrier terminals at Bristol, Tenn.-Va., or terminals of connecting carriers located on the above route. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant does not specify a location.

No. MC 52110 (Sub-No. 129), filed October 10, 1972. Applicant: BRADY MOTORFRATE, INC., 2150 Grand Avenue, Des Moines, IA 50312. Applicant's representative: Cecil L. Goettsch, 11th Floor, Des Moines Building, Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Concrete construction forms, molds, tools, and accessories* necessary for their installation, between Des Moines, Iowa, Fort Wayne, Ind., Metuchen, N.J., Buffalo, N.Y., and Detroit, Mich., on the one hand, and, on the other, points in Delaware, Illinois, Iowa, Indiana, Kentucky, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia, Wisconsin, and the District of Columbia. NOTE: Applicant states that the requested authority duplicates that authority it presently holds in certificate No. MC 52110 and subs thereunder, authorizing the transportation of general commodities, over regular routes, between the places named above on the one hand, and, on the other, points throughout a 23-State area generally encompassing the northeast quarter of the United States. Applicant further states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa, or Washington, D.C.

No. MC 52465 (Sub-No. 44), filed October 10, 1972. Applicant: RICE TRUCK LINES, 1627 Third Street NW., Great Falls, MT 59404. Applicant's representative: Ray F. Koby, 314 Montana Building, Great Falls, Mont. 59403. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Distillers' dried grain*, with, or without solubles, from the United States-Canada international boundary line located at or near Oroville, Wash., to points in Washington, Idaho, Montana, Oregon, Utah, and California, restricted to traffic having a prior movement in foreign commerce. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held in any city in the States of Montana or Washington.

No. MC 55896 (Sub-No. 37), filed October 6, 1972. Applicant: R–W SERVICE SYSTEM, INC., 20225 Goddard Road, Taylor, MI 48180. Applicant's representative: Robert A. Sullivan, 1800 Buhl Building, Detroit, Mich. 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles, aluminum tanks, knocked down, and aluminum plates*, from the plantsite of Chicago Bridge and Iron Co., at or near Indian Oaks, Ill., to points in Indiana, Michigan, Ohio, and St. Louis, Mo. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Chicago, Ill.

No. MC 59150 (Sub-No. 72), filed October 16, 1972. Applicant: WOOD TRANSPORT, INC., Post Office Box 1, Rockaway, NJ 07866. Applicant's representative: Alan Foss, 347 Prospect Avenue, Hackensack, NJ 07601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the plantsite of Chicago Bridge and Iron Co., at or near Indian Oaks, Ill., to points in Indiana, Michigan, Ohio, and New York, N.Y., commercial zone, on the one

No. MC 79142 (Sub-No. 2), filed October 13, 1972. Applicant: T & T TRUCKING & TRANSPORTATION CO., INC., 43-06 54th Road, Maspeth, NY 11378. Applicant's representative: Morton E. Kiel, 140 Cedar Street, New York, NY 10006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Essential oils, aroma chemicals, and flavors* (except in bulk), between points in the New York, N.Y., commercial zone, on the one hand, and, on the other, Avenel, Belleville, Clifton, East Hanover, East Rutherford, Elizabeth, Maywood, Newark, Piscataway, and Totowa, N.J. NOTE: Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 80430 (Sub-No. 144), filed September 28, 1972. Applicant: GATEWAY TRANSPORTATION CO., INC., 455 Park Plaza Drive, La Crosse, WI 54601. Applicant's representative: Joseph E. Ludden (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel pipe and pipe fittings, including wrought iron and/or steel pipe; steel conduit, tubing and fittings*, from Sharon and Wheatland, Pa., to points in Iowa, Minnesota, and Wisconsin. NOTE: Applicant states that the requested authority can be tacked with its regular route authority between Sharon and Wheatland, Pa., on the one hand, and, on the other, various points in Iowa, Minnesota, and Wisconsin which exist in Docket MC 80430 as can be seen are tacked over Chicago. If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa., or Washington, D.C.

No. MC 85465 (Sub-No. 49), filed October 5, 1972. Applicant: WEST NEBRASKA EXPRESS, INC., Box 952, Scottsbluff, NE 69361. Applicants' representative: Stockton and Lewis, The 1650 Grant Street Building, Denver, CO 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products*, as described in section B of appendix I to report in *Descriptions in Motor Carrier Certificates*, 66 M.C.C. 273, from O'Neil, Nebr., to points in Pennsylvania, Illinois, Indiana, Ohio, Michigan, and Wisconsin. NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 95540 (Sub-No. 862), filed October 13, 1972. Applicant: WATKINS MOTOR LINES, INC., 1120 West Griffin Road, Lakeland, FL 33801. Applicant's representative: Paul E. Weaver (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods*, in vehicles requiring mechanical refrigeration, from LaFargeville, Arkport, and Binghamton, N.Y. to points in North Carolina, South Carolina, Georgia, and Florida. NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 106603 (Sub-No. 125), filed October 2, 1972. Applicant: DIRECT

TRANSIT LINES, INC., 200 Colrain Street SW., Grand Rapids, MI 49508. Applicant's representative: Martin J. Leavitt, 1800 Buhl Building, Detroit, MI 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wood particle or composition boards*, from Oxford, Miss., to points in Illinois, Indiana, Iowa, Kentucky, Michigan, Ohio, Missouri, Tennessee, and Wisconsin. NOTE: Applicant also holds contract carrier authority under MC 426240 and Subs, therefore dual operations and common control may be involved. Applicant further states that the requested authority can be tacked with its existing authority, but due to the circuitry which would be involved, does not intend to tack. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Chicago, Ill.

No. MC 110192 (Sub-No. 2) (Correction), filed September 11, 1972, published in the FEDERAL REGISTER issue of October 19, 1972, and republished as corrected this issue. Applicant: HIRAM LEIGH, doing business as SANDERS & LEIGH, Liberty, KY 42539. Applicant's representative: Fred F. Bradley, Post Office Box 773, Courthouse, Frankfort, KY 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, between points in Casey County, Ky. NOTE: Applicant states that the requested authority can be tacked with its existing authority at points in Casey County. The purpose of this republication is to correct the tacking information. If a hearing is deemed necessary, applicant requests it be held at Frankfort, Louisville, or Lexington, Ky.

No. MC 112063 (Sub-No. 16), filed October 10, 1972. Applicant: P. I. & I. MOTOR EXPRESS, INC., 2727 Freeland Road, Post Office Box 685, Sharon, PA 16146. Applicant's representative: Milan Tatalovich, 123 West Liberty Street, Post Office Box 166, Girard, OH 44420. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron or steel pipe, tubing, conduit and fittings, and accessories therefor*, which are unloaded by carrier's trailer mounted mechanical unloading devices, from the plantsite of Wheatland Tube Co., located at Chicago, Ill., to points in Indiana, Ohio, and the Lower Peninsula of Michigan; points in New York on or west of U.S. Highway 15, including the commercial zone of Rochester, N.Y.; and points in Pennsylvania on or west of U.S. Highway 219 beginning at its junction with New York border above Bradford, Pa., and continuing southward to its junction with the West Virginia border. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa., or Washington, D.C.

No. MC 113106 (Sub-No. 37), filed October 13, 1972. Applicant: THE BLUE DIAMOND COMPANY, a corporation, 4401 East Fairmount Avenue, Baltimore, MD 21224. Applicant's representative: Chester A. Zyblut, 1522 K Street, NW., Washington, DC 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Fertilizer and fertilizer materials;* and (2) *agricultural related chemicals and seed*, in containers, from points in East Hempfield Township, Lancaster County, Pa., to points in New York, New Jersey, Delaware, Maryland, Virginia, West Virginia, Ohio, and the District of Columbia. NOTE: Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 113362 (Sub-No. 248), filed October 16, 1972. Applicant: ELLSWORTH FREIGHT LINES, INC., 310 East Broadway, Eagle Grove, IA 50533. Applicant's representative: James Ellsworth, 4500 North State Line Road, Texarkana, AR 75501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe* and *plastic tubing*, with or without plastic fittings, from the plantsite of Tex-Tube Division, Detroit Steel Corp., Houston, Tex., to points in the United States (except Alaska and Hawaii). NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Dallas or Houston, Tex.

No. MC 113362 (Sub-No. 249), filed October 10, 1972. Applicant: ELLSWORTH FREIGHT LINES, INC., 310 East Broadway, Eagle Grove, IA 50533. Applicant's representative: James Ellsworth, 4500 North State Line Road, Texarkana, AR 75501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by the R. T. French Co., from Springfield, Mo., to points in Arkansas, Illinois, Iowa, Kansas, Louisiana, Minnesota, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, and Wisconsin. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Springfield or Kansas City, Mo.

No. MC 113855 (Sub-No. 260), filed October 16, 1972. Applicant: INTERNATIONAL TRANSPORT, INC., 2450 Marion Road Southeast, Rochester, MN 55901. Applicant's representative: Alan Foss, 502 First National Bank Building, Fargo, ND 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Snowmobiles*, from ports of entry on the international boundary line between the United States and Canada located in North Dakota and Montana, to points in New Hampshire, New Jersey, New York, Vermont, Connecticut, Massachusetts, Rhode Island, Maine, Pennsylvania, Indiana, Iowa, Illinois, Ohio, Michigan, Wisconsin, Minnesota, North Dakota, South Dakota, Nebraska, Montana, Wyoming, Colorado, Idaho, Utah, Nevada, Washington, Oregon, and California. NOTE: Applicant states that tacking is possible but not intended. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 113865 (Sub-No. 17), filed September 7, 1972. Applicant: STAUFFER TRUCK SERVICE, INC., Rural Route No. 1, Taylor, MO 63471. Applicant's representative: Robert T. Lawley, 300 Reisch Building, Springfield, IL 62701. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dry animal and poultry feed, dry animal and poultry mineral mixtures, and animal and poultry tonics, insecticides* (except agricultural), *livestock and poultry feeders and equipment, premiums and advertising matter relating to such products*, from Quincy, Ill., to points in Alabama, under a continuing contract or contracts with Moorman Mfg. Co. of Quincy, Ill. NOTE: Applicant presently holds common carrier authority in certificate No. MC 123245 and Subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago or Springfield, Ill.

No. MC 114211 (Sub-No. 178), filed October 13, 1972. Applicant: WARREN TRANSPORT, INC., 324 Manhard Street, Post Office Box 420, Waterloo, IA 50704. Applicant's representative: Daniel Sullivan, 327 South La Salle, Chicago, IL 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood and prefinished paneling*, from the plantsite of Plywood Panels, Inc., and the port of entry located at or near New Orleans, La., to points in Alabama, Florida, Georgia, Mississippi, and Tennessee. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans, La., or Memphis, Tenn.

No MC 114211 (Sub-No. 179), filed October 24, 1972. Applicant: WARREN TRANSPORT, INC., 324 Manhard Street, Post Office Box 420, Waterloo, IA 50704. Applicant's representative: Kenneth R. Nelson (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractors* (except truck tractors), *tractor parts* and *attachments thereof*, from the plant and warehouse site of Ford Motor Co. at Romeo, Mich., to points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa,

Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, the Upper Peninsula of Michigan, ports of entry on

Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, the Upper Peninsula of Michigan, ports of entry on the international boundary line between the United States and Canada at Detroit and Port Huron, Mich., Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Dakota, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, Wyoming, and the District of Columbia. NOTE: Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. Applicant further states that no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich., or Chicago, Ill.

No. MC 114211 (Sub-No. 180), filed October 25, 1972. Applicant: WARREN TRANSPORT, INC., 324 Manhard Street, Post Office Box 420, Waterloo, IA 50704. Applicant's representative: Daniel Sullivan, 327 South LaSalle, Chicago, IL 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bulkheads and bulkhead accessories* from points in Douglas County, Nebr., to points in the United States (except Alaska and Hawaii). NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 114533 (Sub-No. 264), filed August 22, 1972. Applicant: BANKERS DISPATCH CORP., 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative: Warren W. Wallin, 330 South Jefferson Street, Chicago, IL 60606. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Automobile parts, accessories and supplies*, between St. Louis, Mo., on the one hand, and, on the other, points in Illinois lying in those counties on and south of the northern boundaries of Adams, Brown, Cass, Menard, Logan, De Witt, Piatt, Champaign, and Vermilion and points in Indiana lying in those counties on and west of the eastern boundaries of the counties of Parke, Clay, Green, Martin, Dubois, and Perry restricted to shipments weighing not more than 100 pounds. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 115331 (Sub-No. 334), filed September 29, 1972. Applicant: TRUCK TRANSPORT, INC., 1931 North Geyer Road, St. Louis, MO 63131. Applicant's representative: J. R. Ferris, 230 St. Clair Avenue, East St. Louis, IL 62201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Grass seed*, in containers; *fertilizer and seed distributors; grass catchers; chemicals*, in containers; *mowers and mower parts; agricultural implements* weighing less than 50 pounds, *turf aerators; rubber or plastic products; lawn sprinklers; electric metal signs*, and *advertising displays and matters*; and (2) *commodities*, the transportation of which falls within the partial exemption of section 203 (b) (6) of the Interstate Commerce Act, when moving in mixed loads with commodities specified in (1) above, from Marysville, Ohio, to points in Arkansas, Georgia, Illinois, Iowa, Kansas, Louisiana, Mississippi, Florida, Minnesota, Missouri, Nebraska, North Carolina, Oklahoma, South Carolina, Texas, Tennessee, and Wisconsin. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Washington, D.C.

No. MC 115496 (Sub-No. 16), filed August 14, 1972. Applicant: LUMBER TRANSPORT, INC., Cochran, Ga. 31014. Applicant's representative: James L. Flemister, 1220 First Federal Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from the plantsites of Edmundson Griffin Lumber Co., located at Bleckley County, Ga., to points in North and South Carolina and Alabama. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 115840 (Sub-No. 80), filed October 10, 1972. Applicant: COLONIAL FAST FREIGHT LINES, INC., 1215 Bankhead Highway, Post Office Box 10327, Birmingham, AL 35202. Applicant's representative: C. E. Wesley (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) (a) *Pipe, and iron and steel articles*, from Anniston, Ala., to points in Tennessee, Georgia, Alabama, Florida, Mississippi, and those in Louisiana east of the Mississippi River; (b) *materials, and supplies* (except in bulk) used in the operations or production, processing, and transportation of pipe and iron and steel articles or foundries, from points in North Carolina, South Carolina, Tennessee, Arkansas, Alabama, Georgia, Florida, Mississippi, and those points in Louisiana on and east of the Mississippi River, to Anniston, Birmingham, and Bessemer, Ala.; and (2) *insulating materials and supplies* (except in bulk), and *mineral wool*, loose or in packages, from Birmingham, Ala., to points in Arkansas, Florida, Tennessee, those in Louisiana north and west of a line beginning at the Texas-Louisiana State line at or near Merryville, La., and extending along the U.S. Highway 190 to the Mississippi River, and thence northerly along the Mississippi River to the Louisiana-Mississippi State line at or near Angola, La., and those points in Mississippi north of U.S. Highway 80. NOTE: Common control may be involved. Applicant states it intends to tack the requested authority with its lead certificate and subs thereto. If a hearing is deemed necessary, applicant requests it be held at Birmingham, Ala.

No. MC 115840 (Sub-No. 81), filed October 19, 1972. Applicant: COLONIAL FAST FREIGHT LINES, INC., 1215 Bankhead Highway, Post Office Box 10327, Birmingham, AL 35202. Applicant's representative: C. E. Wesley (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles, pipe and tubing*, from New Orleans, La., to points in Illinois, Indiana, Iowa, Kansas, Missouri, Ohio, Oklahoma, and Texas. NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans, La.; Gulfport or Jackson, Miss.

No. MC 117119 (Sub-No. 467), filed October 16, 1972. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., Post Office Box 188, Elm Springs, AR 72728. Applicant's representative: Bobby G. Shaw (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen potatoes, frozen vegetables and dehydrated potatoes* (except in bulk(, from Hart, Holland, and Lake Odessa, Mich., to points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and the District of Columbia. NOTE: Applicant states that it holds authority which possibly could be tacked or joined, however, tacking is not intended. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho, or Washington, D.C.

No. MC 117883 (Sub-No. 174), filed October 16, 1972. Applicant: SUBLER TRANSFER, INC., 791 East Main Street, Versailles, OH 45380. Applicant's representative: Edward J. Subler, Post Office Box 62, Versailles, OH 45380. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen potatoes, frozen vegetables, and dehydrated potatoes*, from Hart, Holland, and Lake Odessa, Mich., to points in Connecticut, Delaware, Illinois, Indiana, Kentucky, Maine,

Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia. Restriction: Restricted to the transportation of traffic originating at the plantsite and storage facilities utilized by Ore-Ida Foods, Inc., at Hart, Holland, and Lake Odessa, Mich. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at the same time and place as other carriers filing similar applications.

No. MC 119435 (Sub-No. 3), filed October 13, 1972. Applicant: WADDELL TRANSFER, INC., Post Office Box 61, Hockett Street, Marion, VA 24354. Applicant's representative: R. Cameron Rollins, 321 East Center Street, Kingsport, TN 37660. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Brick, cinder block, concrete block, clay and clay products, shale and shale products, concrete and concrete products, mortar mixes and brick, block and tile raw materials*, (1) between Glasgow, Richland, and Richmond, Va., on the one hand, and on the other, points in Kentucky, Maryland, North Carolina, Tennessee, and West Virginia and (2) between Elizabethton, Johnson City, Kingsport and Knoxville, Tenn., on the one hand, and, on the other points in Kentucky, North Carolina, Virginia, and West Virginia, under contract with General Shale Products Corp., Johnson City, Tenn. NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Nashville, Tenn.

No. MC 119493 (Sub-No. 94), filed October 10, 1972. Applicant: MONKEM COMPANY, INC., West 20th Street Road, Post Office Box 1196, Joplin, MO 64801. Applicant's representative: Ray F. Kempt (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, and *advertising material* used in the sale and distribution of malt beverages, from the plant and warehouse facilities of Lone Star Brewing Co. at San Antonio, Tex., to points in Arkansas and Oklahoma. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Houston, Tex.

No. MC 119522 (Sub-No. 18), filed October 6, 1972. Applicant: McLAIN TRUCKING, INC., 2425 Walton Street, Anderson, IN 46011. Applicant's representative: Donald W. Smith, 900 Circle Tower, Indianapolis, IN 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Automotive parts, rough stampings, and packing devices*, between Portland, Ind. and Detroit, Mich. NOTE: Applicant presently holds contract carrier authority in permit No. MC 34865 and Subs thereunder, therefore dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich.

No. MC 119656 (Sub-No. 8), filed October 13, 1972. Applicant: NORTH EXPRESS, INC., 219 East Main Street, Winamac, IN 46996. Applicant's representative: Donald W. Smith, 900 Circle Tower, Indianapolis, IN 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dismantled railroad cars and equipment*, between Logansport, Ind., and Chicago, Ill., and from Logansport, Ind., to Joliet, Ill., and Youngstown, Ohio. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind., or Chicago, Ill.

No. MC 119702 (Sub-No. 38), filed September 11, 1972. Applicant: STAHLY CARTAGE CO., a corporation, 130 A Hillsboro Avenue, Post Office Box 486, Edwardsville, IL 62025. Applicant's representative: Robert T. Lawley, 300 Reisch Building, Springfield, IL 62701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Dry fertilizer and liquid fertilizer*, in bulk, from Walcott, Iowa to points in Illinois and Wisconsin; (2) *Bagged fertilizer, dry fertilizer and liquid fertilizer*, in bulk, between Erie, Ill. on the one hand, and, on the other, points in Indiana, Iowa, and Wisconsin; (3) *Anhydrous ammonia*, from Bellevue, Iowa, to points in Illinois and Wisconsin; and (4) *Dry fertilizer and liquid fertilizer*, in bulk, from the plantsite of Hawkeye Chemical Co., near Clinton, Iowa, to points in Illinois and Wisconsin. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 119767 (Sub-No. 297), filed September 18, 1972. Applicant: BEAVER TRANSPORT, CO., a corporation, Post Office Box 186, Pleasant Prairie, WI 53158. Applicant's representative: Fred H. Figge (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Foodstuffs*, from St. Louis, Mo., to points in Michigan; and (2) *Dairy products and by-products*, from St. Louis, Mo., to points in Indiana, Kentucky, Michigan, and Ohio. NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 121082 (Sub-No. 5), filed October 10, 1972. Applicant: ALLIED DELIVERY SYSTEM, INC., 2201 Fenkell Avenue, Detroit, MI 48238. Applicant's representative: William B. Elmer, 23801 Gratiot Avenue, East Detroit, MI 48021. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Patterns*, from the plantsite of Simplicity Pattern Co., Inc., at Niles, Mich., to points in Ohio on and west of Ohio Highway 4 from Sandusky to Springfield, and on and north of U.S. Highway 40 from Springfield to the Indiana boundary; points in Indiana on and north of U.S. Highway 50; points in Illinois on and north and east of Interstate 74; points in Wisconsin on and south of U.S. Highway 18. NOTE: Applicant states that tacking is possible, but applicant has no present intention of tacking. Common control may be involved. The sole purpose of the instant application is to convert the Certificates of Registration in MC 121082 Sub-Nos. 1 and 2 to a Certificate of Public Convenience and Necessity. If a hearing is deemed necessary, applicant requests it be held at Lansing or Detroit, Mich.

No. MC 123383 (Sub-No. 62), filed October 16, 1972. Applicant: BOYLE BROTHERS, INC., 941 South Second Street, Camden, NJ 08103. Applicant's representative: Chester A. Zyblut, 1522 K Street NW., Washington, DC 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and roofing materials, gypsum and gypsum products, composition boards, insulation materials, urethane and urethane products and related materials, supplies and accessories incidental thereto* (except commodities in bulk), from the plantsite and warehouse facilities of the Celotex Corp., located at points in Wayne County, N.C., to points in Virginia, Delaware, Maryland, New Jersey, New York, Pennsylvania, and the District of Columbia. NOTE: Applicant states that the requested authority can be tacked with its existing authority, but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Tampa, Fla.

No. MC 123695 (Sub-No. 5), filed July 5, 1972. Applicant: BRIGGS TRANS., INC., One Brownstone Avenue, Portland, OR 06480. Applicant's representative: John E. Fay, 342 North Main Street, West Hartford, CT 06117. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum lubricating oils, greases, waxes and antifreeze preparations*, in packages and containers and return of empty containers, having a prior movement by rail in a piggy-back service, between points in Massachusetts and

Connecticut, on the one hand, and, on

Connecticut, on the one hand, and, on the other, points in Connecticut, Massachusetts, and New York, under contract with Cities Service Oil Co. NOTE: If a hearing is deemed necessary, applicant requests it be held at Hartford, Conn. or New York, N.Y.

No. MC 124170 (Sub-No. 32), filed October 13, 1972. Applicant: FROSTWAYS, INC., 3900 Orleans, Detroit, MI 48207. Applicant's representative: Robert D. Schuler, One Woodward Avenue, Suite 1700, Detroit, MI 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods and food products*, from points in Michigan on and south of U.S. Highway 10, and on and west of U.S. Highway 27 to points in Connecticut, Maryland, Massachusetts, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, Virginia, West Virginia, and the District of Columbia, restricted to traffic originating at the plantsites or Ore-Ida Foods, Inc., and/or warehouse facilities used by Ore-Ida Foods, Inc. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states that it is authorized to serve supporting shipper's plantsites in Montcalm City, Mich., in its Sub 15, in transporting virtually the same commodities as here sought to the destination states that are here sought, so there is a partial duplication. Applicant offers to surrender Sub 15 for cancellation if this authority is granted in its entirety. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich., or Washington, D.C.

No. MC 124266 (Sub-No. 1), filed October 5, 1972. Applicant: NELSON GWILLIM, Route 2, Box 144, Carlinville, IL 62626. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Fresh and processed meat, dairy and ice cream products, poultry, and other food products*, between points in Missouri, Minnesota, Colorado, Wisconsin, Iowa, Oklahoma, Texas, Arkansas, Georgia, Tennessee, Kentucky, Indiana, Michigan, and Illinois, under contract with Prairie Farms Dairy, Inc. NOTE: If a hearing is deemed necessary, applicant requests it be held at Springfield, Ill., or St. Louis, Mo.

No. MC 124511 (Sub-No. 9), filed October 10, 1972. Applicant: JOHN F. OLIVER, Post Office Box 223, Mexico, MO 65265. Applicant's representative: Ernest A. Brooks II, 1301 Ambassador Building, St. Louis, MO 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Refractory and refractory products*, from points in Audrain, Callaway and Montgomery Counties, Mo., to points in the United States (except Alaska and Hawaii). NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis or Kansas City, Mo.

No. MC 124579 (Sub-No. 8), filed October 13, 1972. Applicant: WIKEL BULK EXPRESS, INC., Route 1, Huron, OH 44839. Applicant's representative: Richard H. Brandon, 79 East State Street, Columbus, OH 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Liquid sugar, invert sugar* and *blends of liquid and invert sugar and corn syrups*, in bulk, in tank vehicles, from Toledo, Ohio, to points in Indiana, Michigan, Pennsylvania, and New York; and (2) *contaminated, rejected, refused and returned shipments of commodities*, in bulk, in tank vehicles, named in (1) above, from destination points named in (1) above, to Toledo, Ohio, on return. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant now holds contract carrier authority under its No. MC 114377, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio or Washington, D.C.

No. MC 125254 (Sub-No. 16), filed October 16, 1972. Applicant: DONALD L. MORGAN, doing business as MORGAN TRUCKING CO., Post Office Box 714, 1201 East Fifth Street, Muscatine, IA 52761. Applicant's representative: Larry D. Knox, 910 Hubbell Building, Des Moines, IA 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, from La Crosse, Wis., to Muscatine, Iowa. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa.

No. MC 127042 (Sub-No. 102), filed October 13, 1972. Applicant: HAGEN, INC., 4120 Floyd Boulevard, Post Office Box 98, Leeds Station, Sioux City, IA 51108. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, NE 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Shampoo, drugs, toilet preparations, cleaning compounds, and supplies and materials used by beauty supply businesses* (except commodities in bulk), from Brookfield, Mo., to points in Arizona, Arkansas, California, Colorado, Idaho, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Montana, Nebraska, Neveda, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Tennessee, Texas, Utah, Washington, Wisconsin, and Wyoming. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Kansas City or St. Louis, Mo.

No. MC 127042 (Sub-No. 103), filed October 16, 1972. Applicant: HAGEN, INC., 4120 Floyd Boulevard, Post Office Box 98, Leeds Station, Sioux City, IA 51108. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, NE 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cleaning compounds* (except in bulk), from Chicago, Ill. to points in Washington, Oregon, California, Montana, Idaho, Utah, Colorado, North Dakota, South Dakota, Nebraska, Missouri, Kansas, Nevada, New Mexico, Wyoming, and Arizona. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 127042 (Sub-No. 104), filed October 24, 1972. Applicant: HAGEN, INC., 4120 Floyd Boulevard, Post Office Box 98, Leeds Station, Sioux City, IA 51108. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, NE 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scented oils, cleaning compounds, toilet preparations, and supplies* (except in bulk), from Madrid, Iowa, to points in California, Wyoming, Colorado, Missouri, Kansas, Nebraska, Arizona, New Mexico, Washington, Oregon, Utah, Texas, Nevada, Idaho, and Montana. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa or Omaha, Nebr.

No. MC 127834 (Sub-No. 82), filed October 13, 1972. Applicant: CHEROKEE HAULING & RIGGING, INC., 540-42 Merritt Avenue, Nashville, TN 37203. Applicant's representative: Robert M. Pearce, Post Office Box E, Bowling Green, KY 42431. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and roofing materials, gypsum and gypsum products, compositions boards, insulation materials, urethane and urethane products and related materials, supplies and accessories*, incidental thereto (except commodities in bulk), from Port Clinton, Ohio to points in Tennessee. NOTE: Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Nashville, Tenn.

No. MC 128270 (Sub-No. 6), filed October 6, 1972. Applicant: REDEIHS INTERSTATE, INC., 7869 Melton Road, Gary, IN. Applicant's representative: James C. Hardman, 127 North Dearborn Street, Chicago, IL 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles and contractor's equipment, materials, and supplies*, between Indian Oaks, Ill., and points in Missouri, Iowa, Wisconsin, Indiana, and Michigan. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 128273 (Sub-No. 133), filed October 9, 1972. Applicant: MIDWESTERN EXPRESS, INC., Post Office Box 189, Fort Scott, KS 66701. Applicant's representative: David C. Freeman (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bedsprings, bedstead rails, cots and cot frames, unupholstered day beds, bed frames, springs, and spring assemblies, metal sleeper fixtures and materials* used in the manufacture of the foregoing commodities, between Hominy, Okla., on the one hand, and, on the other, points in Minnesota, Iowa, Missouri, Arkansas, Louisiana, Wisconsin, Illinois, Michigan, Indiana, Mississippi, Ohio, Kentucky, Tennessee, Alabama, Pennsylvania, Maryland, West Virginia, Virginia, North Carolina, South Carolina, and Georgia and the District of Columbia. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 128404 (Sub-No. 6), filed October 10, 1972. Applicant: BLACKWOOD CRANE & TRUCK SERVICE, INC., Post Office Box 3037, Knoxville, TN 37917. Applicant's representative: James N. Clay III, 2700 Sterick Building, Memphis, TN 38103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Wood chips*, between Knoxville, Tenn. and points in Tennessee, Kentucky, Virginia, and North Carolina; (2) *Plastic conduit and pipe and accessories therefor*, between Knoxville, Tenn. and points in Alabama, Florida, Georgia, Kentucky, Maryland, Mississippi, Missouri, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia; (3) *Plastic conduit and pipe and accessories therefor*, from Toledo, Ohio to those destination points named in (2) above; and (4) *Precast and prestressed concrete products, and plastic conduit and pipe, and accessories therefor*, from Johnson City and Bristol, Tenn. to those destination points named in (2) above. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Knoxville, Tenn.

No. MC 128527 (Sub-No. 31), filed September 29, 1972. Applicant: MAY TRUCKING CO., a Corporation, Post Office Box 398, Payette, ID 83661. Applicant's representative: John K. Gatchel, Post Office Box 195, Payette, ID 83661. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood, plywood paneling, dimensional lumber cut to size, woodmill products prefinished molding, stiles, headers, jambs, laminated plastics and related articles*, packaged or bundled for the convenience of the shipper or consignee to be used in the manufacturing of mobile homes, motor homes, and recreational vehicles, from the site of Champion Home Builders distribution center, located at or near Weiser, Idaho, to the plantsites of Champion Home Builders located at points in California. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho.

No. MC 129749 (Sub-No. 2), filed October 16, 1972. Applicant: FOUNDRY SERVICE CORP., 11 South Third Street, Post Office Box 499, Hammonton, NJ 08037. Applicant's representative: Morton E. Kiel, 140 Cedar Street, New York, NY 10006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Sand and gravel*, from points in Mauricetown and South Vineland, N.J., to points in Pennsylvania, New York, New Jersey, Connecticut, Rhode Island, Massachusetts, Delaware, Maryland, Virginia, and the District of Columbia, under contract with Jesse S. Morie and Son, Inc. NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Philadelphia, Pa.

No. MC 133032 (Sub-No. 4), filed October 2, 1972. Applicant: BURKETT TRUCKING CO., INC., 2508 East Roosevelt Road, Little Rock, AR 72202. Applicant's representative: Donald R. Partney, 35 Glenmore Drive, Little Rock, AR 72204. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Fruit and vegetable shipping containers*, from Nashville, Ark., to points in Denver, Boulder, Weld, Adams, Arapahoe, Larimer, Jefferson, Douglas, Gilpin, Clear Creek, Park, Costilla, Alamosa, and Conejos Counties, Colo.; points in Florida and points in Texas on and east of a line beginning at the Texas-Mexico border at Del Rio, Tex., and extending north along U.S. Highway 377 to junction with U.S. Highway 90, thence west along U.S. Highway 90 to junction with U.S. Highway 285, thence north along U.S. Highway 285 to the Texas-New Mexico State line, under contract with Little Rock Crate & Basket Co., Little Rock, Ark. NOTE: Applicant holds common carrier authority under MC 118016, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Little Rock, Ark.

No. MC 134071 (Sub-No. 4), filed September 22, 1972. Applicant: MODULAR TRANSPORTATION CO., a corporation, 421 West Fulton Street, Grand Rapids, MI 48601. Applicant's representative: William D. Parsley, 1200 Bank of Lansing building, Lansing, MI 48933. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Modular buildings, component parts, materials, accessories, supplies, and other equipment* used in the erection, construction, or installation of such buildings, between the plantsite of Inland-Scholz Housing Systems Co. near Milan, Mich. on the one hand, and, on the other, Kansas City, Kans., and points in the United States east of the western State boundaries of Minnesota, Iowa, Missouri, Arkansas, and Louisiana, under a continuing contract or contracts with Inland-Scholz Housing Systems Co. of Milan, Mich. NOTE: Common control and dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Lansing or Detroit, Mich.

No. MC 134145 (Sub-No. 31), filed October 5, 1972. Applicant: NORTH STAR TRANSPORT, INC., Post Office Box 51, Thief River Falls, MN 56701. Applicant's representative: Robert P. Sack, Post Office Box 6010, West St. Paul, MN 55118. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Snowmobile clothing and related accessories*, from Seattle, Wash. to Aurera, Colo.; Idaho Falls, Idaho; Carol Stream, Ill.; Lansing and Trout Lake, Mich.; St. Paul and Thief River Falls, Minn.; Reno, Nev.; Rochester, N.Y.; Lockhaven, Pa.; Bethel and Randolph, Vt.; and Neenah, Wis., under a continuing contract or contracts with Arctic Enterprises, Inc. of Thief River Falls, Minn. NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis or St. Paul, Minn.

No. MC 135007 (Sub-No. 20), filed October 10, 1972. Applicant: AMERICAN TRANSPORT, INC., 108 East Renfro Circle, Millard, NE 68137. Applicant's representative: Frederick J. Coffman, 521 South 14th Street, Post Office Box 80806, Lincoln, NE 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Floor covering and rugs* from a point at or near Crow Agency, Mont., to points in Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Wyoming, Colorado, New Mexico, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Iowa, Missouri, and Louisiana, under continuing contract with William Volker & Co. NOTE: If a hearing is deemed necessary, applicant requests it be held at San Francisco or Los Angeles, Calif.

No. MC 135067 (Sub-No. 3), filed October 5, 1972. Applicant: HANS. L. SANDBERG, doing business as: SANDBERG TRUCKING CO., 405 South McCoy, Granville, IL 61326. Applicant's representative: E. Stephen Heisley, Suite 805, 666 11th Street NW., Washington, DC 20001. No. MC 135936 (Sub-No. 10), filed October 5, 1972. Applicant: LIEBMANN TRANSPORTATION CO., INC., U.S. Highway 65 North, Iowa Falls, IA 50126. Applicant's representative: C. H. Rogers, Post Office Box 1022, Iowa Falls, IA 50126. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products; meat byproducts and articles distributed by meat packinghouses* as described in sections A and C of appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Denison, Carroll, and Iowa Falls, Iowa and Garden City, Kans., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Vermont, Virginia, West Virginia, Ohio, North Carolina, South Carolina, Georgia, and the District of Columbia. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. 136212 (Sub-No. 2) (Amendment), filed July 3, 1972, published in the FEDERAL REGISTER issue of August 3, 1972, and republished as amended this issue. Applicant: JENSEN TRUCKING COMPANY, INC., 213 South Washington Street, Post Office Box 37, Papillion, NE 68406. Applicant's representative: Frederick J. Coffman, 521 South 14th Street, Post Office Box 303806, Lincoln, NE 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen potato products and frozen vegetables*, from Monte Alto, Edinberg, San Antonio, Dallas, and Corpus Christi, Tex., and their respective commercial zones to points in Louisiana, Mississippi, Tennessee, Arkansas, North Carolina, South Carolina, Georgia, Florida, Alabama, Virginia, West Virginia, Maryland, New Jersey, Pennsylvania, New York, Indiana, Massachusetts, Connecticut, Kentucky, Ohio, Michigan, Illinois, Delaware, and Washington, D.C., restricted to traffic originating at the named origins. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. The purpose of this amendment is to correctly identify the product the supporting shipper sells and ships. If a hearing is deemed necessary, applicant requests it be held at Houston, Tex., or Omaha, Nebr.

No. 136212 (Sub-No. 3) (Amendment), filed July 3, 1972, published in the FEDERAL REGISTER issue of August 3, 1972, and republished as amended this issue. Applicant: JENSEN TRUCKING COMPANY, INC., 213 South Washington Street, Post Office Box 37, Papillion, NE 68046. Applicant's representative: Frederick J. Coffman, 521 South 14th Street, Post Office Box 80806, Lincoln, NE 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen potato products and frozen vegetables*, from Monte Alto, Edinberg, San Antonio, Dallas, and Corpus Christi, Tex., and their respective commercial zones to points in Arizona, New Mexico, Colorado, Utah, Nebraska, Iowa, Wisconsin, Minnesota, North Dakota, South Dakota, Kansas, Oklahoma, Missouri, and California, restricted to traffic originating at the named origins. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. The purpose of this amendment is to correctly identify the product that the supporting shipper sells and ships. If a hearing is deemed necessary, applicant requests it be held at Houston, Tex., or Omaha, Nebr.

No. MC 136568 (Sub-No. 1), filed October 9, 1972. Applicant: MISSISSIPPI MOVING & STORAGE COMPANY, a corporation, 5570 North McRaven Road, Jackson, MS 39209. Applicant's representative: Donald B. Morrison, 717 Deposit Guaranty Bank Building, Post Office Box 22628, Jackson, MS 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods*, as defined by the Commission, and *unaccompanied baggage and personal effects*, between Jackson and Meridian, Miss., on the one hand, and, on the other, points in Clarke, Copiah, Hinds, Issaquena, Jasper, Kemper, Lauderdale, Leake, Madison, Neshoba, Newton, Rankin, Scott, Sharkey, Simpson, Smith, Warren, and Yazoo Counties, Miss., and Choctaw, Greene, Hale, Marengo, and Sumter Counties, Ala., restricted to the transportation of traffic having a prior or subsequent movement in containers (except as to unaccompanied baggage and personal effects), beyond the points authorized, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization, or unpacking, uncrating, and decontainerization of such traffic. NOTE: If a hearing is deemed necessary, applicant requests it be held at Jackson, Miss.

No. MC 136690 (Sub-No. 1), filed October 13, 1972. Applicant: J & S TRUCKING CO., INC., Route 2, Box 341, Carrollton, GA 30117. Applicant's representative: Monty Schumacher, Suite 310, 2045 Peachtree Road NE., Atlanta, GA 30309. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Fresh and frozen meat*, in vehicles equipped with mechanical refrigeration, from the plantsites of Duffey Boneless Beef Co. and Duffey Sausage Co., Inc., Carrollton, Ga., to points in Florida, South Carolina, North Carolina, Virginia, Maryland, Pennsylvania, New Jersey, New York, Tennessee, Kentucky, Ohio, Michigan, Minnesota, Wisconsin, Iowa, Illinois, Indiana, Missouri, Arkansas, Alabama, Mississippi, Louisiana, and Texas. Restriction: The operations sought above are limited to a transportation service to be performed, under a continuing contract, or contracts, with Duffey Boneless Beef Co., a division of Duffey Sausage Co., Inc., of Carrollton, Ga.; (2) (a) *fresh and frozen meats*, in vehicles equipped with mechanical refrigeration, from Carrollton, Ga., to points in North Carolina and South Carolina; (b) *fresh and frozen meats*, in vehicles equipped with mechanical refrigeration, from points in New Jersey and Massachusetts to the plantsite of Du-Gro Frozen Foods, Inc., Carrollton, Ga.; and (c) *french fried potatoes*, blanched and uncooked, in vehicles equipped with mechanical refrigeration, from points in Michigan to the plantsite of Du-Gro Frozen Foods, Inc., Carrollton, Ga. Restriction: The above described operations is limited to a transportation service to be performed, under a continuing contract, or contracts, with Du-Gro Frozen Foods, Inc., of Carrollton, Ga. NOTE: If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 136721 (Sub-No. 2) (Correction), filed September 27, 1972, published in the FEDERAL REGISTER, issue of November 2, 1972, and republished as corrected this issue. Applicant: FREEMAN C. COREY, doing business as FREEMAN C. COREY & SON, R.F.D. No. 1, Washburn, ME 04786. Applicant's representative: John M. Cleary, 914 Washington Building, Washington, D.C. 20005. NOTE: The FEDERAL REGISTER notice of November 2, 1972, states that the authority is "from the account of A. E. Staley Manufacturing Company, * * *." This should read "*for* the account * * *" etc. The rest of the notice remains as previously published.

No. MC 136810 (Sub-No. 1), filed September 11, 1972. Applicant: PROSPEX INDUSTRIES LIMITED, No. 703, 1112 West Pender Street, Vancouver, BC, Canada. Applicant's representative: Ray Pauls (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Steel plates, steel sheets and steel coils*, from the ports of entry on the international boundary line between the United States-Canada located at or near Lynden, Blaine, and Sumas, Wash., to points in Washington and Oregon, restricted to traffic having a prior movement in foreign commerce, under contract with Lambton Steel Ltd. NOTE: If a hearing is deemed necessary, applicant requests it be held at Seattle or Blaine, Wash.

No. MC 136905 (Amendment), filed June 26, 1972, published in the FEDERAL REGISTER issue of October 27, 1972, and republished as amended this issue. Applicant: HOLLIS WILLIAMS, doing

business as HOLLIS WILLIAMS TRUCKING, 314 Oak Avenue, Sulphur Springs, TX 75482. Applicant's representative: Ralph W. Pulley, Jr., Suite 4555, First National Bank Building, Dallas, Tex. 75202. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Valves, valve blanks, valve components, valve materials, machinery and machinery parts* used in the manufacturing and servicing of valves, between the manufacturing and storage facilities of Rockwell Manufacturing Co., in Hopkins County, Tex., on the one hand, and, on the other, points in Texas, Louisiana, and Mississippi, under contract with Rockwell Manufacturing Co. NOTE: Applicant states that no single load transported shall exceed 3,500 pounds. The purpose of this republication is to add machinery to the commodity description and to eliminate an equipment limitation contained in the original application, also to reflect a change in applicant's representative. If a hearing is deemed necessary, applicant requests it be held at Dallas, Tyler, or Texarkana, Tex.

No. MC 136932 (Amendment), filed July 26, 1972, published in the FEDERAL REGISTER issue of August 24, 1972, and republished as amended this issue. Applicant: MERCHANTS' SPEEDY DELIVERY LIMITED, 1716 Langlois Avenue, Windsor 14, ON, Canada. Applicant's representative: Frank J. Kerwin, Jr., 700 Canada Building, 374 Ouellette Avenue, Windsor 14, ON, Canada. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: *Dies and repair parts for use in industrial machinery, automobile parts, metal stampings, uncrated furniture, and appliances*, between the international boundary between the United States and Canada on the one hand, and, Detroit, Mich., on the other. Restricted (1) against transportation in bulk, in tank vehicles; (2) to shipments moving from one consignor to one consignee; (3) to traffic which originates in or is destined to the city of Windsor and the townships of Sandwich West and Sandwich South, Colchester North, Colchester South, Anderdon, and Malden in the county of Essex and Province of Ontario, and (4) restricted to an express type expedited service. NOTE: The purpose of this republication is to redescribe the authority sought. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich.

No. MC 136942 (Sub-No. 2), filed October 4, 1972. Applicant: HOWARD SMITH, doing business as H. S. TRUCKING, 498 State Route 7, Steubenville, OH 43952. Applicant's representative: Paul F. Beery, 88 East Broad Street, Columbus, OH 43215. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Industrial rolls or rollers*, uncrated, loose, and in open cradles, between Three Rivers, Mich., on the one hand, and, on the other, Canton, Louisville, Steubenville, Toronto, Warren, Yorkville, and Youngstown, Ohio; Aliquippa, Allenport, Ambridge, Beaver Falls, Brackenridge, Butler, Clairton, Connellsville, Dravosburg, Duquesne, Grecnsburg, Homestead, Jeannette, Leechburg, Midland, Monessen, New Castle, New Kensington, Pittsburgh, Sharon, Vandergrift, Washington, and Zelienople, Pa.; and Beechbottom, Clarksburg, Fairmont, Follansbee, Weirton, Wellsburg, and Wheeling, W. Va., under a contract or contracts with Dayco Corp. of Dayton, Ohio. NOTE: If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 136944 (Sub-No. 3), filed October 2, 1972. Applicant: STANLEY E. MARSH, R.F.D. 3, Mount Vernon, MO. 65712. Applicant's representative: Turner White, 805 Woodruff Building, Springfield, MO 65806. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Alcoholic beverages* (except in bulk, in tank vehicles), from Peoria, Pekin, Lemont, and Plainfield, Ill., and St. Louis, Mo., to Oklahoma City, Okla., under contract with C & C Wholesale Liquor Co. NOTE: If a hearing is deemed necessary, applicant requests it be held at Oklahoma City or Tulsa, Okla.

No. MC 138100, filed September 18, 1972. Applicant: MELLOW TRUCK EXPRESS, INC., Post Office Box 17063, Portland, OR 97217. Applicant's representative: David C. White, 2400 Southwest Fourth Avenue, Portland, OR 97201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lumber* (including shakes, shingles, and roof panels), *wooden fencing, particleboard, chipboard, and hardboard* (except gypsum board, paperboard, and pulpboard), between points in Washington, Oregon, California, Idaho, and Nevada; (2) *prefabricated wooden buildings, wooden cabinets and doors*, from Portland, Oreg., to points in Oregon, Washington, Idaho, Montana, California, and Nevada; and (3) *feed, feed ingredients, and fertilizer* (except liquid commodities in bulk), from points in California to points in Oregon and Washington. NOTE: Applicant holds contract carrier authority under MC 128285 and subs thereunder. By the instant application, applicant seeks to convert its contract carrier permits to a certificate of public convenience and necessity. Applicant further states that no extension of authority is sought. Upon the grant of this application, applicant will surrender its permits for cancellation. Therefore no duplicating authority or dual operations will result. If a hearing is deemed necessary, applicant requests it be held at Portland, Oreg.

No. MC 138129, filed October 3, 1972. Applicant: ELLIS TRANSPORT, INC., 2345½ West Kearney, Springfield, MO 65802. Applicant's representative: Turner White, 805 Woodruff Building, Springfield, Mo. 65806. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cups, plates, containers, and accessories*, from Springfield, Mo., to points in Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Wisconsin, Colorado, Oklahoma, Texas, Arkansas, Kansas, Illinois, and New Mexico, under contract with Lily-Tulip Division, Owens-Illinois, Inc. NOTE: Applicant holds common carrier authority under 119766, therefore dual operations may be involved. Common control may also be involved. If a hearing is deemed necessary, applicant requests it be held at Kansas City or St. Louis, Mo.

APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

No. MC 113908 (Sub-No. 241), filed October 6, 1972. Applicant: ERICKSON TRANSPORT CORP., 2105 East Dale Street, Springfield, MO 65804. Applicant's representative: B. B. Whitehead (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, in bulk, in tank and/or hopper-type containers and empty tank and hopper-type containers, between points in the United States including Alaska and Hawaii, restricted to shipments having prior or subsequent movement in interstate or foreign commerce. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant respectfully submits that the grant of the instant application will have a beneficial impact on the human environment.

No. MC 136727 (Sub-No. 2), filed September 14, 1972. Applicant: GRIFFIN TRANSFER & STORAGE CO., INC., Fleming Drive, Morganton, N.C. 28655. Applicant's representative: Joe M. Griffin (same address as above). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Telephone equipment material and supplies including tools* used in the construction and maintenance of telephone system and communication, between Morganton, N.C., and points in the counties of Burke, McDowell, Yancey, Mitchell, Avery, Watauga, Caldwell, Alexander, and Catawba, N.C., under contract with Western Electric Co., Inc.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$3.00 per copy.
Paperbound, with charts

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

FEDERAL REGISTER DOCUMENTS PROCESSED BY COMPUTER—Agencies are requested to consult with Federal Register Office to explore new procedures for such documents 24469

ECONOMIC STABILIZATION—IRS/Price Comm. rulings on the following matters: definition of "fiscal year" in determining the base period; sales to the Federal Government as not constituting prenotification with respect to sales to other purchasers; determination of a base price for new firms; and community antenna as a public utility (4 documents) 24417, 24418

BOATS/SHIPPING—
Coast Guard amendments of standard vessel numbering and casualty reporting regulations; effective 7–1–73 24422
Coast Guard proposed amendments concerning marine engineering systems and components; comments by 12–20–72 24435
Coast Guard proposal clarifying design requirements for remote valve controls; comments by 12–19–72 24439

CABLE TELEVISION—
FCC amendment concerning petitions for "special relief"; effective 11–22–72 24423
FCC extends to 11–29–72 the time for filing reply comments to a proposal involving programs for which a per-program of per-channel charge is made 24446

CODE OF FEDERAL REGULATIONS

(Revised as of October 1, 1972)

Title 44—Public Property and Works ..... $.35

Title 49—Transportation (Parts 1–99) 1.25

Title 49—Transportation (Parts 1200–1299) 3.00

[A Cumulative checklist of CFR issuances for 1972 appears in the first issue of the Federal Register each month under Title 1]

Order from Superintendent of Documents,
United States Government Printing Office,
Washington, D.C. 20402

FEDERAL REGISTER

Area Code 202 Phone 962–8626

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended (44 U.S.C. 1510). The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

HIGHLIGHTS—Continued

CROPS—
USDA miscellaneous amendments concerning cotton acreage allotments (3 documents) 24427, 24429, 24430

USDA determination that sugar beet proportionate shares are not required for the 1973 crop 24431

USDA announces county normal yields for the 1972 rice crop 24428

NEW ANIMAL DRUGS—

Title 6—ECONOMIC STABILIZATION

Ruling—Internal Revenue Service, Department of the Treasury

[Price Commission Ruling 1972-275]

DEFINING FISCAL YEARS IN DETERMINING BASE PERIOD

Price Commission Ruling

Facts. A company uses a fiscal year ending June 30 for both accounting and tax purposes. On June 30, 1969, the company changes its fiscal year to the year ending December 31. However, its tax year does not change. Thus, the company has a 6-month fiscal year ending December 31, 1969, and a subsequent fiscal year ending December 31, 1970.

Issue. What are the company's "fiscal years" for determining profit margin during its base period?

Ruling. Economic Stabilization Regulations, 6 CFR 300.5 (1972) provides that "base period" means "any two, at the option of the person concerned, of that person's last 3 fiscal years ending before August 15, 1971 • • •." The term "fiscal years" means consecutive 12-month periods constituting a company's fiscal (accounting) years. Thus, the company's last 3 fiscal years for determining profit margin during its base period are the consecutive 12-month fiscal (accounting) years ending December 31, 1970, June 30, 1969, and June 30, 1968. Where a company has a taxable year different from its fiscal (accounting) year, the fiscal (accounting) year shall be used for determining profit margin during its base period.

Price Commission Ruling 1972-211, 37 F.R. 13650 (1972) holds that a short year cannot be used as a fiscal year for determining profit margin during the base period, and that the term "fiscal years" means consecutive 12-month periods constituting taxable years. Price Commission Ruling 1972-211 is hereby modified to the extent that it defines fiscal years in terms of taxable years.

Price Commission Ruling 1972-211 also states that if there had been a taxable short period within the last 3 taxable years only the 12-month taxable years ending since the short period are included within the base period. This portion of Price Commission Ruling 1972-211 is clarified by explaining that the base period may include, but is not limited to, the 12-month period or periods occurring after a short period. Thus, where a company has a short period occurring during its last 3 fiscal years, it shall use the 12-month periods occurring both before and after the short period in determining its last 3 fiscal (accounting) years if such periods end before August 15, 1971.

This ruling has been approved by the General Counsel of the Price Commission.

LEE H. HENKEL, JR.,
Chief Counsel,
Internal Revenue Service.

Approved: November 7, 1972.

SAMUEL R. PIERCE, JR.,
General Counsel,
Department of the Treasury.

[Price Commission Ruling 1972-276]

CONTRACTS FOR THE SALE OF PRODUCTS OR SERVICES TO THE FEDERAL GOVERNMENT

Price Commission Ruling

Facts. Company A, a prenotification firm, is a manufacturer which enters into a contract with an agency of the Federal Government on September 1, 1972, for the sale of a product which A regularly sells to customers in the private sector. Under the terms of the contract A is able to obtain a slightly higher price from the Government than it charges to its private customers. A now wishes to charge its private customers the same price it charges the Government under the contract. A's opinion is that the price established in the contract is considered a prenotification and approval by the Price Commission under Economic Stabilization Regulations § 300.51(a), 37 F.R. 17476 (1972).

Issue. Does A have to specifically prenotify the Price Commission of the proposed price increase to its customers in the private sector?

Ruling. Yes. Section 300.51(a) relating to prenotification firms states in part that "[T]he entering into of a contract for purchase of a product or service by an agency of the Federal Government • • • is considered a prenotification and approval of the price stated in the contract • • •." This provision, however, means that the slightly higher price specified in the contract is considered approved by the Price Commission with respect to that contract only. It is inapplicable to other price increases contemplated by A which must be justified under Economic Stabilization Regulations, 6 CFR 300.12 (1972) and specifically prenotified in accordance with § 300.51(a).

This ruling has been approved by the General Counsel of the Price Commission.

LEE H. HENKEL, JR.,
Chief Counsel,
Internal Revenue Service.

Approved: November 6, 1972.

SAMUEL R. PIERCE, JR.,
General Counsel,
Department of the Treasury.

[FR Doc.72-19778 Filed 11-16-72;8:50 am]

[Price Commission Ruling 1972-277; Cost of Living Council Ruling 1972-119]

NEWLY ESTABLISHED RETAIL FIRM

Price Commission and Cost of Living Council Ruling

Facts. A new retailer A commences business in calendar year 1972. Retailer A is not a subsidiary or division of, or connected in any way with any other firm. Retailer A was established by two individuals, neither of whom had ever engaged in retail before.

Issue. By what method are A's price adjustments controlled under the Economic Stabilization Regulations?

Ruling. Unless it qualifies for exemption under the provisions of Economic Stabilization Regulations, 6 CFR 101.34 (j), 37 F.R. 3913 (1972), relating to price adjustments of retail firms, including restaurants, with annual sales or revenues of less than $100,000, or under the provisions of 6 CFR 101.51(b), 37 F.R. 8939 (1972), relating to price and pay adjustments (but not rent increases or adjustments) of a firm coming into existence on, or after January 1, 1972, with an average of 60 or fewer employees, price adjustments of firm A are controlled by the provisions of 6 CFR 300.13 (a), 37 F.R. 7621 (1972). See Cost of Living Council Ruling 1972-41, Price Commission Ruling 1972-118, March 24, 1972 (37 F.R. 6599, 1972), for the method of calculating a new firm's annual rate of sales or revenues on a quarterly basis.

Section 300.13(a) provides that a retailer may charge a price in excess of the base price whenever its customary initial percentage markup (CIPM) after November 13, 1971, is equal to or less than its last CIPM before November 14, 1971, or, at its option, its CIPM during its last fiscal year ending before August 15, 1971. It further provides that the aggregate effect of all its price changes shall not increase its profit margin over that which prevailed during the base period.

CIPM is defined in 6 CFR 300.5, 36 F.R. 23974 (1971), as the markup applied to cost (purchase price actually

exists for making this amendment effec-

Section 75.400 (37 F.R. 2400, 15293) is

XUM
V37-223 NOV 17 72 V
XUM

paid by the selling person and transportation charges to be allocated to the merchandise) of merchandise when first offered for sale determined on an item, product line, department, store, or other pricing unit basis, according to the person's customary pricing practice. Profit margin is the ratio that operating income bears to net sales, 6 CFR 300.5, 37 F.R. 3913 (1972). Base period means any two of the last 3 fiscal years ending before August 15, 1971, and in determining a base period for the purpose of computing a profit margin during a base period, a weighted average of its profits during the 2 years chosen shall be used. 6 CFR 300.5, 36 F.R. 23974 (1971).

A is a newly established retailer offering new property for sale, as defined in § 300.409(a)(1), and base price for each item of merchandise is determined by a computation based on the average prices received in a substantial number of transactions by persons selling comparable property in the same marketing area. 6 CFR 300.409(c)(2), 36 F.R. 23974 (1971). Since it is a newly established retailer, A does not have either a CIPM before November 14, 1971, or a base-period profit margin. Thus, the initial selling price for A's items of merchandise shall not be established at a price greater than base prices. Thereafter, the CIPM shall be the percentage difference between cost and the price when first offered for sale, determined on an item, product line, department, store, or other pricing basis, according to the pricing practice initially chosen by A, and subsequent price adjustments shall not be subjected to the profit margin limitation under § 300.13(a)(2). Retailer A does not have a base-period profit margin because it did not have any fiscal years ending prior to August 15, 1971, and for that reason, is unable to establish a base-period profit margin under §§ 300.5 and 300.13(a).

This ruling has been approved by the General Counsels of the Price Commission and Cost of Living Council.

LEE H. HENKEL, Jr.,
Chief Counsel,
Internal Revenue Service.

Approved: November 13, 1972.

SAMUEL R. PIERCE, Jr.,
General Counsel,
Department of the Treasury.

[Price Commission Ruling 1972-279]

COMMUNITY ANTENNA TELEVISION

Price Commission Ruling

Facts. X, a corporation, provides community antenna television (CATV) service to persons located within Y city limits. X obtained authority to furnish CATV service within the city limits when the Y city council enacted an ordinance providing X with the franchise to render CATV service within the city limits. Statutory and case law of the state Z, where Y city is situated, did not confer on the city council jurisdiction to regulate rates charged by X but X did agree to submit to the city council's regulatory authority as a condition of doing business. Furthermore, Z's public utility commission does not regulate X's activities.

Issue. Is X considered a public utility for Economic Stabilization purposes?

Ruling. X is considered a public utility for Economic Stabilization purposes. Economic Stabilization Regulation, 6 CFR 300.16 (1972) defined a public utility to mean, "a person that furnishes utility services to the public • • •." The same section defined "utility service" to mean, "any commodity or service affected with a public interest • • •". "In United States v. Southwestern Cable Co.", 392 U.S. 157 (1968), the Supreme Court held CATV is subject to the regulatory authority of the Federal Communications Commission since CATV provides a public service affected with a public interest.

Regulation § 300.16 was superseded on September 16, 1972, by Economic Stabilization Regulation § 300.301-311, 37 F.R. 18893 (1972). The new definition of public utility in § 300.302 is expansive in nature. Section 300.302 defines a public utility to mean, "a person that furnishes service to the public • • •". X furnishes a service to the public.

Furthermore, the general operation of CATV resembles a public utility operation. X must attract large quantities of capital for construction of its communication facilities. The prices charged by CATV for its service must be sufficient to provide an adequate rate of return in order to attract the necessary capital. Therefore, price increases by CATV could not be reconciled with Price Commission regulations applicable to service organizations, since service organizations may only raise prices above base price to reflect incurred allowable costs, not to insure an adequate rate of return.

Regulation § 300.302 lists "telephone, and telegraph • • • services" as examples of public utility activities. CATV closely resembles the operation of a telephone or telegraph company in that its cables often parallel the same routes used by telephone and telegraph wire. In addition, the CATV service area is restricted and CATV functions in a non-competitive atmosphere. (See Price Commission Ruling 1972-85, 37 F.R. 4371 (1972).)

Therefore, under both sets of regulations, CATV is considered a public utility. CATV cannot be considered a service organization since Economic Stabilization Regulation, 6 CFR 300.14 (1972) excludes public utilities from the definition of a service organization.

This ruling has been approved by the General Counsel of the Price Commission.

Dated: November 8, 1972.

LEE H. HENKEL, Jr.,
Chief Counsel,
Internal Revenue Service.

Approved: November 8, 1972.

SAMUEL R. PIERCE, Jr.,
General Counsel,
Department of the Treasury.

Title 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Animal and Plant Health Inspection Service, Department of Agriculture

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY

Area Released From Quarantine

Pursuant to the provisions of sections 1, 2, 3, and 4 of the Act of March 3, 1905, as amended, sections 1 and 2 of the Act of February 2, 1903, as amended, sections 4, 5, 6, and 7 of the Act of May 29, 1884, as amended, and sections 3 and 11 of the Act of July 2, 1962 (21 U.S.C. 111, 112, 113, 115, 117, 120, 123, 124, 125, 126, 134b, and 134f), Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respects:

In § 82.3, the reference to Colorado in the introductory portion of paragraph (a) and paragraph (a)(7) relating to the State of Colorado is deleted.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111-113, 115, 117, 120, 123-126, 134b, 134f; 29 F.R. 16210, as amended; 36 F.R. 20707, 21529, 21530, 37 F.R. 6327, 6505.)

Effective date. The foregoing amendment shall become effective upon issuance.

The amendment excludes a portion of Jefferson County in Colorado from the areas quarantined because of exotic Newcastle disease. Therefore, the restrictions pertaining to the interstate movement of poultry, mynah, and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles from quarantined areas, as contained in 9 CFR Part 82, as amended, will not apply to the excluded area. No area in Colorado remains under quarantine.

The amendment relieves certain restrictions presently imposed but no longer deemed necessary to prevent the spread of exotic Newcastle disease, and must be made effective immediately to be of maximum benefit to the affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department. Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 13th day of November 1972.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc.72-19811 Filed 11-16-72;8:46 am]

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Docket No. 72-SO-119, Amdt. 39-1559]

PART 39—AIRWORTHINESS DIRECTIVES

Grumman Model G-159 Airplanes

There have been failures of the attachment lugs of the elevator trim tab actuators on Grumman Model G-159 airplanes that could cause elevator flutter. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require inspection of the mounting lugs for cracks and remounting of the elevator trim tab actuators on Grumman Model G-159 airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

GRUMMAN. Applies to Model G-159 airplanes certificated in all categories.

Compliance required within 10 hours' time in service after the effective date of this AD unless already accomplished within the last 190 hours time in service and thereafter at intervals not to exceed 200 hours time in service from the last inspection.

To detect cracked mounting lugs of elevator trim tab actuators, Part Nos. 159SCC100-1 and 159SCC100-5 and to correct out-of-plane mounting, accomplish the following:

(a) Inspect the P/N 159SCC100-1 or 159SCC100-5 trim tab actuator mounting lugs for cracks and shim to correct any out-of-plane condition in accordance with Grumman Aerospace Corp. Gulfstream Customer Bulletin No. 208A through amendment 2 dated April 21, 1972 and Operational Summary No. 72-5B dated August 1972.

(b) If mounting lug cracks are found when conducting the inspections required by paragraph (a), before further flight, replace with a P/N 159SCC100-1, 159SCC100-5, or 159SCC100-11 actuator.

Compliance with this airworthiness directive is not required when the P/N 159SCC100-11 actuator is installed.

This amendment becomes effective November 24, 1972.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on November 9, 1972.

DUANE W. FREER,
Acting Director, Southern Region.

[FR Doc.72-19770 Filed 11-16-72;8:45 am]

[Airspace Docket No. 72-WA-58]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of Area High Routes

The purpose of this amendment to Part 75 of the Federal Aviation Regulations is to change the reference facility for the second waypoint in area high route J812R. Changing the reference facility from Vero Beach, Fla., VORTAC to the Dayonta Beach, Fla., VORTAC will provide improved signal coverage on the segment of J812R involved.

Since this amendment is minor in nature with no substantive change in the regulation, notice, and public procedure thereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective more than 30 days after publication.

In consideration of the foregoing, Part 75 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., January 4, 1973, as hereinafter set forth.

Section 75.400 (37 F.R. 2400, 15293) is amended as follows:

In J812R delete second waypoint information "Apopka, Fla. 28°25'30" N., 81°55'45" W., Vero Beach, Fla." and substitute "Apopka, Fla. 28°25'30" N., 81°55'45" W., Daytona Beach, Fla." therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on November 10, 1972.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER C—DRUGS

PART 135—NEW ANIMAL DRUGS

Subpart C—Sponsors of Approved Applications

PART 135a—NEW ANIMAL DRUGS FOR OPTHALMIC AND TOPICAL USE USE

Triethanolamine Polypeptide Oleate-Condensate

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (12-817V) filed by The Purdue Frederick Co., 99 Saw Mill River Road, Yonkers, NY 10701, proposing revised labeling for the safe and effective use of triethanolamine polypeptide oleate-condensate for the removal of earwax in cats and dogs. The supplemental application is approved.

To facilitate referencing, the firm is being assigned a code number and placed in the list of sponsors in § 135.501 (21 CFR 135.501).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 135 and 135a are amended as follows:

1. Section 135.501 is amended in paragraph (c) by adding a new code No. 083 as follows:

§ 135.501 Names, addresses, and code numbers of sponsors of approved applications.

• • • • • •

(c) • • •

Code No.	Firm name and address
• • •	• • •
083	The Purdue Frederick Co., 99 Saw Mill River Road, Yonkers, NY 10701.

2. Part 135a is amended by adding a new section as follows:

V 37-223 NOV 17 72 XUM

§ 135a.44 Triethanolamine polypeptide oleate-condensate otic solution.

(a) *Specifications.* The drug contains 10 percent triethanolamine polypeptide oleate-condensate in propylene glycol with 0.5 percent chlorobutanol.

(b) *Sponsor.* See code No. 083 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) It is used in dogs and cats to help remove excess or impacted earwax.

(2) The animal's head is tilted to the side and the ear canal filled with the drug. A cotton plug is placed in the canal after instilling the drug and the fluid allowed to remain for 15 to 30 minutes. The ear canal is flushed gently with lukewarm water using a soft rubber syringe and the procedure repeated if required.

(3) A veterinarian should be consulted if the animal has a history of allergy including skin sensitivity or if ear irritation occurs or if earwax remains after three instillations of the drug.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (11-17-72).

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: November 6, 1972.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

[FR Doc.72-19774 Filed 11-16-72;8:45 am]

Title 24—HOUSING AND URBAN DEVELOPMENT

Chapter I—Office of Assistant Secretary for Equal Opportunity, Department of Housing and Urban Development

SUBCHAPTER A—FAIR HOUSING

[Docket No. R-72-173]

PART 106—FAIR HOUSING ADMINISTRATIVE MEETINGS UNDER TITLE VIII OF THE CIVIL RIGHTS ACT OF 1968

The purpose of this regulation is to establish procedures for the scheduling of public meetings to gather information to assist the Assistant Secretary for Equal Opportunity in achieving the aims and objectives of title VIII of the Civil Rights Act of 1968 for the promotion and assurance of fair housing and equal opportunity in housing without regard to race, color, religion, or national origin.

Notice of the proposed amendment to 24 CFR was published in the FEDERAL REGISTER on March 17, 1972 (37 F.R. 5637), and comments were received from several interested persons, organizations, and agencies. In response to the comments, § 106.3(b) has been revised to expand the list of persons who will be furnished copies of the notices of meetings. Section 106.9 has been amended to state that reports on meetings and recommendations of the Assistant Secretary may be made available to the public.

It should be noted that the meetings to be scheduled and held under this regulation are not hearings as are authorized to be held in connection with the investigation of title VIII complaints. In conducting investigations of title VIII complaints, subpenas may be used to require the appearance of witnesses and the production of documents. Subpenas will not be used in holding administrative meetings under this regulation.

Accordingly, Chapter I of 24 CFR is amended by adding a new Part 106 to read as follows:

Sec.
106.1 Purpose.
106.2 Definitions.
106.3 Initiation of meeting; notice.
106.4 Conduct of meetings.
106.5 Counsel and accompanying witnesses.
106.6 Intimidation of witnesses.
106.7 Transcript of meetings.
106.8 Attendance of news media at meetings.
106.9 Meeting report.

AUTHORITY: The provisions of this Part 106 issued under title 8 of the Civil Rights Act of 1968, 42 U.S.C. 3601, and section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

§ 106.1 Purpose.

The purpose of this part is to establish procedures for public meetings or conferences that may be used to assist the Assistant Secretary in achieving the aims of title VIII for the promotion and assurance of equal opportunity in housing without regard to race, color, religion, or national origin, and, specifically, to carry out those responsibilities delegated to him by the Secretary of Housing and Urban Development under sections 808 (e) (1), (2), and (3), and 809 of title VIII.

§ 106.2 Definitions.

As used in this part:

(a) "Assistant Secretary" means the Assistant Secretary for Equal Opportunity in the Department of Housing and Urban Development.

(b) "Meeting" means a public meeting or conference held under the authority of title VIII and this part.

(c) "Title VIII" means title VIII of the Civil Rights Act of 1968, Public Law 90-284, 42 U.S.C. 3601-3619.

§ 106.3 Initiation of meeting; notice.

(a) Proceedings pursuant to this part shall be initiated by a notice issued by the Assistant Secretary. At least 30 days prior to the commencement of a meeting under this part, the Assistant Secretary shall cause such notice to be published in the FEDERAL REGISTER, specifying the date on which such meeting is to commence, the place at which it is to be held, and the subject of the meeting.

(b) Copies of such notice shall be furnished to all persons who are expected to testify or submit statements or other evidence and to the Community Relations Service, U.S. Department of Justice, the Housing Section, Civil Rights Division, U.S. Department of Justice, the U.S. Commission on Civil Rights, other appropriate Federal, State, and local agencies concerned with housing and community development, and such private organizations and groups as may be deemed concerned with the subject of the meeting.

(c) Persons and organizations desiring to submit information concerning the subject of the meeting, or to testify at such meeting, should address such information to: Assistant Secretary for Equal Opportunity, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, or such local address as may be specified in the notice.

§ 106.4 Conduct of meetings.

(a) The Assistant Secretary or his designee shall announce in an opening statement the subject of the meeting.

(b) The Assistant Secretary or his designee shall determine the order of presentation of evidence and appearance of witnesses, and announce the rules governing the meeting.

(c) Meetings shall be conducted with reasonable dispatch and due regard shall be had for the convenience of witnesses.

(d) The questioning of witnesses shall be conducted only by the Assistant Secretary or his designee, or by counsel for any person, organization, or witness on direct or cross-examination, as the Assistant Secretary or his designee may determine.

§ 106.5 Counsel and accompanying witnesses.

Any person agreeing to appear in person before the Assistant Secretary or his designee at a meeting will be accorded the right to be accompanied by persons he may designate, including counsel.

§ 106.6 Intimidation of witnesses.

Witnesses at meetings are protected from threats and intimidation by the provisions of 18 U.S.C. 1505 and 42 U.S.C. 3631 which provide for criminal penalties.

§ 106.7 Transcript of meetings.

(a) An accurate transcript shall be made of the testimony of all witnesses at meetings. Transcripts shall be recorded by any person designated by the Assistant Secretary.

(b) Transcript copies of testimony given at meetings may be obtained by the public upon the payment of the cost thereof.

(c) Any person who has testified at a meeting may, within 2 weeks after copies of the transcript are available, ask to correct errors in the transcript of his testimony or examination. Such requests shall be granted only to make the transcript conform to the testimony presented at the meeting.

§ 106.8 Attendance of news media at meetings.

Reasonable access, as determined by the Assistant Secretary or his designee,

shall be provided for coverage of meetings to the various means of communication, including newspapers, magazines, radio, newsreels, and television. However, no witness shall be televised, filmed, or photographed during the meetings without his consent, nor shall his testimony be broadcast or recorded for broadcasting if he objects.

§ 106.9 Meeting report.

Evidence and information obtained during a meeting will serve as the basis of a report on the meeting by the Assistant Secretary. The report will contain such material and recommendations as the Assistant Secretary may determine to publish or otherwise make available to the public.

Effective date. These regulations shall be effective as of December 15, 1972.

MALCOLM E. PEABODY, JR.,
Acting Assistant Secretary
for Equal Opportunity.

[FR Doc.72-19815 Filed 11-16-72;8:47 am]

Title 32—NATIONAL DEFENSE

Chapter XVI—Selective Service System

CLASSIFICATION PROCEDURES

Whereas, on October 12, 1972, the Director of Selective Service published a notice of proposed amendments to Selective Service Regulations, 37 F.R. 21544, of October 12, 1972, and

Whereas such publication complied with the publication requirement of section 13(b) of the Military Selective Service Act (50 App. U.S.C. sections 451 et seq.) in that more than 30 days have elapsed subsequent to such publication during which period comments from the public have been received and considered; and I certify that I have requested the views of officials named in section 2(a) of Executive Order 11623 and none of them has timely requested that the matter be referred to the President for decision.

Now therefore by virtue of the authority vested in me by the Military Selective Service Act, as amended (50 App. U.S.C. sections 451 et seq.) and Executive Order 11623 of October 12, 1971, the Selective Service Regulations, constituting a portion of Chapter XVI of Title 32 of the Code of Federal Regulations, are hereby amended, effective 11:59 p.m., e.s.t., on November 18, 1972, as follows:

PART 1611—DUTY AND RESPONSIBILITY TO REGISTER

§ 1611.2 [Amended]

Section 1611.2(c) is revoked.

PART 1624—APPEARANCE BEFORE LOCAL BOARD

Section 1624.4(b) is amended to read as follows:

§ 1624.4 Procedure during personal appearance before local board.

• • • • •

(b) At any such appearance, the registrant may present evidence, including witnesses, may discuss his classification, may point out the class or classes in which he thinks he should have been placed, and may direct attention to any information in his file which he believes the local board has overlooked or to which he believes it has not given sufficient weight. The registrant may present such further information as he believes will assist the local board in determining his proper classification. The information furnished should be as concise as possible under the circumstances. The registrant may summarize in writing the oral information that he or his witnesses presented. Such summary shall be placed in the registrant's file.

• • • • •

In § 1624.6 *Procedure of local board following personal appearance*, paragraph (a) is amended to read as follows:

§ 1624.6 Procedure of local board following personal appearance.

(a) After the registrant has appeared before the local board, it shall again classify the registrant and, as soon as practicable thereafter, it shall mail notice thereof on Notice of Classification (SSS Form 110) to the registrant. Only those members of the local board before whom the registrant appeared shall classify him. In the event that the local board classifies the registrant in a class other than that which he requested, it shall record its reasons therefor in his file. The local board shall inform the registrant of such reasons in writing at the time it mails his Notice of Classification (SSS Form 110).

• • • • •

PART 1626—APPEAL TO LOCAL BOARD

Section 1626.4(e) is amended to read as follows:

§ 1626.4 Review by appeal board.

• • • • •

(e) At any such personal appearance, there shall be present a quorum of the members of the board to which the registrant may present evidence, may discuss his classification, may point out the class or classes in which he thinks he should have been placed, and may direct attention to any information in his file which he believes the local board has overlooked or to which he believes it has not given sufficient weight. The registrant may present such further information as he believes will assist the board in determining his proper classification. The information furnished should be as concise as possible under the circumstances. The registrant may summarize in writing the oral information that he presented. Such summary shall be placed in the registrant's file.

• • • • •

PART 1627—APPEAL TO THE PRESIDENT

Section 1627.4(e) is amended to read as follows:

§ 1627.4 Procedures of the National Selective Service Appeal Board.

• • • • •

(e) At any such appearance, the registrant may discuss his classification, may point out the class or classes in which he thinks he should have been placed, and may direct attention to any information in his file which he believes the local board or the appeal board has overlooked or to which sufficient weight has not been given. The registrant may present such further information as he believes will assist the National Board in determining his proper classification. The information furnished should be as concise as possible under the circumstances. The registrant may summarize in writing the oral information that he presented. Such summary shall be placed in the registrant's file.

• • • • •

BYRON V. PEPITONE,
Acting Director.

NOVEMBER 13, 1972.

Title 33—NAVIGATION AND NAVIGABLE WATERS

Chapter I—Coast Guard, Department of Transportation

SUBCHAPTER J—BRIDGES

[CGD 72-18R]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Saginaw River, Mich.

This amendment changes the regulations for the drawbridges across the Saginaw River at Bay City, Milwaukee, and Saginaw. This change was circulated as a public notice dated March 1, 1972, by the Commander, Ninth Coast Guard District and was published in the FEDERAL REGISTER as a notice of proposed rule making (CG 72-18) on February 2, 1972 (37 F.R. 2522). Six comments were received. Two had no objection or no comment. One objected to Saturday hours, however, vehicular traffic counts and bridge openings as shown by the drawtenders log for this period justifies this action. Three objected as a result of a newspaper article which inferred incorrectly that the Belinda Street Bridge would be closed to vessels. Letters of clarification were written to these objectors and no further comment was received.

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.700 to read as follows:

V 37-223 NOV 17 72 XUM

§ 117.700 Saginaw River, Mich.; bridges.

(a) The owner of or agencies controlling each bridge shall provide the necessary drawtenders and the proper mechanical appliances for the safe, prompt opening of the draw for the passage of vessels.

(b) From March 16 through December 15 the draw of railroad bridges shall open as soon after receiving an opening signal as possible, however, passage of a vessel shall not be delayed for more than 15 minutes.

(c) Sound signals: These signals may be made by a whistle, horn, or other sound producing device or by shouting.

(1) The opening signal from a vessel is one long blast followed by one short blast.

(2) The acknowledging signal from the drawtender when the draw shall open is one long blast followed by one short blast.

(3) The acknowledging signal from the drawtender when the draw cannot open is four short, rapid blasts.

(d) Visual signals shall be used in conjunction with sound signals when sound signals cannot be heard.

(1) The vessel shall signal for an opening of the draw with a white flag by day or a green light at night, swung in full circles at arm's length in full sight of the bridge and facing the draw.

(2) When the draw will open, the drawtender shall acknowledge with a white flag by day or a green light at night, swung up and down vertically.

(3) When the draw cannot open, the drawtender shall acknowledge with a red flag by day or a red light at night, swung to and fro horizontally in full sight of the vessel until answered from the vessel by the same signal. In lieu of this procedure the drawtender may have two red lights mounted 30 inches between centers, horizontally, in an elevated position above the bridge and visible both upstream and downstream which will flash alternately when the draw cannot open.

(e) Public vessels of the United States, vessels in distress, and state or local government vessels used for public safety shall be passed through the draw of these bridges as soon as possible at any time, even though closed periods be in effect. Four short blasts is the opening signal from these vessels.

(f) Trains and vehicles shall not be stopped on a bridge for the purpose of delaying its opening, nor shall vessels be handled so as to hinder or delay the operation of the draw. All passages across or through a bridge shall be prompt to prevent unnecessary delay to either land or water traffic.

(g) The draw need not open to provide additional clearance for appurtenances unessential for navigation of the vessel, or for appurtenances essential for navigation but which may be altered by hinging, telescoping, collapsing, or otherwise, so as to require no greater clearance than the highest fixed and essentially unalterable point of the vessel.

(h) Bay City highway and railroad bridges:

(1) From December 16 through March 15 the draws of the highway bridges shall open on signal if at least 12 hours' notice has been given to the dispatcher, police department, Bay City.

(2) From March 16 through December 15 the draws of the Belinda Street, Third Street, Veterans Memorial and Lafayette Street Bridges shall open on signal, except that:

(i) From 6:30 a.m. to 8:30 a.m. and 3:30 p.m. to 5:30 p.m., the draws need not open for the passage of vessels of less than 50 gross tons, except on Sundays, and

(ii) From 7:30 a.m. to 8:30 a.m. and 4:30 p.m. to 5:30 p.m., the draws need not open for the passage of downbound vessels of over 50 gross tons, except on Sundays and legal holidays observed in the locality, and

(iii) From 8 a.m. to 8 p.m. the draw of the Belinda Street Bridge need not open for the passage of pleasure craft on Saturdays, Sundays, and legal holidays observed in the locality except from 3 minutes before to 3 minutes after the hour and half hour.

(3) The draws of the Detroit and Mackinac, and the Penn Central Railroad bridges shall open on signal from March 16 through December 15.

(i) The draws shall open on signal from December 16 through March 15 if at least 12 hours notice has been given.

(j) I–75 highway bridge at Milwaukee:

(1) The draw shall open on signal from December 16 through March 15 if at least 12 hours notice has been given.

(2) The draw shall open on signal from March 16 through December 15. However, vessels should schedule passages through the draw during other than peak vehicular traffic periods as determined by the Michigan State Highway Department.

(j) Bridges at Saginaw:

(1) Sixth Avenue: The draw shall open on signal from 7 a.m. to 11 p.m. from April 1 through November 15. At all other times the draw shall open on signal if at least 3 hours notice has been given.

(2) The draws of all bridges above the Sixth Avenue Bridge shall open on signal if at least 3 hours notice has been given.

(3) Advanced notice as required by this paragraph shall be given to the bridge operations officer, police department, Saginaw.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655 (g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05–1 (c)(4))

Effective date. This revision shall become effective on January 1, 1973.

Dated: November 10, 1972.

J. D. McCann,
Captain, U.S. Coast Guard, Acting Chief, Office of Marine Environment and Systems.

SUBCHAPTER S—BOATING SAFETY

[CGD 72-54CR]

PART 174—STATE NUMBERING AND CASUALTY REPORTING SYSTEMS

Owner or Operator Casualty Reporting Requirements; Correction

In F.R. Doc. 72-17045 published at page 21404 in the October 7, 1972, issue of the Federal Register, a reference to § 173.61 in paragraph (e) of § 174.105, was published in error. The text of the section referred to as § 173.61 was eliminated in the final stages of drafting the regulations; however, through oversight, the reference to the nonexistent section appeared in both the notice of proposed rule making (37 F.R. 7751) and the final rule in § 174.105(e). This document corrects that oversight.

Accordingly, Part 174 of Title 33, Code of Federal Regulations is amended as follows:

1. By revoking paragraph (e) of § 174.105.

(Secs. 18, 39, 85 Stat. 213, 220, 228; 46 U.S.C. 1451, 1467, 1488; 49 CFR 1.46(O)(1))

Effective date. This amendment becomes effective on July 1, 1973.

Dated: November 14, 1972.

A. C. Wagner,
Rear Admiral, U.S. Coast Guard Chief, Office of Boating Safety.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[FCC 72-1009]

PART 76—CABLE TELEVISION SERVICE

Special Relief

Memorandum opinion and order. In the matter of amendment of Part 76, Subpart A of the Commission's rules and regulations concerning procedures in the Cable Television Service.

1. Section 76.27 of the rules requires that an objection to an application for certificate of compliance be filed within 30 days of public notice of its filing. Section 76.7 of the rules allows interested persons to petition for special relief, e.g., ask that the Commission waive a provision of the rules relating to cable television systems or impose additional or different requirements. There is no time limit on the filings of petitions for special relief. To allow a later filed petition for special relief filed pursuant to § 76.7 of the rules to have the same effect as a timely filed objection could have the practical effect of eliminating the 30-day filing limit of § 76.27 of the rules by encouraging objecting parties not to object pursuant to § 76.27 of the rules but instead to delay objection until Commission action seems close and then to object under § 76.7 of the rules.

2. It is impossible to prevent this procedure entirely since the Commission can hardly establish formal filing requirements which would shut it off from consideration of serious public interest allegations. On the other hand, it seems reasonable to try to discourage such tactics as much as possible. A similar problem used to occur in connection with petitions for reconsideration filed in connection with broadcast applications which had not been protested before Commission action. This problem was largely solved in the broadcast area by adoption of § 1.106(c) of the rules. We believe a similar procedure will be helpful in connection with petitions for special relief directed against applications for certificates of compliance. Consequently, we are adding a new paragraph (i) to § 76.7 of the rules to require that a person who files a petition for special relief pursuant to § 76.7 of the rules, which if timely filed could have been asserted in an objection under § 76.27 of the rules, must show either good cause for not filing under § 76.27 of the rules or that consideration of the facts is in the public interest. This action is consistent with our statement in "Plymouth CATV Services, Inc.," FCC 72–953, —, FCC 2d —, that we planned such a change.[1]

3. Since this amendment relates to Commission procedure, the prior notice provisions of section 4 of the Administrative Procedure Act, 5 U.S.C. 553, do not apply.

Authority for the rule amendment adopted herein is contained in sections 2, 3, 4 (i) and (j) of the Communications Act of 1934, as amended.

Accordingly, it is ordered, That effective November 22, 1972, Part 76 of the Commission's rules and regulations is amended as set forth below.

(Secs. 2, 3, 4, 48 Stat. as amended, 1064, 1065, 1066; 47 U.S.C. 152, 153, 154)

Adopted: November 8, 1972.

Released: November 13, 1972.

Federal Communications Commission,[2]
[SEAL] Ben F. Waple,
Secretary.

In § 76.7 a new paragraph (i) is added to read as follows:

§ 76.7 Special relief.

• • • • • •

(i) If the relief requested could have been earlier filed pursuant to § 76.27, the petition will be dismissed unless the petitioner shows that:

(1) The facts relied on relate to events which have occurred or circumstances which have changed since the last opportunity to present such matters pursuant to § 76.27.

(2) The facts relied on were unknown to petitioner until after his last opportunity to present such matters, and he could not through the exercise of ordinary diligence have learned of the facts in question prior to such opportunity.

(3) Consideration of the facts relied on is required in the public interest.

[FR Doc.72-19824 Filed 11-16-72;8:48 am]

[1] The amendment we adopt today does not apply to petitions now on file, but applies only perspectively from the effective date.

[2] Commissioners Johnson and Hooks absent; Commissioners H. Rex Lee, Reid, and Wiley concurring in the result.

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Moosehorn National Wildlife Refuge, Maine

The following special regulation is issued and is effective on date of publication in the Federal Register (11–17–72).

§ 28.7 Special regulations: Operation of vehicles.

Maine

MOOSEHORN NATIONAL WILDLIFE REFUGE

The use of snowmobiles is permitted on the Baring and Edmunds Units subject to the following special conditions:

(1) Use is restricted to the period December 1, 1972 through April 15, 1973.

(2) Use shall be in accordance with all applicable State laws and regulations governing snowmobiles.

(3) Use is limited to designated roads and trails delineated on maps available at refuge headquarters and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Mass. 02109.

The provisions of this special regulation supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective during the period specified herein.

Richard E. Griffith,
Regional Director, Bureau of Sport Fisheries and Wildlife.

November 8, 1972.

[FR Doc.72-19799 Filed 11-16-72;8:45 am]

PART 33—SPORT FISHING

Arrowwood National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on date of publication in the Federal Register (11–17–72).

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

North Dakota

ARROWWOOD NATIONAL WILDLIFE REFUGE

Sport fishing on the Arrowwood National Wildlife Refuge, N. Dak., is permitted only on the areas designated by

B. In § 301.48–2a relating to the State

Huntington County. The entire county.

Tippecanoe County. The entire county.

Vanderburgh County. The entire county.

V37-223 NOV 17 72 XUM

signs as open to fishing. These areas comprising 1,550 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge shall extend from December 1, 1972 through March 25, 1973.

(2) The use of boats, without motors, is permitted.

The provisions of these special regulations supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through March 25, 1973.

EARL R. CUNNINGHAM,
Acting Refuge Manager, Arrowwood National Wildlife Refuge, Edmunds, N. Dak.

NOVEMBER 2, 1972.

[FR Doc.72-19801 Filed 11-16-72;8:46 am]

PART 33—SPORT FISHING

Horicon National Wildlife Refuge, Wis.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (11-17-72).

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

WISCONSIN

HORICON NATIONAL WILDLIFE REFUGE

Sport fishing on the Horicon National Wildlife Refuge, Mayville, Wis., is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 15 acres, are delineated on maps available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from January 1 through February 28, 1973, inclusive.

(2) Permit is required to take carp for sale.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through February 28, 1973.

ROBERT G. PERSONIUS,
Refuge Manager, Horicon National Wildlife Refuge, Mayville, Wisconsin

NOVEMBER 10, 1972.

Title 7—AGRICULTURE

Chapter III—Animal and Plant Health Inspection Service, Department of Agriculture

PART 301—DOMESTIC QUARANTINE NOTICES

Subpart—Japanese Beetle

REGULATED AREAS

Pursuant to the provisions of sections 8 and 9 of the Plant Quarantine Act of August 20, 1912, as amended, and section 106 of the Federal Plant Pest Act (7 U.S.C. 161, 162, 150ee), and § 301.48–2 of the Japanese Beetle Quarantine regulations, 7 CFR 301.48–2, as amended, a supplemental regulation designating regulated areas, 7 CFR 301.48–2a, is hereby amended.

§ 301.48–2a Regulated areas; suppressive and generally infested areas.

The civil divisions and parts of civil divisions described below are designated as Japanese bettle regulated areas within the meaning of the provisions of this subpart, and such regulated areas are hereby divided into generally infested areas or suppressive areas as indicated below:

ALABAMA

(1) *Generally infested area.* None.

(2) *Suppressive area.*

Calhoun County. Sections 35 and 36, T. 15 S., R. 7 E.; and secs. 1, 2, 11, and 12, T. 16 S., R. 7 E.

Cleburne County. That portion of the county lying within the corporate limits of the city of Heflin.

Jackson County. That portion of the county lying within the corporate limits of the city of Scottsboro.

Jefferson County. Secs. 5, 6, 7, 8, 17, 18, 19, and 20, T. 17 S., R. 1 W.; and secs. 1, 12, 13, and 24, T. 17 S., R. 2 W.

Lee County. Secs. 7, 8, 17, 18, 19, and 20, T. 19 N., R. 27 E.

Winston County. Secs. 6 and 7, T. 10 S., R. 10 W.

* * * * *

A. In § 301.48–2a relating to the State of Georgia the entire description for that State is changed to read as follows:

GEORGIA

(1) *Generally infested area.*

Banks County. The entire county.

Barrow County. The entire county.

Bartow County. That portion of the county lying within 827 and 936 Georgia Militia Districts.

Bibb County. That portion of the county lying within an area bounded on the west by Georgia Highway 11, on the south by Rocky Creek, and on the east and north by Ocmulgee River.

Burke County. That portion of Georgia Militia District 66 lying north of Brier Creek, west of Highway 23, and north of Newberry Creek; that portion of Georgia Militia District 67 lying east of Highway 23 and 56; that portion of Georgia Militia District 65 lying north and west of the Keysville-Hephzibah Road, and that portion of Georgia Militia Districts 69 and 72 lying within a circle having a radius of 3 miles with the center at the intersection of the Savannah and Atlanta Railroad and the Georgia and Florida Railroad.

Cherokee County. The entire county, excluding Georgia Militia Districts 971, 960, 1028, and 817.

Clarke County. That portion of the county lying within Georgia Militia Districts 219, 1347, 241, and 216.

Clayton County. The entire county.

Cobb County. The entire county, excluding Georgia Militia Districts 851, 1318, and that portion of 991 lying southwest of U.S. Highway 41.

Columbia County. That portion of the county lying south of I-20 and east of Little Kiokee Creek.

Dawson County. The entire county.

De Kalb County. The entire county excluding that area lying south of Rockbridge Road and west of Panthersville Road and I-285.

Douglas County. That portion of the county lying within Georgia Militia Districts 1273, 784, 736, and 1272.

Elbert County. That portion of the county lying within Georgia Militia Districts 201, 197, and 315.

Fannin County. The entire county except Georgia Militia Districts 980 and 1130.

Fayette County. That portion of the county lying within Georgia Militia Districts 1248, 549, 496, 709, and 1262, and that portion of Georgia Militia District 496 lying north of State Highway 54, including the city of Fayetteville.

Forsyth County. The entire county.

Franklin County. The entire county.

Fulton County. The entire county, excluding Georgia Militia Districts 1165, 757, and 652.

Gilmer County. The entire county except Georgia Militia District 958.

Gordon County. That portion of the county lying within Georgia Militia Districts 1057 and 874.

Gwinnett County. The entire county.

Habersham County. The entire county.

Hall County. The entire county.

Hart County. The entire county.

Henry County. That portion of the county lying within Georgia Militia Districts 888, 775, and 622.

Jackson County. The entire county.

Lumpkin County. The entire county.

Madison County. The entire county.

Murray County. That portion of Georgia Military District 825 lying east of the L. & N. Railroad.

Newton County. That portion of the county lying within Georgia Militia District 462.

Oconee County. That portion of the county lying within Georgia Militia Districts 240, 239, and 224.

Oglethorpe County. That portion of the county lying within Georgia Militia Districts 226, 1303, 235, 236, and 227.

Paulding County. That portion of the county lying within Georgia Militia District 1596.

Pickens County. The entire county.

Rabun County. The entire county.

Richmond County. The entire county.

Spalding County. That portion of the county lying within the corporate limits of the city of Griffin and that area south of city to the county line lying east of Carver Road and west of Potato Creek.

Stephens County. The entire county.

Towns County. The entire county.

Union County. The entire county.

Walton County. That portion of the county lying within Georgia Militia Districts 250, 415, 421, 419, and 1663.

White County. The entire county.

(2) *Suppressive area.* None.

B. In § 301.48–2a relating to the State of Illinois under generally infested area in the counties of Cook and Iroquois, the following properties are added or redescribed as follows:

ILLINOIS

(1) *Generally infested area.*

* * * * *

Cook County. * * * and secs. 1, 2, 3, 4, 5, 8, 9, 10, 11, 12, 13, and 14, T. 35 N., R. 14 E.; and secs. 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, and 32, T. 35 N., R. 15 E. (all in Bloom Township).

* * * * *

Iroquois County. That portion of the county lying east of State Highway 49, secs. 1 and 2, T. 26 N., R. 10 E.; secs. 25, 26, 27, 34, 35, and 36, T. 27 N., R. 10 E.; sec. 6, T. 26 N., R. 11 E.; secs. 30 and 31, T. 27 N., R. 11 E.; secs. 18, 19, 30, and 31, T. 27 N., R. 13 W.; and secs. 13, 14, 23, 24, 25, 26, 35, and 36, T. 27 N., R. 14 W.

* * * * *

C. In § 301.48–2a relating to the State of Indiana the entire description for that State is changed to read as follows:

INDIANA

(1) Generally infested area.

Allen County. The entire county.

Benton County. The entire county.

Boone County. The entire county.

Carroll County. The entire county.

Cass County. The entire county.

Clark County. That portion of the county bounded by a line beginning at a point where State Highway 62 intersects the Floyd-Clark County line; thence extending northeastward along said highway to the point where it junctions with State Highway 131; thence northeastward along said highway to the point where it intersects Interstate Highway 165; thence continuing in a northeastward direction along the bituminous surfaced road located on the northern boundary of secs. 20 and 21 to the point where it junctions with Allison Lane; thence southeastward along said lane to the Ohio River; thence westward along the Ohio River to the point where it intersects the Floyd-Clark County line; thence north along said line to the point of beginning.

Clay County. Secs. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 15, 16, 21, and 22, T. 13 N., R. 6 W. and secs. 1, 2, 3, 4, 9, 10, 11, 12, 14, 15, 16, 21, 22 and 23 T. 13 N., R. 7 W.

Clinton County. The entire county.

Daviess County. The entire county.

Dearborn County. T. 4 N., R. 1 W.; T. 5 N., R. 1 W.; T. 6 N., R. 1 W.; E½ and secs. 20, 21, 28, 29, 30, 31, 32, and 33, T. 7 N., R. 1 W.; secs. 1, 2, 3, 4, 5, 8, 9, 10, 11, 12, 13, 16, and 17 T. 4 N., R. 2 W.; E½ and secs. 4, 5, 8, 9, 16, 17, 21, 28, and 33. T. 5 N., R. 2 W.; secs. 13 and 24, T. 6 N., R. 2 W.

De Kalb County. The entire county.

Delaware County. Secs. 2, 3, 10, 11, 14, and 15, T. 20 N., R. 10 E.

Dubois County. Secs. 16, 17, 18, 19, 20, 21, 27, 28, 29, 30, 31, 32, 33, and 34, T. 1 N., R. 3 W.; secs. 13, 14, 15, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36, T. 1 N., R. 4 W. lying within the county; secs. 17, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 32, 33, 34, 35, and 36, T. 1 N., R. 5 W.; secs. 5 and 6, T. 1 S., R. 3 W.; secs. 1, 2, 3, 4, 5, 6, 8, and 9, T. 1 S., R. 4 W.; and sec. 1, T. 1 S., R. 5 W.

Elkhart County. The entire county.

Fulton County. The entire county.

Greene County. Secs. 28, 29, 30, 31, 32, and 33, T. 6 N., R. 3 W. and secs. 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36, T. 6 N., R. 4 W.

Hendricks County. Secs. 1, 2, 3, 10, 11, 12, 13, 14, 15, 23, and 24, T. 15 N., R. 1 E.; and secs. 5, 6, 7, 8, 17, 18, 19, and 20, T. 15 N., R. 2 E.

Huntington County. The entire county.

Jackson County. Secs. 1, 2, 11, 12, 13, 14, 23, and 24, T. 4 N., R. 2 E.; secs. 11, 12, 13, 14, 23, 24, 25, 26, 35, and 36, T. 5 N., R. 2 E; secs. 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 22, 23, and 24, T. 4 N., R. 3 E.; secs. 7, 8, 9, 16, 17, 18, 19, 20, 21, 28, 29, 30, 31, 32, 33, and 34, T. 5 N., R. 3 E.; secs. 7, 18, and 19, T. 4 N., R. 4 E.; secs. 12, 13, and 24, T. 6 N., R. 5 E.; and secs. 7, 8, 9, 16, 17, 18, 19, 20, and 21, T. 6 N., R. 6 E.

Jasper County. The entire county.

Jefferson County. Secs. 1, 2, 11, 12, 13, 24, and 25, T. 3 N., R. 9 E.; secs. 5, 6, 7, 8, 17, 18, 19, 20, 29, and 30, T. 2 N., R. 10 E.; secs. 2, 3, 4, 5, 6, 7, 8, 18, 19, 30, 31, and 32, T. 3 N., R. 10 E.; secs. 20, 21, 22, 27, 28, 29, 32, 33, 34, and 35, T. 4 N., R. 10 E.; sec. 2, T. 3 N., R. 11 E.; and secs. 26, 27, 34, and 35, T. 4 N., R. 11 E.

Jennings County. Sec. 1, T. 5 N., R. 7 E.; sec. 6, T. 5 N., R. 8 E.; E½ and secs. 4, 5, 8, 9, 16, 17, 20, 21, 28, 29, 32, and 33, T. 6 N., R. 7 E.; secs. 22, 23, 25, 26, 27, 28, 32, 33, 34, 35, and 36, T. 7 N., R. 7 E.; sec. 6, T. 5 N., R. 8 E.; secs. 3, 4, 5, 6, 7, 18, 19, 20, 21, 28, 29, 30, and 31, T. 6 N., R. 8 E.; secs. 27, 28, 29, 30, 31, 32, 33, and 34, T. 7 N., R. 8 E.; and secs. 28, 29, 32, and 33, T. 7 N., R. 9 E.

Kosciusko County. The entire county.

Lagrange County. The entire county.

Lake County. The entire county.

La Porte County. The entire county.

Lawrence County. That portion of the county lying west and south of a line starting at the intersection of State Highway 37 and the Lawrence-Monroe County line, thence southerly along State Highway 37 to the junction of State Highways 37 and 58, thence southeasterly along said highway to the junction of State Highway 50, thence easterly along State Highway 50 to its intersection with the Lawrence-Jackson County line.

Marion County. The entire county.

Marshall County. The entire county.

Martin County. The entire county.

Miami County. The entire county.

Montgomery County. The entire county.

Newton County. The entire county.

Noble County. The entire county.

Ohio County. Secs. 1, 2, 3, 4, 9, 10, 11, 15, and 16, T. 3 N., R. 1 W.; and secs. 8, 9, 10, 14, 15, 16, 17, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 32, 33, 34, 35, and 36, T. 4 N., R. 1 W.

Orange County. T. 1 S., R. 2 W.; T. 1 N., R. 2 W.; T. 2 N., R. 2 W.; T. 3 N., R. 2 W.; secs. 1, 12, 15, 16, 21, 22, 27, and 28, T. 1 S., R. 1 W.; secs. 5, 6, 7, 8, 17, 18, 19, and 20, T. 1 N., R. 1 W.; secs. 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 26, 27, 28, 29, 30, 31, and 32, T. 2 N., R. 1 W.; secs. 19, 20, 21, 22, 23, 26, 27, 28, 29, 30, 31, 32, and 33, T. 3 N., R. 1 W.; and secs. 6 and 7, T. 1 S., R. 1 E.

Parke County. Secs. 34 and 35, T. 14 N., R. 6 W.; secs. 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36. T. 14 N., R. 7 W.; secs. 15 through 18 and S½ T. 14 N., R. 8 W.; secs. 13, 22, 23, 24, 25, 26, 27, 35, and 36, T. 14 N., R. 9 W.

F. In § 301.48–2a relating to the State of South Carolina under generally infested area, the following counties are added or redescribed and should be listed in alphabetical order as follows:

SOUTH CAROLINA

(1) *Generally infested area.*

. . . . . .

Anderson County. That portion of the county lying north of Interstate Highway 85.

Calhoun County. That portion of the county lying north and west of U.S. Highway 601.

. . . . . .

(2) *Suppressive area.* None.

G. In § 301.48–2a relating to the State of Tennessee under generally infested area, the following counties are added or redescribed and should be listed in alphabetical order as follows:

TENNESSEE

(1) *Generally infested area.*

. . . . . .

Carter County. The entire county.

. . . . . .

Hamblen County. That portion of the county lying east of Tennessee Highway 66 and south of U.S. Highway 11 East.

Hawkins County. That portion of the county lying within the incorporate city boundaries of Bulls Gap. That portion of the county bounded by a line beginning at the juncture of Federal Aid Secondary Road 2367 and U.S. Highway 11 West; thence northeast along U.S. Highway 11 West to its juncture with Federal Aid Secondary Road 2527; thence along said road to its juncture with Federal Aid Secondary Road 2462; thence northeast along said road to the Hawkins-Sullivan County line; thence south along said county line to its intersection with Federal Aid Secondary Road 2463; thence southwest and west along said road to a point where it junctures at the Holston River with Federal Aid Secondary Road 2367; thence west along said road to the point of beginning.

. . . . . .

Monroe County. . . . That portion of the county lying north of the Little Tennessee River.

Morgan County. That portion of the county bounded by a line beginning at a point where the Emory River intersects the Morgan-Roane County line; thence north along said river to the White Oak Creek; thence northwest along said creek where it terminates; thence diagonally across the Federal Aid Secondary Road 2590 to the first northbound gravel road; thence north along said road to where it junctures with the boundary of the Catoosa Wild Life Management Area; thence east along boundary of said Catoosa Wild Life Management Area to the point where it meets the Emory River at the point of the juncture of the Crooked Fork Creek; thence north along said creek to the point where it intersects U.S. Highway 27; thence south along said highway to the Morgan-Roane County line; thence west along said county line to the point of beginning.

Polk County. That portion of the county bounded on the south by a line beginning at the Georgia-North Carolina State line; thence west along Tennessee-Georgia State line to a point where State line intersects the Ocoee River; thence northwest along said river to a point where it junctures with the Hiwassee River; thence northwest along said river to the Polk-McMinn County line.

Roane County. That portion of the county bounded on the northwest by the south shoreline of the Tennessee River and on the northeast by U.S. Highway 70.

. . . . . .

Sullivan County. The entire county.

Unicoi County. The entire county.

. . . . . .

(2) *Suppressive area.* None.

. . . . . .

(Secs. 8, 9, 37 Stat. 318, as amended, sec. 106, 71 Stat. 33; 7 U.S.C. 161, 162, 150ee; 29 F.R. 16210, as amended; 37 F.R. 6327, 6505, 10554; 35 F.R. 7001, 7 CFR 301.48–2)

This amendment shall become effective upon publication in the FEDERAL REGISTER (11–17–72).

The Deputy Administrator of the plant protection and quarantine programs has determined that infestations of the Japanese beetle exist or are likely to exist in the civil divisions and parts of civil divisions listed as regulated areas or that it is necessary to regulate such areas because of their proximity to Japanese beetle infestations or their inseparability for quarantine enforcement purposes from Japanese beetle infested localities.

The Deputy Administrator has further determined that each of the quarantined States, wherein only portions of the State have been designated as regulated areas, is enforcing a quarantine or regulation with restrictions on intrastate movement of the regulated articles substantially the same as the restrictions on interstate movement of such articles imposed by the quarantine and regulations in this subpart, and that designation of less than the entire State as a regulated area will otherwise be adequate to prevent the interstate spread of the Japanese beetle. Therefore, such civil divisions and parts of civil divisions listed above are designated as Japanese beetle regulated areas.

This amendment adds to the Japanese beetle regulated areas all or parts of the following previously nonregulated city and counties: Calhoun, Cleburne, Jackson, Jefferson, Lee, and Winston Counties in Alabama; Bartow, Burke, Columbia, Gordon, Murray, and Paulding Counties in Georgia; Sullivan, Dubois, and Greene Counties in Indiana; the City of St. Louis and St. Louis County in Missouri; Anderson County in South Carolina; Daviess, Madison, and Oldham Counties in Kentucky; and Hamblen and Morgan Counties in Tennessee. The Japanese beetle regulated area has been extended in some previously regulated counties.

This document imposes restrictions that are necessary in order to prevent the dissemination of the Japanese beetle and should be made effective promptly to accomplish its purpose in the public interest. Accordingly, it is found upon good cause, under the administrative procedure provisions of 5 U.S.C. 553, that notice and other public procedure with respect to the foregoing regulation are impracticable and contrary to the public interest, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 10th day of November 1972.

LEO G. K. IVERSON,
Deputy Administrator, Plant Protection and Quarantine Programs.

Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 4]

PART 722—COTTON

Subpart—Base Acreage Allotments for 1971, 1972, and 1973 Crops of Upland Cotton

MISCELLANEOUS AMENDMENTS

On September 28, 1972, notice of proposed rule making regarding determinations with respect to base acreage allotments for 1971, 1972, and 1973 crops of upland cotton was published in the FEDERAL REGISTER (37 F.R. 20254). Interested persons were invited to submit written data, views, and recommendations regarding the determinations within 15 days. No comments were received in response to this notice.

This amendment is issued pursuant to applicable provisions of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.). The purposes of the amendment are as follows:

1. To provide that planted and considered planted credit be given to cotton on federally-owned land when there is a restrictive lease in effect prohibiting its production and when leased back with uninterrupted possession to the former owner after acquisition under the right of eminent domain.

2. To provide for restructuring of the regulations relative to new farm eligibility for uniformity and to provide that the spouse's farm and nonfarm income be used in computing the income requirement for a new farm allotment.

3. To provide for the transfer from federally-owned land only in those cases where the land was leased back with uninterrupted possession to the former owner. Currently the regulations provide that no transfer is permitted from federally-owned land.

Since farmers are now making plans for their 1973 cotton crop, it is essential that these regulations be made effective at the earliest possible date. Accordingly, this document is being made effective upon date of its publication in the FEDERAL REGISTER.

Signed at Washington, D.C., on November 10, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

1. Paragraph (f) of § 722.404 is amended by adding a new subparagraph (9) to read as follows:

§ 722.404 Definitions.

. . . . . .

(f) . . .

(9) Acreage on federally owned land having a restirctive lease in effect prohibiting production of upland cotton when the land is leased back with uninterrupted possession to the former owner after acquisition under the right of eminent domain.

. . . . . .

2. Section 722.407 is revised to read as follows:

§ 722.407 Base Acreage Allotments for new cotton farms.

(a) *Written application.* The farm owner or operator shall file an application for a new cotton farm base acreage allotment at the office of the county committee where the farm is administratively located on or before February 15 of the year for which such allotment is requested.

(b) *Eligibility requirements for owner or operator.* A new cotton farm base acreage allotment may be established if each of the following conditions are met:

(1) *Interest in another farm.* Neither the farm owner nor the farm operator shall own or operate any other farm in the United States for which an upland cotton base acreage allotment is established for the current year.

(2) *Availability of equipment and facilities.* The farm operator shall own, or have readily available, adequate equipment and any other facilities of production (including irrigation water in irrigation areas) necessary to the production of upland cotton on the farm.

(3) *Income requirement.* The operator must expect to obtain during the current year more than 50 percent of his income from the production of agricultural commodities or products from farming.

(i) *Computing operator's income.* The following shall be considered in computing operator's income:

(a) *Income from farming.* Income from farming shall include the estimated return from home gardens, livestock and livestock products, poultry, or other agricultural products produced for home consumption or other use on the farm(s) but shall not include estimated return from the production of any requested new cotton farm base acreage allotment.

(b) *Income from nonfarming.* Nonfarming income shall include but shall not be limited to salaries, commissions, pensions, social security payments, and unemployment compensations.

(c) *Spouse's income.* The spouse's farm and nonfarm income shall be used in the computation.

(ii) *Operator a partnership.* If the operator is a partnership, each partner must expect to obtain more than 50 percent of his current year income from farming.

(iii) *Operator a corporation.* If the operator is a corporation, it must have no other major corporate purpose other than ownership or operation of the farm(s). Farming must provide its officers and general manager with more than 50 percent of their expected income. Salaries and dividends from the corporation shall be considered as income from farming.

(iv) *Special provision for low-income farmers.* The county committee may waive the income provisions in this section provided the county committee determines that the farm operator's income, from both farm and nonfarm sources, will not provide a reasonable standard of living for the operator and his family, and a State committee representative approves such action. In waiving the income provisions the county committee must exercise good judgment to see that such determination is reasonable in the light of all pertinent factors, and that this special provision is made applicable only to those who qualify. In making such determination, the county committee shall consider such factors as size and type of farming operations, estimated net worth, estimated gross family farm income, estimated family off-farm income, number of dependents, and other factors affecting the individual's ability to provide a reasonable standard of living for himself and his family.

(c) *Eligibility requirements for the farm.* The eligibility requirements for the farm are as follows:

(1) *Available land, type of soil, and topography.* The available land, type of soil, and topography of the land on the farm must be suitable for cotton production. Also continuous production of cotton must not result in an undue erosion hazard.

(2) *Entire allotment permanently transferred by sale or owner.* A farm which includes land from which the entire cotton base-acreage allotment was permanently transferred by sale or owner shall not be eligible for a new cotton farm base-acreage allotment for a period of 5 years beginning with the year in which the transfer became effective.

(3) *Entire allotment permanently released.* A farm which includes land from which the entire cotton base-acreage allotment was permanently released shall not be eligible for a new cotton farm base-acreage allotment for a period of 3 years beginning with the year the release was effective.

(4) *Entire allotment designated by owner for a reconstitution.* A farm which includes land which has no upland cotton base-acreage allotment because the owner did not designate an allotment for such land when the parent farm was reconstituted pursuant to Part 719 of this chapter shall not be eligible for a new cotton farm base-acreage allotment for a period of 3 years beginning with the year in which the reconstitution became effective.

(5) *Eminent domain.* A farm which includes land acquired by an agency having the right of eminent domain for which the entire cotton base-acreage allotment was pooled pursuant to Part 719 of this chapter, which is subsequently returned to agricultural production, shall not be eligible for a new cotton farm base-acreage allotment for a period of 3 years from the date the former owner was displaced.

(d) *Establishment of base-acreage allotments for new cotton farms.* If the applicant's farm is eligible for a cotton base-acreage allotment, such base-acreage allotment shall be established by the county committee on the basis of land, labor, and equipment available for the production of cotton; crop-rotation practices; and the soil and other physical

V37-223-NOV17-72 XUM

facilities affecting the production of cotton. The allotment so determined for any such farm shall not exceed the smallest of: (1) The factored base-acreage allotments established pursuant to § 722.406 for old cotton farms in the county which are similar except for the acreage planted to cotton during the farm-base years, (2) the base-acreage allotment requested, or (3) acreage of the requested commodity intended to be planted in the current year. The sum of the base-acreage allotments determined by the county committee for new cotton farms shall not exceed the reserves available for such farms in the county. The base-acreage allotments for new cotton farms shall be subject to review and approval by a representative of the State committee.

(e) *Reduction or cancellation of new cotton farm base-acreage allotments for misrepresentation.* If a new cotton farm base-acreage allotment is established under this section and it is later determined by the county committee or State committee, or the deputy administrator, that the new farm base-acreage allotment was obtained by misrepresentation by or on behalf of the farm operator or owner, the new farm base-acreage allotment established for the farm shall be canceled if the farm is not eligible for a new cotton farm base-acreage allotment or reduced to the amount which would be proper on the basis of the facts and a notice of revised allotment shall be issued. Any reduction or cancellation of a new cotton base-acreage allotment by the county committee shall be subject to the approval of the State committee. A cotton base-acreage allotment established for a farm in any year subsequent to the establishment of a new cotton farm base-acreage allotment for such farm shall be revised to reflect any reduction or cancellation of the new farm base-acreage allotment and a notice of revised allotment shall be issued.

3. Paragraph (h) of § 722.421 is revised to read as follows:

§ 722.421 Additional conditions and limitations.

* * * * *

(h) *Federally owned land.* No transfer under section 344a of the act shall be made from any land owned by the United States, or any agency or instrumentality wholly owned by the United States, except that the transfer may be approved in cases where the land is leased back with uninterrupted possession to the former owner after acquisition under right of eminent domain. For such transfers, the Government agency or instrumentality is not required to sign the record of transfer.

(Secs. 301, 344a, 350, 375, 52 Stat. 38, as amended, 79 Stat. 1197, as amended, 79 Stat. 1193, as amended, 52 Stat. 66, as amended; 7 U.S.C. 1301, 1344b, 1350, 1375)

Effective date: Date of publication in the FEDERAL REGISTER (11–17–72).

[FR Doc.72–19851 Filed 11–16–72;8:51 am]

PART 722—COTTON

Subpart—1973 Crop of Upland Cotton; Base Acreage Allotments and National Production Goal

Sections 722.463 to 722.465 are issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.) (referred to as the "act"), with respect to the 1973 crop of upland cotton (referred to as "cotton"). The purpose of these provisions is to: (1) Proclaim a national production goal; (2) establish a national base acreage allotment; and (3) apportion the national base acreage allotment to States. Section 722.466 is issued pursuant to the Agricultural Act of 1949, as amended (7 U.S.C. 1421 et seq.), and provides for a cropland set-aside percentage of zero. The latest available statistics of the Federal Government have been used in making determinations under these provisions.

Notice that the Secretary was preparing to make determinations with respect to these provisions was published in the FEDERAL REGISTER on September 16, 1972 (37 F.R. 18923), in accordance with 5 U.S.C. 553. The views and recommendations received in response to such notice have been duly considered.

In order that State and county ASC committees may complete the necessary work for issuing farm allotment notices in a timely manner for cotton producers to complete their plans for the 1973 crop of cotton, it is essential that these provisions be made effective as soon as possible. Accordingly, §§ 722.463 to 722.466 shall be effective upon filing this document with the Director, Office of the Federal Register. The material previously appearing in these sections under centerhead "1972 Crop or Upland Cotton; Base Acreage Allotments" remains in full force and effect as to the crop to which it was applicable.

§ 722.463 National production goal for the 1973 crop of cotton.

The national production goal for the 1973 crop of cotton is hereby proclaimed to be in the amount of 12,075,000 standard bales of cotton determined in accordance with the formula prescribed under section 342a of the act, based on the following data:

	480 lbs., net weight bales
(1) Estimated domestic consumption, 1973–74 marketing year	8,000,000
(2) Estimated exports, 1973–74 marketing year	3,500,000
(3) Allowance for market expansion (5 percent of sum of (1) and (2))	575,000
(4) Adjustments to assure adequate stocks	0
Total	12,075,000
(5) 50 percent of the average offtake for the preceding 3 marketing years (1970, 1971, and estimated 1972)	5,824,750

§ 722.464 National base acreage allotment for the 1973 crop of cotton.

The national base acreage allotment for the 1973 crop of cotton shall be 10 million acres, determined in accordance with section 350(a) of the act.

§ 722.465 Apportionment of national base acreage allotment to the States.

The national base acreage allotment of 10 million acres is apportioned to the States in accordance with section 350 (b) of the act as follows:

States:	*State allotment (acres)*
Alabama	587,316
Arizona	208,060
Arkansas	831,428
California	462,725
Florida	18,893
Georgia	506,201
Illinois	1,771
Kansas	7
Kentucky	4,238
Louisiana	348,292
Mississippi	956,654
Missouri	223,759
Nevada	2,202
New Mexico	107,762
North Carolina	270,800
Oklahoma	464,480
South Carolina	413,183
Tennessee	332,009
Texas	4,250,719
Virginia	9,501

§ 722.466 Cropland set-aside percentage.

There will be no requirement for the 1973 crop of cotton that producers set aside an acreage of cropland equal to a percentage of the farm-base acreage allotment.

(Secs. 301, 342a, 350, 103; 52 Stat. 38, as amended, 84 Stat. 1371, 84 Stat. 1374; 7 U.S.C. 1301, 1342a, 1350, 1444)

Effective date. Date of filing this document with the Director, Office of the Federal Register.

Signed at Washington, D.C., on November 15, 1972.

EARL L. BUTZ,
Secretary.

[Amdt. 9]

PART 722—COTTON

Subpart—Acreage Allotments for the 1966 and Succeeding Crops of Extra Long Staple Cotton

MISCELLANEOUS AMENDMENTS

On September 28, 1972, notice of proposed rulemaking regarding determinations with respect to acreage allotments for 1966 and succeeding crops of extra long staple cotton was published in the FEDERAL REGISTER (37 F.R. 20255). Interested persons were invited to submit written data, views, and recommendations regarding the determinations within 15 days. No comments were received in response to this notice.

This amendment is issued pursuant to applicable provisions of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.). The purposes of the amendment are as follows:

1. To provide for restructuring of the regulations relative to new farm eligibility for uniformity and to provide that the spouse's farm and nonfarm income be used in computing the income requirement for a new farm allotment.

2. To provide for the transfer from federally owned land only in those cases where the land was leased back with uninterrupted possession to the former owner. Currently the regulations provide that no transfer is permitted from federally owned land.

Since farmers are now making plans for their 1973 cotton crop, it is essential that these regulations be made effective at the earliest possible date. Accordingly, this document is being made effective upon date of its publication in the FEDERAL REGISTER.

Signed at Washington, D.C., on November 10, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

1. Paragraphs (c), (d), and (e) of § 722.512 are redesignated (d), (e), and (f), respectively, and reference in redesignated paragraph (f) is changed to read "paragraph (d) of this section," and paragraphs (a) and (b) of § 722.512 are amended to read as follows:

§ 722.512 Allotments for new ELS cotton farms.

(a) *Written application.* The owner or operator shall file an application for a new farm allotment at the office of the county committee where the farm is administratively located on or before February 15 of the year for which the new farm allotment is requested.

(b) *Eligibility requirements for owner or operator.* A new farm allotment may be established if each of the following conditions are met:

(1) *Interest in another farm.* Neither the farmowner nor the farm operator shall own or operate any other farm in the United States for which an ELS cotton allotment is established for the current year.

(2) *Availability of equipment and facilities.* The operator must own, or have readily available, adequate equipment and any other facilities of production (including irrigation water in irrigation areas) necessary to the production of ELS cotton on the farm.

(3) *Income requirement.* The operator must expect to obtain during the current year more than 50 percent of his income from the production of agricultural commodities or products from farming.

(i) *Computing operator's income.* The following shall be considered in computing operator's income:

(*a*) *Income from farming.* Income from farming shall include the estimated return from home gardens, livestock and livestock products, poultry, or other agricultural products produced for home consumption or other use on the farm(s) but shall not include estimated return from the production of the requested new farm allotment.

(*b*) *Income from nonfarming.* Nonfarming income shall include but shall not be limited to salaries, commissions, pensions, social security payments, and unemployment compensations.

(*c*) *Spouse's income.* The spouse's farm and nonfarm income shall be used in the computation.

(ii) *Operator a partnership.* If the operator is a partnership, each partner must expect to obtain more than 50 percent of his current year income from farming.

(iii) *Operator a corporation.* If the operator is a corporation, it must have no other major corporate purpose other than ownership or operation of the farm(s). Farming must provide its officers and general manager with more than 50 percent of their expected income. Salaries and dividends from the corporation shall be considered as income from farming.

(iv) *Special provision for low-income farmers.* The county committee may waive the income provisions in this section provided the county committee determines that the farm operator's income, from both farm and nonfarm sources, will not provide a reasonable standard of living for the operator and his family, and a State committee representative approves such action. In waiving the income provisions the county committee must exercise good judgment to see that such determination is reasonable in the light of all pertinent factors, and that this special provision is made applicable only to those who qualify. In making such determination, the county committee shall consider such factors as size and type of farming operations, estimated net worth, estimated gross family farm income, estimated family off-farm income, number of dependents, and other factors affecting the individual's ability to provide a reasonable standard of living for himself and his family.

(c) *Eligibility requirements for the farm.* A new farm allotment may be established if each of the following conditions are met:

(1) *Available land, type of soil, and topography.* The available land, type of soil, and topography of the land on the farm must be suitable for ELS cotton production. Also continuous production of ELS cotton must not result in an undue erosion hazard.

(2) *Entire allotment permanently transferred by sale or owner.* A farm which includes land from which the entire ELS cotton allotment was permanently transferred by sale or owner shall not be eligible for a new farm allotment for a period of 5 years beginning with the year in which the transfer became effective.

(3) *Entire allotment permanently released.* A farm which includes land from which the entire ELS cotton allotment was permanently released shall not be eligible for a new farm allotment for a period of 3 years beginning with the year the release was effective.

(4) *Entire allotment designated by owner for a reconstitution.* A farm which includes land which has no ELS cotton allotment because the owner did not designate an ELS cotton allotment for such land when the parent farm was reconstituted pursuant to Part 719 of this chapter shall not be eligible for a new ELS cotton allotment for a period of 3 years beginning with the year in which the reconstitution became effective.

(5) *Eminent domain.* A farm which includes land acquired by an agency having the right of eminent domain for which the entire ELS cotton allotment was pooled pursuant to Part 719 of this chapter, which is subsequently returned to agricultural production, shall not be eligible for a new farm allotment for a period of 3 years from the date the former owner was displaced.

2. Paragraph (c) of § 722.530 is deleted. Paragraphs (d), (e), (f), (g), and (h) are redesignated (c), (d), (e), (f), and (g), respectively. The redesignated paragraph (g) is amended to read as follows:

§ 722.530 Additional conditions and limitations.

* * * * *

(g) *Federally owned land.* No transfer under §§ 722.526 to 722.531 shall be made from any land owned by the United States, or any agency or instrumentality wholly owned by the United States, except that the transfer may be approved in cases where the land is leased back with uninterrupted possession to the former owner after acquisition under right of eminent domain. For such transfers, the Government agency or instrumentality is not required to sign the record of transfer.

(Secs. 344, 347, 375, 63 Stat. 670, as amended, 675, as amended, 52 Stat. 66, as amended; 7 U.S.C. 1344, 1347, 1375)

Effective date: Date of publication in the FEDERAL REGISTER (11–17–72).

V 37-223 NOV 17 72 XUM V

with the rice marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended. Section 301(b)(13), subparagraphs (D) and (F), of the Act provide definitions for county normal yields as follows:

(D) "Normal yield" for any county, in the case of rice * * * shall be the average yield per acre of rice * * * for the county during the 5 calendar years immediately preceding the year for which such normal yield is determined * * * adjusted for abnormal weather conditions and for trends in yields. If for any such year data are not available, or there is no actual yield, an appraised yield for such year, determined in accordance with regulations issued by the Secretary, taking into consideration the yields obtained in surrounding counties during such year and the yield in years for which data are available, shall be used as the actual yield for such year.

* * * * *

(F) In applying subparagraphs (D) and (E), if on account of drought, flood, insect pests, plant disease, or other uncontrollable natural cause the yield for any year of such 5-year period is less than 75 per centum of the average; 75 per centum of such average shall be substituted therefor in calculating the normal yield per acre. If, on account of abnormally favorable weather conditions, the yield for any year of such 5-year period is in excess of 125 per centum of the average, 125 per centum of such average shall be substituted therefor in calculating the normal yield per acre.

Prior to the issuance of the regulations for determining county normal yields for 1972 and the determination of county normal yields thereunder, public notice (36 F.R. 13838) was given in accordance with 5 U.S.C. 553. No data, views, or recommendations pertaining thereto were submitted pursuant to such notice. Since farmers will be harvesting rice in areas prior to the date that county normal yields would ordinarily become effective (30 days after publication in the FEDERAL REGISTER), it is hereby found that the proclamations and determinations herein shall become effective upon the date of filing of this document with the Director, Office of the Federal Register.

Section 730.1507 is issued to provide the regulations for determining county normal yields and to proclaim the yields for the 1972 crop of rice determined thereunder.

§ 730.1507 County normal yield for 1972 crop rice.

(a) *Regulations.* County normal yields for 1972 crop rice shall be determined by computing the average yield per harvested acre of rice for each county producing rice during the years 1967 through 1971, adjusted for abnormal weather conditions and other uncontrollable natural causes and for trends in yields. Where data for any year are not available, or there was no actual yield, an appraised yield for such year shall be determined on the basis of the yields obtained in surrounding counties during such year and the yield in years for which data are available. Adjustments for abnormal weather conditions and other uncontrollable natural causes shall be as follows: For any annual yield, including an appraised yield, which is less than 75 per centum of the 5-year (1967–71) average yield, 75 per centum of such average shall be substituted therefor; and for any annual yield, including an appraised yield, which is in excess of 125 per centum of the 5-year (1967–71) average yield, 125 per centum of such average shall be substituted therefor. The adjustment for trends in yields shall be made by adopting as the county normal yield the simple average of (1) the 1967–71 average yield per harvested acre of rice for the county, adjusted for abnormal weather conditions and other uncontrollable natural causes as provided in the preceding sentence, and (2) the 1970–71 average yield per harvested acre of rice for the county, similarly adjusted, except that no trend adjustment shall be made unless the 2-year adjusted average is higher than the 5-year adjusted average. Notwithstanding the adjustments as indicated above, no county normal yield shall be less than the unadjusted 5-year (1967–71) average yield.

(b) *Statistical data.* Section 301(c) of the Agricultural Adjustment Act of 1938, as amended, provides that "The latest available statistics of the Federal Government shall be used by the Secretary in making the determinations required to be made by the Secretary under this act." In accordance therewith, the annual yields of rice for counties in the States of Arkansas, California, Louisiana, Mississippi, Missouri, and Texas used in the determination of county normal yields in this section shall be the latest official yields determined by the Statistical Reporting Service of the Department, on the basis of its estimate of harvested acres and production of rice in applicable counties of those States during each of the years 1967 through 1971, except that if such a yield for any year is not available, an appraised yield shall be used for such year. In the minor rice-producing States of Florida, North Carolina, Oklahoma, South Carolina, and Tennessee where no official estimates of rice yields were available, the annual rice yields for the years 1967 through 1971 used in determining the county normal yields in this section for the applicable counties in these States shall be those obtained by special surveys covering all farms producing rice in any of the calendar years 1967 through 1971.

(c) *Proclamation of county normal yields.* County normal yields for 1972 crop rice, determined in accordance with paragraphs (a) and (b) of this section, are as follows:

Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

SUBCHAPTER G—DETERMINATION OF PROPORTIONATE SHARES

[Docket No. SH-309]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

Proportionate Shares for Farms for 1973 Crop of Sugar Beets Not Required

The following determination is issued pursuant to section 302 of the Sugar Act of 1948, as amended.

§ 850.233 Proportionate shares for the 1973 crop of sugar beets not required.

It is determined for the 1973 crop of sugar beets that, in the absence of proportionate shares, the production of sugar from such crop will not be greater than the quantity needed to enable the area to meet its quota for 1974, the calendar year during which the larger part of the sugar from such crop normally will be marketed, and provide a normal carryover inventory. Consequently, proportionate shares will not be in effect in the Domestic Beet Sugar Producing Area for the 1973 crop.

(Secs. 301, 302, 403, 61 Stat. 929, 930, as amended, 932; 7 U.S.C. 1131, 1132, 1153)

STATEMENT OF BASES AND CONSIDERATIONS

Section 302 of the Sugar Act, as amended, provides, in part, that the Secretary shall determine for each crop year whether the production of sugar from any crop of sugar beets will, in the absence of proportionate shares, be greater than the quantity needed to enable the area to meet its quota and provide a normal carryover inventory, as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar from such crop normally would be marketed. Such determination may be made only after due notice and opportunity for an informal public hearing.

General. Sugar beet acreage has not been restricted since the 1966 crop, although restrictions on the 1970 crop were established in October 1969 and then rescinded in April 1970 because of lower than anticipated sugar production from the 1969 crop and indications that total plantings would be less than the acreage tentatively allotted for the 1970 crop.

Plantings to the 1971 crop were about 41,000 acres below those for the previous crop even though acreage restrictions were not established. Beet sugar production from the 1971 crop is expected to total at least 3,512,000 short tons, raw value, or about 58,000 tons more than the marketing opportunity for calendar year 1971. Thus, the effective inventory on January 1, 1972, was only about 74,000 tons higher than that of a year earlier and represented about 73.6 percent of the total 1972 quota for the area, as compared with 76.5 percent the previous year. These percentages are well below the range of 82 to 90 percent suggested as appropriate by Congress when the Sugar Act was amended in 1965.

Proportionate shares were not established for the 1972 crop of beets. Plantings to the 1972 crop of about 1,420,000 acres at average yields indicates sugar production of about 3,300,000 tons. This would be about 100,000 tons less than the adjusted 1972 marketing quota currently in effect for the area. Assuming the area markets its full adjusted quota in 1972, the effective inventory on January 1, 1973, would be reduced by an equivalent quantity.

Public hearing. At the public hearing held in Denver, Colo., on August 17, 1972, views and recommendations were requested on the need for establishing proportionate shares for the 1973 crop. In the notice of hearing, persons proposing the establishment of proportionate shares were asked to include recommendations on the details of a program.

Representatives testifying on behalf of sugar beet growers recommended that proportionate shares not be established for the 1973 sugar beet crop. They generally agreed that the Department's estimate of an effective inventory on January 1, 1973, of about 2,510,000 to 2,652,000 tons or 71 to 74 percent of the area's probable 1973 marketing quota is a reasonable expectation. The representatives restated their position that acreage should be restricted whenever the area can provide a normal carryover inventory. A representative of all sugar beet processors also recommended that farm proportionate shares not be established. An organization of farmers submitted a brief recommending that shares not be considered at this time.

Determination. This determination provides that proportionate shares will not be established for farms in the Domestic Beet Sugar Producing Area for the 1973 crop of sugar beets.

The effective inventory of beet sugar

§ 905.548 Tangelo Regulation 44.

(b) During the period beginning at

thereof in the continental United States,

V 37-223 NOV 17 72 XUM

The effective inventory of beet sugar on January 1, 1972, was about 2,716,000 tons. Although the 1972 crop is unrestricted, the estimated production from the crop suggests that the effective inventory on January 1, 1973, will be lower than a year earlier by 100,000 tons if this year's adjusted marketing quota is fully marketed. The effective inventory would then represent less than 71 percent of the area's 1973 marketing opoprtunities if they are the same as this year's before they were adjusted downward. That level would be about 411,000 tons below the bottom of the range suggested as appropriate in legislative history.

After a thorough review of the latest information available, it is determined that the production of sugar from the 1973 crop of sugar beets, in the absence of proportionate shares, will not be greater than the quantity needed to enable the Domestic Beet Sugar Area to meet its quota and provide a normal carryover inventory.

Accordingly, I hereby find and conclude that the foregoing determination will effectuate the applicable provisions of the Sugar Act of 1948, as amended.

Effective date: Date of publication. (11-17-72).

Signed at Washington, D.C., on November 7, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Orange Reg. 71, Amdt. 1; Grapefruit Reg. 73, Amdt. 1; Tangerine Reg. 44, Amdt. 1; Tangelo Reg. 44, Amdt. 1]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Limitation of Shipments

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida; effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, grapefruit, tangerines and tangelos, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The recommendations by the committees reflect their appraisal of the potential marketing situation during the week in which Thanksgiving Day occurs and for the period immediately following. Historically, there has been heavy purchasing of fresh oranges, grapefruit, tangerines, and tangelos in the terminal markets prior to Thanksgiving Day followed by a period of slow movement immediately following the holiday. Inordinate shipments in the period of slow movement tend to depress market prices and returns to growers. Hence, the curtailment of such shipments, as hereinafter specified, is necessary to prevent a buildup of excess supplies in the markets during and immediately following the Thanksgiving Day week in order to prevent unduly depressed market prices and returns to growers.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of these amendments until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which these amendments are based became available and the time when these amendments must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective upon publication in the FEDERAL REGISTER. Domestic shipments of Florida oranges, grapefruit, tangerines, and tangelos are currently regulated pursuant to Orange Regulation 71 (37 F.R. 21799), Grapefruit Regulation 73 (37 F.R. 21799), Tangerine Regulation 44 (37 F.R. 21799), and Tangelo Regulation 44 (37 F.R. 21799) and, unless sooner terminated or modified, will continue to be so regulated through September 23, 1973; determinations as to the need for, and extent of, regulation under § 905.52(a)(3) of the order must await the development of the crops and the availability of information about the demand for such fruits; the recommendation and supporting information for limiting the total quantity of fresh oranges, grapefruit, tangerines, and tangelos by prohibiting shipments thereof, pursuant to said section, during the period herein provided, were promptly submitted to the Department after an open meeting of members of the Growers Administrative Committee on November 8, 1972, held to consider recommendations for such regulations, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; necessary supplemental information was submitted to the Department on November 8, 1972; information regarding the provisions of the regulations recommended by the committees has been disseminated among shippers of such fruits grown in the production area, and these regulations, including the effective time thereof, is identical with the recommendations of the committees; and compliance with these regulations will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective time hereof.

Order. 1. In § 905.545 (Orange Regulation 71; 37 F.R. 21799) the provisions of paragraph (a) preceding subparagraph (1) thereof are revised, paragraph (b) is redesignated as paragraph (c), and a new paragraph (b) is added to read as follows:

§ 905.545 Orange Regulation 71.

(a) Except as otherwise provided in paragraph (b) of this section, during the period October 16, 1972, through September 30, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

• • • • • •

(b) During the period beginning at 6 p.m., e.s.t., November 21, 1972, and ending at 12:01 a.m., e.s.t., November 24, 1972, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico, any oranges grown in the production area.

• • • • • •

2. In § 905.546 (Grapefruit Regulation 73; 37 F.R. 21799) the provisions of paragraph (a) preceding subparagraph (1) thereof are revised, paragraph (b) is redesignated as paragraph (c), and a new paragraph (b) is added to read as follows:

§ 905.546 Grapefruit Regulation 73.

(a) Except as otherwise provided in paragraph (b) of this section, during the period October 16, 1972, through September 30, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

• • • • • •

(b) During the period beginning at 6 p.m., e.s.t., November 21, 1972, and ending at 12:01 a.m., e.s.t., November 24, 1972, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico, any grapefruit grown in the production area.

• • • • • •

3. In § 905.547 (Tangerine Regulation 44; 37 F.R. 21799) the provisions of paragraph (a) preceding subparagraph (1) thereof are revised, paragraph (b) is redesignated as paragraph (c), and a new paragraph (b) is added to read as follows:

§ 905.547 Tangerine Regulation 44.

(a) Except as otherwise provided in paragraph (b) of this section, during the period October 16, 1972, through September 30, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

• • • • • •

(b) During the period beginning at 6 p.m., e.s.t., November 21, 1972, and ending at 12:01 a.m., e.s.t., November 24, 1972, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico, any tangerines grown in the production area.

• • • • • •

4. In § 905.548 (Tangelo Regulation 44; 37 F.R. 21799) the provisions of paragraph (a) preceding subparagraph (1) thereof are revised, paragraph (b) is redesignated as paragraph (c), and a new paragraph (b) is added to read as follows:

§ 905.548 Tangelo Regulation 44.

(a) Except as otherwise provided in paragraph (b) of this section, during the period October 16, 1972, through September 30, 1973, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico:

• • • • • •

(b) During the period beginning at 6 p.m., e.s.t., November 21, 1972, and ending at 12:01 a.m., e.s.t., November 24, 1972, no handler shall ship between the production area and any point outside thereof in the continental United States, Canada, or Mexico, any tangelos grown in the production area.

• • • • • •

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated, November 13, 1972, to become effective upon publication in the FEDERAL REGISTER (11-17-72).

PAUL A. NICHOLSON,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Proposed Rule Making

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[9 CFR Part 381]

POULTRY PRODUCTS INSPECTION

Poultry Slaughtered Under Kosher Exemptions

Statement of considerations. Pursuant to the Poultry Products Inspection Act, as amended (21 U.S.C. 451 et seq.), a notice was published in the December 14, 1971, issue of the FEDERAL REGISTER (36 F.R. 23728) regarding a request made on behalf of a Rabbinical Union to allow poultry slaughterers and processors who apply for a religious dietary exemption under the poultry products inspection regulations to be exempt from the feather removal requirements for dressed poultry in former §§ 81.1 and 81.49(d) of the regulations and the cooling and chilling requirements of former § 81.50 of said regulations. The request was based on the contention that the availability of fully feathered, warm-dressed poultry was necessary to enable compliance with a religious dietary requirement under rabbinical law by persons of the Jewish faith. It was contended that denial of the exemption would make it impossible for certain members of the Jewish faith to obtain such poultry.

The notice afforded interested persons an opportunity to present data, views, or arguments pertaining thereto not later than 30 days after its publication in the FEDERAL REGISTER, and consideration has been given to all comments received. A total of 26 comments were filed. Of this number, 23 supported the request and three were opposed. Some of the supporting comments were filed by Rabbis who stated that the regulations were in conflict with their religious requirements. However, a majority of those commenting in support merely expressed their view generally on religious exemptions and did not address themselves to the specific request. Of the three statements opposing the proposal, one was a statement from the head of the above mentioned Rabbinical Union indicating that full-feathered carcasses are not required by rabbinical law. Another comment stated the opinion of the writer as a member of the Jewish faith that the defeathering and cooling and chilling requirements would pose no religious burden to kosher slaughterers. The other comment made no reference to religious requirements but strongly opposed the proposed practice on the grounds of sanitation and product safety.

Section 15(a) (3) of the Act (21 U.S.C. 464(a) (3)) provides that the Secretary shall, by regulation and under such conditions as to sanitary standards, practices, and procedures as he may prescribe, exempt from specific provisions of the Act, persons slaughtering, processing, or otherwise handling poultry or poultry products which have been or are to be processed as required by recognized religious dietary laws, to the extent that the Secretary determines necessary to avoid conflict with such requirements while still effectuating the purposes of this Act.

However, the comments received raised question whether the rabbinical law is actually in conflict with the feather removal requirement and the cooling and chilling requirement. Moreover, many retail stores traditionally have sold live poultry to consumers for slaughter and preparation of the birds at their retail stores. These stores provide a source of supply for the purchaser who desires to observe the feathered, warm carcass in order to comply with any religious dietary laws requiring such observation.

One objective of the Poultry Products Inspection Act, as amended (21 U.S.C. 451 et seq.), is to prevent the distribution in commerce or otherwise subject to the Act of any diseased or otherwise adulterated slaughtered poultry capable of use as human food. The Administrator of the Animal and Plant Health Inspection Service has determined that the allowance of the request would not protect the health and welfare of consumers and therefore would not effectuate the purposes of the Act because it is not possible to detect certain otherwise detectable disease conditions or other types of adulteration in poultry on ante mortem inspection or on postmortem inspection of carcasses of birds which have not been defeathered; and without prompt removal of body heat, carcasses are more subject to the presence of adulterating byproducts caused by decomposition.

Therefore, after consideration of all relevant matters, including the comments on file, the request for the proposed exemptions is hereby denied under § 381.11 of the Poultry Products Inspection Regulations (9 CFR 381.11).

Done at Washington, D.C., on November 14, 1972.

RICHARD LYNG,
Assistant Secretary.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 117]

[CGD 72-225P]

OAKLAND INNER HARBOR TIDAL CANAL, CALIF.

Proposed Drawbridge Operation Regulations

The Coast Guard is considering amending the regulations for the Department of the Army drawbridges at Fruitvale Avenue to permit closed periods during peak morning and evening vehicular traffic and rescinding the present regulations which prohibit passage except during slack water or when opposing the tidal flow. This change is being considered because of newly reconstructed bridges which eliminate the slack water or tidal flow requirement. These closed periods are also being considered for the Park Street and High Street bridges. A substantial increase in vehicular traffic during these periods warrants this consideration.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Commander (OAN), 12th Coast Guard District, 630 Sansome Street, San Francisco, CA 94126. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, 12th Coast Guard District.

The Commander, 12th Coast Guard District, will forward any comments received before December 22, 1972, with his recommendations to the Chief, Office of Marine Environment and Systems, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations be amended by revising paragraph (d) of § 117.712 to read as follows:

§ 117.712 Tributaries of San Francisco Bay and San Pablo Bay, Calif.

• • • • •

(d) *Oakland Inner Harbor Tidal Canal; County of Alameda Highway*

bridges at Park and High Streets and Department of the Army highway and railroad bridges at Fruitvale Avenue. The draws shall open on signal except from 7 a.m. to 8:30 a.m. and 3:30 p.m. to 5:30 p.m., Monday through Friday, not including national holidays, at least 2 hours notice is required. In cases of emergency the draws shall open on signal at any time.

• • • • •

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4))

Dated: November 13, 1972.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[CGD 72-206PH]

MARINE ENGINEERING SYSTEMS AND COMPONENTS

Notice of Proposed Rule Making

The Coast Guard is considering amendments to its regulations for certain marine engineering systems and components, particularly nuclear vessels.

Interested persons are invited to submit written views, data, arguments, objections, or comments to U.S. Coast Guard (GCMC/82), Room 8234, 400 Seventh Street SW., Washington, DC 20590. All communications received before December 20, 1972, will be fully considered before final action is taken on this notice. Each submission should identify the notice (CGD 72-206) and the section, give reasons for any recommendations, and include proponent's name and address.

The proposed amendments may be changed in the light of comments received. The Coast Guard will hold a public hearing on December 12, 1972, at 0930 in Conference Room 8334, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, DC. Interested persons are invited to attend the hearing and present oral or written statements on this proposal.

Copies of all written communications will be available for examination at U.S. Coast Guard Headquarters, in Room 8234, 400 Seventh Street SW., Washington, DC.
